Mission Statement

The mission of IoBM is to foster a learning environment, where students are motivated to make learning an on-going life-long process. We see ourselves as a multi-dimensional educational institution. Our aim is to prepare students to excel in academics as well as in management skills. Students learn to function ethically, and take effective decisions in business and other endeavors of life. The Institute allows freedom of thought and expression by encouraging faculty and students to be independent and creative thinkers. We believe in pursuing leading-edge research. We are catalysts engaged in the development of innovative ideas, analytical, interpersonal and leadership skills. Our faculty is committed to using the best teaching and training methodologies. We are also committed to our stakeholders which include parents, the business community and professional organizations, to create responsible corporate leaders of tomorrow.
FROM THE CHANCELLOR

IoBM has come of age. There are pertinent reasons why this Institute has been awarded the top category status by the Higher Education Commission, Government of Pakistan, rated at the zenith of rankings of the Sindh Charter Inspection and Evaluation Committee and distinguished among the leading business schools of the world by the internationally accredited and valued Eduniversal organization.

The secret of IoBM's success is no secret. It is a blend of students' perseverance, faculty guidance and management's leadership inspiration. The net result is that IoBM alumni are placed in notable positions in leading national and multinational organizations. It is heartening to note that both IoBM students and alumni have earned a good name for themselves, their institution, their family and their country both here and abroad through academic, extra-curricular, career and professional excellence.

In fact, the grace of the brand called IoBM is reflected in its purpose-built campus with well-equipped labs and classrooms; current and contemporary IT facilities; state-of-the-art auditorium, conference rooms and Business Support Center; well-stocked and up-to-date library for research and reference; top class facilities for popular and trendy sports with an invigorating gymnasium, a modern squash court and a bustling Student Activity Center with a modern cafeteria.

Spacious walkways and smooth drive ways, with IoBM graceful administration, academic and maintenance buildings and a bustling Students Activity Center in the background are compelling reasons for a re-visit. In the backdrop of the overwhelming ambiance and infrastructure are the emotional maturity, seriousness of purpose and perceptive thinking of persevering students and guiding faculty towards IoBM academic excellence and public image.

IoBM’s credibility, with accredited programs in business management and allied disciplines, lies in its students’ career focused activities aimed at confidence and career building and inculcating in them the spirit to care for and share mutual rewards. The turning point in its students’ creativity and confidence is that they themselves plan, organize and promote seminars, workshops, debates, exhibits, presentations and special occasions of national and international importance. That is why IoBM is a brand and a hallmark of reputation and credibility in the corporate sector.

The welcome to new entrants of the IoBM family is much more than a traditional gesture. They are welcomed with the trust of truly exploring and benefiting from IoBM’s opportunities, being assets for their families and for the Institute. There is no alternative to punctuality, regularity and discipline in attendance, studies and revision and, of course, respect for parents and teachers, so instrumental towards academic and career excellence. May you thrive in your study and career pursuits. Ameen.

Aftab Ahmed Khan
Chancellor

WELCOME TO IoBM
FROM THE PRESIDENT

The sixteenth year of Institute of Business Management brings with it the promise of myriad opportunities and endless prospects of a dynamic and resourceful leadership for the country. Looking back at its first fifteen years, we realize that IoBM has come a long way in such a short time to see itself where it stands today. But its voyage does not stop here as it pledges to forge ahead and mark its upcoming years with an absolute commitment to your success.

We train our students to rise to the challenges placed in front of them by the ever changing global scenario and provide them learning experiences that last a lifetime. The faculty at IoBM are at the cutting edge of professionalism in their respective disciplines. Research has always been at the heart of IoBM. Our research journal, in its twelfth year of continuous publication, is indexed and abstracted by the American Economic Association and recognized by the Higher Education Commission. IoBM’s quality assurance system ensures that our teaching and research conforms to the highest academic standards.

Our vibrant academic programs tailored to suit the market are an example of how we are approaching the increasing demands of higher education. We offer all mainstream degrees in the business studies area and continue to introduce programs in various disciplines, such as engineering, economics, actuarial sciences, education, commerce, environment, energy and policy studies.

IoBM’s active networking with the corporate sector helps connect its graduates to promising careers. All prominent multinational and national companies employ our graduates and participate in our internship programs. Representatives of the Karachi Stock Exchange, the Karachi Chamber of Commerce and Industry and several banks are on our Board of Governors and other statutory bodies.

Profit making has never been and shall never be the motive and the driving force of IoBM. What drives the Institute is its exemplary commitment to a life of learning for the IoBM community in particular, and the nation in general. It is with this spirit of commitment that we feel it is more important than ever to continue our efforts to help our students excel as leaders of tomorrow.

Choosing a university is a tough, yet momentous, decision for your future. To quote Julian Huxley, “university education is a route to enlightenment”. Passing through these portals should enable you to become what Aristotle rightly called “a whole man”. At such an important milestone of your life we welcome you to IoBM, look forward to helping you achieve your goals and wish each one of you continued success.

Shahjehan S. Karim

Institute of Business Management
Institute of Business Management

An Introduction to the Institute of Business Management

This catalog will give you the most up-to-date and vital information about the courses and programs of study that most interest you. Essential information about fees, facilities and student services is also available here to help you to be well-versed with life at IoBM.

Beginning with a prologue of the Institute, the catalog proceeds to introduce life at IoBM and culminates in course descriptions. The catalog also describes undergraduate and master's degree programs offered at IoBM; its teaching methods; academic and research programs and assessment procedures; its computer and library resources; student support services and information on application procedures.

Administrative and financial information including opportunities for financial assistance and stipends are also included in the catalog. The catalog introduces you to the academic and administrative personnel at IoBM and its faculty. A detailed description of all courses taught at IoBM is also given.

Every effort has been made to keep the catalog up-to-date and to ensure that courses are offered as described. However, circumstances beyond IoBM's control may sometimes make this impossible. Changes in the curriculum may be necessary to keep abreast of professional developments. For that reason, the Institute reserves the right to make unavoidable alterations in courses offered, and in the structure of the fees.

IoBM: 1994-2010

The Foundation for Higher Education was established as a non-profit institution in 1994 by a group of dedicated citizens of Karachi, and was registered under the Societies Act of 1860. The Foundation promotes dissemination of quality education. Its first project was setting up a management university to serve trade, industry and commerce by producing highly competent and talented business executives. Teaching began at the College of Business Management (CBM), IoBM's first constituent college, in September, 1995.

In January 1998, a bill was unanimously approved by the Sindh Provincial Assembly for establishing a University known as the Institute of Business Management in the private sector. At present, the Institute has its three constituent colleges, the College of Business Management (CBM), the College of Computer Science & Information Systems (CCSIS) and the College of Economics & Social Development (CESD). Since 2006 the Institute has been ranked as one of the top universities in the private sector, both by the Higher Education Commission of the Federal Government and the Sindh Provincial Government. During 2008 and 2009, we have been honoured with prestigious awards of EDUNIVERSAL Palms for meritorious evaluation and certification of educational institutions around the world. The Institute is a member of the International Association of Universities (IAU), Association of Advanced Collegiate Schools of Business (AACSB) and other international and national organizations.
The Governor of Sindh is an ex-officio Patron and Mr. Aftab Ahmed Khan, former Federal Secretary Finance, is the Chairman of the Board of Governors of the Institute and also its Chancellor. The other members of the Board are:

- Chairman, Higher Education Commission
- President, Federation of Pakistan Chambers of Commerce & Industry
- President, Karachi Chambers of Commerce & Industry
- President, Karachi Stock Exchange
- Secretary Education, Government of Sindh
- Mr. Shahjehan S. Karim, President Foundation for Higher Education
- Mr. Abdul Ghaffar Adamjee
- Mr. Basheer Janmohammad
- Mr. Justice (Retd) G. H. Malik
- Mr. S. M. Muneer
- Mr. Salahuddin Qureshi
- Mr. Jahangir Siddiqui
- Mr. Muhammad Sharif
- Prof. Dr. Zafar Saied Saify
- Mr. Muhammad Ali Tabba
- Mr. Talib S. Karim, Member/Secretary

The Institute, through its College of Business Management (CBM), offers a four year BBA (Honors) and a two/three year MBA degree programs with specialization in Marketing, Finance, Human Resource Management and Management Information Systems, Health & Hospital Management, Pharmaceutical Administration, Advertising & Media Management, Industrial Management, Finance & Risk Management and Educational Management. A research degree, an MPhil leading to PhD, is also offered in Finance, Human Resource Management, Marketing and Management Information Systems. A four year Bachelor of Computer Science (Honors) followed by a two years Master of Computer Science is offered through the College of Computer Science & Information Systems (CCSIS). The College also offers programs in Industrial Engineering & Management, Actuarial Science & Risk Management, Telecommunication Engineering & Management and Financial Mathematics & Statistics. The College of Economics and Social Development offers a BS program in Commerce, MSc Organizational Psychology & HRM, Media Psychology and MSc leading to MPhil in Economics.

The Institute emphasizes research and publishes HEC and internationally recognized Pakistan’s first business policy and research journal, Pakistan Business Review. Students and faculty contribute regularly to its pages. A research seminar is organized on a weekly basis. The Institute is the only business school where foreign language courses, Arabic, French, Spanish or German are compulsory subjects in the BBA and BCS programs. The Institute has a competent and dedicated faculty with the majority holding foreign degrees. One international seminar funded by the HEC is organized on an annual basis.

IoBM academic programs are up-to-date and comprehensive in concept and structure, resembling honors programs offered by UK and graduate programs of US Universities. It has extensive links with a number of North American and British universities. Professors from these universities have served as Chief Academic Officers of the Institute. Since 1998, more than 3300 students have graduated from the Institute. Most of them are placed in key positions in leading national and multinational firms including Citibank, RBS, Standard Chartered, PIA, Engro, Berger Paints, Geo TV, National Bank of Pakistan, Unilever, IBM, ICI, SmithKline & Beecham, Aga Khan University Hospital, Karachi Stock Exchange and several provincial and federal government agencies. Many graduates have proceeded for their post-graduate program to reputable universities in the UK and USA. More than 300 students go for compulsory internships every summer to national and multinational organizations.
Institute of Business Management

The Business Support Centre (BSC) of the Institute organizes professional education, training and research programs for serving the corporate sector to enhance both its profitability and contribution to society. Support is provided in the areas of banking and finance, marketing, human resource development and information systems management.

The Institute has come a long way since 1995. There are over 4000 students on our campus which is large and purpose-built at Korangi Creek on a 9 acre site, comprising the Business College building, Administration and Business Support Center building, CCSIS building, a Convocation Center, Student Activity Centre, a five-storeyed Library building, Industrial Engineering and Management building, a mosque and CESRD building.

At the Institute’s fourth convocation in December, 2001, an honorary degree of Doctorate of Philosophy was conferred upon Dr. Nafees Sadik, former Executive Director, United Nations Population Program. At the fifth convocation held in December, 2002, an honorary degree was conferred on our keynote speaker, Mr. Babar Ali, Pro-Chancellor, Lahore University of Management Sciences (LUMS), and at the ninth convocation an Honorary degree was conferred on Dr. Goolam Mohmedbhai, President International Association of Universities (IAU). The sixth convocation was held in December 20, 2003 with Dr. Atta-ur-Rahman, Chairman, Higher Education Commission and Minister for Science & Technology as the Chief Guest and Ms. Musharaf Hai, Chairperson, Unilever Pakistan Limited as the keynote speaker. The seventh convocation was held on December 18, 2004 with the Governor Sindh as the Chief Guest and Mr. Hameed Haroon, Chief Executive Dawn Group of Newspapers as the keynote speaker. Over 300 students were awarded BBA (Hons), BCS (Hons), BS (Accounts), MBA and MCS degrees at this convocation. The eighth convocation was held on December 17, 2005 with the Minister for Education, Sindh, as the Chief Guest and Syed Ali Raza, President, National Bank of Pakistan, as the keynote speaker. Over 400 students were awarded degrees at this convocation. The ninth convocation of the Institute was held on December 16, 2006 with the Education Minister as the Chief Guest and Dr. Goolam Mohamedbhai President, IAU, as the keynote speaker. Over 450 students were awarded degrees at this convocation. The tenth convocation was held on December 8, 2007, where Mr. Jose Manuel Salazar-Xirinachs, Executive Director of the International Labour Organization, Geneva was the keynote speaker and over 500 students were awarded degrees. The eleventh convocation of the Institute was held on December 6, 2008 where the Governor, State Bank of Pakistan was the keynote speaker and Governor Sindh, Dr. Ishrat ul Ebad was the chief guest and over 700 degrees were awarded to students at this convocation. Syed Qaim Ali Shah, Chief Minister of Sindh and Mr. Nisar Ahmed Khuho, Speaker Sindh Assembly attended the twelfth convocation of the Institute, held on December 05, 2009. The keynote Speaker was Mr. Shaharyar Muhammad Khan, former Foreign Secretary and former Chairman of the Pakistan Cricket Board. As many as 927 graduates were awarded degrees.

Faculty standing in respect of National Anthem at Convocation, 2009
WHY CHOOSE IoBM?

The essence of IoBM’s academic programs pertains to career focused education towards Individual fulfillment, professional excellence, institutional credibility, family welfare and social responsibility. The net result is reflected in the net product. IoBM’s credibility speaks for itself.”

Shahjehan S. Karim
President, Institute of Business Management

For the last four years, IoBM has been rated as one of the top universities in the private sector, both by the Higher Education Commission of the Federal Government and the Provincial Government of Sindh. Eduniversal, during its international conventions of Deans of Business Colleges from over sixty countries, held in 2008 at Paris, France and in 2009 at Cape Town, South Africa awarded IoBM 2 Palms as one of the two best Business Schools in Pakistan. The Institute has been an active member of the International Association of Universities (IAU), International Association of University Presidents (IAUP), Association of Advanced Collegiate Schools of Business (AACSB), Association of Commonwealth Universities (ACU) and is also associated with several other international academic organizations.

IoBM has established linkages and earned credibility with reputed foreign business schools and leading international institutes, associations and organizations pertaining to sharing and contributing ideas and insight in business education and research.

The programs we offer include executive MBA, in diverse fields, held on weekends placing special emphasis on the needs of busy executives and those who, having finished one career, wish to go for a new one. IoBM offers programs in Health and Hospital Management, Finance & Risk Management, Industrial Management, Telecommunication Management, Environment & Energy Management, Education Management, Organizational Psychology, Economics and many other disciplines.

IoBM teachers excel in their respective fields. They pass on their expertise in research and scholarship to students enabling them to have an enhanced understanding of their respective disciplines.

Students have access to excellent facilities and learning resources as IoBM continually invests in the University’s infrastructure: library, gym, sports, computer equipment, WiFi facility, video conferencing, state-of-the-art campus building and subsidized transport facilities.

IoBM has earned its reputation through an excellent internship and graduate employment record. The rigorous academic degree courses enable graduates to acquire breadth and depth in their chosen subjects and, therefore, enter a wide range of careers. A large number of its graduates join top business schools in Europe, USA and Canada.

Research is a core competence at IoBM. All members of the IoBM community are actively engaged in disseminating knowledge, pursuing research in a diverse range of themes. The Institute publishes the country’s first research quarterly journal, Pakistan Business Review (PBR), which is recognized by the Higher Education Commission (HEC) and ECONLIT, Journal of Economic Literature, USA. An annually held HEC financed international conference provides a platform for the presentation of research undertaken at IoBM.
Syeda Amrah Ghazanfar

BS (Joint Honors), Economics and Finance

IoBM has given me exposure to so many things which I believe will serve a key purpose when I enter the corporate world, the world this institute is gearing me up for. IoBM has taught me to work and interact with a diverse set of people and has introduced me to different career options, different societies and clubs. Being an active part of Vanguard: The SS Club, I have learnt team work and event management. I have also acquired skills to coordinate and persuade different businesses and organizations for various society linked purposes and agendas. In a nutshell, I've learnt multitasking, time management and meeting deadlines, even if at times I had to learn it the hard way, it's still a lifelong lesson.

Syeda Sara Tazeen Jaffer

BBA (Honors)

Extra-curricular activities not only broaden one’s perspective on issues that arise, but also make one apt at diplomacy, team work and problem solving. I have worked through my university years gaining as much experience in terms of work and education that only such a reputable Institute can offer. My greatest asset that this Institute has taught me is my capability to mould to any team that I choose to work with and to yield optimal results with the same.
LIFE AT IoBM
Institute of Business Management

RESOURCES AND FACILITIES

Institute of Business Management has a purpose built nine acre campus located in the serene and secure surroundings of Korangi Creek, Karachi. The Business College building, covering an area of 74,000 sq. ft., is equipped with state-of-the-art teaching equipment to enable the Institute to keep pace with the dynamics of the global market. All classrooms are equipped with internet and intranet facilities. IoBM is a Wi-Fi campus. The campus buildings are centrally air-conditioned and they have all been self financed with no outside assistance or donation. A separate centrally air-conditioned modern Administration and Business Support Center building, with a covered area of 20,000 sq.ft. was completed in 2001. Another centrally air-conditioned building with a covered area of 50,000 sq.ft., houses the College of Computer Science and Information Systems and has been operational since 2002. The Convocation Center was completed in November, 2002, and the Students Activity Center building in September, 2003 which has a second floor housing 10 faculty residential suites for visiting scholars and was completed in January, 2006. The library building has been operational since January, 2005. A separate building houses the department of Industrial Engineering & Management. The Institute provides students with subsidized transportation to and from the campus through conveniently located pick and drop points all over Karachi. Girls are provided this facility to and from their homes. The campus also has ample car parking facilities.

Computer Facilities

One of the strengths of the IoBM program is the incorporation of information technology as a key component of the curriculum. The academic programs offered by the Institute require students to obtain hands on experience on computers and develop a high level of expertise in this field. The Information Systems Department (ISD) of the College of Computer Science and Information Systems provides administrative, networking and technical support to the faculty and students. The College of Computer Science and Information Systems building includes a number of computer laboratories with over two hundred workstations. It is fully equipped with satellite/ radio-linked e-mail, Wi-Fi facilities and internet facilities for all students, faculty and staff.

Library

The IoBM library, an ideal setting for learning and research, serves as a repository for the rich array of both traditional and electronic information services. A distinctive strength is its rich spectrum of resources, including a large number of books, journals, periodicals, reference material, audio-visual material, government documents and reports catering to the scholarly needs of students, faculty and researchers. Its pleasant and conducive-to-learning environment accommodates 350 students and 25,000 books. All library books are searchable using OPAC (Online Public Access Catalog), the newly developed software Library Information and Management System (LIMS), available at the front desk. Students are provided with Internet work stations and rooms for group study. Of the many recent initiatives by IoBM are its access to a large number of e-resources through the HEC Digital library, and online journals through JSTOR e-database. The library also provides access to print and online journals through subscription to a number of business, marketing, management and HRM journals. In addition to the main library, the Learning Resource Centre in the Academic block caters to the scholarly requirements of MPhil and PhD programs. The Library engages in numerous projects to expand access to its physical and digital collections. Skills development sessions are conducted for students and faculty from time to time. The library projects on the horizon include development of a portal of web links, just a click away, on the desktops of faculty and students. The library employs a dynamic and diverse staff offering innovative and flexible services to library users.
STUDENT ACTIVITIES

Student life at IoBM is not just about presentations, reports, midterms and finals. In fact, there is a whole range of student-organized entertainment and events that take place throughout the year. Students on campus are genuinely interested in cultural vibrancy and a sense of community. In between the busy academic schedule there are seminars, talk shows, guest speakers, fund raiser bake sales, the Event Management class food & fun stalls, CBMUN, the Green Day, Drama festival and so much more. One can never get enough of it.

To cater to the individual student’s choice, there are a number of societies for like minded people such as:

Literary and Public Speaking Society; Finance Society; Mathematics Society; Entrepreneurs Society; Club IT; CBM Society for Health Managers; Egalitarians-Economics Society; Youth Enhancement Society; Enlighterz Society; Industrial Engineering & Management Society; Dialogue Society; Islamic Society; Marketing Society; Strategic & Human Resource Society; Entertainment Plus Society, Vanguard Society and the Sports Society.

Each society is headed by a faculty advisor who is a senior member of the faculty or management and a team of student office bearers.

These societies are diverse in their activities, organizing university-wide forums for students to talk about and debate social, economic, and political issues; organize seminars & workshops where they invite well known personalities from the business, government and corporate world. This provides them with an opportunity to exchange ideas and opinions with market leaders.

Our students participate in various events organized by other universities / institutes locally, as well as, nationally and have won laurels for their Institute. For example, IoBM won first prize amongst all business schools of Pakistan in Unilever Lipton Competition and P&G Business Plan.

Social care is a regular feature of these societies. Every year in the month of Ramzan donations in cash and kind are collected and, along with the Management’s major contribution, distributed to the needy in various hospitals of the city. Among other regular features are blood donation camps put up from time to time.

Exciting and eventful as always, last year at IoBM has been no exception. Following are some examples to give you a glimpse of life at IoBM in general:

Recent Events

The Marketing Society
> Seminar on ‘Marketing in Challenging Times’ held on April 9, 2009
> Brand Safari, held on October 28, 2009. The event focused on creating an engaging brands to interact with the students.
> MAP Membership Drive on January 27, 2010.
> P&G Global Hygiene and Grooming Workshop held on February 11, 2010.
The Dialogue Society
> A lecture on “Hajj: Philosophy and Wisdom of Sacrifice” by Shaikh Shujauddin held on November 24, 2009
> Talk on, “Dilemmas of the Youth in Turbulent Times” by Shaikh Kamaluddin, Professor of Islamic Law at LUMS and AKU
> An interactive program for Dawn News TV channel, “The State of Shariah” on January 21, 2010

CBM Society of Health Managers (CSHM)
> Career Avenues for Future Leaders in Health Care and Allied Industries, held on April 12, 2009.
> Health Managers Fight Against Hepatitis, held on May 31, 2009.
> Collaboration of CSHM with AKHSP (A constituent of Aga Khan Development Network AKDN) to synergize and contribute towards health care provision in the region. The MoU signing took place on July 7, 2009 at IoBM.
> CSHM Health Fungaama 09’ (FREE HEALTH CAMP)– The first ever health camp in a business management institute under the vision of Health Happiness and Hope held on November 1 & 2, 2009. The event was graced by the Sind Minister of Health, Dr. Sagheer Ahmed.
> Swine Flu-Myth, Reality or Hoax, a health awareness seminar held on January 17 & 18, 2010.
> Tetra Pak Activation Wake, an interactive health and nutrition education seminar exclusively for females held on February 13, 2010.

The Enlighterz Society (TES)
> TES organized NAUROZE, EASTER and HOLI in Spring to show respect for students of IoBM belonging to all religions.
> Knee Arthritis seminar sponsored by Johnson & Johnson was held at the Regent Plaza, Karachi. Many doctors and physicians specializing in the field of orthopedics were present to deliver their lectures on a variety of topics pertaining to arthritis, rheumatism and muscle pain.
> “TES Mega Mela” held in Fall, 2009 can adequately be described as a perfect blend of all the things that TES stands for; celebration of diversity, creativity & a platform from where to raise your voice.

The Literary and Public Speaking Society conducted its first ever model United Nations exercise entitled CBMUN.
There were five committees namely:
> Commission on the Status of Women
> UN Human Right Council
> Commission on Population & Development
> UNICEF
> Disarmament and International Security

Eight countries of the Asia Region were represented by their delegates. Each committee had issues and delegates debated these issues which required producing a position paper, a working paper, and finally a draft resolution.
Finance Society

> Finance Society - Inter Society Cricket Tournament, February 24-25, 2009 at IoBM Convocation Ground.

> An interactive panel discussion session on “Federal Budget 2009-2010” on July 30, 2009. The event was graced by Mr. M Ashraf Janjua, Ex Deputy Governor SBP & Advisor to the President, IoBM; Dr. Kaiser Bengali, Member of National Finance Commission of Pakistan; Mr. Sayem Ali, Country Economist Standard Chartered Bank and Mr. Muzammil Aslam, Senior Economist of JS Global and Mr. Shahzad Mitani, renowned business program host of CNBC Pakistan, who moderated the panel.

> An informative seminar on “Monetary Policy of Pakistan” in collaboration with Business Plus on Dec 10, 2009. Mr. Ashraf Janjua, Ex- Deputy Governor State Bank and Advisor to the President, IoBM; Mr. Shahid Hassan Siddiqui, Chairman & Chief Executive, Research Institute of Islamic Banking & Finance; Mr. Nadeem Naqvi, CEO, AKD Investment Management Limited and Mr. Mian Zahid Husain were the esteemed guests at the event.

> An enlightening seminar on Investment: It’s all about your risk appetite on Feb 10, 2010. The event was honored by Mr. Fredrick Coenrard De Beer- CEO Adamjee Life Assurance Co.Ltd, Mr. Farid Alam- CEO AKD Securities and Mr. Naveed Shahid- Head of Investment EFU Life Assurance Co. Ltd. The event was moderated by the host of The Financial Daily.

Egalitarians Economics Society

> A guest speaker session on the topic of “Capital Gains Tax : Implications for Investment and Growth” held on Tuesday, August 04, 2009.

> The Egalitarians Society launched their second issue of the “Economizer” magazine with a truly unique concept on April 16, 2009. A skilfully created wall of balloons, which bore the letters of “Economizer”, was put together by the members after weeks of hard work.

> A seminar on March 2, 2010, in collaboration with Business Plus, on the topic of “Economic Activities in Pakistan”. The show was hosted by Shazeb Khanzada and the guest speakers were Mr. Saleem Ghorai- Chairman NETSOL, Lahore; Mr. Haseeb Khan-Senator – CEO Brookes Pharmaceuticals; Dr. Ikhtiar Baig-Advisor to PM and Dr. Shahida Wizarat-HOD, Economics, IoBM.

Vanguard SS Society

> The 1st Annual National Social Sciences Conference (ANSSC) was held on Saturday, November 14, 2010 on the theme ‘Enhancing Individuals’ Performance in Business.

The Entertainment Plus Society

> The EPS calendar year began with a scrumptious Bake Sale which was a refreshing start for the sweet tooth at IoBM.

> Youm-e-Hussain and Jashan-e-Eid-e-Milaad-un-Nabi were organized with much religious fervor and immense respect.

> The year culminated with the grand Jashan-e-Baharan which entertained thousands at IoBM. The performances by Shazia Khushk and Amjad Sabri were enjoyable to the nth degree. The dance group and the other entertainers also left leaving the crowds at IoBM happy and cheerful after an evening filled with the best food, music and entertainment.
Institute of Business Management

Sports Society

- Inter-University Table Tennis tournament organized by IoBM, January 26-27, 2009. Fourteen universities participated in this tournament and IoBM was the runner up.

- The National University of Computer & Emerging Sciences organized Inter-varsity Table Tennis Tournament on March 17-18, 2010. Eleven universities participated in this event and IoBM won the tournament.

Sports Facilities

Sports play an important role in the development of one’s personality. IoBM’s cricket, football and table tennis teams have performed well in various tournaments and have brought laurels to the Institute. Our cricket team toured South Africa in June, 2006. A billiard room, table tennis, carom and chess room along with fully equipped gymnasium are also available for students and faculty. The facility also includes students and faculty lounges, girls common room and a book store. Outdoor Basketball and Volleyball courts have been recently constructed and are now ready for use. A fully air-conditioned Squash Court has also been constructed.

Dining Facilities

The Student Activity Center with fully equipped Dining Hall and Kitchen is in operation since September, 2003 with dining facilities for 300 students, staff and faculty. There is a self serving dining hall which offers hot and cold meals at subsidized rates throughout the day. Lunch and snacks from international fast food chains can be enjoyed in a relaxing and informal atmosphere in the air-conditioned dining hall. It is a place where students get an opportunity to interact not only with their colleagues, but also with faculty on an informal basis.

A view of Dining Area at Student Activity Center
CONVOCATION

In December, 2009, IoBM held its twelfth Convocation, awarding degrees to 340 MBA (Regular), 122 MBA (Executive), 23 MBA (Health and Hospital Management), 27 MBA (Industrial Management), 18 MBA (Media Management), 09 MBA (Advertising and Communication Management), 01 MPhil, 01 MCS, 280 BBA (Honors), 84 BS (Joint Honors), 09 BS (Computer Science), 07 BS (Industrial Engineering) and 06 BBA (four-year). EXTERNAL LINKS

IoBM has extensive links with the business community and many business associations, firms and banks as its sponsors. IoBM and the Marketing Association of Pakistan have successfully launched an MBA program in Advertising and Media Management. IoBM has also developed links with foreign business schools, and faculty members from American, Canadian, and British universities have served on the faculty of the Institute. Institutional links with foreign business schools in USA, UK and Canada are being developed rapidly.

