

IS WEATHER A WEAPON OF MASS DESTRUCTION (WMD)?

Dr Shahida Wizarat
Professor of Economics
Institute of Business Management, Karachi

There has been a drastic change in weather all over the world. Earth quakes are striking with greater intensity, floods, tsunamis and hurricanes are bringing great devastation to peoples around the world. They are said to have been caused by global warming. What is causing global warming? Is it as a result of natural phenomenon or is it manmade? This question has been baffling the minds of people all over the world. Whether the weather is being altered by greater use of automobiles, industrialization and modern life styles resulting in carbon emissions in the atmosphere or is it on account of deliberate incisions made in the ionosphere over selected areas?

We will try to explore this question by referring to academicians and policy makers around the world. As long ago as the 1970s Brzezinski (a former National Security advisor) wrote in his book *Between Two Ages*: "Technology will make available, to the leaders of major nations, techniques for conducting secret warfare, of which only a bare minimum of the security forces need be appraised... [T]echniques of weather modification could be employed to produce prolonged periods of drought or storm." And in the early 1980s Marc Filterman, a french military officer talked about the "weather war" for which the U.S. and the Soviet Union had acquired the know-how for bringing about climatic changes like hurricanes, droughts and floods.

High-Frequency Active Auroral Research Programme (HAARP) started in the 1940s was bought by the United States Navy and Air Force in the 1990s. In 1996 the U.S. Senate allocated \$15 million dollars for developing tomography, i.e. the ability to

penetrate the earth. NASA and the National Imagery and Mapping Agency of the Department of Defense are doing research on flooding, soil erosion, earthquakes, land-slides, ecological zones, weather forecasts and climatic changes with data relayed from satellites.

Scientists have acknowledged that HAARP has been altering global climate by spraying ionosphere with electromagnetic rays of varying frequencies, that cause warming resulting in climatic changes, disrupting land sea and air communications and human mental functions. As compared with conventional warfare, HAARP is a low cost alternative, can be launched without the knowledge of the target, destabilizing agricultural and ecological systems through climatic manipulations. For example, Choddovsky acknowledged that “HAARP is fully operational and has the ability of potentially triggering floods, droughts, hurricanes and earthquakes. From a military standpoint HAARP is a weapon of mass destruction.”

Dr Nick Begich and Jean Manning have addressed these questions in *Angels Don't Play This HAARP*. They state that the US military has the ability to alter weather conditions. The rainmaking technology was tested as long ago as the Vietnam war days. They also state that the U.S. Department of Defense sampled lightning and hurricane manipulations in projects known as Skyfire and Storm fury. An expert quoted by Begich and Manning stated that the US military studied lasers and chemicals which could damage the ozone layer over an enemy. And several decades ago a project known as Prime Argus studied ways to cause and detect earthquakes.

Similarly, Professor Gordon J. F. MacDonald (associate director of the Institute of Geophysics and Planetary Physics at the University of California, Los Angeles and member of the US President's Science Advisory Committee, and President's Council on Environmental Quality) in the chapter “How To Wreck The Environment,” in *Unless Peace Comes*, discusses the use of weather manipulations, climate modification, ozone depletion, ocean wave control, polar ice cap melting or destabilization

techniques, earthquake engineering and brain wave manipulation using the earth's energy fields.

The floods in Pakistan, mudslides in China and wild fires in Russia appear to be targeted attempts and bear the traits of a WMD. In the recent floods in Pakistan, Brazil, Haiti and Australia thousands of people died and millions were displaced. According to an investigator on Rupeenews.com HAARP has recently been used in the north western areas of Pakistan aimed at submerging the entire country and bringing about the worst crisis experienced in Pakistan. The History Channel corroborates this by stating that the use of Tesla technology and HAARP has now made it possible to cause floods, earthquakes, hurricanes, fires, etc. These are the real Weapons of Mass Destruction (WMDs) unleashed by a country that is leading the world in the fight against terrorism and looking for WMDs all over the world where none exist !