IoBM is a member of the following National and International Organizations/Bodies:

- International Association of Universities (IAU), UNESCO, France
- International Association of University Presidents (IAUP), Thailand
- Association of Commonwealth Universities (ACU), UK
- Association of Universities of Asia and the Pacific (AUAP), Thailand
- The Association of Advanced Collegiate Schools of Business, (AACSB), USA
- Asian Media Informational Communication Centre (AMIC), Singapore
- Management Association of Pakistan (Member, Executive Committee)
- Marketing Association of Pakistan (Vice President for the year 2010)
- Employers Federation of Pakistan
- Institute of Corporate Governance

IoBM also has linkages with the following Organizations:

- International Finance Corporation (IFC) Financing of Rs. 350 million for infrastructure and curriculum development
- Memorandum of Understanding with Michigan Tech University, USA

Counseling and Advisory Services

IoBM offers a variety of services which assist students in making sound career decisions. These help students to select and define career alternatives and identify prospective firms, banks, and employers. Guidance is provided on skills and strategies essential for effective job search. These skills and strategies include letter writing, resume development and interview techniques.

College of Business Management
BBA (HONORS) (FOUR-YEAR) PROGRAM

Bachelor of Business Administration (Honors) is a professional and comprehensive management degree course which covers all areas of business including Marketing, HRM, Economics, Business Strategy, etc. It equips students with both soft and hard managerial skills in a balanced way and prepares them to undertake diverse, entry-level executive jobs. The emphasis of BBA is on applied management knowledge.

The Bachelor of Business Administration (Honors) is a four-year program. It requires completion of 144 credit hours of course work and 2 credit hours of internship in a firm approved by the College. A student is required to complete 48 courses of 3 credit hours each in order to meet the degree requirements. Six credit hours are structured into the program for a foreign language course. Students must maintain a CGPA of 2.5 for the conferment of the BBA (Honors) degree.

Students are provided with general business courses as part of their studies and are required to select one of the fields of specialization listed below:

- Accounting
- Finance and Banking
- Human Resource Management
- Industrial Management
- Management Information Systems
- Marketing
- Advertising and Communication Management
- Management
- Media Management

Courses are divided into Foundation, Core and Electives.

History of Ideas

Students must take a minimum load of twelve credit hours (four courses) or a maximum load of eighteen credit hours (six courses) in a semester. In order to obtain the BBA (Honors) degree in four years, they would have to cover twelve courses in a year. Full load of six courses can be taken each in the Fall and Spring semesters with option for fewer courses in the latter and making up the shortfall in the Summer session.

The Master’s/Bachelor’s degree programs offered at IoBM are based on a semester system. An academic year consists of a fall semester commencing in September and concluding in January, a spring semester commencing in January and concluding in May, and a summer session from June to August.

Enrollment in fall and spring sessions is compulsory with the summer session being optional. For the MBA executive program enrollment is also compulsory in the summer session.

IoBM does not encourage transfer of credits from other colleges. In case one feels that he/she deserves transfer of credit, the applicant should submit a request to the Dean/Executive Director Academics at the time of admission.

Muhammad Jahanzeb Alvi  
*BBA (Honors), General Secretary, IoBM Finance Society*

Studying at IoBM has broadened my horizons both socially and academically. My interest in business studies has been transformed into a passion. At IoBM I enjoy every bit of my time no matter whether it is in class or outside class. IoBM has everything that a student needs in his academic life to learn, and progress towards his career. IoBM academics only teach you conventional business subjects but also incorporate subjects like Philosophy (History of Ideas), International Relations and Entrepreneurship, broadening your horizons and the way you look at the world and make decisions. I realized the actual value of my IoBM degree when I went to London for my advanced studies and met students from different cultural backgrounds and places. I am proud of IoBM because it gives me an edge over other students at an international level.

Abdullah Aziz
President, EPS, BBA (Honors)

Never had I thought that I would be honored with the Presidency of one of the most prestigious societies in IoBM. I got a chance to explore the creative and leadership skills I had at CBM. The four years I’ve spent in CBM have been like a journey, something new and something exciting. I have been able to network with people from all diversities which is an experience in itself and I have learned more from them than anybody else. IoBM is a place where I have spent time living and it is a major part of my life. I can never and will never forget my life at IoBM.

MBA in MIS and Finance is an interdisciplinary degree designed for students who aspire to become business leaders in MIS and Finance. The program offers students both breadth and flexibility to cater to the needs of modern competitive market. Students learn the core concepts of modern business disciplines, such as marketing, human resource management, economics, accounting and quantitative finance, along with the solid computer skills needed to understand and apply the concepts successfully.

CBM’s MBA in MIS and Finance is designed for students who have a background of a wide range of disciplines, such as commerce, engineering, law, science, medicine, arts and pharmacy.

MBA in MIS and Finance requires students to complete twenty-seven courses spread over four regular and one Summer semester. Students are required to complete 81 credit hours of course work and 2 credit hours of internship of at least six weeks in a firm approved by the College and an applied Finance project. Students must maintain a CGPA of 3.0 and clear the comprehensive examination for the conferment of the degree.

The program consists of three groups of courses: Foundation, Core and Electives.

Students who are weak in English and Communication skills are required to take an additional “Business English” course to enhance their language skills to be at par with other students.

* Refer to course structure
**Business Elective Courses**

The specialized courses are divided into two classes:

**Management Information Systems**
- MIS404  Computer Programming Language
- MIS405  Visual Basic
- MIS406  Operations Research
- MIS407  Programming in JAVA
- MIS408  Web Page Dev. & Adobe Photoshop
- MIS509  Software Project Management

**Finance**
- FIN406  Financial Econometrics
- FIN407  Financial Engineering
- FIN503  Corporate Finance
- FIN507  Portfolio Management
- FIN508  Risk Management
- FIN509  Financial Derivatives

**Courses Structure**

**Semester One**
- Introduction to Financial Accounting
- Business English*
- Business Communication
- Micro and Macroeconomics

Mr. Nisar Ahmed Khuhro, Speaker Sindh Assembly, awarding degree to a BBA (Honors) student
MBA HEALTH AND HOSPITAL MANAGEMENT  
(TWO YEAR) PROGRAM

The program is geared to professionals who aspire to be health care managers. This is a specialized program that amalgamates management skills and knowledge of economics, finance, statistics, and epidemiology and health policy, relevant to those working within the private and government sectors. The program has an integrated and multidisciplinary approach in preparing graduates for the provision of necessary expertise to manage health services most effectively and develop technically competent and socially sensitive managers for leadership roles in hospitals, health systems management, pharmaceutical industries and population programs. The teaching methodology includes case studies and research projects.

The two-year MBA-Health Management Program is designed to provide students with ten business core courses and an opportunity to select four/five business electives. The business core courses provide students with a sound management base, while the business base is complemented by four core Health Management courses and six/seven Health electives (amongst a choice of twenty two listed health electives). A supervised research project of three credit hours provides students with an opportunity to apply curricular concepts and hands-on skills to provide solutions to the problems that occur in an organizational setting.

The semester structure integrates complementing health core and elective courses providing a concentrated approach that gives students an opportunity to relate and draw parallels between health and business courses.

The Program

The two-year MBA—Health Management (Health Services, Hospital, and Pharmaceutical Management) program is offered on weekends. Students are required to complete 24 courses of 3 credit hours each in order to fulfill the degree requirements. Students must maintain a 3.0 CGPA for the conferment of the degree.

The courses are divided into three modules:

1. Health Services Management
2. Hospital Administration
3. Pharmaceutical Administration

Students weak in English and Communication Skills are required to take an additional “Business English” course to enhance their language skills.

Core Business Courses

**Accounting**
- ACC401 Intro. to Managerial & Cost Acc.
- ACC402 Introduction to Financial Accounting

**Communication**

**Muhammad Danial**

BBA (Honors), Won 3rd Prize at All Pakistan Inter University Web Page Designing Competition and 3rd Prize in Photography by Governor of Sindh, Youth Festival, 2010."

Having an interest in Arts and Computers, I choose to study Business to collaborate my passion with the career. IoBM proved to be the best choice for me. It does not teach you the Business only, but encourages you to participate in lots of co-curricular activities to enhance your learning and creative skills. I had an access to learn Foreign Language in the institute, and went for French which again encouraged me to learn more. Therefore, I learnt Chinese and Arabic. My tenure at IoBM is a thoughtful learning experience, which did not only make me a good student but an avid learner.

Mr. Basheer Janmohammad, Member, Board of Governors awarding degree to a BBA (Honors) student at Convocation, 2009
MBA ADVERTISING AND MEDIA MANAGEMENT (THREE YEAR) PROGRAM

This one of a kind MBA in Advertising Management is designed for candidates who wish to opt for a career path in the advertising industry: an agency, a PR firm, a media outlet, or may be hired directly by a company to develop branding for the company’s product or service. MBA in Media management is geared to professionals already working in the media. It is specifically designed to instill in graduates the skills and competencies required to both understand and function, within the complex legal, ethical, economic, and social dimensions of media management. The program is designed for students who have passed two-year Bachelor’s degree.

What makes the two programs common is that students of both Media Management and Advertising Management take 24 out of 36 courses together. The difference between the two programs is that of choosing one out of the two sets of electives. Those who take an additional 12 courses pertaining to electives of Media Management may be eligible for MBA Media Management and those who take 12 elective courses related to the Advertising group may become eligible for MBA Advertising Management.

Required Courses

**MPhil LEADING TO PhD**

(Management Sciences) Program

The MPhil program is especially beneficial for middle level executives and university teachers with considerable experience. It is meant to foster intellectual curiosity and to promote research in the field of management sciences.

**Requirements**

Candidates with 16 years of education holding MBA/MCS degree from IoBM or Master’s degree holders in the relevant subject with 1st division/CGPA with at least 3 on a scale of 4 from a HEC recognized university are eligible for admission to the MPhil program at IoBM. Experience in research or teaching, or executive positions in firms and banks, will be considered as an additional qualification.

**Course Structure**

MPhil leading to PhD is a 30 credit hours program with 8 courses and one thesis of 6 credit hours. Each of the 8 courses will be of 3 credit hours.

After successful completion of the course work, the students are required to carry out research study for the thesis under the guidance of a research supervisor assigned by IoBM.

**Four Courses in Areas of Specialization**

Candidates are allowed to choose four courses either in Finance, Human Resource Management, Marketing, Management Information System or Communication.

**Theses Completed at IoBM:**

1. Foucauldian Critique and Justification of Capitalist order.
3. Succession Planning in National and Multinational Firms in Pakistan.
5. Determining Effectiveness of Monetary Policy Transmission Mechanism in Pakistan.
POSTGRADUATE DIPLOMA IN SUPPLY CHAIN MANAGEMENT
A UNIQUE PROFESSIONAL DEVELOPMENT OPPORTUNITY FOR MANAGEMENT EXECUTIVES

The Postgraduate Diploma in Supply Chain Management has been designed to develop the necessary skills in executives who wish to decide on a career in Supply Chain Engineering & Management and Manufacturing and Service Operations Management. It has been developed in response to the needs and requirements of industries & service related organizations. It is based on evolving trends in the industry & services. Manufacturing and service industries focus mainly on improvement strategies within the firm, such as manufacturing resource planning, just-in-time (JIT) systems, Business Process Reengineering (BPR) and Enterprise Resource Planning (ERP). In recent years, however, the need to improve inter-firm communication and coordination along the supply chain has been realized as “the new frontier in improving operations and logistics management”. This program will help in bridging the gap.

This course is carefully crafted to suit the needs of supervisors, junior level executives and middle level managers helping them contribute to the competitiveness of firms operating in the global, dynamic, 21st century market place.

* Core courses for three-year students
**Accepted as elective under all disciplines.
**Saima Siddiqui**  
*Manager HR Policies & Projects at Aga Khan University (Graduated in the year 2000 - Gold Medalist in MBA MIS)*  
As I have progressed professionally over the years, from a fresh entrant to a manager, I have always felt blessed and extremely fortunate to have selected CBM as my choice institution for higher learning. The exciting and stimulating academic environment at CBM helped me immensely in preparing myself for the challenge of making good in a tough and competitive job environment- instilling in me both academic excellence and ethical work principles. I wish IoBM management, faculty and students all success in their future endeavors!

---

**Neeraj Mahesh Motiani**  
*Valedictorian-MBA Batch of 2008, Assistant Trade Category Manager-Beverages, Unilever*  
Five years at IoBM were surely a rollercoaster ride! It was a string of years with ups and downs, with discoveries and blunders, lots of smiles and some frowns. My tenure at IoBM taught me that fine education is not in answers but in questions. Above all, it taught me that building relations with friends, colleagues and teachers is important but what is most important is to maintain & sustain these relations for life. Surely I am proud to say that I have been a student of this college & I shall make sure to treasure my learning, memories & relations for life.
College of Computer Science and Information Systems
BS COMPUTER SCIENCE  
(FOUR YEAR) PROGRAM

Keeping abreast of technological advances in the information technology industry, the BS (Computer Science) program has been designed to fulfill the need for a rigorous and enriching academic experience. The program emphasizes the need for an overall development that includes exposure to an integrated series of courses in technology, methodology, social sciences, liberal arts and management. Project-based software development along with research assignments have also been emphasized. These courses seek to impart a broad and deep knowledge of theory, design and application of digital computers and information processing techniques. The curriculum has been designed to prepare students to serve the productive needs of Pakistan’s software industry.

The program comprises four years of study over at least eight semesters. It requires completion of 144 credit hours of course work. Students are required to take 48 courses, a live project and comprehensive research assignment in order to complete their degree requirements. Students must maintain a CGPA of 2.5 for the conferment of degree. On successful completion, students are required to undergo 2 credit hours of internship of at least six weeks with a business organization, approved by the Institute before a BS (Computer Science) degree is awarded to them.

BS (Computer Science) program consists of three groups of courses: foundation, core and elective.

Foundation Courses

**Accounting**
ACC101 Introduction to Financial Accounting
ACC201 Intermediate Financial Accounting

**Communication**
COM101 General English

Mr. Abdul Ghaffar Adamjee, Member Board of Governors and Executive Director, IoBM awarding Gold Medal to an MBA graduate at Convocation, 2009
BS MANAGEMENT AND INFORMATION TECHNOLOGY (FOUR YEAR) PROGRAM

The program focuses on the application of computers and computer software to manage information systems to meet the needs of industry and government. This program requires completion of 144 credit hours of course work and 2 credit hours of internship of at least six weeks in a firm approved by the College. Students graduating with a CGPA of 2.5 automatically qualify for the MBA program offered by IoBM.

Students must take a minimum load of twelve credit hours (four courses) or a maximum load of eighteen credit hours (six courses) in a semester. In order to obtain the BS degree in 4 years, a student is required to complete twelve courses in a year. Full load of six courses can be taken each in the Fall and Spring semesters with an option of four courses in the latter and making up the shortfall in the Summer session.

(FOUR YEAR) PROGRAM

The program is intended for students who are interested in the applications of mathematics, probability, statistics and modern finance. The program comprises four-years of study over at least eight semesters. It requires the completion of 144 credit hours of course work and 2 credit hours of internship of at least six weeks in a firm approved by the College. Students must maintain a CGPA of 2.5 for the conferment of the degree. On successful completion, the students automatically qualify for an MBA program offered by CBM. Students must take a minimum load of twelve credit hours (four courses) or a maximum load of eighteen credit hours (six courses) in a semester. In order to obtain the B.S degree in 4 years, a student is required to complete twelve courses in a year. A full load of six courses can be taken each in the Fall and Spring Semesters with the option of four courses in the latter and making up the shortfall in the Summer Session.

Internship (2 credit hours)
BS INDUSTRIAL ENGINEERING AND MANAGEMENT (FOUR YEAR) PROGRAM

This is an intensive program integrating engineering skills with managerial knowledge. The program has been designed in close consultation with leading engineering firms. A blend of management and engineering courses makes this program distinct from other engineering courses. Another outstanding feature is the provision of hands on training facilities in industrial units on a continuous basis, which blends theory with practical experience. Each final year student is required to undergo 2 credit hours of internship of 6 to 8 weeks with a reputable engineering firm. This close collaboration increases job opportunities and accessibility to higher technical and managerial positions.

This program requires completion of 144 credit hours of course work, including 48 courses. Students graduating with a CGPA of 2.5 automatically qualify for the MBA program offered by IoBM. Students can also proceed further for postgraduate work in Industrial / Management Engineering at leading international schools.

BS ACTUARIAL SCIENCE AND RISK MANAGEMENT
(FOUR YEAR) PROGRAM

BS in Actuarial Science and Risk Management program is intended to provide students with the tools of risk analysis, transfer, and financing that are critical to the operation of private and public institutions, and to prepare them for careers in risk management and insurance. As a risk management major, student will gain a broad business background with an emphasis in accounting, finance and law, as well as a thorough knowledge of all types of insurance.

BS in Actuarial Science and Risk Management is a four year degree program. It requires completion of 144 credit hours of course work and 2 credit hours of internship of at least six weeks in an organization approved by the Institute. Students graduating with a CGPA of 2.5 at the scale of 4 are eligible to apply for MBA program offered by the Institute.

BE TELECOMMUNICATION (FOUR YEAR) PROGRAM

BE Telecommunication at IoBM is geared towards those who want to integrate engineering skills with managerial know-how; enhance job opportunities and accessibility to higher technical and managerial positions; design and manage telecommunication networks at the national and international level and find new and exciting ways to use their expertise.

The one of its kind BE Telecommunication accredited by Pakistan Engineering Council (PEC) is designed in close consultation with leading telecommunication firms. A blend of management and engineering courses makes this program distinct from other engineering courses emphasizing on laboratory work, experimental knowledge and innovative teaching methods. One of its special features is an internship of 6 to 8 weeks in a reputable telecommunication engineering organization.

Completion of 144 credit hours of course work (with 2.5 CGPA) and 2 credit hours of internship automatically qualify students for the Master’s programs offered by IoBM. They can also proceed further for postgraduate studies or work in the fields of Telecommunication, Electronics, Electrical Engineering and Computer Systems Engineering at leading universities and organizations throughout the world as IoBM course credits are easily transferred to reputable international universities.

MS COMPUTER SCIENCE
(ONE YEAR) PROGRAM

The Master of Science program in Computer Science provides an intensive preparation in the concepts and techniques related to the design, programming and application of computing systems. The program requires students to take a broad spectrum of courses and simultaneously allows for emphasis in the desired areas of specialization. The program is based on the HEC guidelines. The program comprises one-year of study over at least 3 semesters. It requires completion of 30 credit hours of course work. Students are required to complete 8 courses and a thesis of 6 credit hours equivalent of 2 courses in order to fulfill their degree requirements. Students must maintain a CGPA of 3.0 for the conferment of the degree.

Eligibility

BS(CS) / MCS / BE in Computer Engineering or candidates are required to make up for the requirement as proposed by the Department Board of Studies Minimum CGPA of 2.5 on a scale of 4.

MS (Computer Science) program consists of two groups of courses: core and elective.

Core Courses

CSC541 Advanced Research Methodology
CSC543 Advanced Computer Architecture
CSC545 Decision Theory
CSC547 Analysis of Algorithms

CSC576 Parallel & Distributed Algorithms
CSC578 Communication and Info. Policy
CSC581 Neural Networks
CSC582 Pattern Recognition
CSC583 Fuzzy Systems

Course Structure

Semester One
Advanced Research Methodology
Advanced Computer Architecture
Analysis of Algorithm

Semester Two
Decision Theory
Elective I
Elective II

Semester Three
Elective III
Elective IV
MS Thesis (6 credit hours)

Elective Courses

CSC531 Data Warehousing
CSC561 Advanced Software Engineering
CSC562 Object Oriented Software Engg.
CSC563 Software Quality Assurance
CSC564 Software Requirement Engineering
CSC565 Software Testing Strategies
CSC571 Advanced Database Mgmt. Systems
CSC573 Data Mining
CSC574 Distributed Systems
CSC575 Parallel & Distributed Computing

Mr. S. M. Muneer, Member Board of Governors, awarding Gold Medal to a BBA (Honors) student at Convocation, 2009
MBA INDUSTRIAL MANAGEMENT AFTER BS INDUSTRIAL ENGINEERING AND MANAGEMENT (ONE YEAR) PROGRAM

IoBM students who have completed BS (Industrial Engineering and Management) four-year program have the option to complete MBA in Industrial Management in one-year. The students are exempted from core and basic courses and they are required to complete 12 courses, including two elective courses.

The course is particularly designed to provide the business expertise essential for senior managers by combining specific management and engineering subjects.

Core Courses

**Accounting**
ACC401 Intro. to Managerial & Cost Accounting

**Engineering**
ENG408 Facilities Planning

**Finance**
FIN404 Financial Management

**Human Resource Management**
HRM502 Industrial Relations and Labor Laws

**Management**
MAN405 Strategic Management
MAN410 Industrial Management
MAN411 Project Management

**Marketing**
MKT530 New Product Development

**Supply Chain and Logistics Management**
SCM502 ERP Systems Design and Impl.

**Statistics**
STA404 Statistical Inference

Elective Courses

**Engineering**
ENG405 Env. Impact Assessment & Mgmt.
ENG407 Manufacturing Process and Systems
ENG410 Maintenance Management
ENG501 Technology Management

**Finance**
FIN510 Investment Analysis

**Management**
MAN408 Analysis of Pakistani Industries
MAN502 Business Process Re-engineering
MAN509 Logistics and Inventory Control

**Management Information Systems**
MIS501 Information Systems Management

**Marketing**
MKT505 Industrial Marketing

Course Structure

**Semester One**
Introduction to Managerial and Cost Accounting
ERP Systems Design and Implementation
Statistical Inference

**Semester Two**
Facilities Planning
Financial Management
Industrial Relations and Labor Laws
Project Management

**Semester Three**
Strategic Management
New Product Development
Elective I
Elective II
MBA INDUSTRIAL MANAGEMENT
(TWO YEAR) PROGRAM

Master of Business Administration in Industrial Management degree program is designed to address and solve real life problems relating to industrial set-ups. Collaboration with relevant industries and financial institutes is its modus operandi. This course is one of the very few aimed at mid-career professionals who wish to make the move to senior management within industrial and manufacturing organizations. It is designed to provide the business expertise essential for all senior managers by integrating specific engineering subjects with the management of technology and manufacturing systems.

The program also examines the latest business thinking and provides expert knowledge on engineering and technology issues and theories. Topics such as finance, marketing, management strategy are integrated with modern industrial issues such as project and quality management, manufacturing effectiveness, advanced manufacturing technology and supply chain management. This combination of subjects has been specifically designed to reflect the challenges faced by traditional manufacturing organizations.

Required Courses

**Accounting**
- ACC401  Intro. to Managerial & Cost Acc.
- ACC402  Introduction to Financial Accounting

**Communication**
- COM402  Business Communication

**Economics**
- ECO401  Micro and Macroeconomics

**Engineering**
- ENG405  Env. Impact Assessment & Mgmt.
- ENG408  Facilities Planning

**Finance**
- FIN404  Financial Management

**Human Resource Management**
- HRM401  Human Resource Management
- HRM502  Industrial Relations & Labor Laws

**Management**
- MAN303  Production & Operations Mgmt.
- MAN401  Principles of Management
- MAN405  Strategic Management
- MAN410  Industrial Management
- MAN411  Project Management
- MAN501  Total Quality Management
- MAN502  Business Process Re-engineering
- MAN503  Supply Chain Management

**Management Information System**
- MIS401  Computer Applications

MBA TELECOMMUNICATION MANAGEMENT
(TWO YEAR) PROGRAM

Telecommunication is an exciting area of study, involving fast moving and sophisticated technologies of telephone, television, radio, computers, the internet and more.

MBA in Telecommunication Management, offered by IoBM, is designed to provide the management skills and technical knowledge required to plan, acquire, evaluate and operate telecommunication system. Students learn the structure and environment of the telecommunication industry, total quality management, strategic planning and financial management with emphasis in critical management concepts. This program can prepare students for careers in the telecommunication industry. The course has been designed by Telecommunication experts with experience at the international level, keeping in view the requirements of the country.

This is a weekend program with a minimum load of 6 credit hours (2 courses) and a maximum load of 12 credit hours (4 courses) in each of the 3 sessions (Fall, Spring and Summer).

Required Courses

**Accounting**
ACC401 Intro. to Managerial & Cost Acc.
ACC402 Introduction to Financial Accounting

COLLEGE OF ECONOMICS AND SOCIAL DEVELOPMENT (CESD)
BS (HONORS) COMMERCE (FOUR-YEAR) PROGRAM

The College of Economics and Social Development (CESD) is a liberal arts college with graduate and undergraduate programmes in the areas of commerce and professional studies, education, economics, media studies and psychology. Research is a core competence of CESD.

BS (Honors) Commerce is designed to help students build a solid foundation in general business principles and skills. It requires completion of 144 credit hours of course work and 2 credit hours of internship of at least six weeks in a firm approved by the College. Students graduating with a CGPA of 2.5 automatically qualify for MBA program offered by CBM. BS Commerce is a weekday program. Students may take a maximum of six courses per semester with Summer as an optional semester.

BS Commerce will lead to MBA in Finance, Marketing or CA. Students have the option of passing the Institute of Chartered Accountants of Pakistan (ICAP) foundation and intermediate examinations simultaneously while obtaining the BS Commerce degree.

Required Courses

Environmental Management, or Org. Behavior
Management Infrastructure, or Services Mgmt.
Org. Consulting Skills or Investment Banking or Marketing Research
Analyses of Financial Management, or Sales Mgmt.

Notes:
It is mandatory for all students who opt for the ICAP stream to complete all ICAP related courses. Other students may select other available options as indicated.

All ICAP papers are covered by two courses I & II (90 teaching hours). The Computer Practical Training I & II would require 120 hours of practical work.

ICAP students may undergo Computer Practical Training during Summer.
BS (HONORS) MEDIA STUDIES (FOUR-YEAR) PROGRAM

The media industry plays a central and ever-increasing role in contemporary societies. Throughout the 20th century and into the 21st they have expanded in range and influence and now affect many aspects of our lives and there is an ever-increasing demand for media ‘content’. This explosion has broadened the possibilities for graduate careers.

The media industry is exciting and challenging and this course will prepare you for these challenges. If your ambition is to succeed in a career in the media; this degree course is right for you and potential employers.

The BS in Media Studies is an intensive interdisciplinary four-year program. Besides consolidating knowledge in the discipline area, students will get opportunities to broaden their understanding of the uses of information technology, appreciate the relevance of other allied subjects as useful for a media graduate, have an overview of subjects as diverse as statistics and logic, develop a strong base of communication skills, media literacy and an ability to carry out project works independently. They have ample opportunities for working with media firms during the course of the degree.

The program has been created for the real world of contemporary media and aims to produce professionals to fulfill the increasing demands of skilled and trained human resources in media organizations and media support services, and also to meet the requirements of educational institutions, development agencies and other research sectors.

Students will work with media firms gaining skills in media production (print, broadcast, and online), research, communication, reporting and media handling. It will allow them to fully appreciate the media processes so they can turn great ideas into great media products.

The program aims to critically engage the student with creative analyses, production and research into traditional and emerging forms of media and requires completion of 144 credit hours of course work and 2 credit hours of internship (in the area of interest). The internship would be at least 6 weeks in an organization approved by the Institute.

Students must take a minimum load of 12 credit hours (4 courses) or a maximum load of 18 credit hours (6 courses) per semester For the 4 year BS degree students are required to complete 12 courses a year.

This program is designed to develop a sound and broad academic base for a professional career in media studies. A full load of six courses can be taken in the Fall and Spring semesters with an option of four courses in the latter and making up for the shortfall in the Summer session. It also requires completion of 2 credit hours of internship of at least six weeks in an organization approved by the College.

Students graduating with a CGPA of 2.5 automatically qualify for MBA or MS in the relevant discipline offered at IoBM.

Students of BS Media Studies are required to submit a research thesis in the area of media. This will enable students to practically understand topics they have covered in their four year study and present their findings and evaluations in a thesis which is designed to be useful for selected organizations.
MSc ORGANIZATIONAL PSYCHOLOGY AND HUMAN RESOURCE MANAGEMENT (TWO YEAR) PROGRAM

The program is geared towards professionals who wish for a better understanding of the organization they work for. It is concerned with the social and psychological processes operating in organizations, and how these processes relate to organizational systems and structures.

This two-year weekend program requires successful completion of 72 credit hours of course work, including 23 courses plus a research project or internship of 3 credit hours each spread over six semesters. Students are expected to maintain a CGPA of 3.0 and successful completion of internship or research project for the conferment of the degree. This program combines study in psychology with courses in human resource management, workplace relations, leadership and team dynamics, and management strategy.

Student can take a minimum load of 6 credit hours (two courses) or maximum of 12 credit hours (four courses) in each of the 3 semesters (Fall, Spring and Summer).

Eligibility

Applicants should have a first/second class bachelor’s degree from an HEC recognized university or an equivalent overseas/professional qualification (BA, BSc, BCom, or an Equivalent degree). Students are required to complete 6 compulsory foundation courses, i.e., 18 credit hours followed by two curriculum options as per interest:

Option I
consists of 36 credits hours of Psychology and 15 credits hours of HRM.

Option II
consists of 36 credits hours of HRM and 15 credits hours of Psychology.

(Both the options include 3 credit hours of Research project/Internship).

Both options include all required subjects approved by Department of Management and Social Sciences.

Foundation Courses

**Accounting**
ACC410 Management Accounting

**Communication**
COM405 Organizational Consulting Skills

**Law**
LAW406 Professional Ethics & Legal Issues

**Management**

Mr. Muhammad Ali Tabba, Member, Board of Governors awarding Gold Medal to a BBA (Honors) student at Convocation, 2009
MSc MEDIA PSYCHOLOGY
(THREE YEAR) PROGRAM

Master’s in Media Psychology is particularly designed to develop a sound and broad academic base for a professional career in media psychology. This program provides an understanding of how people perceive, interpret, use, and respond to the media-rich world by emphasizing on the way the media creates and changes psycho-cultural environment. The program will help students gain an insight into media psychology and technology, their cultural contexts, and their influences on both the individual behavior and psychological aspect of society. Students examine ‘media psychology’ theory within cultural, historical, political, legal, economic and social contexts, and explore aesthetic properties of media psychology artifacts. In sum, students will learn how to create meaning from their study of mediated psychological experiences.

Using diverse research methods, both qualitative and quantitative, students will be trained to learn to question effectively, research, and analyze critical media psychology issues and problems that impact their daily lives as well as the world. Students will be empowered with the skills and curiosity to become avid researchers in education and industry, and prepare them for both graduate and professional work in a variety of media psychology related fields. The course work will emphasize on collaboration with the media channels for their assignments and projects.

This program is particularly designed to develop a sound and broad academic base for a professional career in media psychology. It requires completion of 108 credit hours of course work, including 36 courses and 2 credit hours of internship (in Media Psychology) of at least six weeks in an organization approved by the College and clear a comprehensive examination. Students must maintain a CGPA of 3.0 for the conferment of the degree. The program is designed for students who have passed B.A./B.Com./B.Sc or 2-year Bachelor’s degree recognized by the Higher Education Commission of Pakistan.

Students can take a minimum load of six credit hours (two courses) or a maximum load of twelve credit hours (four courses) in a regular semester (Fall, Spring and Summer). In order to obtain the Master’s degree in 3 years, a student is required to cover twelve courses in a year. Full load of four courses can be taken each in the Fall, Spring and Summer semesters.

MSc LEADING TO MS ECONOMICS AND FINANCE

Overview of the Proposed Program

MS Economics and Finance is a much sought after degree, currently being offered by both public and private sector universities. The program to be offered by the IoBM will be more advanced and sensitive to the needs of the market than the programs currently being offered by public and private sector universities.

The program is particularly designed to achieve the following aims:

> To provide thorough education and training in economics and finance.

> To prepare students for a career in academia, government departments, financial institutions, private companies, regulatory institutions, etc.

> To apply knowledge and understanding of economics and finance.

> To enhance learning skills and personal development in order to encourage independence and originality and contribute to business and society through further study at the doctoral level, etc.

> To integrate students’ understanding of theoretical microeconomics, applied finance and econometric methodology.

MSc Leading to MS Economics and Finance

Students completing the BS (Economic and Finance) program can obtain an MSc (Economic and Finance) degree after completion of 30 credit hours. An MS degree requires a further 6 credit hours of thesis writing.

MS Economics and Finance (Three-Year, 102 Credit Hours)

This program is proposed for BA/BCom/BSc students who have 14 years of prior education. In the first 2 years of the program the students will do pre-requisite courses. Upon completion of the first 3 years, students enrolled in the program will get an MSc degree. An MS degree requires a further 6 credit hours of thesis writing.

MSc Leading to MS Economics and Finance (Two-Year)

This program is proposed for MA/MSc students who have 16 years of prior education and those with equivalent qualifications. The students enrolled will complete one year of course work for 24 credit hours for obtaining an MSc degree. Six further credit hours of work will lead to the award of an MS degree.

Career Opportunities

The program will be a major source of opportunities in banks, financial institutions, finance department at the federal and provincial level, universities, academic institutes, international agencies, consultancies and economic research institutes.

Mr. Shaharyar Muhammad Khan, Keynote Speaker awarding Gold Medal to an MBA student at Convocation, 2009
Institute of Business Management

Required Courses

**Economics**
ECO501  Microeconomics  
ECO502  Macroeconomics  
ECO503  Econometrics  
ECO505  Theory & Practice of International Economic Policy

**Finance**
FIN406  Financial Econometrics  
FIN517  Theory and Practice of Finance

Elective Courses

**Economics**
ECO506  Monetary Economics  
ECO507  Development Economics  
ECO508  Mathematical Economics  
ECO509  Industrial Organization  
ECO510  Mergers, Acquisitions & Restructuring  
ECO511  Taxation and Business Strategy  
ECO512  Trade and Globalization

**Finance**
FIN503  Corporate Finance  
FIN518  Current Issues in Islamic Finance  
FIN519  Industrial and Financial Economics  
FIN520  Financial Risk Management  
FIN521  International Financial Management

Course Structure

**Semester One**
Microeconomics  
Macroeconomics  
Econometrics

**Semester Two**
Theory and Practice of Finance  
Theory and Practice of Int’l Economic Policy  
Financial Econometrics

**Semester Three**
Elective I  
Elective II

Students at CBMUN 2010
COMPREHENSIVE EXAMINATION

After completion of their MBA program all students are required to pass a comprehensive examination conducted by the Institute. The comprehensive examination provides students an opportunity to integrate, synthesize and apply the various aspects of academic achievements and overall work done in their chosen majors and the core courses studied during the MBA. Preparation for the comprehensive examination would develop a broader understanding of the significance of the major chosen by the students within the framework of their overall educational experience.

Students of MBA Executive program are exempted from this examination.

Structure

The comprehensive examination is of 3 hours duration divided equally into three segments consisting of three case studies of one hour duration each.

The case studies are related to all specializations available to MBA students.

To pass the comprehensive examination, a student must get satisfactory grades in all of the three case studies. The examination is conducted twice a year in the months of March and September. Passing the Comprehensive examination is a mandatory requirement for obtaining the MBA degree.

Students are allowed a maximum of two attempts to qualify for the comprehensive examination. A third attempt may be availed only after the Dean's permission. The comprehensive examination is taken only after the student has completed all course requirements and attained a CGPA of at least 3.0 in his/her program.

IoBM students in the Examination Hall
**Asif Quyyum**  
*Chief Solutions Architect/Regional Sales Head, Inbox Business Technologies*

My experience at IoBM was a pilgrimage of self-discovery and the mix of individuals in my class was my laboratory. It was here at IoBM that I discovered my passion for entrepreneurship and launched my first startup, which ushered in the era of e-payments and online credit card transactions in the Pak-rupee economy. IoBM provided me with the essentials to understand business, the tenacity to launch a startup with practically nothing but raw guts, dreams and the wisdom to let go. I feel that attending IoBM was one of the best decisions I ever made.

---

**Soooraj Kumar Khetpal**  
*BBA (Honors)*

Choosing to do a BBA program at the Institute of Business Management was one of the best decisions I have ever made. Complementing my courses, BBA gave me the opportunity to put myself on the forefront dealing with our daily business issues. Today I have the overall picture I always wanted to get. My BBA covered the missing gaps and linked the different business topics together, leading me to a very interesting experience. During my university studies at IoBM, I especially appreciated being taught by professors with real-world experience, ready to equip us to confront real situations in our professional careers. IoBM offers a great environment where teamwork is put into practice. This allowed us to learn to listen and exchange ideas in different fields.
INTERNERSHIP AND PLACEMENT PROGRAMS
Institute of Business Management

**INTERNSHIP PROGRAM**

IoBM makes efforts to help students get some experience in highly competitive organizations. Their fresh ideas, unique perspectives and fundamental knowledge are important assets that can help shape the future of an organization. The Internship Program for interns is designed to provide students with the opportunity to work on meaningful assignments and gain real-world experience. Real-world experience is aligned to the courses studied by students. Such experience is of vital importance to students in two main areas:

1. **Gain Valuable Work Experience in the Chosen Field of Interest**
   An internship is a great way to gain hands-on work experience, develop specific skills and knowledge as well as to network with people from the students’ chosen field. Moreover, employers assess the skills and abilities of prospective employees by evaluating their previous experience. Students pursue career-related opportunities prior to graduation, thereby, obtaining an edge over other candidates in the competitive job market.

2. **Decide on Right Careers Prior to Graduation**
   An internship provides a more accurate picture of what individuals do in certain professions. After experiencing a particular job environment and observing what it entails, students may decide if this is the right career for them.

The internship is compulsory for all MBA, BBA, and BS final year students, and has a minimum duration of six consecutive weeks. Executive students are exempted from the internship program.

**Eligibility for Internship**

<table>
<thead>
<tr>
<th>Minimum CGPA</th>
<th>Semesters of Study Completed at IoBM</th>
</tr>
</thead>
<tbody>
<tr>
<td>MBA</td>
<td>2.8</td>
</tr>
<tr>
<td>BBA / BS (Honors)</td>
<td>2.4</td>
</tr>
</tbody>
</table>

> MBA & BBA (Honors) students should have passed the Methods in Business Research (MBR) course.
> The Institute selects the organization for internship for the student.
> A student has to select and write a case study on an intriguing problem faced by the organization or department where the student interns and has to suggest workable solutions considering the courses studied.
> Students are required to explain in their report how the internship enriched their learning by identifying theories and concepts studied in class and their application in relation to their experience in the organization of internship. Reports are graded as follows:

**A - Grade = 3.89 points**

**B - Grade = 3.33 points**

Grades lower than ‘B’ are considered ‘satisfactory’ and are not awarded any marks. Interns who fail to get a passing grade are required to re-write their reports.

> Reports are required to be submitted by an intern within two weeks of completion of the internship.
> All sponsoring organizations are requested to evaluate the intern’s performance on a prescribed form which is discussed with the intern so as to focus on his/her strengths and weaknesses.

Students participating in CBMUN 2010
PLACEMENT PROGRAM

IoBM lays tremendous emphasis on its close collaboration with the government, firms, banks and leading HR consultants so as to ensure appropriate induction of its graduates into such organizations. Close linkages are maintained with CEOs and Heads of Departments in organizations so as to provide the best career prospects for graduates. Efforts are made to match the talents of students with requirements of both multinational and local organizations.

Emphasis has been placed on the requirement of Career Fair Seminars. They provide a meeting ground between the corporate world and graduates with the provision of resumes to HR representatives where students are selected for jobs against their requirements immediately, or at a later stage since their personal data remains easily available with such organizations for possible employment. In Career Seminars, graduates are given fresh insight into the corporate world with detailed discussions on the writing of resumes and methodology in performing well during interviews.

IoBM’s Internship & Placement Department provides a firm commitment to its graduates for developing careers. This begins from the point the student is inducted and continues with a life long partnership. In the past we have assisted our graduates in finding careers for our alumni as well. Some of the activities designed for placing students include, but are not limited to:

1. **On-Campus Recruitment Drives**
The Internship & Placement Department has been able to develop strong relationships with the corporate sector by signing MoUs for both Internship & Job Placements, co-sponsoring guest lectures and seminars. As a result, companies frequently conduct on-campus recruitment drives. This includes such organizations as Unilever, P&G, ICI, GSK, Engro, etc.

2. **Publishing Bi-Annual Graduate Directory**
MBA graduates are invited to showcase their resumes in IoBM’s bi-annual Graduate Directory. This publication is circulated to about 150 national and multinational companies and is an essential tool for being placed in the market. The Internship & Placement department recently conducted a survey to determine the efficacy of this document. It was found that 62% of the respondents were contacted for interviews and 69% of these were able to secure positions.

3. **Career Counseling**
Guidance and counseling is an extremely important aspect of development for young adults at IoBM. With this in mind the team in the Internship & Placement Department is constantly engaged in assisting students in the entire process of preparing for and actually finding jobs for them.

4. **Guest Lectures by Industry Experts**
Recognizing the importance of networking and relationship management, the Department frequently invites industry professionals for lectures, conferences and corporate events. Our aim is to provide students with the opportunity to establish a strong and lasting contact base before graduation to ensure that they are able to get positions in the industry and business organizations.

5. **Workshops Related to Career Management**
The department has recently introduced periodic in-house workshops, such as interviewing techniques, resume writing, behavior patterns in organizations, etc.
6. **Career Fair**
At the end of 2009, the department organized a Career Fair, inviting organizations engaged in their recruitment cycle to make company presentations and answer questions from students. This day long event was managed in collaboration with students and received widespread appreciation. The department envisages this as an annual event not for only interactive sessions between students and the corporate world, but also for providing resumes for either immediate employment, in case jobs are available with the organization concerned, or resumes being kept pending by organizations for jobs whenever such an opportunity arises.

7. **Job Alerts via Group mail, Notices and Rozeepk.com**
IoBM’s Internship & Placement Department manages a database of job opportunities in the market. Students are provided opportunities through group mails, notices and an online web portal in collaboration with Rozeepk.com.

Naveed Ilyas  

I believe that every business school follows the same curriculum, however, it is the method of equipping graduates with the tools and techniques of applying this curriculum to real world situations. These tools and techniques provide a graduate the confidence required to face the rough ride of the outside world. I thank IoBM for equipping me enough to tackle the challenges on my way to an illustrious career.

Sarocsh Ahmed  
CFO-Symmetry Group, Strategic Media Manager, Telenor Pakistan

Having graduated from CBM in 2000, aspiring to take over the world….I joined the media industry at a time when having a career in media was a futuristic approach. Almost five years with Pak Mediacom as Sr. Manager Media Planning shaped the base of my career and prepared me for what was to be my most eventful journey ever. From bringing media basics to Pakistan to working on different assignments with P&G UK, P&G Geneva, PMC was nothing short of a joyride. The next stop was a shift to FMCG through Tapal as Manager Marketing Services where planning for the product and brand itself was a world beyond media. Initiating for the first time annual/ monthly /quarterly media and brand reviews for all brands and developing the media strategy for corporate communication with dedication earned me the “Best Performance Award” by Managing Director. Just when I thought life couldn’t get any better, I shifted by career to a new entrant in Telecom then, Telenor Pakistan. It would not be wrong to say that I owe a lot to IoBM for achieving what I have today.
BUSINESS SUPPORT CENTER
BUSINESS SUPPORT CENTER

Business Support Center (BSC) at IoBM undertakes consultancy on development and implementation of effective strategies that meet the objectives of the corporate world. It offers an overarching range of training programs with the excellence and rigor that is designed to make every organization’s experience a valuable one. Over the years, the Business Support Centre has been successful in sustaining partnerships and long term relationships with leading national and regional organizations on the basis of its immersive approach to service excellence and dedication and innovative approach to organizational change.

BSC offers two kinds of programs—Organization Specific Programs and Open Enrolment Programs. An Organization Specific Program is a tailor made program to design solutions for the needs of the client organization. An Open Enrolment Program includes expedient training programs covering a comprehensive range of disciplines that would benefit individuals and organizations through practical skills and knowledge that can be applied in real situations.

Business Support Centre offers the following Open Enrolment training programs:

1. **Branding and Media Strategy for Nonprofit Organizations**
   The purpose of this two-day workshop is to identify ways for client organizations to engage media to the maximum advantage for their effective branding. The training would enable the participants to establish linkages with media and provide better understanding of media expectations. Practical skills like writing effective press releases, conducting press conferences and television appearance skills will also be imparted. This workshop is aimed at senior level development professionals who are responsible for strategic planning for their organizations.

2. **Marketing ... the Chain is as Strong as the Weakest Link**
   This specially crafted, interactive program aims to improve skills to understand and manage value creation through effective marketing. The program will explore the theoretical foundations and practical implications of state-of-the-art techniques and concepts of contemporary marketing management. Participants will be equipped to plan and implement effective marketing practices in their organizations.

   The course will benefit new (or experienced) managers of those companies where the marketing value creation chain is an integrated part of company strategy and where a significant part of commercial effort and expenses are on value creation. Participants will typically have the title of marketing, brand or product managers, area managers, regional manager or business unit manager.

3. **Managing Sales Force Productivity**
   This specially crafted, interactive program will improve skills to understand and manage sales operations more productively. The program aims to explore the theoretical foundations and practical implications of state-of-the-art techniques and concepts of contemporary sales force management. Participants will be equipped to plan and implement effective sales force management practices in their organizations.

   The course will benefit new (or experienced) managers of those companies where the sales force is an integral part of the marketing value creation chain, where a significant part of commercial effort and expenses are on the sales force. Participants will typically have the title of sales manager, area manager, regional manager or business unit manager.
4. **From Good to Excellent Customer Service**
This program will help participants become committed to providing 'winning service' to their customers.

It will help them gain an insight into how they can go beyond their customers’ rising expectations, enhance sales, service & achievement and shift from blame and shame to taking personal responsibility.

The program is a must for all those who have the responsibility for delivering either internal or external customer service. Frontline staff cannot afford to miss it.

5. **Financial and Accounting Management for Non-Financial Executives**
All business activities, functions and decisions have accounting and financial implications. Therefore, all managers managing a company’s finances and accounting function must be conversant with the essentials of Finance and Accounting. The program will provide knowledge of the essential concepts of Finance and Accounting to enable non-financial managers to apply the relevant techniques in their respective responsibilities.

The program will be most relevant for top and senior business executives and development heads who are responsible for organizational or functional profitability.

6. **General Banking for Bank Officers**
The program will provide knowledge and practical experience directly relevant to the various functions of commercial, investment, industrial and central banks. The objective of the training is to impart general banking knowledge and practical training to newly appointed officers in banks.

The program is particularly designed for newly appointed officers of commercial, investment, industrial and central banks.

---

Mr. Talib S. Karim, Executive Director, IoBM and Ms. Farah Pandith, President Obama’s Special Representative for Muslim Communities
7. **Workshop on Display / Merchandising**
   This workshop will give sales executives a context and industry standard to objectively look at their retail environment and store image. Participants will better understand how they can impact the effectiveness of their efforts on visual presentation while creating a strong image for their brand in the marketplace. The workshop will particularly focus on areas in merchandising. This workshop is geared towards area sales manager, management trainee, field manager, sales representative and merchandiser.

8. **Strategy : Creating and Sustaining Competitive Advantage**
   This program prepares senior executives and teams to anticipate and respond to the accelerating pace of global competition and technological change. Through hands on workshop approach, participants evolve their own unique cutting-edge strategy and formulate sustainable action plans specific to their own organization. Building and sustaining competitive advantage is designed for company teams of at least four senior-level cross functional executives who are responsible for developing and implementing competitive strategy. Individual executives are encouraged to attend. Participants are typically employed in industries, such as consumer products, pharmaceuticals, banks, financial services, manufacturing, telecommunication, universities, etc.

9. **Successfully Managing Change and Employee Resistance**
   This is a one day program that will look at the concept of Change Management through looking at ‘Why Organizations Need to Change’, discussing different ways of approaching change, describing a proposed process of successful change management, what works and what doesn’t when managing change in the organization.

   This program is for those managers and executives who have the responsibility of managing change – who are looking for ways to manage change in a way that employees in their organization can cope with it.

10. **Result Based Leadership**
    This two day program will help participants understand the leadership attributes they require in business. In other words, the program will help them identify their style of leadership and connect attributes to results. They will be able to focus on four important areas of results such as employee results, organization results, customer results and investor results.

    This program is designed for middle or senior managers with at least five years’ management experience and who are in line for succession. They would have responsibilities in functional areas for delivering organizational results.

---

*Mr. Talib S. Karim, Executive Director, presenting shield to Dr. Imam Yahya Hendi, Georgetown University, USA*
11. **Supply Chain Management**
By the end of the program, participants will be able to define the objectives and functions of management purchasing material, stock control, stores and physical distribution and understand how they relate to each other; present and discuss the specifications needed for each of the materials management functions in order to optimize the use of personnel, facilities and capital.

This program is particularly designed for directors, senior managers and business planners involved in the decision making process for implementation of supply chains for full optimization.

12. **Strategic Planning and Implementation - To Achieve Desired Results**
At this three day workshop participants would learn what strategic planning really means and how it differs from the kind of “maintenance” planning that is typical in most organizations. They will learn how to implement an effective process to discover what it is that they don’t realize and what they need to know before an effective strategic plan can be created.

This program is a must for all managers, executives, consultants and others who take up decision making roles in the organization. It is also recommended for young upcoming executives.

13. **Profitability Management**
Using practical cases, exercises and management films, the program will present techniques and practices for achieving optimum corporate profitability in a competitive environment.

The program would be most beneficial to top and senior business executives and development heads who are responsible for corporate or functional profitability.

14. **Strategic Human Resource Management**
Participants will gain insight into concepts, techniques and successful practices for optimum development and utilization of human resources for the achievement of corporate goals and objectives. The program will be most useful for heads and senior officers of HR operations or marketing.

15. **Managing State Enterprises Effectively**
State Enterprises, if managed effectively, can play an important role in the country by providing essential goods and services at reasonable prices and substantial employment. The program will provide guidelines for formulation, implementing policy strategies and operating systems for effective and efficient management of State Enterprises (SEs). The program will be most relevant for top and senior officials of SEs and Ministries of the Government Controlling SEs.

16. **MIS for Profit Management**
Relevant, correct and timely information is a prerequisite for business decisions. The program will offer practical techniques for the formation of an effective and efficient Management Information System to facilitate timely and correct decisions at the operating, executive and top management levels. The program will be most relevant for top and senior business executives and development heads who are responsible for organizational or functional profitability. Latest technical literature, business cases, practical exercises and management films will be used in the program for optimum impact.
17. **Stress Management**
This workshop would enable participants to identify how stress differs from pressure; assess their personal levels of stress; determine the root causes of their stress; recognize their own patterns of stress reaction and learn practical tips and techniques for reducing, relieving and avoiding stress. This training is designed for managers, executive teams and employees at all levels. The course can be customized to meet the requirements and the skill level of a certain group.

18. **The Art of Communication**
This training program can be customized to suit the needs of the target group to focus on any of the following training areas:

- Effective written communication in the workplace
- Winning proposals
- Technically sound reports
- Ability to speak eloquently to disseminate information and convince listeners
- Understand and get more out of meetings
- Contribute to problem solving and decision making
- Crafting effective resumes and ‘delivering the goods’ during interviews

The training is geared towards managers and middle level executives in public and private enterprise who need to develop or upgrade their written and spoken communication skills.

19. **Fight Stage Fright!**
This workshop is aimed at oral presentation skills. The areas in training will equip participants with strategies of dealing with nerves; speaking with clarity & confidence; project their voice; use effective eye contact and body language when making power point presentations. The participants will also be provided with survival language used during presentations. The session will be followed by presentations by the participants and peer and trainer feedback.

The workshop is particularly designed for anyone who wants to excel in the art of oral presentations.

20. **The Art of Negotiation**
The workshop would train participants to plan for negotiations that often take place during the sales process; become more effective when handling negotiations in person or on telephone; minimize conflict and obstacles by utilizing principled negotiation strategies; build internal unity by working within their organization during negotiations; focus on interests and issues that lead to common agreement; adjust their negotiation approach based on customer cues and buyer behavior; handle negotiations in an ethical manner that strengthen relationships and build better sales deals to increase profitability and satisfaction.

The negotiation workshop is designed for anyone who negotiates at work or at home including: executives, managers, professionals, salespeople, real estate agents, property managers, entrepreneurs, lawyers, accountants, engineers, health care professionals, educators, customer service representatives, and labor relations specialists/ senior executives (such as CEOs or board members) from the private or public sector.
21. **Motivate - Yourself & Others to Succeed**
This program is geared towards top company leaders, senior and middle managers, supervisors, managers, salespeople, plant workers, office staff, and anyone else committed to getting more out of his or her life and job. The training will help participants in establishing a personal mission statement or core purpose for their life; determining their personal guiding values; gaining clarity on their personal life passions; developing a goal setting system and habit; creating a plan of action for each goal and developing an easy-to-use system for regular planning and review.

22. **Managing & Resolving Conflicts Productively at Work**
The workshop would improve the way conflicts are resolved before they affect the organization; minimize the escalation of conflict and channel conflict into a positive outcome. It will help participants understand conflict styles and allow them to really see their self-destructive behavior patterns.

The workshop is geared towards managers, trainers, consultants, project managers who must keep everyone happy and effectively coordinate groups of disparate people while not having any authority to actually do so.

23. **Be A WINNER...with Positive Thinking & Attitude**
After attending this program participants should be able to identify and establish new goals, develop a new sense of purpose and generate new ideas about themselves and their future. It will help them discover the power their positive attitude has to help them achieve their goals and ultimate success. In short, it will help them become winners which they deserve to be.

The program is geared towards all those who want to win and succeed in life, bureaucrats, administrators, CEOs, management, professionals, and all those who believe that if you are not fired with enthusiasm, you are not living.

24. **Corporate Governance**
"Corporate Governance is the system by which business corporations are directed and controlled. The corporate governance structure specifies the distribution of rights and responsibilities among different participants in the corporation, such as the board, managers, shareholders and other stakeholders and spells out the rules and procedures for making decisions on corporate affairs. By doing this, it also provides the structure through which company objectives are set and the means of achieving those objectives and monitoring progress are determined".

The workshop is specially crafted to include:

- Building effective boards and their committees … the mix of skills and the role of independent directors.
- Good governance of human assets and conducting board self assessments.
- The role of the board in strategic planning and its interaction with management.
- Evaluating CEOs and succession planning.
- What every director needs to know about accounting and finance.
- Information disclosure and transparency, enterprise risk management, internal audit and control procedures, the audit committee and interaction with the external auditor.
- The role of the board in protecting shareholders rights, in related party transactions and the company’s dividend policy.
- The role of the board in preparing and conducting general body meetings and managing corporate conflicts.

CFA TRACK AT CBM

The College of Business Management offers The CFA® Advantage to students seeking Finance majors in their MBA program. The globally acknowledged Chartered Financial Analyst program is administered by a US based Association for Investment Management and Research (AIMR).

The CFA Track of CBM delivers a very high quality to the business management program by adopting the entire curriculum of the CFA program’s Level I and Level II examinations. Secondly, the MBA (Finance majors) graduates of CBM, who have successfully completed the CFA Track’s elective courses, would be well equipped to pass the CFA Level I and II exams, if they wish to do so.

There are thousands of CFA charter holders the world over, including from Pakistan. Every year, more than 65,000 candidates from all over the world take CFA Level I, II or III examinations, including more than 600 every year from Pakistan. All these examinations are conducted by the Association for Investment Management and Research (AIMR) of USA once a year in the first week of June, at over 75 locations the world over simultaneously, including Karachi and Lahore.

The CFA Track of CBM offers 4 finance electives structured around the CFA Level I and II examination curriculum. These are all sequential courses and the various textbooks from which reading material of these courses is developed, are the same as prescribed by the AIMR. The description of these 4 finance elective courses is as follows:

1. **Foundations of Financial Analysis**
   This is the first course that is based on CFA Level I examination curriculum. Beginning from ethical and professional standards and moving on to quantitative methods, the course takes students through micro and macroeconomics. The major part of the course familiarizes students with the concepts of Financial Statement Analysis, Corporate Finance, various types and markets of financial assets, including alternative investments and portfolio management.

2. **Fundamentals of Asset Valuation and Portfolio Management**
   This is the second course based on CFA Level I curriculum, with the first course “Foundations of Financial Analysis” serving as the pre-requisite. The contents of “Fundamentals of Asset Valuation and Portfolio Management” covers topics, such as corporate investing and financing decisions; financial markets and instruments; equity, debt, derivative and alternative investments, capital market theory and operations.

3. **Advanced Financial Analysis**
   The first two courses of the CFA Track serve as pre-requisites for this course titled “Advanced Financial Analysis”. This is the first course that is based on CFA Level II examination curriculum, ethical and professional standards and quantitative methods for valuation and economic evaluation. The major part of this course is, however, the advanced concepts of financial statement analysis, including inter-corporate investments and business combinations; global issues, special topics and considerations in financial statement analysis.

4. **Advanced Asset Valuation and Portfolio Management**
   The first three courses of the CFA Track serve as pre-requisites for this course titled “Advanced Asset Valuation and Portfolio Management”. This is the second course based on CFA Level II examination curriculum. It exposes the students to topics like industry and company analysis; valuation models; special valuation cases, valuation perspectives and applications in equity investments; credit analysis, valuation issues, structured securities and trading strategies of debt investments, futures, swaps and options, alternative investments, capital markets and asset pricing models and practices.

RESEARCH AT IoBM
RESEARCH AT IoBM

> Research being a core competence, is accorded top priority at the Institute of Business Management.
> All full time faculty members have a contractual obligation to complete one major research study per year.
> MBA at CBM is research intensive and every optional course is designed to include a research component.
> IoBM’s Research Director is Honorary Economic Advisor to the Federation of Pakistan Chamber of Commerce and Industry.

Pakistan Business Review
IoBM publishes Pakistan's first refereed academic business research quarterly. PBR is abstracted and indexed by the American Economic Association in the ECONLIT, the Journal of Economic Literature, USA and recognized by the Higher Education Commission (HEC). It is supervised by an International Advisory Board of Business Academics from national and international organizations, such as the London School of Economics, the University of Sussex, the University of San Diego, Bochun University, Germany, the United Nations Industrial Development Organization, the International Association for Clean Technology, Austria, the Institute of Cost and Management Accountants of Pakistan, the Institute of Chartered Accountants of Pakistan, the Pakistan Institute of Development Economics, the Applied Economic Research Center, the University of Karachi, Indiana University and The Aga Khan University, Karachi. All full time faculty members are on the editorial board and contribute research papers on a regular basis. Pakistan Business Review is in its twelfth year of continuous publication.

International Conference
An international Conference, funded by the HEC is held on an annual basis. The Second Sindh International Conference was held in January, 2010 to discuss the Sindh Economic Survey 1972-2008 prepared at IoBM. Two international conferences are planned for the current academic year 2010-2011, one on Management Capacities and the other on Labor Policies in Pakistan. These conferences provides a platform for the presentation of research at IoBM.

Textbooks
IoBM is concerned about the lack of textbooks which reflect Pakistan environment and practices for business students. Several textbooks by IoBM faculty have been published. These include:

1. Money and Banking in Pakistan (now in its sixth edition)
2. Financial Management in Pakistan
3. Business Ethics in Pakistan

Another textbook on Financial Institutions in Pakistan is under preparation and will be published by the Oxford University Press in 2011.

External Research
Consultancy work has been undertaken for the Federation of Pakistan Chambers of Commerce and Industry, The Aga Khan Education Service, Karachi, the Institute of Bankers in Pakistan, Deloitte, Touche International Chartered Accountants, the United Nations Industrial Development Organization, Vienna, SBP, Doha Bank FPCCI, TDAP and the Government of Sindh. Research papers from CBM are regularly presented at the annual meetings of the Pakistan Society for Development Economics, Islamabad.

Online Accessibility
IoBM subscribes to the Business Collection of JSTOR, an online access to a vast collection of business academic journals. It allows access to 46 multidisciplinary and discipline specified collections. In addition, the HEC has allowed us online access to almost 5000 research journals. These publications carry theoretical and applied research findings in fields, such as Accounting, Business, Computing, Economics, Engineering, Finance, Law, Management, Marketing, etc. The fast internet link of IoBM provides an easy access to download articles and research reports. Students are encouraged to avail the browsing facility available at the campus. The faculty is also encouraged to use these research journals, give assignments and group discussion exercises based upon the articles of specific fields.
ACADEMIC REQUIREMENTS
IoBM has been, and continues to aim at harnessing the best researched and the most widely implemented methods of dissemination of information to support excellence in teaching, learning and research. Multifaceted teaching strategies at IoBM include cooperative learning, directed class discussions and activities in critical thinking.

> The case method of instruction continues to be a significant classroom teaching strategy at IoBM so as to integrate best practices with management theory.

> Field based learning encourages students to complement their conceptual knowledge with off-campus learning experiences that deepen their understanding of business issues.

> Research based assignments under the supervision of trained faculty aim to hone the research skills of students and maximize participant-centered learning experiences by exploring specific topics of interest related to real business situations.

> Specially-designed classrooms reinforce instruction through multimedia technology.

> Understanding being the purpose of instruction, the process of assessment at IoBM is more than just evaluation. It is a substantive contribution to learning that aims to identify gaps in student learning. IoBM’s approach to learning is rooted deeply in assessment that fosters understanding and is more than an end-of-the-semester test. It informs students and faculty about what students currently understand and how to proceed with subsequent teaching and learning.
PERFORMANCE EVALUATION AND STANDARDS

The performance of students is constantly evaluated through surprise quizzes, hourly examinations, assignments throughout the semester, submission of term reports, presentations and final examinations at the end of the semester. The grades awarded are as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Marks</th>
<th>Grade Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>96-100</td>
<td>4</td>
</tr>
<tr>
<td>A</td>
<td>91-95</td>
<td>3.89</td>
</tr>
<tr>
<td>A-</td>
<td>87-90</td>
<td>3.78</td>
</tr>
<tr>
<td>B+</td>
<td>84-86</td>
<td>3.67</td>
</tr>
<tr>
<td>B</td>
<td>79-83</td>
<td>3.33</td>
</tr>
<tr>
<td>B-</td>
<td>75-78</td>
<td>3</td>

<tr>
<td>C+</td>
<td>69-74</td>
<td>2.67</td>
</tr>
<tr>
<td>C</td>
<td>64-68</td>
<td>2.5</td>
</tr>
<tr>
<td>D</td>
<td>60-63</td>
<td>1.5</td>
</tr>
<tr>
<td>F</td>
<td>&lt; 60</td>
<td>0</td>
</tr>
</tbody>
</table>

Grade points are assigned to the given grades for calculation of the Cumulative Grade Point Average (CGPA).

The grade of ‘I’ (Incomplete) may be recorded to indicate that the requirements of a course have been substantially completed, but for a legitimate reason, a small component of the work (final examination) remains to be completed and the record of the student justifies the expectation that he or she will obtain a passing grade upon completion. The instructor should be notified of the reason for the non-completion of work in order to ascertain the legitimacy of that reason and in turn to grant an incomplete grade. In order to complete the “I” grade, students must appear in the final examination in the following semester. Failure to do so will result in an ‘F’ grade. The incomplete grade is not counted in the computation of the CGPA for the semester in which the incomplete grade was permitted. The instructor assigning an incomplete grade files with the Dean a signed form indicating the reason for the incomplete grade.

Only courses for which grades C, D or F are received may be repeated for credit. Only one repetition is permitted, unless authorized in writing by the Dean. On the repetition of a course, the credit hours are applied towards a degree only once.

BBA (Hons) and BS students must maintain a minimum CGPA of 2.0 on a cumulative basis in order to maintain good standing. Any deficiency should be made up in the following semester, otherwise, the concerned student may be dropped from the rolls of the College. A CGPA of 2.5 is required for the conferment of the degree.

MBA and MPhil students are expected to maintain a CGPA of 2.5 to remain in good standing. Any deficiency should be made up in the following semester, otherwise the concerned student may be dropped from the rolls of the College. The cumulative GPA should be 3.0 in order to receive the degree. MBA and MS students are required to repeat those courses in which they receive F and D grades.

**Farhan Chawala**
Director Marketing, BOSCH Pharmaceutical
CBM provided an environment which enhanced creativity and independent thinking. My teachers, more like mentors, with each specializing in their respective field and with plenty of real world experience, were able to relate theory to the practical side of life. They taught me how to think beyond the realm of ordinary and come with newer concepts and bold ideas. My time at CBM acted as foundation to build where I am now.
Institute of Business Management

Discipline
IoBM stands out among other universities for its special emphasis on maintaining good order and discipline among its students. It reserves the right to prescribe such regulations from time to time that may be considered expedient for effectively maintaining the highest standards. The regulations set out below are IoBM’s General Regulations for discipline.

The General Regulations provide that:

No student of IoBM shall:

1. disrupt the activities and functions of the Institute;
2. damage any property of the Institute or of any faculty member, visitor or an employee of the Institute or knowingly misappropriate such property;
3. forge or falsify any certificate/degree issued by IoBM or knowingly make false statements concerning standing or results obtained in examinations;
4. engage in violent, indecent, disorderly, threatening, or offensive behavior or language;
5. engage in the harassment/disrespect of any faculty member, peer, visitor, employee of the Institute;
6. exhibit behavior that is inappropriate in terms of the norms and cultural values of the Institute and society in general;
7. engage in any political activity while enrolled at IoBM;
8. disrespect/disregard any guidelines/instructions prescribed by faculty and management of the Institute;
9. assist or encourage directly or indirectly any person to act in breach of the above mentioned regulations.

No student of IoBM shall breach any regulation:

(a) relating to the use of the libraries or the information and communication technology facilities at IoBM;
(b) relating to conduct in examinations;
(c) assist or encourage directly or indirectly any person or persons to act in breach of above mentioned regulations.
The Disciplinary Committee
The Disciplinary Committee, IoBM, comprises a Chairman, Executive Director Academics, Executive Director Administration, Academic Heads of Departments, Controller of Examination, Senior Manager Admissions and such other members notified by IoBM. If the Disciplinary Committee is satisfied that a student is guilty of breach of conduct it may:

(a) impose a fine of such amount as it thinks fit;

(b) order the student to pay compensation to any person or body suffering injury, damage, or loss as a result of the student’s conduct;

(c) make an order banning the student from specified premises or facilities for a certain period or on such terms as it thinks fit;

(d) rusticate the student for such period as it thinks fit;

(e) expel the student;

(f) award ‘F’ (fail) grade to a student cheating in an examination or a part of the examination concerned;

(g) ask the parents of the student to give an undertaking that henceforth their wards will not get involved in any activity warranting disciplinary action and should any such incident occur, the Disciplinary Committee reserves the right to expel him/her permanently from the Institute without even asking him/her to appear before the Committee for the consideration of his/her case.

If the Disciplinary Committee is satisfied that a student has committed a breach of the disciplinary regulations relating to plagiarism it may:

(i) exclude any part of the work submitted from assessment;

(ii) award no mark / reduce or disregard any piece of work;

(iii) permit a student to re-sit an examination or resubmit a piece of work on such conditions as it thinks fit.

Appeal / Review of the decision: The review of the decision taken by the committee shall rest with the President, IoBM.

Readmission Policy

Students who stop attending classes at the university, for any reason, without lodging a request to the concerned authorities to drop a semester or informing the concerned authorities about their absence shall be struck off from the university rolls and would be required to go through the admission procedure again in case they want to register for courses in future.

Credit hours once transferred to another university shall not be counted as part of the credit hours students are required to complete at the Institute in case they wish to re-join at any stage.
Institute of Business Management

Examination Norms
Each semester has two hourly exams (6th & 11th week) & one final exam in the 15th week. Marks distribution is conveyed to the students at the beginning of the semester which traditionally is 15 marks for each hourly and 40 marks for the final exam. 30 marks are assigned for quizzes and assignments. In some cases there might be a slight variation if the concerned faculty desires so.

IoBM, in its pursuit of excellence, believes in providing a congenial atmosphere to the students during all exams in order to get them to perform at their optimum level. However, there are certain norms which the students are expected to be aware of and observe both in letter and spirit. These norms are:

> Impersonation may lead to permanent expulsion from the Institute.
> Cell phones are strictly prohibited in the exam hall/room. Defying this rule may result in confiscation or a fine of Rs. 1000/=.
> Valid college ID card is mandatory for entry to the exam room/hall. There is absolutely no relaxation in this rule.
> Punctuality is most important at all times. Students are expected to check their exam location and be seated at least 10 minutes prior to the exam time. Late comers will be made to wait for 5 minutes in case of hourlies and 15 minutes in the final exams before they are allowed entry.
> As per college policy all question papers are to be returned along with the answer script.
> Students are required to bring their own stationary & calculators as no lending or borrowing is permitted during examination.
> Programmable calculators or any other kind of electronic devices are strictly prohibited inside the exam area.
> Indiscipline in the exam hall/room will not be tolerated. Such cases are to be reported to the Controller of Examinations immediately for appropriate action.
> Possession of any written material related to the subject or communication with their fellow students, will result in disciplinary action through the decision of the Disciplinary committee.

Mid-Term Policy
Students are required to take two mid-terms and one final examination. There would be no N-1 given to a student. All students must take both the mid-terms, as the aggregate of these would be included in the final grade.

The Institute does not exempt students from completing course requirements on medical grounds nor is leave granted for any personal reasons. This is done to ensure the market credibility of the Institute teaching programs and degrees.

Policy for Course Repetition
Student failing a course twice will not be allowed to register for a third attempt. If it is a compulsory course, a second failure will lead to failure in the degree and withdrawal from the Institute.

Academic Dishonesty
To maintain credibility and uphold its reputation, the Institute has certain procedures to deal with academic dishonesty which are uniform and should be respected by all. Violations of academic integrity include:

> Unauthorized assistance during an examination
> Falsification or invention of data
> Unauthorized collaboration on an academic exercise
> Plagiarism
Definition of Plagiarism
Students are required to submit original work. Papers and/or projects submitted as part of a group effort must be clearly identified, with the team members specifically acknowledged. Ideas, data, direct quotations, paraphrasing, or any other indirect incorporation of the work of others must be clearly referenced to avoid plagiarism. Examples of plagiarism include:

> Direct quotation or paraphrasing from published sources that are not properly acknowledged;
> The use of other persons or services to prepare work that is submitted as one’s own;
> The use of previously submitted papers or work, written by other students or individuals;
> Misappropriation of research materials;
> Any unauthorized access to an instructor’s file or computer account;
> Any other serious violations of academic or moral integrity as established by the instructors of the Institute;
> Conduct during examinations.

Cheating is unacceptable. Examples of cheating are:

> Any written or oral communication among students during an examination;
> Providing information about the content of an examination;
> Impersonation by another student during an examination.

IoBM is no smoking campus. Any violation of this rule can lead to serious consequences. The penalty for this can amount to the extent of cancellation of registration.

Dress Code Policy
Appropriate dressing enhances the personality and contributes to successful non-verbal communication in the workplace.

IoBM expects its students to reflect its values and standards in every way, and especially in the way they dress and conduct themselves. This will enable them to make a positive impression and project a professional image wherever they go.

In order to achieve the above stated objectives, the following guidelines must be strictly observed:

> All clothing worn by students should be well laundered.
> Clothes should be inoffensive in terms of cuts and style, or by way of messages printed on them.
> Female students may only wear jeans provided their tops are of mid-thigh length. They should also be modest and avoid transparent materials and short lengths for sleeves and trousers/shalwars.
> Only light make up, jewelry and perfume is permitted.
> Male students are only allowed full length trousers or jeans. For footwear, they must wear dress shoes, moccasins, joggers or sandals with back straps.
> Male students should maintain proper haircuts and refrain from piercing their ears and faces.

No variations or violations in all of the above will be permitted and students doing so will be marked absent in their respective classes.
ADMISSION REQUIREMENTS

Admission to IoBM is on a highly competitive basis, and only those who compete successfully in their academic careers, showing excellent results are selected for admission. They come from a variety of backgrounds. After joining IoBM, students continue to pursue their studies with a high level of competitiveness aimed at professional development. The admission criteria for the Institute’s academic programs are described below:

**Admission Eligibility for Entrance into the BBA (Honors), BS (Computer Science), BS (MIT), BS Industrial Engineering and Management, BS Joint (Honors) in Economics and Finance/Banking, Accountancy and Finance/Banking - Leading to MBA Finance, Financial Mathematics and Statistics programs, is based on any one of the following:**

> A Higher Secondary School (HSC) Certificate with at least 50% marks awarded by a recognized Provincial Intermediate Board

> ‘A’ Levels with a minimum of two Cs, preferably in business related subjects, excluding General Paper and Urdu or an American High School Diploma with CGPA of 2.5 or equivalent

> Recognized Overseas Equivalence Diploma

*Success in aptitude test and interview conducted by IoBM*

**Eligibility for Entrance into the MBA Program is based on any one of the following:**

> A 4-year Bachelor’s degree in Arts, Science, Law, Commerce, Engineering, Medicine or Pharmacy, with high second division from HEC/Provincial Government recognized and Institute’s approved Universities in Pakistan

> A final qualification examination of a professional body recognized by the University, for example, ACMA, ACA

> Recognized overseas degree

> One-year work experience (only for MBA Executive)

*Success in aptitude test and interview conducted by IoBM*

* Students with 2-year Bachelor’s degree are eligible for MBA (3-year) program

**Eligibility for Entrance into the MS (Computer Science) Program is based on any one of the following:**

> BS (Computer Science)/MCS/16 year* Engineering or Arts, with high second division from HEC/Provincial Government recognized and Institute’s approved Universities in Pakistan.

*Education in Science/Engineering/relevant field

> Recognized overseas degree

*Success in aptitude test and interview conducted by IoBM*
Institute of Business Management

Financial Assistance Programs

Internal
IoBM has established a financial assistance fund for students who are unable to afford the financial costs associated with an academic program. Assistantships and financial assistance are provided to students on merit and need-cum-merit basis. Currently about 25% of the students are currently receiving some form of financial aid.

HEC - Japanese Need Based Merit Scholarships
The Government of Japan in collaboration with the Higher Education Commission (HEC) Pakistan is offering scholarships to Pakistani Students. The objective is to provide opportunities to talented students who cannot afford higher education.

Sixteen (16) scholarships are being offered for a period of five (5) years to students who are currently enrolled or desire to get admission, both for under-graduate and graduate programs.

Endowment Fund - Education Department, GOS
Endowment scholarships awarded by the Government of Sindh, Education and Literacy Department, are also available to our students studying under undergraduate and graduate programs. These are based on a specific quota for urban and rural applicants.

Shell Need Based Merit Scholarships
Shell need based merit scholarships are awarded by Shell Pakistan Pvt. Ltd. for students studying under undergraduate and graduate programs based on both need and merit.

Bilkent University Scholarship
Bilkent University, Turkey offers full scholarship to IoBM students to take courses at Bilkent Business School as visiting students for one academic year.

Janmohammad Trust and Tabba Foundation
Generous scholarships and financial assistance are available through Janmohammad Trust and Tabba Foundation. Many current students are availing assistance through these programs.

Mr. Rasheed Janmohammad awarding Gold Medal to an MBA graduate
FEE STRUCTURE*

IoBM is operates on a self-financing basis as a non-profit institution. * Subject to Change  
** Non refundable and non transferable  
*** Six courses for weekdays, four courses for weekend classes

The summer session fee is charged on a per credit hour basis. Convocation fee of Rs. 7,500 is charged on completion of the degree program, inclusive of degree charges of Rs. 3,000. MBA executive and weekend students, planning to take less than a full load, would be charged registration and tuition accordingly. However, the refundable caution money will remain the same.
Bilal Khan  
**Head of IT, EMIRATES Airline**  
IoBM provided me an insight into business studies, corporate culture, and helped in becoming a better human being. It groomed my personality, self confidence and gave me the inspiration to achieve.

Hammad Khan Saddozai  
**Royal Preferred Banking (RPB) Manager, The Royal Bank of Scotland**  
IoBM provided me with the best time of my life. The friends I made there are still with me, while the knowledge I received is invaluable. The campus was state of the art, providing the students with everything that was needed. In short, CBM gave me a start that every student should have to succeed in the life ahead.
ORGANIZATION
Institute of Business Management

BOARD OF GOVERNORS
The Board of Governors exercises the powers to hold, control and administer the property, funds and the resources of the Institute. It also approves the Annual Report, Plan of Work, Statements of Accounts and the Annual Budget Estimates as recommended by the Executive Council. It is also responsible for ensuring effectiveness of the Institute’s operations and continuity and preservation of its autonomy.

Members of the Board of Governors (listed on Page 9).

EXECUTIVE COUNCIL
The Executive Council is responsible for formulating and approving the principles, policies and plans governing the activities and operations of the Institute so as to facilitate teaching and other academic work. It can appoint faculty, researchers and officers on the recommendation of the Selection Board. It can also create new components of the Institute such as faculties/departments/college, and constitute standing committees, subcommittees, councils, and other administrative or academic advisory bodies, if necessary. It can undertake initiatives to ensure efficient and effective management and functioning of the Institute. It proposes plans of work for the approval of the Board of Governors.

Members of the Executive Council
> Mr. Basheer Jamnomenclad, Chairman
> Chairman, Higher Education Commission, or his nominee
> Mr. Shahjahan S. Karim
> A Judge of the High Court nominated by the Chief Justice
> Secretary, Government of Sindh Education Department or his nominee
> Mr. Abdul Ghaffar Adamjee
> Mr. Salahuddin Qureshi
> Mr. Muhammad Ali Tabba
> Mr. Muhammad Sharif
> Dr. Javed A. Ansari, Dean CBM
> Mr. Talib S. Karim, Secretary

ACADEMIC COUNCIL
The Academic Council is responsible for:
> Advising the Executive Council on academic matters
> Regulating the conduct of teaching, research, publications and examinations
> Regulating the admission of students to courses of studies and examinations at the Institute
> Regulating the conduct and discipline of the students of the Institute
> Regulating award of financial assistance, exhibitions, medals and prizes

FOUNDATION FOR HIGHER EDUCATION

Foundation for Higher Education was established in 1994 under the Societies Registration Act, 1860 as a non-profit institution committed to the provision of quality education in Pakistan. IoBM is the first educational institution established by the Foundation. Following are the members of the Foundation:

> Mr. Shahjehan S. Karim, President
> Mrs. Justice Imam Ali Kazi
> Mr. Z. A. Nizami
> Dr. Mehtab Karim
> Mrs. Sabina Mohsin
> Dr. Ahmer S. Karim
> Mr. Talib S. Karim
> Mr. Shoaib Nabi Ahmed
> Mr. Sani Ahmed
> Dr. Musarrat Hasan
> Mr. Mohsin Furqan

Mr. Aftab Ahmed Khan, Chancellor, IoBM, presenting degree to a BBA (Honors) graduate
Dr. Sanjay Gajria  
**Senior Product Manager, GlaxoSmithKline Pakistan**

“Being a doctor you tend to lose sight of the business potential in you. The IoBM Health Management program’s contemporary approach gives you the right dose to have a substantial competitive advantage to prosper in the pharmaceutical business”. The IoBM Health Management program is one of the best programs for doctors to explore and polish their business side. The program has helped me grow and prosper in the pharmaceutical industry giving me in-depth knowledge of the health management industry. My journey of 5 years at IoBM was full of passion, excitement and determination. IoBM gave me not only education but also a vision for the future. The faculty at IoBM was indeed a vehicle to move forward. The support of friends and colleagues was instrumental in confronting the ups and downs throughout my journey at the college. It was my privilege to be associated with IoBM which gave me education, confidence and personality. The confidence which I developed over the years encouraged me to contribute to our society as well. Along with my friends and family I have formed a group with the name of “Show You Care” (SYC). The aim of SYC is to create social awareness and to impress upon the concerned authorities to provide proper ancillary facilities such as ramps and elevators in public places for the physically challenged people of our society. I believe that special people are not ‘Disabled’, they are ‘Differently Able’.

Taha Saleem

**BBA (Honors)**

A life far away from the centre city, a life in this serene red coated academy, hallmarks my personality and my vision forever. I’ll forever be grateful to what this place gave me, not only education but the gift of knowledge to pursue, the personality to boast on, the memories to cherish, and the friends to live for! Thank you, IoBM!

Adeel Abbas

**Executive Engineer, PIA**

It's a great honor for me to have completed my MBA from IoBM. It is among the top three Business Schools of Pakistan. My sincerest prayers are for my Institute, its faculty and staff.
FACULTY
Institute of Business Management

FACULTY OF CBM

He has four years of teaching experience at various degree awarding institutions. He has expertise in Visual Programming Languages and Computer Graphics Technologies. His research interests include the areas of Artificial Neural Networks, Fuzzy Logic and Data Warehousing.
Najmus Saher Shah, Lecturer in Computer Science, holds an MCS degree and BSc (Honors) in Economics from the University of Karachi and has secured 2nd position in the department. She has three years of teaching experience.

Asim Iftikhar, Lecturer in Computer Science, holds a Master’s degree in Computer Science and is currently enrolled in MS program leading to PhD. He has also done Microsoft Certified Professional Systems Engineer (MCSE). He has eight years of teaching experience in computer related courses. His areas of interest include Digital Communications, E-commerce & Web Development and Graphics Designing.

Imran Chughtai, Lecturer in Computer Science, holds a Master’s degree in Computer Networks and Communications from Westminster University, London. He has amassed eight years of industry experience including 3 years working as a software engineer in London. He is currently enrolled in the CISCO program for higher certification. His interests include Computer Networking, Routing and Switching.

Industrial Engineering

Dr. Mohammad Irshad Khan, Senior Fellow and Head of the Department of Industrial Engineering with the rank of Professor, holds a PhD degree in Chemical Engineering and a Postgraduate Diploma from University of Bradford, UK. He has over 30 years experience of Industry and Management and is a registered consultant of the Islamic Development Bank, Jeddah and SMEDA, Pakistan.

Muhammad Moin Uddin Ali Khan, Head of Quality Enhancement cell and Senior Fellow Industrial Engineering and Management, has BSc and BE degrees from University of Karachi and MS in Engineering from University of Missouri, USA. He has been trained in fields of Operations Management, Quality Assurance, Environmental Management, Supply Chain Management and Technology Management from USA, Japan, UK, South Korea, Sweden, Russia, Brazil and Australia. He has been associated with the industry and education for over 34 years. He is certified lead Auditor ISO 9000 QMS and is actively involved in developing Quality Enhancement activities at IoBM in close coordination with the HEC of Pakistan. His research publications are in the areas of advanced materials and has been guest speaker at American and Malaysian Universities.

Asif Iqbal, Assistant Professor, Industrial Engineering has a Master’s degree in Computer Science from Depaul University, USA, and BE in Electrical Engineering from NED University, with 12 years of professional and 3 years of teaching experience.

Zeeshan Ellahi Vohra, Lecturer Industrial Engineering, holds an MSc Degree from the University of Manchester. He has specialized in Manufacturing Management, Advanced Manufacturing Technologies, Consultancy Tools, CAD/CAM, Advanced Machining Technologies and E-Manufacturing. He also holds a BE Mechanical Engineering degree from NED University.
**Institute of Business Management**

**Abdul Shakoor Memon**, Adjunct Faculty, Industrial Engineering, is an MSc Engineering from UMIST, Manchester, UK and BE Mechanical from Sindh University. He has also served as an Associate Professor at Sindh University, Jamshoro. He has over 30 years work experience at Sui Southern Gas Co. holding different positions related to his field.

**Mathematics and Statistics**

**Dr. Syed Iftikhar Ali**, Senior Fellow with the rank of Professor, holds MS and PhD from England. He has a vast teaching experience and has worked for SUPARCO, University of Benghazi (Libya), FAST Institute of Computer Science (Karachi) and Yanbu Industrial College, Saudi Arabia. He is a chartered Physicist and Member of Institute of Physics (London). His main interests are in the areas of Mathematics, Physics and Numerical Analysis.

**Laiq Muhammad Khan**, Senior Fellow in Statistics, holds an MSc in Statistics from the University of Karachi. He has over 30 years experience, teaching Statistics to undergraduate and graduate students. He has been associated with IoBM as visiting faculty since August, 2000.

**Wajhat Ali**, Senior Lecturer in Mathematics, has an MSc from the University of Karachi. He has been involved in research and teaching in Mathematics and Statistics.

**Rizwan Ahmed**, Senior Lecturer in Mathematics and Statistics, has done his MSc in Statistics and MPA (Finance) from the University of Karachi. He has also done his MAS (Applied Economics) from Applied Economics Research Center, University of Karachi. He has six years of teaching experience at various institutes. His areas of interest are Quantitative Analysis for Business and Management, Statistical Inference, Macroeconomics, Mathematical Economics and Business Finance.

**Adnan Rauf**, Senior Lecturer in Mathematics, holds MSc in Industrial and Business Mathematics from the University of Karachi and MS in Industrial Mathematics with specialization in “Mathematical Modeling and Scientific Computing” from TU Kaiserslautern, Germany in 2004. He has taught at FAST and Hamdard University.

**Hina Samreen**, Instructor in Mathematics holds an MSc in Applied Mathematics and Master’s in Applied Economics from the University of Karachi. She has been actively involved in research related work and assisted Pakistan Institute of Education and Research in the development and preparation of various policy papers in labor management and allied subjects.

**Mohammed Ather Akhalq**, Instructor in Mathematics and Computer Science, holds a Master’s degree in Computer Science from IoBM and is currently pursuing an MPhil program. His research primarily focuses on MIS and technology. He has worked at Standard Chartered Bank in IT Department and in Jaffer Business Systems as an internee. He had been a Senior Management Analyst at Bearing Point, a multinational management and technology consultants company.
Telecommunication

**Dr. Asadullah Shah**, is Professor of Telecommunication Engineering and Head of the Department of Telecommunication Engineering & Management. Before Joining IoBM he worked as Head of Telecommunication and CS Departments of Sukkur IBA and Dean faculty of Computer and Management Sciences, Isra University, Hyderabad. Dr. Shah has a total of 24 years teaching and research experience. He has 44 research publications in International and national journals and conference proceedings. He has produced 4 MPhil and PhD students and currently 4 more students are registered under his guidance. Dr. Shah has done his undergraduate degree in Electronics, Master’s degree in Computer Technology from the University of Sindh, and PhD in Multimedia Communication, from the University of Surrey, England, UK. His areas of interest are multimedia compression techniques, research methodologies, speech packetization and statistical multiplexing. He has been teaching courses in the fields of electronics, computers, telecommunications and management sciences.

**Izhar Ullah Siddiqui**, is a Senior lecturer in Telecommunication. He holds a BSc degree from the University of Karachi, BE (Elect) from NED University of Engineering and Technology Karachi and a Master’s degree in Telecommunication Engineering. He has taught at NED University and worked as an ADE in the Telegraph & Telephone Department (T&T), Govt. of Pakistan. He has received two years training at Staff College in the field of telecom systems. He has been awarded a scholarship for advanced professional training in the field of telecom system by Deutsche Bundes Post (Germany). In addition to that, he has attended training in M/s Alcatel (France) for (E10B) system, and M/s Huawei (China) and Next Generation Network (NGN). He has more than 25 years experience in handling different telecom projects, maintenance and operation(M&O) work at T&T/ PTCL as an ADE/DE / Director Karachi Multi Exchange Area (KMEA).

**Adnan Alam**, Lecturer in Telecommunication, holds a Master’s of Computer Science and Master’s of Science in Telecommunication from Hamdard University. He is currently enrolled in PhD in telecommunication.

Mr. Shahjehan S. Karim, President IoBM, awarding degree to a BBA (Honors) graduate at Convocation, 2009
FACULTY OF CESD

Commerce

**Mohamed Aslam Dossa**, Head of the Department of Commerce and Professional Studies, is a qualified Chartered Accountant and a Chartered Management Accountant (England). **Saqib Shaikh**  
*District Field Manager, Pfizer*

I always feel proud that I earned my MBA from one of the top business institutes of the country. IoBM has played a great role in my professional and personal development, which will help me to excel in my professional career.

---

**Saad Aftab**  
*Joint Director, IKON Essences*

The Institute has alway been a place for me where apart from the academics, a great deal of learning incorporated with public dealing skills was cultivated into my personality. The ups and downs in my academic life and a smooth landing with the MBA degree in my hands was a learning experience altogether which has made me what I am today.
COURSE DESCRIPTIONS
The courses offered by the Institute, covering a wide range of fields, are especially designed to help students gain an insight into the subject matter. The contents of the courses not only cover an international perspective of the concept taught but also place a special emphasis on the local/national content.

> Students should ensure that they complete the pre-requisite courses before opting for advanced level courses.
ACCOUNTING

ACC101/402  Introduction to Financial Accounting
This course is aimed at people with no or limited prior knowledge and provides an understanding of how financial statements are prepared for various types of organizations. The principles of financial accounting course focuses on the record-keeping and financial statement preparation process. On completion of the course, students should develop a thorough understanding of accounting records, learn how to record transactions and develop an ability to apply accounting concepts, principles and practices.

ACC102/103  Introduction to Financial Accounting
The objective of this course is to enable students to understand fundamentals of accounting theory and apply it to basic financial accounting. The course will help them to develop knowledge and understanding of financial statements and the techniques used to prepare financial statements including necessary underlying records.

ACC104  Cost and Management Accounting
This course covers the understanding of cost concepts, cost classifications, flow of costs stream, costing methods and accounting of elements of costs.

ACC201  Intermediate Financial Accounting
This course covers all aspects of corporate accounting, analysis of financial statements and specialized accounting for leases, construction contracts, inflation and taxation.
Pre-requisite:  ACC 101

ACC202/204  Taxation I & II
The aim of these courses is to develop basic knowledge and understanding in the core areas of income tax and its chargeability as envisaged in the Income Tax Ordinance 2001 and the Income Tax Rules 2002 (relevant to the syllabus), Sales Tax Act 1990 and the Sales Tax Rules (relevant to the syllabus).

ACC203/304  Financial Accounting I & II
This course covers all aspects of accounting concepts, accounting equation, rules of accounting, recording the transactions, adjusting & rectifying the books, preparation of financial statements, analyzing financial statements, reconciling the books.

ACC301/401  Introduction to Managerial and Cost Accounting
The course is designed to make students familiarize with product costing systems, including job order costing, process costing, joint products and by-products. It gives students managerial accounting concepts applicable to planning, controlling & decision making.
Pre-requisite:  ACC 402

ACC302  Accounting and Financial Information Systems
This course provides an understanding of computer based accounting and hands on training of application of accounting package.
Pre-requisite:  ACC 101, CSC 203

ACC305/415  Cost Accounting I & II
The course is designed to equip candidates an understanding of the importance of the role of cost accounting in planning and controlling the wide range of organizational and manufacturing cost. The students are expected to acquaint themselves with a comprehensive knowledge of established practices of cost accumulation methods and learn the application of this knowledge to basic planning, control and decision making.
Institute of Business Management

**ACC405 Internal Auditing and EDP Accounting**
This course covers the understanding and application of internal auditing tools and techniques and information system for management of risk and security system.

**ACC410 Management Accounting**
This course deals with the performance evaluation, decision making and control aspects of business. It creates an understanding of cost concepts, principles, tools and techniques of management accounting for performance measurement, operational and investment decisions and cost controls.

**ACC413 Managerial Accounting**
This course is designed to familiarize students with product costing systems including job order costing, process costing, joint products and by-products. The course also covers budgetary planning & control systems including standard costing and variance analysis, cost/volume/profit analysis, performance measures evaluation, etc.

**ACC414/416 Auditing I & II**
The purpose of the course is to give students theoretical and to a limited extent, technical knowledge and skills of auditing and review of historical financial information. It will provide a foundation for acquiring intensive knowledge required for professional competence.

**ACC501 Advanced Financial Accounting**
The course will enable students to understand and learn accounting aspects of topics in partnership, head office/branch relationship, installment sales, business combinations, foreign currency translation and bankruptcy and liquidation.
Pre-requisite: ACC 402 / ACC101

**ACC502 Advanced Managerial Accounting**
This course covers the use of accounting data for managerial decision, control and planning purposes and provides in-depth analysis of various techniques and methods used by managers.
Pre-requisite: ACC 401/403/410

**ACC503 Taxation**
Tax law is studied with a special emphasis on what constitutes taxable income and allowable deductions for individual tax payers. The course also includes a comprehensive coverage and treatment of taxes as related to business profits.
Pre-requisite: ACC 201

**ACC505 Auditing**
This course covers the understanding of audit techniques, rules, principles and procedure and their application in the audit of financial statements, relevant records and source documents.
Pre-requisite: ACC 402/501

**ACC506 Analysis of Financial Statements**
The course begins by describing accounting standards of USA and international accounting standards with a special focus on developing students’ capability to standardize various companies’ financial statements. The course develops a road map of financial analysis from both the creditor’s and equity investor’s point of view.
Pre-requisite: ACC 402/501
ADVERTISING

ADV401 Principles of Advertising
The course provides working knowledge of advertising while giving an insight into various tools used for advertising to sell goods and services. The students will analyze the current issues facing the business of advertising and the environment in which it operates.

ADV402 Advertising Management
The course investigates the nature & scope of advertising and its place within marketing strategy decisions and society. The students will learn the methods of planning, preparing, placing and evaluating an advertising message in the applicable media.
Pre-requisite: ADV401, MKT401

ADV403 International Advertising and Promotions
An intensive analysis of theoretical concepts and the practice of international advertising. The course also covers environmental considerations in international advertising, planning and execution of advertising worldwide, and the role of media in the debate surrounding standardization versus localization of worldwide advertising campaigns for consumer/industrial products and services.
Pre-requisite: MKT 401/509, ADV401/402

ADV406 Advertising Strategy
A study of the theoretical foundations and the process of developing advertising and promotional strategy; methods of utilizing research data for developing and evaluating advertising strategy.
Pre-requisite: ADV401/402/405, MKT401/509

ADV407 Creative Production
The course gives an insight into the competing factors of “brilliant instinct” as opposed to the disciplines of the marketing process; the diligence of research & its interpretation; strategic thinking & an understanding of positioning and brand identity, the considerations for cost effectiveness and the necessity for teamwork.
Pre-requisite: ADV401/402/405/406, MKT509

ADV408 Client Management
The course will provide opportunities to practice advertising management by analyzing and discussing situations that arise in the course of advertising management and create future advertisers who have good command over strategic thinking, creative analysis and client management.
Pre-requisite: ADV401/402, MKT509/527

ADV409 Advertising Campaign
A presentation of the skills, necessary to design, implement and manage advertising campaigns, with an emphasis on planning and decision making procedures applied to specific advertising problems.

ADV501 Creative Management
The course provides an understanding of the purpose and process of developing creative work in an advertising agency and all relevant issues in the creative process from brief to market success.
Pre-requisite: ADV401/402
Institute of Business Management

ADV504 Advertising Management and Strategy
This course is concerned with planning and managing programs for advertising products and services. It involves preparatory research, setting of objectives, planning of budget media, creative programs and evaluation of advertising effectiveness.

ADV505 Creative Planning and Development
The course will help the students generate fresh, unique and appropriate ideas that can be used in advertising and learn tactics to improve on advertising campaigns including developing central selling points and creating a brand image. The course will give an insight into the steps involved in the process of creativity.

ADV506 Media Performance and Product Development
This course teaches the students about developing an entirely new media outlet, be it print or electronic. This course also teaches students to track the effectiveness, importance and challenges for media managers through case studies that encourage student to apply the text matter to contemporary issues.

COMMUNICATION

COM101/401 General English / Business English
This course has been designed to improve the students' understanding and use of writing skills in English and inculcate a maturity of thought appropriate to students in their freshman year.

COM102 Business Communication I
Employees as well as employers need to be able to write effective messages, whether for supervisors or themselves in business and industry. This course provides students with the fundamentals of effective writing which can be applied in other courses, and in any correspondence required of them in their future occupations. Students will write, rewrite and edit business messages in a positive tone for specific purposes and solving real life business communication problems.
Pre-requisite: COM 101

COM201 Business Communication II
This course builds on the skills students acquired in COM 102 by applying them to advanced business writing situations, such as reports, proposals and formal research reports. Students will learn to respond to requests for proposals from a real life organization. They will also research and write an executive research report that solves a real business related problem. Students will learn the research and writing techniques necessary for complex professional documents.
Pre-requisite: COM 102

COM103/104 Functional English I & II
The objective of this syllabus is to help students communicate effectively in English language through proper usage of vocabulary and knowledge of English grammar. It will provide a basis for composition and comprehension, practical use of grammar and writing mechanics

COM105/106 Business Communication and Behavioral Studies I & II
The course aims to introduce students to the key concepts of business communication and their application. The course also intends to incorporate an understanding of the concepts of organizational behavior to develop problem solving skills, negotiation skills and leadership qualities in the students.

COM107 Introduction to English Literature
The course includes a study of Shakespeare's “As You Like It” and one of Somerset Maugham's collection of short stories, Pakistan English literature, one novel by Sidhwa or Qureshi and Omar Qureshi's essays.
COM202 Business and Professional Speech
This course is designed to improve the students’ interpersonal, intrapersonal and public communication abilities to analyze topics, support assertions with proof, amplify ideas, structure messages, use language in appropriate and imaginative ways, and deliver messages with effective vocal and physical behavior. Basics of oral communication, principles and context of communication; interviewing skills, public discussion, group problem solving, public speaking are the salient features of the course.
Pre-requisite: COM 101

COM203 Methods in Business Writing
Essential to effective business communication is the preparation of business letters and other documents, including memoranda and job resumes. The student learns to write clear, coherent, effective messages that reflect consideration of writer’s intent and reader’s response. Organization and format appropriate to a given situation are stressed, so are the revisions and editing to produce an acceptable copy.
Pre-requisite: COM 201

COM402 Business Communication
This course aims at creating awareness of the current norms and conventions of written business communication. It teaches students how to plan, organize, and write correct and effective “reader friendly” business documents appropriate for use in today’s global business environment.

COM403 Interpersonal Communication Skills
This course has been designed to enable students to develop skills in the areas of interpersonal communication, as well as, personal management. After completion of this course students would have a better understanding of interpersonal relationships and the role that communication plays in such relationships.
Pre-requisite: COM 402

COM405 Organizational Consulting Skills
This course is primarily designed for the practitioner who provides services to agencies, professionals, or organizations. The purpose of the course is to provide an understanding of the process of organizational consultation. The course focuses on the essential skills and abilities needed for successful consulting to organizations. Topics include business development, project management, cost estimation and report writing. The course emphasizes learning techniques used for successful group presentations and skills for effective oral and written communication.

COM406 Applied Linguistics
This course introduces students to the nature of language and the way in which language is acquired and used in society. It also addresses grammatical aspects of language, such as syntax, semantics, and pragmatics and changes in language over time. Stages of language acquisition and bilingual development will also be discussed.

COM407 English Language Development
This course is designed to develop the listening, speaking, reading and writing skills of the learners. Intensive oral, reading and writing activities focus on accelerating progress in linguistically appropriate developmental aspects of grammatical/spelling/pronunciation accuracy.

COM408 Critical Thinking and Reading
This course introduces participants to critical reading as a process of analyzing and evaluating the context and purpose of written texts by focusing on the four basic methods of critical thinking: analysis, interpretation, evaluation, and synthesis. One of the aims would be to teach the participants to analyze reading texts and understand the main ideas and views through the use of a variety of authentic academic reading formats.
Institute of Business Management

COM409 Proposal Writing
This course is designed to prepare students to write technically sound proposals that win contracts. It focuses on both clear writing and the business aspects of proposal writing. It will train students in the direction and organization needed to tackle the work involved in responding to a large government or corporate requests for proposals.

COM410 Literature Review
This course is intended for students preparing to write a master’s thesis or doctoral dissertation. The course will explain what a literature review is and offer insights into the form and construction of a literature review. The course will also give an insight into the stages in the development of literature review, the patterns to organize a literature review and the resources to develop literature review.

COM411 Thesis Writing (equivalent to 12 credits)
The participants will be given further guidance and readings to conduct a research project of approximately 6000-8000 words in their own work environment. The project is likely to be based on the investigation of a management issue leading to recommendations for improvement and action. The investigation could take the form of empirical research or it could be based on desk research, making use of already available data.

COMPUTER SCIENCE

CSC102/400 Introduction to Computer Science
Introduction to computers, types, generation, units, methods of computing, algorithm development and number systems, flow of control, basic number codes, overview of computer systems, using computer software.

CSC103/401 Structured Programming Language
The course enables students to develop short programs using conditional statements and loops and functions, structure, linked list and file processing. Students are required to complete a project at the end of the course using C language.

CSC105/402 Data Structure and Algorithms Design
The course covers object oriented design, static and dynamic data structures (strings, stacks, queries, binary trees), recursion, searching and sorting.
Pre-requisite: CSC103

CSC201/403 Low Level Programming Language
Digital computer organization, machine language, instruction execution, addressing techniques, digital representation of data symbolic coding and assembly system; macros; conditional assembly; I/O control subroutine linkage, system and utility programs are covered in this course.
Prerequisite: CSC105

CSC202 Digital Computer Logic
The course covers an introduction to switching logic and combination circuits, minimization techniques, Karanugh Map and Quin Mcclusky methods, Half Adders & Full Adders, Combination Circuits using MSI AND LSI Components and an introduction to Micro Programming.
Prerequisite: GSC101 [Not pre-requisite for BS (MIT)]

CSC203 Object Oriented Programming Language
The course includes the basic concepts of object-oriented programming, functions, classes, linked list, procedures, Data Abstraction, Inheritance and Polymorphism, Filing Concept, Data Retrieval and saving into Binary and Text files.
Pre-requisite: CSC103
CSC205  Computer Architecture & Organizations
The course involves a study of information set architecture, processor performance and design, data path, control (hardware, micro programmed), pipelining, I/O memory organization with cache virtual memory.
Prerequisite:  CSC201, CSC202

CSC206  Database Management Systems
This course develops an understanding of a database software package developed for microcomputer applications. Topics include how to design implement, and access a database.
Pre-requisite:  CSC102

CSC208  Network Programming Framework
This course presents an overview of the technology, architecture and software used by the systems of network connected computers. The course will cover data transmission, local area network architecture, network protocols, internet working, distributed systems, security, and World Wide Web technology. Students will write programs that run concurrently on multiple computers.
Pre-requisite:  CSC105

CSC301  Theory of Automata
Automata and formal language, regular expressions, Turing machines, recursive functions, formal languages, non-deterministic automata and push down automata are the contents of this course.
Pre-requisite:  MTH201

CSC302  Multimedia Technologies
The course covers design, use and applications of multimedia systems. It introduces acquisition, compression, storage, retrieval and presentation of data from different media, such as images text, voice and video. Current multimedia tools would be used to develop multimedia projects.
Prerequisite:  CSC203

CSC303  Computer Graphics
This course discusses the introduction to computer graphics hardware, algorithms, and software. The topics include: line generators, affine transformations, line and polygon clipping, splines, interactive techniques, perspective projection, solid modeling, hidden surface algorithms, lighting models, shading, and animation. Substantial programming experience is required.
Pre-requisite:  CSC203

CSC304  Operating Systems Concepts
This course describes the fundamental concepts behind operating systems and examines the ways that desing goals can be achieved. Two primary aims of an operating systems are to manage resources (e.g. CPU time, memory) and to control users and software.

CSC305  System Analysis & Design
This course provides study of structured techniques in data processing applications, objectives, investigation, system models, design effectiveness, procedures, etc. Physical models, data models, project dictionary and project management tools and techniques are also covered as part of the course.
Prerequisite:  CSC204

CSC308  Operating Systems Concepts
Topics of the course include software organization, translation, linkage, loading and executing, control programs for batch processing, time sharing and real time application, accounting, communication between programs units, multiprogramming and multiprocessing system, etc.
Prerequisite:  CSC205
Institute of Business Management

**CSC309  Microprocessor and Applications**
The course discusses the structure of Microprocessor, Bit slices and 8/16/32 bit microprocessors, processor architecture, registers, index and stack pointers, address modes, I/O interface adapters, interface devices, system clock, clock phase and bit rates, memory read-write and read only, memory mapping of I/O interrupts, handling of interrupts, direct memory access methodologies.
Pre-requisite: CSC201, CSC205

**CSC313  Numerical Computing**
This course covers the study of errors, calculations and importance in numerical computing, various methods of solution of non-linear equations, Newton’s Method and Conditions of convergence.
Pre-requisite: MTH105

**CSC345  Digital Image Processing**
The course includes digital image fundamentals, image sampling & quantization problems, image modeling & geometry, image translation, rotation, convolution, FFT & DCT, Walsh transform, histogram modification, edge linking & boundary detection, image compression techniques.
Prerequisite: CSC303

**CSC410  Data Communication & Networking**
The course focuses on Data Communications and network management overview, review of computer network technology, standards, models, and language.
Pre-requisite: CSC304

**CSC411  Compiler Construction**
The course discusses the structure of compilers, lexical analysis, syntax analysis, semantic analysis, abstract interpretation, Tree: pattern matching and parsing and code generation.
Pre: CSC301

**CSC412  Artificial Intelligence**
The course introduces the overview of AI applications area, predicate calculus and structures and strategies for state of space search. It also discusses the Heuristic search, control and implementation of state space search. An introduction to Prolog and LISP is also given. Other topics may also be covered, such as Rule-based expert systems, knowledge representation and natural languages.
Pre-requisite: CSC301

**CSC414  Visual Programming Language**
The course introduces a visual programming concepts, which may cover the topics: using and customizing the development interface, application and class wizards, resources, dialog boxes and control the gallery, writing and using ActiveX controls, Optimizing and debugging, building macros with scripting language and tools.
Pre-requisite: CSC 203

**CSC417  Project**
The aim of this project is to bridge the gap between the academic study and training needed by industry and businesses. Students are initiated to work under close faculty supervision, on real-world problems of sufficient magnitude. Project implementation and documentation are the main concerns.
Pre-requisite: CSC414, CSC305

**CSC 422  Parallel Computing**
The course includes the introduction to parallel computing, a review of parallel hardware, library-based and language-based approaches to parallel computing and basic concepts of parallel computing.
Pre-requisite: CSC435

176
CSC425 Advanced Operating Systems
This course covers many advanced topics in operating system design and implementation such as operating systems structuring, multi-threading and synchronization in detail and then moves on to systems issues in parallel and distributed computing systems.
Pre-requisite: CSC304.

CSC427 Software Engineering
The course introduces the basic concepts & modern tools & techniques of software engineering, stresses the development of reliable & maintainable software via systems requirements & specifications and software design methodologies.
Pre-requisite: CSC305

CSC428 Web Engineering
Overview of Protocols: TCP/IP, HTTP, 3-tier Architecture, Web Based Applications Architecture. Front End Applications: Front End Development Tools, HTML, DHTML, Scripting, Java Applets, ActiveX.
Pre-requisite: CSC302

CSC430 Decision Support Systems
An introduction to the analysis, design, and application of information systems used in the direct support of management decision making. This includes not only comprehending key ideas, concepts and facts, and the ability to restate them in different terms, but extends to the ability to evaluate to assess and choose among alternative concepts and ideas, to relate and reconcile among them, and apply them to new situations.
Pre-requisite: CSC305

CSC432 Systems Administration
A survey of the tools and techniques used in the administration of computing systems, system installation and the use of advanced scripting to ease system administration tasks are contents of the course.
Pre-requisite: CSC304

CSC434/563 Software Quality Assurance
This course extends Software Engineering concepts to focus upon quality, from the perspective of the software, user, customer, and support staff. Topics included are software quality practices, user friendly systems design, modularity and structure, requirements coverage, systems architecture, designing from test maintainability, and an overview of languages and their fit toward various target applications.
Pre-requisite: CSC422

CSC 435/574 Distributed Systems
The aim of this course is to provide students with an understanding of the principles, techniques, and practice in the design and implementation of distributed systems, with a particular focus on infrastructure software.
Pre-requisite: CSC204, CSC427

CSC436 Business Process Re-Engineering
The course covers the concepts of business process re-engineering: guidelines, planning phase, redesign phase, transition phase, implementation phase. Total quality management (TQM) techniques, How TQM and Re-engineering are different, Desktop computing and LANs, how re-engineering improves an organization's efficiency; the ISO 9000 and TQM, Achieving TQM and the ISO 9000 directives.
Pre-requisite: CSC305
**Institute of Business Management**

**CSC438 Multi Tier Programming**
This course extends the theory and skills gained in the foundation course, and the object oriented programming course. Using numerous N-tier distributed technologies, the student will gain experience in developing multi-tier applications using conducive programming language and satisfying industries need for distributed computing personnel.
Pre-requisite: CSC203

**CSC439 Software Architecture Design**
This course covers the fundamental design principles and strategies for software architecture and design. Design methodologies, architectural styles, quality attributes, notations and documents, reference architecture, and pattern-oriented design, component-oriented design, service-oriented design, and interface design in detail and design process are also discussed.
Pre-requisite: CSC427

**CSC442 Human Computer Interface**
It provides an introduction to human-computer interface design and evaluation, with an emphasis on graphical user interfaces for software products. It covers design principles and theory, usability engineering methods, and selected basic research in the areas of human factors and human cognition, hands-on application of learned principles using, NET or other languages.
Pre-requisite: CSC305, CSC203

**CSC443 Mobile Computing**
The course includes Mobile Information Device Profile (MIDP 2.0) programming using J2ME (de facto standard for mobile devices) to supplement the introduction to wireless Internet (WAN, LAN and PAN) covered in the classes. By the end of this course, you will have acquired a deep understanding of various wireless programming concepts and APIs and developed extensive knowledge that you can use to develop sophisticated MIDP applications.
Pre-requisite: CSC410, CSC414, CSC425

**CSC444 Electronic Commerce**
This course emphasizes organizational issues related to electronic commerce, such as business models for B2B or B2C e-commerce, technology infrastructure, electronic payment mechanisms, information privacy, and competitive advantage.
Pre-requisite: CSC102

**CSC445 Network Security**
Cryptology and simple cryptosystems; conventional encryption techniques; stream and block ciphers; DES; Block Ciphers; The Advanced Encryption Standard; confidentiality & message authentication: hash functions are the contents of the course.
Pre-requisite: CSC208

**CSC447 Object Oriented Database Management Systems**
The students will learn how the principles of design impact on the design of database management systems; develop an entity relationship diagram to respond to a data management issue; differentiate between relational and object-oriented database management systems; develop and use strategies to plan and implement a database management system; and provide examples of file system concurrency control and distributed databases.
Pre-Requisite: CSC203, CSC204
**CSC448  Digital Signal Processing**
One- and N-dimensional signals and systems, sampling theorem, discrete-time fourier transform, discrete fourier transform, fast Fourier transform, z-transforms: stability and minimum phase signals/systems, linear filtering of signal: time domain: difference equations and convolution, impulse invariance, etc. are the contents of the course.
Pre-requisite: CSC313, CSC410

**CSC451  Telecommunication Systems**
The course includes introduction to media, bandwidth and noise. Twisted pair (UTP, STP), coaxial cables (types and specifications), optical fibres (types and losses), introduction to optical sources and detectors. Microwave links, satellite communication and infrared links, etc.
Pre-requisite:  CSC410

**CSC510  Wireless Communication**
The course discusses the historic development of wireless communication, communication satellites and its systems, satellite frequency bands, satellite multiple access formats, brief treatment of modulation, encoding, decoding, satellite channels, protocols, application of satellite in data in computer communication.
Pre-requisite:  CSC410

**CSC531  Data Warehousing**
This course provides an introduction to data warehouse design. Topics in data modeling, database design and database access are reviewed. Issues in data warehouse planning, design, implementation and administration are discussed in a seminar format.
Pre-requisite:  CSC204

**CSC541  Advanced Research Methodology**
Students will be given an in-depth analysis to the research methods used in the study of organizations and especially in the study of computer science issues. The course will cover the quantitative and qualitative research processes, which includes sampling techniques, measurement and measurement testing, generalizability and a practical seminar relating to questionnaire construction and data gathering and management.

**CSC543  Advanced Computer Architecture**
Design and evaluation of modern uni-processor computing systems, evaluation methodology/metrics and caveats, instruction set design, advanced pipelining, instruction level parallelism, prediction-based techniques, alternative architectures (VLIW, Vector and SIMD), memory hierarchy design and I/O. Case studies.

**CSC545  Decision Theory**
The course combines approaches to decision theory. It is intended for advanced undergraduates and graduates students in computer science. The course will cover basic decision theory, also known as "rational choice theory"; the limitations and problems with this theory, as it applies to computers and to human agents.

**CSC547  Analysis of Algorithms**
Introduction; asymptotic notations; recursion and recurrence relations; divide-and-conquer approach; sorting; search trees; heaps; hashing; greedy approach; dynamic programming; graph algorithms; shortest paths; network flow; disjoint Sets; polynomial and matrix calculations; string matching; NP complete problems; approximation algorithms.

**CSC561  Advanced Software Engineering**
System development using formal techniques, algebraic specification, abstract model specification, verification: proof systems, proof techniques, proof obligations, design: data refinement, operation refinement, design decomposition, software reliability and metrics, macro models: productivity, effort, defect reliability modeling, simple model, markove modeling, parameter estimation, comparison of models.
Institute of Business Management

**CSC 562  Object Oriented Software Engineering**
This short course with UML, Java, and Eclipse will expose students to the basics of object-oriented software engineering, including object-oriented analysis and design using UML (Unified Modeling Language), object-oriented programming using Java, all within the Eclipse environment. Laboratory sessions will equip participants with practical experience in object-oriented design, programming, and testing.

**CSC563  Software Quality Assurance**
This course provides an intermediate QA and Test. Students will acquire a thorough skill set for their respective roles in a QA or test team environment. They will also learn both the theoretical concepts of this matured discipline and the unique experiences and innovative practices from Microsoft.

**CSC564  Software Requirement Engineering**

**CSC565  Software Testing Strategies**
The course introduces the major concepts of software testing and develops technical proficiency in test case design and test plan development to covers techniques and tools for software requirements to support testing and test plan development.

**CSC571  Advanced Database Management Systems**
This course begins with a study of advanced relational theory, followed by the SQL Application Programming Interface (API) standards. Students will also study Data Warehousing, OLTP and OLAP integration, and database distributed architectures.

**CSC573  Data Mining**
The objective of this course is to serve as an introduction to the techniques, tools and applications of data mining (DM). Also covered is the relationship between DM and other fields, such as artificial intelligence, Knowledge Discovery for Databases (KDD), data warehousing and Online Analytical Processing (OLAP). By the end of the course, students should be able to learn any commercial DM tools easily and apply DM techniques to a variety of research and application projects.

**CSC574  Distributed Systems**
This course aims to provide students with a deeper understanding of distributed systems. In particular, we focus on the principles, techniques, and practices relevant to the design and implementation of such systems. The course takes a systems-oriented view of distributed systems, concentrating on infrastructure software and providing hands-on experience implementing distributed systems.

**CSC575  Parallel and Distributed Computing**
Parallel and distributed systems. Speedup and Amdahl’s Law, Hardware architectures: multiprocessors (shared memory), networks of workstations (distributed memory), clusters (latest variation). Software architectures: threads and shared memory, processes and message passing, Distributed Shared Memory (DSM), Distributed Shared Data (DSD), etc.

**CSC576  Parallel and Distributed Algorithms**
The topics to be covered are parallel/distributed algorithms, coarse-grain parallel algorithms and applications, parallel scientific computation, interconnection networks, parallel and distributed computing on network of workstations, scheduling, languages and compiler techniques for parallel programming and theory of parallel/ distributed computing.

**CSC578  Communications and Information Policy**
This course provides an introduction to the technology and policy context of public communications networks, through critical discussion of current issues in communications policy and their historical roots. The course focuses on underlying rationales and models for government involvement and the complex dynamics introduced by co-evolving technologies, industry structure, and public policy objectives.
CSC581  Neural Networks
Basic Characteristics: The Processing Element; The Magic of the Transfer Function, Weight Adjustment Basics; Network Learning Types; Network Architectures, Comparison to Traditional Methods, Using Neural Networks with Data, Generalization, Validation and Sample Neural Networks Applications; Pattern Recognition Applications; Image Understanding NN's; Spacecraft Structure Neuro control

CSC582  Pattern Recognition
This course will introduce the fundamentals of statistical pattern recognition with examples from several application areas. Techniques for handling multidimensional data of various types and scales along with algorithms for clustering and classifying data will be explained. This is an advanced level course suited for graduate students in Computer Science and Engineering.

CSC583  Fuzzy Systems

ECONOMICS

ECO101  Principles of Microeconomics
The course focuses on the introduction to consumer behavior and the theory of the firm. Topics include the production, possibility frontier, the demand behavior of households, the supply behavior of business firms, the theory of costs, and an introduction to market structure and welfare economics.

ECO102  Principles of Macroeconomics
This course analyzes the determinants of aggregate economic activity. The main areas studied are the monetary and banking system, the composition and fluctuations of national income, and inflation, all as influenced by monetary fiscal and exchange rate policies. There is a special emphasis on the Pakistan government’s economic policies, financing the budget deficit, structural adjustment program (SAP), and privatization policies.

ECO103/105  Intermediate Micro and Macroeconomics
The objective of this course is twofold: to extend the students’ understanding of microeconomic theory and to introduce the use of mathematical and graphic models of macroeconomic process.

ECO104/401  Micro and Macroeconomics
The course analyzes the study of the working of a country’s economy in an international setting. It examines the interaction of households, business firms, government and the rest of the world in resource, product and financial business fluctuations, inflation, unemployment and monetary and fiscal policies, with a special emphasis on the Pakistan government’s economic policies, financing the budget deficit, structural adjustment program (SAP) and privatization policies.

ECO202/203  Introduction to Economics and Finance I & II
The objective of the course is to enable candidates to equip themselves with the main economic concepts and their uses and relevance in economic analysis. The course aims to serve an introduction to the economic environment of trade, industry and banking as well as to methods of analysis relevant to the study of financial decisions.
**Institute of Business Management**

**ECO204  The Pakistan Economy**
This course focuses on the structural change of employment, investment and external trade in Pakistan’s economy since 1947. It gives insight into the GDP growth of various sectors encompassing expenditure and production.

**ECO205  Economic Development of Sindh**
This course highlights Sindh’s share in Pakistan’s economy. It also encompasses the development strategy of the government of Sindh and its fiscal policy. It strives to compare Sindh and the gulf economy and focuses on the demographics, environment and the economy of Karachi.

**ECO301  Managerial Economics**
The course aims to serve an introduction to optimization techniques and their application on the market behavior in terms of demand and supply, market equilibrium and forecasting market parameters.
Pre-requisite: ECO 101, ECO 102

**ECO302  International Trade**
International Trade is primarily concerned with trade flows between nations and the resulting monetary flows that occur between nations. In this course students are exposed to theories that explain the current flow of trade, various commercial policies, foreign exchange markets, balance of payments, and macroeconomic policies that deal with various types of imbalances in the balance of payments of countries.
Pre-requisite: ECO 103/105

**ECO303  Financial Economics**
Financial Economics introduces students to the process of investment in financial markets, both at a practical and theoretical level. This course discusses various types of financial instruments in common use and the economic theories that explain how they are priced.
Pre-requisite: ECO 102

**ECO304  Introduction to Econometrics**
The course focuses on the role and uses of statistical inference in economic research; problem of spanning gap from an economic model to its statistical counterpart; measurement problems and their solutions arising from statistical model and nature of the data; limitations and interpretation of results of economic measurement from statistical techniques.

**ECO305  Topics in Microeconomics**
This course focuses on market structure and the economics of information. The course aims to make candidates comfortable enough with this area of microeconomics theory so that candidates can read applied papers in one’s areas of application and use theoretical models appropriately in research.
Pre-requisite: ECO 103/105

**ECO306  Topics in Macroeconomics**
The course aims to provide an introduction to macroeconomic analysis. Long-run growth, business cycles, trade, and fiscal & monetary policies are analyzed using dynamic general equilibrium models. Classical, Keynesian and new classical models are used to examine inflation, unemployment, the open economy, and analysis of fiscal, monetary and exchange rate policies.
Pre-requisite: ECO 305

**ECO307  Monetary Theory and Policy**
The course is a study of the theoretical and empirical work in money demand, money supply, money multiplier, output effect of monetary policies, alternative techniques of monetary policy formulation and implementation, multi-asset financial markets, and inflation.
Pre-requisite: ECO 103/105
ECO308   Capital Investment Economic Analysis
The course aims to offer an analysis of economic merits of alternatives including interest and income tax consideration. Risk and sensitivity exploration techniques and an introduction to analytical techniques for multiple objectives or criteria.

ECO402   Pakistan Economic Policy
The course is an overview of structural change in the Pakistan economy 1947-2008. The topics include GDP in terms of production sectors and expenditure; structure of employment, investment and external trade; macroeconomic policies, planning (five years and ADP); fiscal policy, monetary policy, balance of payments policy, exchange rate policy, microeconomic policy, agricultural policy, industrial policy, labour policy, social sectors, poverty and income distribution.
Pre-requisite:  ECO 101/201

ECO403   Macroeconomics
The course is a study of the operation of a country’s economy in an international setting examining the interaction of households, business firms, government and the rest of the world in resource, product and financial business fluctuations, inflation, unemployment and monetary and fiscal policies, with special emphasis on the Pakistan government’s economic policies, financing the budget deficit, structural adjustment program (SAP), and privatization policies.

ECO404   Micro and Managerial Economics
The course aims to provide an introduction to optimization techniques and their application on the market behavior in terms of demand and supply, market equilibrium, forecasting market parameters and application on business models; elasticity and risk, methods to calculate risk, risk analysis and capital budgeting and five approaches to competitive structure.
Pre-requisite:  STA 403

ECO405   Seminar in Economic Policy
The course includes growth and structural change in the Pakistan economy, fiscal, monetary and exchange rate policies, the corporate sector, trade policy, foreign investment, structural adjustment. The role of the World Bank and International Monetary Fund (IMF), discussion on regional economic cooperation. Strategies in multinational corporations and issues in the international transfer of the technology are also discussed.
Pre-Requisite: ECO 403, ECO 404

ECO406   Money and Banking
The course describes the monetary systems, financial markets, national income components and their relationship to business activity. Study of structure, regulation and performance of the banking industry.
Pre-requisite:  ECO 401

ECO408   Applied Financial Economics
The course will describe the categories, within which financially important variables exist, and develop ways to encapsulate them using simple statistics drawn from the study of simple probability distributions. It will develop graphical tools to analyze market movements, financial history and models which every person interested in finance must know.

ECO501   Microeconomics
The course will focus on microeconomic theory and its applications includes: concept of duality in the context of consumption and production decisions; general equilibrium: linear and non-linear models, fixed coefficient technology, contract curve and production possibilities frontier; aggregation issues, decision-making under uncertainty, expected utility theory, its critiques and alternatives; competitive equilibrium, welfare analysis in a partial and general equilibrium setting; the Stolper-Samuelson theorem, the Rybczynski theorem, Walrasian competitive adjustment mechanism, existence and stability of salravis equilibria; existence and stability of walravis equilibria, pareto optimality, efficiency of perfect competition; the expected utility hypothesis, the expected etility eheorems; concepts of game theory; theory of form under uncertainty, production uncertainty.
**Institute of Business Management**

**ECO502  Macroeconomics**  
The course will cover long-run and short-run macroeconomics; aggregate demand and national income accounts; saving and finance; investment and financial markets; investment and monetary policy; central bank and macroeconomic policy; money supply and interest rate transmission mechanisms; fiscal policy; discretionary fiscal policy; expectations, inflation, and interest rates; foreign exchange markets and foreign trade and international balance.

**ECO503  Econometrics**  
The course deals with issues pertinent to research in economics including: literature reviews and data sources; overall design of a research project; equation misspecification, omitted variables, errors in variables, measurement error, simultaneous equation bias; instrumental variables; dynamic single equation models; static, dynamic and equilibrium-correction models; causality and ergogeneity; co-integration tests, Johansen’s estimator; generalized linear models for binary and categorized dependent variables; random effect models for panel and other multilevel structures and diagnostic testing.

**ECO505  Theory and Practice of International Economic Policy**  
The basic aim of this course is to analyze the international aspects of development policy pursued by developing countries, using the tools of open economy macroeconomics as well as international trade theory and policy to investigate issues of concern to policy-makers in developing countries.

**ECO506  Monetary Economics**  
The course will focus on monetary issues. The principal aim will be to identify the major intellectual developments in monetary economics over the past two centuries. The course will help students examine key ideas, concepts and theories that have shaped the historical evolution of the subject with special emphasis placed on key articles in the literature. Major monetary schools, new classical Keynesian, stake flow consistency approached will be evaluated.

**ECO507  Development Economics**  
This course will offer a brief overview of selected topics in development economics. Following a general introduction to the subject and to the data the course will focus on long-term processes of productivity growth and structural transformation. This will be followed by a critical presentation of the, still rapidly growing, literature on cross-country growth comparisons (Barro regressions). The last part of the course deals with modern economic growth and globalization.

**ECO508  Mathematical Economics**  
The course includes study of mathematical concepts and tools, such as functions, matrices and higher-order derivatives in cases of single and multiple independent variables. Emphasis is on the application of optimization, both with and without constraints, and introductory integral for understanding relationships of various economic variables and concepts, such as the relationship of aggregate, average and marginal functions. Other topic covered analyses market equilibria, impact of taxation and input-output models.

**ECO509  Industrial Organization**  
The course analyzes the problems of the real economy that cannot be described within the framework of a classical economic theory that is taught by traditional micro- and macroeconomics. Lecture course covers all the three main fields of industrial organization theory: the theory of a firm, the theory of imperfect competition, and the theory of economic regulation.
ECO510  Mergers, Acquisitions & Restructuring
This course uses an analytical framework and real-world applications to introduce key principles and techniques for successful mergers, acquisitions, restructuring, divestitures and leveraged buyouts. It addresses crucial questions including: Why do mergers fail? What is the best negotiation strategy? What does it take to make the “synergy” come to life? How can a merger be funded in such a way as to retain the merged entity’s flexibility? When do leveraged buy-outs make sense, and how can they be financed? One goal for students is to develop a critical appreciation of the key financial criteria in a proposed acquisition, so as to grasp the main strengths and risks of the company’s strategic and financial alternatives.

ECO511  Taxation and Business Strategy
The objective of the course is to provide a framework that is useful for thinking about how taxes affect business activities. The focus is the impact of taxes on investment strategies and financing policies. It also considers the tax consequences of compensation alternatives to both the employer and the employee.

ECO512  Trade and Globalization
The course aims to help students review and understand the historical continuities and discontinuities in globalization, investigate in a preliminary way some particular topics in globalization studies: identity and culture, structural adjustment and world economic institutions, resistance to globalization and defense of globalization from a development perspective. Since International Business is the study of the business operations and managerial decision making and the social, economic and political factors affecting these operations and decision making in the global market, this course will also enable the students to identify these factors and evaluate the effects of the international differences in economic, political and social systems on the business management. This course will help students to formulate strategies in the international business environment.

ECO601  Theory of Economic and Social Policy
The areas that the course covers are: moral and ethical foundations of economic and social policy, the role of state in policy making, economic policy; various economic systems including a) market-oriented economy, capitalism; liberalim, b) marxism, socialism including economic theory of socialism, and c) keynes and social democratic policies; an appraisal of contemporary social democratic regimes is included as well. The course also closely focuses on development policy including theoretical foundations.

EDUCATIONAL MANAGEMENT

EDM401  Introduction to Education Management
This is an introductory course focusing upon major issues in educational sector management. The topics will include educational policy in Pakistan, the education regulatory regime at the secondary and higher education level, curriculum management, the education manager’s relations with stake holders, the educational institutions and services and career planning in education sector.

EDM404  Economics of Education
Economics of Education’ uses econometrics, institutional readings and applications of economic theory to examine the economic ramifications of some current issues in education. This course examines economic issues related to education.

EDM406  Education Law & Policy in Pakistan
The topics in the course include empirical and legal research on education policy issues at the local and state levels, facilitating communication between education leaders and policymakers subjected to judicial legislation. Legal aspects of administration in institutions of higher education, statutes and case law related to liability, due process, student rights, admission, employee relations and property use are fully addressed.
Institute of Business Management

EDM408  Career Planning and HRM in Education
This course deals with the management and personnel subsystem: concepts, functions, and practices in education sector. It is designed to guide students through the academic and career exploration and planning processes, and to provide strategies and skills necessary for a lifetime of career-related decision making. It will also examine assessment and reflection techniques to define and clarify educational and career plans and methods of researching academic and career opportunities.

EDM410  Financing Education
This course explores the fundamental nature of the corporate finance function and the theoretical tools for successful financial management in education. The topics include: institutional planning, capital budgeting and controlling, capital structuring, capital markets and securities, risk, return and diversification, valuation, cost of capital, and capital structure for education.

EDM412  Marketing Education Services
The course trains the teachers for certification in intensive business and training. This course offers a study of business and marketing trends, goals, teaching procedures, tests and measurements, special helps, teaching materials, and technologies utilized in the field of education.

EDM414  Strategic Management Issues in Education
This course covers knowledge of strategic management model, theories and practices in the field of education. It examines concepts, information, and skills related to strategic planning, identifying objectives of educational organization, transforming strategic planning to procedural planning, particularly merging the elements of planning budgeting to achieve management efficiency and stimulating members of educational organization: faculty and staff to be engaged in the stages of strategic planning.

EDM415  Educational Psychology and Ethics
This course focuses on aspects related to the learning process, the study of learning outcomes, student attributes, and instructional processes directly related to the classroom and the school. It will also provide specific standards of ethics to cover most situations encountered by the students to protect their welfare. It also educates the learners to function according to the ethical standards of the discipline.

EDM416  Comparative Education Systems
This course not only covers a comparison of two different countries but also prefers to focus on comparisons within a single country over time. It analyzes the data and insights drawn from the practises and situation in another country, or countries. The course aims to highlight the relationships between education and society and establish generalized statements about education that are valid in more than one country.

EDM417  Educational Counseling
The course integrates issues of educational, pedagogic and organizational counseling in relation to the contemporary school situation. The focus is on work of school counseling centers, for example, counseling in the sphere of educational and behavioral problems and students’ career growth.

EDM418  Testing
The course aims to discuss ways by which teaching and testing can be integrated. It will focus on the use of tests as an instructional as well as an administrative tool, teacher attitudes towards testing, and teacher competency with regard to testing. The course will help participants use testing as an important tool in the process of teaching and learning.
EDM419 Managing Teaching and Learning
This course explores teaching methods and strategies, teaching and learning styles, classroom management, testing, and their application to a range of classroom contexts. The course will also focus on teacher beliefs and the evaluation of books and teaching materials. Practical application of the methods will be experienced in practical sessions based on peer observation, micro-teaching, and simulation.

EDM420 Academic Writing and Seminar Skills
This course will develop the participants’ skills in writing academic English through the study of grammar and usage, sentence structure, principles of writing academic essays, and use of American Psychological Association (APA 6th edition) writing style. It also aims to equip the participants with editing and proof reading strategies to help them refine their drafts. The second section of this course focuses on students’ participation in academic seminars, discussions, and presentations through a variety of practical approaches. Students will be expected to engage with the subject in a more active way by discussing ideas and sharing opinions with tutors and classmates during seminars.

EDM421 ICT in Education
This course will focus on the use of computers related to learning, teaching and the curriculum, the nature of educational software, and the impact of new technologies, such as multimedia and networking. Specific areas to be introduced will include: the use of generic educational software, multimedia, the Internet, web-based learning, and artificial intelligence. Some of the major current issues associated with the use of computers in education will also be addressed.

EDM422 Developing and Managing Financial and Material Resources
This course explores the fundamental nature of the corporate finance function and the theoretical tools for successful financial management in education. The topics include: institutional planning, capital budgeting and controlling, capital structuring, capital markets and securities, risk, return and diversification, valuation, cost of capital, and capital structure for education.

EDM423 Reflective Inquiry in Education
The course will help participants gain an insight into the concept of reflective inquiry in teaching; an invaluable teaching tool for challenging times. It will bring together essential perspectives of researchers, practitioners and theoreticians about reflective inquiry to offer a comprehensive treatment of reflective inquiry from a complete perspective, including historical background, current issues, and future directions.

EDM424 Teacher Education
This course introduces participants to the best practices in teacher education and professional development. It focuses on relevant theories, current issues, and present-day practices in teacher development for teachers operating at different levels. The course also focuses on the various stages of pre-service and in-service models to help participants arrive an informed engagement with teacher training theory and practice. This involves taking participants from needs analysis to evaluation, and linking with the ‘managing teaching and learning’ course.

EDM425 Developing Leadership and Management Skills
This course introduces some of the basic theories and issues related to leadership and management in educational settings and how they might work in a range of situations and national/international cultures. It will focus on awareness and understanding of self as a leader and critique the nature and practice of leadership.

EDM426 Curriculum Management and Planned Change
This course will cover concepts, processes, and principles of curriculum planning, development, and evaluation. It is intended to help the participants develop the performance competencies needed to engage in curriculum planning and decision-making as an administrator, supervisor or teacher.
Institute of Business Management

EDM427 Research Methods in Education I (Qualitative)
This course introduces qualitative research methods as they are applied across the social sciences, especially in education. Methods covered include interview, focus group, oral history, participant observation, and textual analysis. In addition, the skills of analysis of qualitative data and the capability to prepare instruments for testing generalizations or confirming transferability in small and contrasting settings are emphasized. The primary purpose of the course is to develop awareness in the participants and facilitate the ability to carry out small scale action research in their own professional settings.

EDM428 Research Methods in Education II (Quantitative)
This course is designed for participants who have a limited knowledge of research methods and provides an understanding of definitions and meanings of keywords, such as hypothesis, theory, variables, and constructs. The course will focus on the process of defining research problems, the logic of research design, and a limited number of techniques for measurement, design and sampling, and for analysis of data.

EDM429 Marketing Management in Education
This course is based on the marketing framework, which includes business, management and entrepreneurship. Emphasis is placed on the functions of marketing distribution, financing, marketing information, pricing service, and promotion. The course will also introduce the participants to the study of business and marketing trends in education.

EDM430 Education Policy, Planning and Management of Change
This course presents a critical overview of national education policies and the emerging policy issues as they affect public and private sector institutions. It will also present selected national, regional and international education policies for critical analysis and demonstrate significant perspectives on the main challenges facing education policy makers in the targeted nations.

EDM431 Writing and Presenting Educational Research
This course is designed to guide the participants with the writing process for scholarly purposes. It introduces the key aspects such as genre, style, and the language used in writing research papers and facilitates the participants to write and present research proposals and reports orally as well as in writing. In addition, it further builds on the writing and language skills introduced in Academic English I, with special emphasis on the correct use of APA.

EDM432 Data Collection
This course will focus on methods and techniques of data collection in both primary and secondary research including testing hypothesis, analysis, interpretation, drawing inference, data types, etc. The students will learn how to make effective choice of data collection methods and deal with the problems that arise during data collection. The course will also teach them how to do pilot study/pre test.

EDM433 Seminar
This course will give an opportunity to the participants to present, share, and discuss with their colleagues recent research studies published in journals and books on areas of interest, especially based on their thesis areas. The course will also encourage participants to share their research progress for critique.

EDM501 Education Leadership and Organizational Development
This course is based on understanding and development of leadership theory and practice in education. The topics include trait theory, contingency theory, situational theory transformational theory, knowledge management and instructional leadership. This course also identifies skills and qualities that educational leaders must possess and introduce students to the main competencies needed by the administrator manager, the school director/ teachers and technical managers. This course provides students self-awareness of their own competencies and to think about ways to improve them in order to meet the required goals of education.
EDM502  Managing Higher Education Systems
The course assesses the performance in higher education institutions and obstacles to academic and administrative work in these departments as well as identified possible solutions. This course will provide students professional experiences in the various departments of higher education institutions.

EDM503  Quality Improvement and Effectiveness in Education
This course is based on the theoretical framework of quality control management as a model of modern management and its potential application in the educational field. The course will examine identification of time invested in educational process, its measurement and regulation, its effect on the efficiency of education, concept of quality control on administrative aspects in public and private institutions and obstacles in the way of applying this model in the field of education.

EDM504  Managing School and School Systems
This course is particularly based on elements of school systems by utilizing system analysis in identifying system input, operations, outputs and feedback processes which offer clear criteria for development and improvement in both public and private school system.

EDM505  Industrial Relations in the Education Sector
The course focuses on trade unionism in the service sector, quality of work environment, promotional criteria, wage structure and wage discrimination on the bases of gender or class; legislation governing education, remuneration, employment conditions in education industrial sectors.

EDM506  Training Systems
This course focuses on the role of an education leader in planning and executing, monitoring, supervising and evaluating training programs and analyzes reasons behind the success or failure of training programs in both developed and developing countries.

EDM507  Islamic Education System
The purpose of this course is to enable students to gain an insight into some concepts and principles of the system of Islamic education; its aims and methods and description of the role of educational means in forming Muslim character in the Islamic society; organization of Madaris and development of Dars-e-Nizami education in Pakistan, specifically in the formation of Wifaq and the impact of modern western education on Islamic education.

EDM508  Knowledge Management
This course is based on a range of organizational practices specifically to identify, create, represent, distribute and enable adoption of insights and experiences. The course will focus on application of knowledge management for research and curriculum development processes and student alumni services.

EDM509  Managing Early Child Development
This course focuses on the history, trends and philosophy of early childhood education with emphasis on physiological, social, and cognitive development. Topics will include early childhood development through activities and experiences in pre-school, montessori, and primary program, classroom organization and procedures, use of classroom time and materials, approaches to education for young children, professionalism, and curricular procedures.
Institute of Business Management

EDM510  Educators as Project Managers
This course introduces the participants to the concepts and strategies of project management to help them address tighter budgets, demanding time constraints, and fewer resources to give their institutions a competitive advantage. The participants will learn the practical application of these concepts in the day to day planning and execution of projects. The course will also enable the participants to become more effective project managers and gain greater respect and responsibilities within their organizations.

EDM511  Lifelong Learning in Changing Contexts
This course analyzes the competing understandings and practices of lifelong learning against a background of rapid social, cultural, and organizational change. Debates around the impact of globalization will be central to the analysis of lifelong learning. Particular attention will be given to examining the inter-relationship between lifelong learning and wider debates about citizenship and the changing nature of work and organizations.

ENGINEERING

ENG101  Workshop Practice
The course is focused on practical learning experiences. Students will develop their skills with materials/ components, tools, machines/equipment and related technology. The course will also include workshop safety, project planning and design, reading working drawings and surface finishing.

ENG 102  Engineering Mechanics
The course discusses static of particles, kinematics of particles, kinetics of particles, rigid bodies, equilibrium of rigid bodies, kinematics of rigid bodies, plan motion of rigid bodies, friction and analysis of structures. Pre-requisite: MTH 202

ENG103  Engineering Drawing
This course extensively covers the drawing equipment and the use of instruments, basic drafting techniques and standards, freehand sketching of machine and engine components, concepts of working drawings of component parts of machines and engines, etc.

ENG104  Applied Chemistry
The course aims to introduce student to the general concepts of chemical engineering by laying the foundation to establish material and energy balances of chemical processes. Fundamental knowledge of stoichiometry and chemical equilibrium is applied to simple combustion and separation processes.

ENG105  Basic Industrial Engineering
This course is designed to introduce the fundamental concepts of industrial engineering and give answers to the very first questions that are usually asked by the prospective industrial engineering students. The course surveys both the traditional and modern topics of industrial engineering, providing a historical as well as an academic perspective of the whole profession.

ENG106  Fluid Mechanics
The course focuses on fluid flow measurement, properties of fluids, basic fluid flow concepts, fluid static, dimensional analysis, similitude and model studies, fluid flow and viscosity, laminar & turbulent flow, pumping of fluids. The Laboratory work – calibration of pressure gauge, determination of head losses in pipes and pipe fittings; evaluation of viscosity, specific gravity and density and experimentation with hydro static pressure.

ENG107  Basic Thermodynamics
The course discusses thermodynamic properties of pure substances and mixtures, the interdependency of properties of substances, first and second law of thermodynamics, conservation of mass and its application, demonstration of application and basic modes of heat transfer and conduction.
ENG201  Design of Machine Elements
The course content includes the choice of material, component design, shaft design and shafting, gear design, introduction to design of simple machine elements, governors and gyroscopes, design of springs and design/selection components.
Pre-requisite:  ENG 101/102

ENG202  Production System Design
The course focuses on the structure and operation of production planning, scheduling and control systems; emphasis on system structure, capacity planning, master production scheduling, shop loading and supply chain; investigation of current trends, cellular manufacturing, group tech, flexible manufacturing systems and introduction to robot anatomy.
Pre-requisite:  ENG 201

ENG203  Engineering Economics
The course includes the economic environment, cost concepts and analysis, time value of money, depreciation and depletion, comparing alternatives; production concepts and mathematical models and capital financing and budgeting.
Pre-requisite:  ECO 104

ENG204  Plant Engineering
The course content comprises thermal power plants, steam generators and turbines, air-conditioning and ventilation, pumps and compressors, etc.

ENG205  Metrology and Gauging
The course is designed to familiarize students with basic concepts of metrology and gauging. The course content includes standardization, standards of length, measurement, surface texture, machine tool metrology, etc.

ENG 206  Manufacturing Process
The course is designed to focus on analytical study and design of manufacturing engineering with emphasis on manufacturing and processes; the interaction of design, materials, and processing, laboratory instruction and hands-on experience in metrology, machining, process planning, economic justification, current manufacturing methodologies and expendable and non-expendable casting processes.

ENG207  Analysis of Manufacturing Processes
The course includes manufacturing process engineering, primary, secondary, finishing and assembly processes, concurrent engineering, process planning, group technology, manufacturing analysis and application of economic analysis.
Pre-requisite:  ENG 206

ENG208  Reliability Engineering
The course introduces the system reliability, focuses on analysis of deterministic, probabilistic and stochastic reliability models. The topics covered include coherent structures, minimum path representations, computing system reliability, systems with associated components, bounds on system reliability, classes of life distributions, optimal management of systems by replacement and preventive maintenance.
Pre-requisite:  STA 204

ENG209  CAD/CAM Application
The course focuses on modular software development for interactive CAD. The topics include human interface for interactive design, programming structure for modular entity creation, storing and retrieving object data, utilizing peripheral input and output devices, attribute regulation and control, and software transfer and documentation specifications.
Pre-requisite:  MIS 001/104
Engineering Courses at the Institute of Business Management

**ENG210 **Strength of Materials
Simple tension, compression and shear, biaxial tension and compression, torsion, stress of beams, analysis of plane stress and strain. Deflection of beams, mechanical properties of materials.

**ENG211 **Basic Electrical Engineering
The course introduces to electrical engineering, basic circuit and systems concepts, mathematical models of components, Kirchhoff's laws, resistors, sources, capacitors, inductors, and operational amplifiers, solution of first and second order linear differential equations associated with basic circuit forms.

**ENG212 **Electronic Devices and Circuits
The course focuses on theory of electrical conductivity, metals and semiconductors, the physics of semiconductors, principles of pn junctions, bipolar transistors, and field-effect transistors, bias circuits & active loads, single- and multi-stage amplifiers, operational amplifiers, frequency response, feedback and stability, the physics of noise, noise analysis, switched capacitor circuits, comparators and data convertors.

**ENG300 **Electrical Technology and Instrumentation
The course focuses on an index study of electrical technology and instrumentation. The course content includes electricity fundamentals and basic laws, A.C. fundamentals, electric machines fundamentals and measuring instruments.

**ENG301 **Industrial Safety and Health
The course will help the students acquire a working knowledge of the practical aspects of safety engineering and legal and technical aspects of safety. It focuses on a systems approach to safety engineering. Students are also exposed to various theories of accident causation, research methodology and ways of evaluating safety programs and related research.

**ENG302 **Industrial Maintenance
This course is designed to develop an understanding about Industrial maintenance. It includes basic considerations for industrial maintenance, maintenance management and replacement analysis.
Pre-requisite:  ENG 301

**ENG303 **Production Planning and Control
The course is designed to provide the basics of production planning and control with the need of modern manufacturing organizations in mind. The topics covered in the first course are: production and operations strategy, subjective and objective forecasting -such as Delphi method, trend-based methods, and methods for seasonal series, deterministic inventory planning and control, etc.
Pre-requisite:  MAN 304

**ENG304 **Automation and Robotics
The course focuses on the general principles of operation and programming of automated systems, automated assembly, automated manufacturing, and inspection systems. Control of automated manufacturing, industrial logic systems and programmable logic controllers, etc. are also a part of the course.
Pre-requisite:  MIS 001/104

**ENG305 **Work Study and Methods Engineering
This course is designed to teach the fundamentals of Work Study and Methods Engineering, which are both used for the examination of human and human work in all their contexts. Work Study topics includes: methods study, charting techniques, time study, workplace design principles, job evaluation and compensation.

**ENG306 **Basic Machine Design
The course focuses on normal design procedure, strength & properties, metallurgical aspects, choice of materials, component design, gear design, design of springs, design/selection of screw, bolts, rivets and other joining components and power screws.
ENG307 Basic Electronics
The course is designed to understand and troubleshoot electrical and electronic circuits found in modern applications of technology. The types of work environments that use the skills of electronics technicians include telecommunications service providers, TV and satellite service organizations, computer network sales and entertainment industries.

ENG401 Computer Integrated Manufacturing (CIM)
The course is designed to help students to define computer integrated manufacturing (CIM), use manufacturer’s reference manuals to determine the system’s normal operating characteristics, set-up, program, and troubleshoot a system. The course provides them an opportunity to study the integration of robots, CNC, CAD/CAM, databases, and automated systems into the manufacturing environment.
Pre-requisite: ENG 209

ENG402 Manufacturing Strategies
This course deals with strategic implications of alternative methods of product cost measurement. The discussions will primarily be case-based and will cover cost measurement issues in both conventional and modern manufacturing environments.
Pre-requisite: ENG 207

ENG403 Human Factor Engineering
The course focuses on the analysis and design of work systems considering human capabilities and limitations, human anatomy and physiology, and occupational safety and health, an emphasis on understanding how human factor should be considered in design processes to maximize system effectiveness and safety.
Pre-requisite: HRM 301

ENG404 Tool Design
Tool designing is a division of manufacturing or industrial engineering. This course includes lab work where jigs, fixtures, molds, and dies will be designed, built and operated. It also involves both theoretical and practical tooling design and experimentation, lab work, reporting and class discussion.
Pre-requisite: ENG 209

ENG405 Environmental Impact Assessment and Management
The goal of the course is to promote an understanding of how environmental impact assessment is conducted and used as a valuable tool in the engineering project management decision-making process. Students learn to prepare an environmental impact assessment, review and critically analyze an environmental impact statement, use mathematical models for environmental impact prediction, and apply environmental impact assessment as a tool in management decision-making. Case studies of environmental impact assessment for several types of engineering projects will be also be discussed in the course.

ENG407 Manufacturing Processes & Systems
The course includes manufacturing processes and systems, defines role of manufacturing in a world-class organization by improving operational processes. This is done by identifying internal and external customers in the manufacturing cycle, reducing lead-in time in production of quality products and services, integrating supply chain & by understanding working and benefits of CNC machines and automated processes.

ENG408 Facilities Planning
The course includes fundamentals in developing efficient layouts for single-story and multi-story production and service facilities, manual procedures and micro-computer based layout algorithms; algorithms to determine the optimum locations of facilities and special considerations for multi-period and dynamic layout problems.
**Institute of Business Management**

ENG410 **Maintenance Management**
This course is designed to help students gain a perspective regarding the maintenance of buildings, industries, and facilities management. Administrative tools and methodology specific to maintenance activities are introduced. Students learn how to manage finance, equipment, materials, and personnel to carry out maintenance functions.

ENG501 **Technology Management**
This course examines external environmental factors essential to manage organizations involved in new technologies. It considers the adoption of technologies and innovative processes. The students develop skills in acquiring and interpreting information about the external environment to facilitate technology management. The course analyzes the issues associated with resource management for a technology-based firm. This includes manufacturing technologies, information technologies, work force and materials.

**ENVIRONMENTAL AND ENERGY MANAGEMENT**

EEM401 **Environmental Issues and Management**
What is environment? What is pollution? Classification of pollution, nature of pollutants, who is responsible for pollution? Effect of pollution, how to prevent and manage them? Health impact, environmental policy and its compliance, environmental protection agency role and is responsibilities, industries and citizens responsibilities towards pollution prevention, analytical methods for measurement of selected parameters of NEQS, case studies and plant visits will be part of this course.

EEM402 **Air and Noise Pollution Management**
Definitions and types of pollutions, causes, sources and effects of air pollution, particulate matters, measurement of air pollutants and particulate matters, green houses gases, global warming, causes, sources and effects, ozone depletion, acid rain, causes, sources and effects, air pollution prevention and control, strategies/methodology compliance of NEQS standards for air pollutants, nature of noise, propagation of noise in air, noise characterization, sources of noise, effect of noise pollution, health impact of noise pollution, noise measuring techniques and methodology etc. will be covered in this course.

EEM403 **Energy Sources and Environment**
The course will cover basic concept of energy, forms of energy, fundamental of renewable/non-renewable energy sources, energy and environment renewable energy sources, energy scenario in Pakistan, renewable energy potential in Pakistan, basic heat transfer mechanism etc. Students will learn about the best practices in these areas, includes case studies and visit to plans.

EEM404 **Industrial and Municipal Waste Management**
The course will cover waste classification, sources, characteristics, generation, onsite handling and storage, collection, transfer, recycling and disposal techniques of solid and hazardous waste. It also covers history of waste disposal, dumping, and burning, land filling, composting and incinerating techniques and various methods for the treatment of liquid effluents from municipalities and industries.

EEM405 **Renewable Energy and Energy Conservation**
The course will cover a brief history of energy, reasons of shortage and load shedding, fuel problems for energy, alternative fuels and its problems, power from wind, its environmental impact, costs and economics of alternative fuels, energy from bio-mass and solid waste its problems and environmental impact, etc.

EEM406 **Coastal Environment and Management**
Products of direct economic value, such as fish, hydrocarbons, minerals, dieseline water etc., products of natural system (intangible), supply of rich nutrients to support productivity, nursery and breeding grounds of fish and shellfish, mangrove ecosystem, coast-dependent activities, such as coastal aquaculture, marine transport and shipping, beach related activities, ports and harbor, etc. will be part of this course.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>EEM407</td>
<td>Green Technology and Energy Analysis</td>
<td>This course is multidisciplinary and examines Environmental Management Systems (EMS), including their planning and organization. The course also studies how businesses can manage their interactions with the environment in a systematic strategic management approach. Since awareness of environmental issues has increased the need for product eco-compatibility. Students will learn a new methodological approach to design for the environment.</td>
</tr>
<tr>
<td>EEM408</td>
<td>Safety, Health and Environmental Management</td>
<td>The course is based on OSHA 18000 and is designed for the students to understand the concept of EHS management, its importance and principles, hazards and risks at work place, causes and solutions, importance of EHS in industries, purpose and policy, developing safety policy, EHS auditing and inspections, safety training and employee’s motivation and involvement. A plant visit is also a part of the course.</td>
</tr>
<tr>
<td>EEM409</td>
<td>Risk and Disaster Management</td>
<td>This course is designed to enable students to develop management skills to operate and understand the complex techniques and key concepts of disaster and risk management pertaining to floods, earthquakes etc. Students will develop critical evaluation and the application of key elements of business planning and the management of risk and disaster.</td>
</tr>
<tr>
<td>EEM410</td>
<td>Environmental Impact Assessment (EIA)</td>
<td>The course is designed to provide a critical overview of the theory and practice of EIA as per international standard to those students who need to understand pollution impacts on the environment and how to do its assessment. EIA is one of the major requirements of environmental regulations and the course would cover the impact of development on environment.</td>
</tr>
<tr>
<td>EEM411</td>
<td>Environmental Rules, Laws and Regulations</td>
<td>The course provides the students various regulations of environmental laws of Pakistan and international practices, theory and enforcement problems, including policy making, analysis of policy, needs of environmental law, implementation of legislations etc.</td>
</tr>
<tr>
<td>EEM412</td>
<td>Research and Survey Methodology</td>
<td>The course is designed for those students who are new comers to research and who may have barrier with regard to the research methods and having difficulties in writing thesis or a research project report. The course will give students a sound knowledge of research methodology which is essential for writing thesis, research project conceptualization, elements of a research proposal and formulation of research design.</td>
</tr>
<tr>
<td>EEM501</td>
<td>Climatic Changes and its Impact</td>
<td>Climate changes is today’s most pressing issue, receiving international attention from political leaders, media, corporations and the general public. The students will learn about strategic frameworks for assessing the impact of climatic changes on markets and customer demand.</td>
</tr>
<tr>
<td>EEM502</td>
<td>Natural Resources Management</td>
<td>The students will learn qualities of ecosystems and critically review environmental issues, such as climate change, water shortage and forest preservation etc. The course includes social-ecological system concepts, ecosystem based management, global and regional governance through multilateral agreements, sustainable development, poverty versus environment.</td>
</tr>
</tbody>
</table>
EEM503  Hospital Waste Management
The course covers the general awareness of the health and environmental risks resulting from poor care of hospital waste management practices. It will provide the knowledge about handling, disposal and effect of infections hazardous health care waste, including hospital waste disposal problems and solutions. The course focuses on proper planning and organized approach necessary to improve the system for hospital waste management.

EEM504  Solid and Hazardous Waste Management
The basic goal of this course is to manage community and industrial waste in a manner that meets public health and environmental concerns and public desires to reuse and recycle waste materials. The students will learn how to manage solid and hazardous waste properly and efficiently. The course covers different modern methods of waste disposal, composting and incinerating, etc.

EEM505  Energy Audit
This course covers the need for energy consumption, monitoring, designing and starting energy consumption control program, energy accounting, targeting and reporting, energy audit process, preparations, facility inspections, audit procedure and action plan, audit report, recommendations, implementation and follow ups of energy conservation schemes, understanding energy bills, electric rate structure, natural gas rate schedule, steam and chilled water rate, cost of water and waste water, monthly energy bill analysis and actions to reduce electricity utility costs.

EEM506  Energy Conservation
The course will cover areas of energy consumption and conservation, conservation scheme, and implementation, major areas of energy conservation, lighting, components of lighting system, lamp types, luminaries and types, maintenance of the lighting system and schedule, luminaries dirt depreciation factor, re-lamping strategies, spot replacement and group re-lamping strategies and costs, lighting survey, measuring light levels, regulatory/safety issues, lighting safety issues, energy policy Act 1992, lamp substitution, lighting control technologies, selection of lights for new facility, EPA green lights program, electrical motors and transformers-factor involving selection and installation, maintenance and overhaul scheduling, performance tests, depreciation factors, energy system maintenance, transmission and distribution networks, HVAC systems, boilers, steam distribution systems.

EEM507  Energy Planning
The course will cover energy economics and planning, energy economics, the nature and cause of the energy problems, demand side and supply side issues, commercial and traditional energy determinants externalities, policy issues, pricing and distribution policies, energy balances formulation and execution, natural energy statistics, definitions, of primary, secondary, delivered and useful energy, problems of interpolation and comparison of energy statistics, rural energy planning, pattern of energy demand and supply, socio-economic aspects of energy utilization, survey methods, identifying potential solutions, project planning, monitoring and execution, financial evaluation projects, project analysis and financial appraisal, discounted cash flow, time preference discount rates, inflation and interest rates and project evaluation in term of present values and internal.

EEM508  Environmental Ethics
The course focuses on the understanding of the natural environment and human relationship to it. The course provides strong coverage of major ethical theories, such as moral, relativism, ethical egoism and discussion about the tragedy of the commons, etc.
EEM509 Public Awareness for Environment and Energy Sector
This course will focus on the importance, scope and application of the public relation and public information as regard to environment and energy in the private and public sectors, the local, regional, national and international levels.

FINANCE AND BANKING

FIN101 Financial Markets in Pakistan
The course gives an insight into the theory of financial development, dynamics of finance and the real economy, financial development in Pakistan, financial infrastructure and financial sector policy (specially monetary policy). The money market (including the foreign exchange market) is also discussed. The capital market (equity and bond), the informal financial system, microfinance and Islamic Finance are also part of this course.

FIN201 Introduction to Business Finance
The course explains the basic concepts of time value of money, valuation of current assets, financial forecasting and planning, ratio analysis and common size statements, and capital budgeting techniques.
Pre-requisite: ACC 101

FIN202/404 Financial Management
This course covers the basics of finance like fundamentals of financial management, discounted cash flows, capital budgeting techniques, leverage, capital structure determination, etc.
Pre-requisite: FIN 201

FIN301 Financial Institutions
The course provides an analysis of the working and interaction among various types of financial institutions, financial markets and the economy. The topics include policies of financial institutions, interest rate structure and the security and mortgage markets.
Pre-requisite: FIN 201

FIN305 Internet Banking and EPS
In this course, students will study topics which include: e-commerce, e-business, digital commerce, B2B, B2C, internet advertising, internet auctions, internet banking, internet marketing. Case studies that give students great experiential knowledge to be effective in the market will also be a part of the course.

FIN306 Introduction to Insurance
Insurance draws principles from finance, law, and ethics to address the issues that face individuals, companies, and society in general. The course will help the students to differentiate between the relatively narrow field of insurance and the broader discipline of risk management. Upon completion the students will have the vocabulary and basic understanding of the various methods of handling exposure to loss.

FIN307 Mathematics of Financial Derivatives
The course will begin with the development of the basic ideas of hedging and pricing by arbitrage in the discrete time setting of binomial tree models. Key probabilistic concepts of conditional expectation, martingale, change of measure, and representation, will all be introduced first in this simple framework as a bridge to the continuous model setting.
Pre-requisite: MTH 104, MTH 105
Institute of Business Management

FIN308/407  Financial Engineering
Financial engineering is a body of knowledge encompassing conceptualization and implementation of financial innovations. This course introduces financial engineering innovations within the context of managerial decisions and solving vexing problems of investment management and corporate finance.

FIN402  Money and Banking
The course describes the monetary systems, financial markets, national income components and their relationship to business activity. It also includes the study of structure, regulation and performance of the banking industry focusing on the strategy and procedures of the Central Bank.
Pre-requisite:  ECO 401, FIN 401

FIN403  Islamic Banking and Finance
The course covers the operations and role of banking institutions in an economy. The different types of financial institutions, local as well as multilateral, and their distinct functions are reviewed. The course also covers the concepts of Islamic banking and similarities and conflicts between Islamic and conventional banking. The requirements to be met by a sharia compliant financial instruments and established Islamic financial instruments (e.g., Musharika, Modarba, Morabaha, leasing etc.) are also covered.
Pre-requisite:  ECO 401

FIN405  Banking Laws and Regulatory Environment
The course discusses the role and significance of laws related to banks/financial institutions, including laws applicable to international trade and banking. The role/functions of important regulatory institutions, such as State Bank of Pakistan, Securities and Exchange Commission of Pakistan, Ministry of Finance etc. are also covered. The purpose and critical evaluation of important regulations will also be a part of the course.
Pre-requisite:  ECO 401, FIN 404

FIN406  Financial Econometrics
This course provides an intensive introduction of basic principles of econometric analysis that may help students understand finance theories and their empirical applications. In addition, it also equips students with appropriate statistical techniques for doing applied financial research. The emphasis will be on developing and applying regression-based techniques in both cross-sectional and time-series contexts. Their usefulness will also be examined in the light of financial studies. This course applies principles of economics and finance to the management and creation of value in the insurance enterprise. Course topics encompass: 1) the theory of the firm as applied to the insurance enterprise; 2) the operational risk management of insurance institutions as a class of financial institutions; 3) the industrial organization of insurance markets within an integrated financial services industry; and 4) principal insurance business functions with an emphasis on significant issues and innovative strategies.
Pre-requisite:  FIN 404, FIN 501

FIN408/627  Investment Banking and Security Analysis I & II
The course deals with merchant banking activities performed by banks/DFIs inclusive of non-fund based and fund based activities that bring in windfall profits to financial institutions. The course provides a detailed study of valuing corporate equity instruments and discusses the use of earnings, dividends, risk, cost of money and future growth rate in valuation. It also discusses applications like bond valuation, SWAP funds, arbitrage, etc.

FIN409  Working Capital Management
This course equips students with generic, technical, computational, analytical, critical and evaluative skills relevant to financial management and the commercial bank treasury department function. The course also educates the students on the role of State Bank of Pakistan with close reference to money and capital market.
FIN501  Advanced Financial Management
The objective of this course is to introduce the basic asset valuation models, risk management system, ways to acquire and allocate funds in the most economical and profitable manner, concepts and principles governing investment decisions, etc.
Pre-requisite:  FIN 404

FIN502  Strategic Financial Management
Giving a review of the fundamentals of financial management, this course enables students to understand the various areas of decision-making in the broad field of financial management in a non-financial sector company. Hence, this course focuses on the dynamics of the entire financial management process, emphasizing the skills to take risk-return profile decisions for the business in the presence of a myriad of complexities.
Pre-requisite:  FIN 202/404

FIN503  Corporate Finance
This course covers the valuation of corporate liabilities and other securities under uncertainty. The capital asset pricing model is presented and is compared with more recent theories of asset pricing, such as the arbitrage pricing theory and the option pricing model.
Pre-requisite:  FIN 202/501/502

FIN504  International Finance
The course deals with the factors affecting currency values and the forecasting of future currency prices; describes foreign exchange products, markets, and participants and examines foreign currency exposure from a corporate point of view.
Pre-requisite:  FIN 202/404

FIN505  Treasury and Fund Management
The course equips students with generic, technical, computational, analytical, critical and evaluative skills relevant to financial management and the commercial bank treasury department function; the role of State Bank of Pakistan with close reference to money and capital markets.
Pre-requisite:  FIN 404/501/502

FIN506  Investment Banking and Security Analysis
This course enables the students to recognize the ways to select securities and to act prudently with respect to diversification and management of fund for investment. It contains topics like valuation, sale and purchase of companies, assets management theory, mutual funds management and security analysis.
Pre-requisite:  FIN 404/501/502

FIN507  Portfolio Management
The course covers the application of portfolio theory to investment decisions and performance evaluation to cover both the fundamentals of investment theory and the most recent developments in academic research involving the practical implementation and analysis of modern portfolio strategies.
Pre-requisite:  FIN 202/501/502

FIN508  Risk Management
This course explores various aspects of management of risk associated with operating multinational enterprise and emphasizes on evaluating and hedging financial risks (fixed-income, equity, commodity, and foreign exchange risk exposures).
Pre-requisite:  FIN 404/501/502
Institute of Business Management

FIN509  Financial Derivatives
The course covers a wide range of financial derivatives, including forwards, futures, swaps and options. The working of various derivative markets and the pricing of derivatives are discussed. The course also covers trading/investment strategies that involve these derivatives.
Pre-requisite: FIN 401/404/502

FIN510  Investment Analysis
The course includes alternative investment theories and decision making under differing uncertainties and constraints. Formulation of objectives and strategies, development of conceptual managerial perspectives for investment environment and security analysis will also be covered in this course.
Pre-requisite: FIN 202/401/405/501/502

FIN511  Analysis of Financial Statements
The course begins by describing accounting standards of USA and international accounting standards with special focus on developing students’ capability to standardize various companies’ financial statements. It develops a road map of financial analysis from both the creditor’s and equity investor’s point of view.
Pre-requisite: FIN 202/404/501/502

FIN512  Money and Capital Markets
This course covers the fundamentals of money and capital markets, like market instruments and mechanisms and various risk management techniques.
Pre-requisite: FIN 202/404/501/502

FIN513  Project Appraisal
The course teaches formulation of projects and financial projections into the future. Balance sheet, profit and loss accounts and cash flows are prepared for future years depending on the need and nature of the projects. Economic analysis like internal economic rate of return, Bruno’s ratio and the economic rate of return are also described. The course equips students with the understanding of nuances of consortium and syndicate finances.
Pre-requisite: FIN 202/404/501/502/504

FIN514  Asset Liability Management
The course gives an insight into the traditional functions of Asset Liability Management (ALM). It gives a comprehensive review of ALM hedging techniques that encompass all assets and liabilities of financial institutions. Regulatory environment prevailing in the Pakistani financial market and how the State Bank of Pakistan and the Securities and Exchange Commission are regulating financial institutions in Pakistan is also discussed in this course.
Pre-requisite: FIN 401/501/502

FIN515  Foreign Trade and Banking
The course aims at discussing the technicalities of foreign trade covering basic concept, difference between local and foreign trade and documentary requirements of banks.
Pre-requisite: FIN 501/502

FIN517  Theory and Practice of Finance
The course will cover overview of risk and return, stochastic dominance, portfolio theory, mean variance decision model, other statistical methods, efficient markets, skewness, limits of arbitrage, attention, corruption, political connections, corporate governance and the role of the government, financial econometrics, market microstructure, informational efficient markets, managerial behavior, agency cost and capital structure, corporate finance and compensation and networking, etc.
FIN518  Current Issues in Islamic Finance
The course covers the history of Islamic Banking, market perceptions & performance of Islamic finance industry, analysis on Islamic interest free banking, current economical system & its problems, comparison of capitalism & socialism and philosophy of Islamic economical system. This course gives an in depth study of sources of sharia, ijzah, riba & its types, commercial interest, usury, simple & compound interests, markup, profit, gharar and gambling.

FIN519  Industrial and Financial Economics
This course provides a basis in the neoclassical theory of finance that underlies other finance courses. This course is primarily concerned with static, i.e., one period, theories of finance. This course will convey more conceptual understanding of finance than exercise complicated mathematical derivations. It starts with examining the data and then develops basic finance theory to explain the data. Following this course, students should be prepared for advanced courses in finance, such as dynamic theories, continuous time finance, empirical finance, and advanced corporate finance. The course will also cover structure, conduct and performance of firms, relationship of various market structures and business operations and resource allocation, as well as an analysis of firms’ strategic behavior.

FIN520  Financial Risk Management
This course deals with the theoretical and practical approaches to effective financial management. Planning, analyzing and controlling investment and short and long term financing are examined for decision-making purposes. Emphasis is placed on the application of risk, the methods in today’s business environment and related industries. Topics include: Capital budgeting, risk and diversification, asset liability management, financial derivatives and financial engineering, swaps, options and financial future.

FIN521  International Financial Management
Students taking this elective course should expect to learn the nature and purposes of financial management in the international context. They will gain skills in international investment and financing techniques and in exchange risk management, including accounting and taxation aspects. They will learn, through hands-on case studies and simulations, how to judge the riskiness of a currency from a firm’s perspective, and how to measure and manage the company’s exposure to exchange rate and international interest rate risks. They will discover how companies use banks, and techniques, such as currency swaps and hybrid bond structures. In the end, the goal is to apply state-of-the-art techniques to the international firm’s investment, financing and risk management decisions.

FINANCE AND RISK MANAGEMENT

FRM201/401  Principles of Risk Management
This course aims to introduce students to the rationale, principles, process and major tools of risk management. A holistic/integrated view of risk management is adopted throughout the course. Covered topics include the concept of risk, risk theory, risk measurement, corporate risks and the rationales of corporate risk management, risk management organization and process, and some major tools of risk management. A lot of the course content reflects the latest developments & industry practices in the discipline of risk management.

FRM202  Life and Other Contingencies
Survival distributions and life tables. Construction of mortality, sickness, multiple decrement and other similar tables for graduated data. Determination of the probability and monetary functions based on mortality, sickness, multiple decrement and other similar rates. Values for premiums for single life annuities and assurances. Determination of policy values, surrender values and paid-up policy values. Mathematical models of actuarial reserving. Introduction to the design of unit linked products and introduction to profit testing methods. Use of the stationary population model. Multiple life models; joint life, last survivor, contingent insurance:- values of premiums for multiple life annuities and assurances and reversionary annuities and compound statuses.
Institute of Business Management

FRM204  Enterprise Risk Management
This course is designed to provide information to actuaries who do not yet regularly practice in enterprise risk management (ERM), but want to know more about it to help expand existing skills or meet professional development requirements. The course content is designed to be introductory, so provides less hard—core mathematics and more conceptual understanding and learning. ERM has been a hot topic for several years and the Society of Actuaries and its members have worked with other actuarial organizations around the world to develop best practices and share them within the actuarial community. The goal of this e—course is to introduce you to some of these initiatives, show you where to access ERM information and generally to help you learn and implement ERM at your organization. You will even be introduced to ERM for individuals.

FRM206  Institutional Investments
The course will start by reviewing basic investment practice, with a discussion about the differentiating institutional features of markets, instruments and benchmarks around the world. It will focus on investment theory, by reviewing the benefits of adding international securities to a domestic portfolio and the key elements of an investment program, starting with the definition of a philosophy and continuing with the construction of a process for managing international equity portfolios.

FRM302/402  Computational Methods in Risk
A historical perspective of market risk measurement, including the Markowitz, CAPM, and APT models; investigation of the value-at-risk approach and its variants and extensions, and a survey of other methods for evaluating risk, including multivariate methods for evaluating portfolios requiring copula tools. We will discuss approaches to measuring credit risk and determining default probabilities and company ratings based on financial ratios (logit, probit, and discriminate analysis, decision trees etc.). The software package S-PLUS is used. For 80% of the course, R or Matlab could be used instead.

FRM304/404  Risk Financing Techniques
The Risk Financing course explores the selection, implementation and monitoring of risk financing techniques — ways in which an organization can obtain funds to pay for accidental losses which strike it. Topics include risk financing objectives, various types of risk financing plans, insurance as a risk financing technique, capital market products for risk financing, forecasting accidental losses and risk financing needs, accounting and income tax aspects of risk management, and allocating risk management costs. Topics include understanding insurance as a risk financing technique, insurance plan design, forecasting accidental losses and risk financing needs, self-insurance plans, retrospective rating plans, reinsurance and its importance to risk financing plan, captive insurance plans, finite and integrated risk insurance plans, capital market risk financing plans, noninsurance contractual transfer of risk, and purchasing insurance and other risk financing services.

FRM403  Introduction to Financial Risk Management
This course covers the principles of financial risk management and financial engineering from the perspective of non-financial corporations. The first part of the course discusses how to measure risks and risk exposures, why firms should or should not hedge, and how to hedge basic exposures. You will also learn how to manage foreign exchange rate risk, interest rate risk, commodity price risk and credit risk. The second part of the course demonstrates how financial engineering, i.e., the issuance of complex financial securities, can increase shareholder value. This course provides a systematic and advanced treatment of financial risk management. It focuses on interest rate risk, market risk, liquidity risk, credit risk and operational risk.
FRM405 Advanced Financial Risk Management
This course is tailored to provide financial risk professionals with the necessary groundwork required to become a financial risk specialist including the latest standards that represent best practice. The course is essential for any person currently in or planning to enter careers in the financial sector, retail banking, investment & merchant banking, asset management, corporate finance, risk analytics and strategic consultancy. Topics covered in this course include, Introduction to Financial Risk Management, Derivative Basics, Option Basics, Stochastic Volatility Modeling, the Yield Curve, Value-at-Risk & Risk Measurement Methods, Credit Risk, Bank Capital and Basel I & II.

FRM501 Property Risk Management
Insurance company operations and management, including statutory accounting principles, financial management, underwriting, claims and reinsurance. Discussion of commercial property coverages and risk management techniques, including basic property insurance, consequential loss coverage, fidelity and surety bonding and crime coverage. An examination of the major commercial property loss exposures including fire, business interruption, crime, inland marine, ocean marine, and miscellaneous property coverage. The different risks are analyzed to select optimal combinations of risk treatment and insurance for financial protection against property losses.

FRM502 Management of Insurance Institutions
This course applies principles of economics and finance to the management of and creation of value in the insurance enterprise. Course topics encompass: 1) the theory of the firm as applied to the insurance enterprise; 2) the operational risk management of insurance institutions as a class of financial institutions; 3) the industrial organization of insurance markets within an integrated financial services industry; and 4) principal insurance business functions with an emphasis on significant issues and innovative strategies. The goal of this course is to equip students with concepts and tools that will help them respond to management challenges in a rapidly evolving industry.

FRM503 Corporate Risk Management
This course provides an introduction to modern methods of risk management. Lectures cover risk metrics, measurement and estimation of extreme risks, management and control of risk exposures, and monitoring of risk positions. The impact of risk management tools, such as derivative securities, will be examined. Issues pertaining to the efficiency of communication architectures within the firm will be discussed. Regulatory constraints and their impact on risk management will be assessed. The approach to the topic is quantitative. The course is ideal for students with strong quantitative backgrounds who are seeking to understand issues pertaining to risk management and to master modern methods and techniques of risk control.

FRM504 Theory of Risk and Insurance
Institute of Business Management

GENERAL SCIENCES

GSC101 Physics
The course aims to cover vector review, Coulomb’s law, electric fields, Gauss’s law, electric potential, capacitors and dielectrics, d.c. circuits, Kirchoff law, RC and RL Circuits, magnetic fields, Ampere’s and Farady’s laws, energy stored in electric and magnetic fields, Biot and Savart law, electromagnetic oscillations, a.c in resistive, inductive and capacitive, elements.

GSC201 Basic Thermodynamics
This course builds familiarity with thermo-physical properties. It teaches the students to apply the laws of thermodynamics so as to identify, formulate and solving engineering problems involving closed and open systems. It also develops knowledge of engineering analysis based on their knowledge of calculus and physics.

GSC401 Basic Electronics
The course aims to cover semiconductor materials, band theory types of diodes of applications, half ware; full wave rectifier, clipper, clamper, transistors & its different configurations; amplifiers, Op-amps & its circuits logic families, oscillators, active filters, voltage regulators, IC fabrication, AM & FM nodulation receivers and transmitters.

HEALTH MANAGEMENT

MHM401 Introduction to Health Policy, Planning and Management
This course provides students with an overview of the health system in Pakistan and introduces them to the concepts of public health and the basis of public health programs in the country. Study of planning methodologies and role of health planners within the health care sector. Concepts and techniques of health planning as applied to community and institutional health systems are analyzed.

MHM402 Quantitative Analysis
The course includes introductory as well as advanced study of stochastic and quantitative analytical tools and concepts which can be used to compute vital statistical rates applicable to problems in public health. Topics, such as regression analysis, anova, chi-square are also discussed.

MHM403 Health Management Information Systems
Applications of computer technology for designing management information system for health care institutions. Topics include data collection, reporting and transmission, file design, record structure, report formats, processing requirements, medical records and statistical audit. Principles of managing the acquisition and development of health management information system are also discussed.
Pre-requisite: MIS 103

MHM404 Research and Survey Methodology
This course is designed to familiarize students with basic concepts surrounding surveys. It intends to expose students to the various components, techniques and methods of developing survey instruments and modes of survey conduction. It defines the basic concepts of research methodology and designing of sample survey, including data presentation through tables and graphs.

MHM501 Pharmaceutical Branding
This course emphasizes on the expressional area of promotion and capitalizes on the functional area as well. Student will be able to launch new brands, create strategy for brand equity with long-term sustainability, handle multi-brand portfolios and conduct evaluation of brands.
MHM502  Health Economics
This course deliberates on and applies general theoretical principles of economics to health care sector. The basic approach is to recognize the importance of scarcity and incentive allowing for any differences peculiar to health. Demand and supply of health and medical care are examined as they involve consumers, patients, nurses and hospitals.
Pre-requisite:  ECO 401

MHM503  Financial Management of Health Services
The course exposes students to basic financial ratios and a general understanding of financial statements and some productivity, tracking systems and measurements typically utilized in health care organizations.
Pre-requisite:  FIN 401

MHM504  Strategic Management of Health Services
The content of the course is developed around several health care trends including restructuring, innovation of health care delivery and finance and an increased emphasis on performance. It addresses basic theory, strategic plan development, organizational analysis and specific appropriate analytical techniques, implementation strategies and case studies.
Pre-requisite:  MAN 401

MHM505  Concepts of Primary Health Care
The course familiarizes students with the basic concepts surrounding primary health care. It aims to provide the basic conceptual understanding of public health problems pertaining to the availability, accessibility and affordability of primary health care services.
Pre-requisite:  MHM 401

MHM506  Managing Professional Health Care Organizations
The course will includes application of management theory and concepts to health services systems and organizations. It characterizes functions, organizational structures of delivery system, fiscal management, personnel management and planning procedures.
Pre-requisite:  MAN 401, MHM 401

MHM507  Introduction to Epidemiology
The course includes definitions, principles and factors related to the manifestation of infectious and non-infectious diseases, including tracing their sources, modes of survey conduction, controlling spread and initiating measures to prevent recurrences.
Pre-requisite:  MHM 401

MHM508  Pharmaceutical Marketing & Quality Assurance
This course examines the nature of pharmaceutical industrial market and analyses of customer procurement strategy, product policy, pricing, distributing strategy and sales force management strategy. It identifies quality assurance as an integral structured organizational process for involving personnel in planning and executing standardized improvements in systems.
Pre-requisite:  MKT 401

MHM509  Marketing of Health Services
The course aims to familiarize the students with methods most commonly used in marketing of health services. It focuses on the critical links between health service marketing as it relates to customers, competitors, market segmentation and definition of target markets. Solutions to service price, promotion and distribution problem are also discussed.
Pre-requisite:  MKT 401
**Institute of Business Management**

**MHM510  Introduction to Demography Methods**
An introduction to the fundamental methods employed in the statistical study of human populations, especially their size, distribution and number of births/deaths and their health consequences. The students will also learn to apply computer technology to demographic studies.

**MHM511  Population and Health**
The course studies the impact of population growth on the health of the populace and its effect on the health care delivery system.
Pre-requisite: MHM 401, MHM 404

**MHM512  Economics and Management of Pharmaceutical Industry**
The course focuses on the nature of economic systems and how they constrain, control and impact the operational effectiveness of pharmaceutical organizations. Deliberation on contemporary management tools utilized by pharmaceutical organizations to overcome economic, financial, managerial and industrial constraints are also discussed.
Pre-requisite: ECO 401

**MHM513  Managing Physicians**
The course content examines the strategic advantage of attracting and retaining competent medical staff members as it relates to higher occupancy and decreased litigation. Simultaneously, it assesses physician co-operation in making cost effective and high quality care service delivery decisions. It examines strategies for mutually beneficial linkages between hospitals and physicians to realize the goals of hospitals.

**MHM514  Environmental Health Assessment and Mgmt.**
The objective of this course is to study the impact of environmental pollution and degradation on the health of populace. It provides theoretical instructions with a focus on environmental health assessment and knowledge of managing environmental health problems.
Pre-requisite: MHM 401, MHM 404

**MHM515  Hospital Administration**
The course addresses major functions and issues surrounding supervision of hospitals; organization and management of hospitals, relationships/differences between line and staff functions. Likerts Scale, Peter Principle, McGregor’s Theory X and Y are also discussed. Strengths and weaknesses of employee performance appraisal are identified. Personal and professional skills necessary to provide a wide range of services and quality care in hospitals are emphasized upon.
Pre-requisite: MAN 401

**MHM516  Health Program Evaluation**
The course prepares students to discuss components of program evaluation and formulate credible evaluation questions. Students will be able to construct evaluation designs, recognize limitations of each, report evaluative results and critically assess evaluation reports.
Pre-requisite: MHM 501

**MHM517  Research Project**
A capstone course involving a supervised research project, applies curricular concepts and skills to problems in an organizational setting.
Pre-requisite: MHM 402, MHM 404
MHM518  Regulatory Affairs at Healthcare Industry
Healthcare is a highly regulated industry and the course provides an insight into the important laws and regulations controlling business in the healthcare sector. Upon completion of the course, students will be well versed with drug laws, good manufacturing practices, and laws governing operation of blood banks, breast feeding ordinance, 2002, environmental concerns and WTO.
Pre-requisite: MHM 401

MHM519  Financial Applications in Pharmaceutical Marketing
The course is designed to reach financial justification on acceptable accounting principles. Success of marketing activities, whether aimed at consumer satisfaction or otherwise are measured in terms of “revenue and profit”. This course introduces students to marketing activities involving financial justification.
Pre-requisite: FIN 401

MHM520  Product Management
This course focuses on creating and managing product and brand portfolios in pharmaceutical industry for long-term profitability, as established and mature products and brands are critical to an organization’s financial stability and strategic posture. Students will apply strategic frameworks for managing mature products for profitability, transferring existing competencies to new products and evolving market opportunities of a product portfolio.
Pre-requisites: MAN 401

MHM521  Pharmaceutical Sales Management
This course enables the students to develop analytical and managerial skills for estimating sales potential, forecasting sales, manning territories and controlling sales force in the pharmaceutical sector. Furthermore, the students will learn to apply these concepts for solving problems, through case studies, training and motivational exercises.

MHM522  Project Management of Health Services
In this course, students will be able to learn planning for quality, performing quality assurances activities, and closing project contracts keeping in view ethics, professional knowledge, stakeholder’s interests and cultural diversities. By the end of the course, students will be proficient in organizing and executing complex healthcare projects using techniques of project management software tools.
Pre-requisites: MAN 401, MIS 401

MHM523  Health Ethics
In this course, the students will be able to learn the principles and theories of ethics related to health care delivery/administration and legal issues surrounding the relationships of patient, provider, and health care institution. This course also focuses on principles of autonomy and informed consent, confidentiality, truthfulness, professional standards and institutional ethics, corporate liability, medical malpractice, medical staff bylaws, patients’ rights, medical records and governmental regulation of personnel and health facilities. In addition, the course will cover the ethical problems related to death, reproductive rights, the ethics of transplants, cloning and the biomedical research.
HUMAN RESOURCE MANAGEMENT

HRM301/401 Human Resource Management
The course includes a wealth of conventional wisdom related to traditional human resource management challenges of recruitment and placement, training and development, compensation and labor relations. In addition, contemporary management challenges related to such issues as the strategic role of HRM & global HRM are included. Overall, the course is carefully crafted to present traditional HR management concepts, important contemporary HR management issues and insights so as to ensure organizational success. The pedagogical objective of the course is to impart specific actionable skills to the student. Pre-requisite: MAN 301/302/401/402

HRM400 Foundation of Human Resource Management
This course is a study of approaches and theories of human resource management; an overview of the human resource profession, including emerging trends, professional roles and professional competencies.

HRM405 Research Methods in HRM
This course focuses on description, analysis and application of research methods for HRM professionals, studied in the context of key business and organizational decision-making processes. Pre-requisite: STA 400, HRM 400, MAN 402

HRM406 Conflict Management and Negotiation
This course examines the nature and effects of conflict in organizations and relationships in the workplace, making conflict and negotiation productive and constructive. The course includes theories supporting effective conflict management strategies and tactics for use and resolution, practice of conflict resolution, negotiation and mediation methods. Pre-requisites: HRM 400, MAN 400/402

HRM407 Seminar in Human Resource Management
This course focuses on discussions of current theory and research in human resource management and related topics. It is based on high quality contemporary research, case studies, discussion forums and available literature on human resource function as it relates to the overall strategy of the company. This course provides students the opportunity to apply knowledge acquired in prerequisite courses to resolve real-life workplace issues.

HRM408 Human Resource Issues in Pakistan
This course focuses on five key issues that present the greatest opportunities and challenges for HR professionals today and examines their implications in Pakistan. The course explores ways to realign HR and to explain the professional competencies needed to play a leadership role in realizing organizational change; examines the opportunities and benefits of planning for and managing a diverse workforce; defines the role of HR in managing a team environment; evaluates ways to design and implement alternative work schedules, reward system, human capital metrics and long term human resource strategies with a variety of organizations from not-for-profit to government organizations and local companies.
HRM409  Management of Excellence & Innovation in Organization
This course aims to enhance students’ understanding of innovation processes in the organization and how to manage such processes effectively. It introduces the key concepts, models, and techniques of innovation and organizational change management. Particular areas of emphasis will be the nature of innovation, innovation process, innovation typologies, changes in the external environment and drivers for change, models of organizational innovation and change, individual and group creativity, factors associated with innovation, practices for developing innovative organizations, organizational culture and transformational leadership.

HRM501  Recruitment and Selection
This course offers an understanding of effective techniques of the recruitment and selection process. It equips students with generic, technical, analytical and evaluative skills relevant to recruitment and selection. The course encompasses an in-depth knowledge of the entire recruitment process, right from the planning of staff requirement to designing of the job descriptions and advertisements, interviewing and testing applicants till the final selection and job offer. It encapsulates relevant information about the candidate through effective methodologies applied in the interviewing procedure.
Pre-requisite: HRM 301/401/402

HRM502  Industrial Relations and Labor Laws
The course deals with relationship issues arising from interaction between parties in the workplace. It develops an understanding of the principles & philosophy of industrial relations; labor-management relationship and labor administration; industrial relations attitudes and approaches; development and objectives of trade unions; their federations; employers’ associations, collective agreements; trade & consideration and process of collective bargaining. The course also focuses on grievance handling, problem solving and role of social partners in industrial conflict resolution; labor and productivity bargaining; labor laws and international labor standards and their influence on industrial relations.
Pre-requisite: HRM 301/401/402

HRM503  Employee Training and Development
The course emphasizes the changing role of training as a tool in giving organizations a competitive advantage in the highly competitive business environment. It covers a broad understanding of strategic training models, need assessment techniques, learning theories and program design evaluation. Traditional training methods, use of new technologies in training and interactive training. It also focuses on the importance of employee development for organizational excellence and in this context deals with issues of career planning, career development and succession planning with an emphasis on special issues in training and development, special challenges in career management and the future of training and development.
Pre-requisite: HRM 301/401/402

HRM504  Negotiation Skills and Collective Bargaining
Explains the principles of exchange and develops confidence and skills to conduct negotiations and achieve a mutually acceptable outcome. It covers the method of negotiation developed by the Harvard negotiating project, known as Principled Method of Negotiation. The course covers the whole process of negotiations and collective bargaining in the context of business labor laws, industrial relations and practices; from preparation to closing a deal and includes essential guidelines for devising a negotiation strategy; how to reach consensus; what to do when negotiation breaks down and how to make use of a third party to break deadlock and resolve conflict.
Pre-requisite: HRM 301/401/402

HRM505  Organizational Change and Development
The course will help students gain insight into Behavioral Science techniques and practices to help corporate managers and practitioners to formulate and implement changes that promote organizational effectiveness and efficiency and improve quality of life and environment.
Institute of Business Management

HRM506  Strategic HRM
The course provides an in-depth understanding of how the major components of the HR practice fit in with each other in order to develop a "high-performance working environment". This course will give first hand experience about the hidden traps that hinder HR-effectiveness in real life situations and what options does an organization has to avoid these traps. It will explain the core systems of HR like training & development, performance management, succession planning, career planning & development, management development, competency profiling, etc.
Pre-requisite: HRM 301/401/402

HRM507  Public Relations and Event Management
The course focuses on public relations as management process in business, government and society; decision-making constraints, use of authority, power play of social, political, economic, technological, and moral issues in decision-making and the limitation and abuse of authority.
Pre-requisite: HRM 301/401/402

HRM508  Salary and Compensation
The course analyzes compensation strategies and practices from the perspective of the industry as well as an individual. It addresses the flexibility propositions in a compensation package which enables a company to adapt to the changing environment.
Pre-requisite: HRM 301/401/402

HRM509  Leadership Studies
This course is designed to cope with the rapid change which the world has been undergoing for the past five decades; more stringent and varying demands are being placed on management leadership for the growth of their organizations, if not for their actual survival.
Pre-requisite: HRM 301/401/402

HRM510  Personnel Development
This course extends training in the area of performance appraisals and is an integral part of Human Resource Development (HRD). It highlights the procedures for assessment of training needs, employee feedback and counseling, career planning and growth, and ways to enable companies to fulfill the intrinsic needs of its employees.
Pre-requisite: HRM 301/401/402

HRM511  Performance Appraisal and Management
The success of an organization depends on its results, which are achieved by its employees. Unless organizations select, develop & retain the best talent, they cannot succeed. Organizations plan, coordinate and review the activities of employees so as to achieve the desired results. The purpose of this course is to understand the links between human resource planning, performance and compensation. Students will study the new concepts and prevailing practices of performance management besides learning skills of managing the employee-employer expectation and tools of performance evaluation and appraisal.
Pre-requisite: HRM 301/401/402

HRM517  Personnel Management & Industrial Relations
This course aims to cover the theoretical foundations and empirical practice of HRM and IR. It provides students exposure to a wide variety of organizational practices; to manage and develop employees, ensure their welfare and understand changing employment legislation essential to business survival. This course enables students to develop practical skills in the subject area to equip them for a career in HR/IR.
HRM518     Coaching Skills and Techniques
This course builds and/or refines the student's repertoire of basic coaching skills applicable to most executive coaching situations (e.g. self-awareness, empathy, listening, questioning, giving and receiving feedback, confrontation, limit setting, demonstrating leadership, etc.). It seeks to develop the specialized techniques of executive coaching, peer coaching, management coaching, leadership coaching and individualized skill. Students learn how to coach and understand organizational culture to develop high-performing cultures that strengthen business results.

HRM519     International HRM
The course will review the theories, models and concepts developed in the areas of international management, international organizational behavior, cross-cultural management, and study their implications on international HRM practices. A major focus of the course will be on international human resource management & development issues of recruitment and selection, compensation and reward systems, training and development, performance appraisal, expatriation, repatriation and career development.

LANGUAGES

LAN101     Introduction to Arabic
This is an introductory course in Arabic. It is structured for those who have no prior knowledge of the Arabic language. It starts from the basics and brings the students to a level at which they can develop phrases and understand spoken Arabic.

LAN102     Introduction to French
This course is designed for those who do not have any prior knowledge of this language. It enables the students to carry out basic conversation in French. Students are prepared in a manner that they can put the message across. This course is designed to bring about awareness about the business taking place between Pakistan and France. This course also gives some knowledge about French culture. The main objective of this course is to bring the students to a level where they can read, write, speak, and understand foreign language and comprehend and appreciate foreign cultures.

LAN103     Introduction to Spanish
This is an introductory course in Spanish. It is structured for those who have no prior knowledge of the Spanish language. It starts from the basics and brings the students to a level at which they can develop phrases and understand spoken Spanish.

LAN104     Introduction to German
This is an introductory course in German language. It is structured for those who have no prior knowledge of the German language. It starts from the basics and brings students to a level at which they can develop phrases and understand spoken German.

LAN105     Introduction to Japanese
This is an introductory course in the Japanese language. It is structured for those who have no prior knowledge of the Japanese language. It starts from basics and brings students to a level at which they can develop phrases and understand spoken Japanese.

LAN106     Introduction to Italian
This is an introductory course in Italian. It is structured for those who have no prior knowledge of the Italian language. It starts from basics and brings the students to a level at which they can develop phrases and understand spoken Italian.
**Institute of Business Management**

**LAN107 Introduction to Russian**
Introductory course structured for beginners. Students will learn basic grammar, pronunciation and dialogue interaction so as to develop phrases and understand spoken language.

**LAN201 Intermediate Arabic**
This course is for those who have a basic understanding and command of Arabic language. It is oriented towards advanced sentence structuring and composition while improving one’s speech style.
Pre-requisite: LAN 101

**LAN202 Intermediate French**
This course is designed for those who have basic knowledge of the language and are able to conduct a simple conversation. This course further enables students to converse in French on a higher level for specific purposes. This course is designed to give general knowledge of different operative systems of France. It prepares the students in manner that they can deal with different situations while traveling and contact and correspond with French natives by letter writing or e-mail. The main objective of this course is to bring the students to a level where they can communicate well and deal with different situations in French.
Pre-requisite: LAN 102

**LAN203 Intermediate Spanish**
This course is for those who have a basic understanding and command of the Spanish language. It is oriented towards advanced sentence structuring and composition while improving one’s speech style.
Pre-requisite: LAN 103

**LAN204 Intermediate German**
This is an advanced course for those who know the basics of the German language. It teaches advanced sentence structuring and composition while improving one’s speech style.
Pre-requisite: LAN 104

**LAN205 Intermediate Japanese**
This course is for those who have a basic understanding and command of Japanese language. It is oriented towards advanced sentence structuring and composition while improving one’s speech style.
Pre-requisite: LAN 105

**LAN206 Intermediate Italian**
This course is for those who have basic understanding and command of the Italian language. It is oriented towards advanced sentence structuring and composition while improving one’s speech style.
Pre-requisite: LAN 106

**LAN207 Intermediate Russian**
The course is oriented towards advanced sentence structuring and composition while improving dialogue interaction.
Pre-requisite: LAN 107

**LAN401 Functional Urdu**
The course will give an insight into the basics of Urdu language. Students will be able to shape language to communicate effectively, while applying appropriate conventions of language usage and grammar. The course will also focus on vocabulary and reading, writing and speaking skills.
LAW

LAW101/102  Mercantile Law I & II
The course aims to enable the students to develop a professional approach towards matters connected with Mercantile Law in the performance of their duties as chartered accountants.

LAW103/104  Company Law I & II
This course provides candidates with knowledge of the Companies Ordinance, 1984, and helps them to develop an understanding of their application to corporate and other business environment, excluding advanced topics, such as provisions relating to arbitration, arrangements and reconstruction, prevention of oppression and mismanagement, winding up, etc.

LAW201  Corporate Law
The aim of the course is to provide knowledge about the practical aspects in the areas of the companies ordinance, 1984, e.g., incorporating/registering different types of companies & joint ventures, raising finances from different modes like issuance of different types of shares, debentures (TFCs) and other capital maintenance issues; practical aspects of holding and managing company meetings and decision making; powers, duties & responsibilities of directors and other company officers in the light of corporate laws & governance; practical aspects of mergers & acquisitions and the reasons and consequences of liquidations.

LAW401  Business Law
The course provides an in-depth study of law relating to commercial associations/ entities with a particular focus on companies. The topics includes legal system/framework of Pakistan, an introduction to the concepts and sources of laws; different aspects of contract laws as in day to day commercial life, performance/ dischargement of the contract with particular emphasis on the specialized contracts made by companies, e.g., agency, industry & guarantee, bailment (which includes carriage of goods & pledges). Topics also include the selected parts of partnership laws and sale of goods laws.

LAW405  Media Law and Business Ethics
This course is based on interaction between media and the public sphere and examines the way moral criteria have been used to underpin the legitimate ethics of journalistic practice. It aims to develop a new framework, which can take an account of the way in which information is produced and distributed in the new environment by examining a broad range of issues, including commercial pressures. The course also introduces laws and ethics in the Pakistani context, especially issues of freedom of expression, absolute vs. responsible freedom, code of conduct and ethics of APNS and CPNE.

LAW406  Professional Ethics and Legal Issues
This course addresses the legal and ethical issues in organizations from a multicultural perspective. The course explores managerial decision-making and reinforces ethical considerations in test decision making, employment selection, compensation, performance appraisal and general treatment of employees at work. The emphasis is on the study of multiple perspectives on an issue, analysis and problem solving strategies to create policy and sustain practices that conform to the spirit of ethics codes of the American Psychological Association and the Society of Human Resources Management in its applicability both domestically and globally.
MANAGEMENT

**MAN101/301/401 Principles of Management**
The purpose of this course is to prepare students to be managers. The course includes a wealth of conventional wisdom related to traditional management challenges of planning, organizing, leading and controlling. In addition, the contemporary management challenges related to such issues as people, quality, diversity, ethics and the global environment are included. Overall, the course is carefully crafted to present traditional management concepts, important contemporary management issues and insights so as to ensure organizational success. The pedagogical objective of the course is to impart specific actionable skills to the student.

**Pre-requisite:** MAN 101/301/401

**MAN201 Personal Management**
The importance of self-management is stressed for productive results. Topics include time management, stress and conflict handling. Development of emotional maturity is discussed and interpersonal skills are developed through transactional analysis.

**Pre-requisite:** MAN 101/301/401

**MAN302/402 Organizational Behavior**
Organizational behavior is a study of how people behave as individuals, in groups and how groups behave as parts of organizations. An effective organization is the one that understands and manages optimum levels of these three types of behavior. The course includes a wealth of conventional wisdom related to traditional organizational behavior issues of the individual, the group and the organization. In addition, the contemporary management challenges related to such issues as the design of HR practices, technology, work design and organizational dynamics are included. The course is carefully crafted to present traditional OB concepts integrated with important contemporary OB management issues and insights so as to ensure organizational success. The student must learn to critically analyze and apply principles to specific, real or created situations.

**Pre-requisite:** MAN 101/301/401

**MAN303/406 Production and Operations Management**
The course will provide a student-oriented presentation of the subject. It will reflect current production and operations management practices and techniques. An integrated approach featuring management process, resource conversion and concepts, models, and behavior applications within the production/operations function will be followed.

**Pre-requisite:** MAN 101/301/401, STA 202, MTH 103

**MAN305 International Relations**
This course aims at providing basic knowledge of international relations. In this course, the key theoretical concepts and terms of the field will be discussed, such as level of analysis of international relations, theory and theory building, important actors in the international arena and the world system, and relations between states. Students will also be introduced to contemporary and future problems and issues in international politics.

**Pre-requisite:** MAN 201

**MAN321 Organizational Behavior & HRM**
This management area focuses on (1) individual, group, and organizational attributes and behavior to describe and explain the functioning and structuring of work organizations, and (2) the practical aspects of human resource management. Students seeking managerial careers in any business function can valuably learn about leadership, motivation, morale, performance, teams, organizational culture, and organizational design. Students interested in careers as human resource management specialists and managers can gain technical knowledge about selection, performance appraisal, training, compensation, workforce diversity, work and family programs, and strategic human resource management.
MAN403 Entrepreneurship & Small Business Management
To provide an understanding of the person and the process of creating and growing a new venture, this course introduces the entrepreneurial perspective and focuses on all the elements in the entrepreneurial process that are part of creating a new venture. It introduces a new venture through alternative sources of capital in financing. Particular emphasis is laid on managing a new venture during early operations, growth and expansion.
Pre-requisite: MAN 101/301/401, MKT 302/402, FIN 202

MAN404 Operations Research and Management
The course aims to enhance the capability of decision-making through application of modern methods of mathematical science to complex problems. The topics include linear programming, transportation and assignment models, network models, queuing models, simulation, replacement models, etc.
Pre-requisite: MKT 303, MAN 303

MAN405 Strategic Management
The course is intended to be a challenging and exciting capstone course for a graduate business school curriculum. It is the first course about strategy and its implementation. Students will be exposed to the state of the art of strategy analysis, formulation, implementation and control. Through case studies, students will develop skills relating to the application of industry and competitive analysis, the ingredients of an attractive strategic plan, the importance of building a sustainable competitive advantage and the special demands of operating in an increasingly global competitive environment.
Pre-requisite: MKT 302/402, MAN 301/401, 302/402, HRM 301/401/402

MAN407 Organizational Management
This course is a study of the entire process of management. It gives an insight into the development of managerial skills for effective running of business operations. Along with the in-depth knowledge of the functions of management it serves as a basis for understanding motivation techniques for human resource which is critical for synergies in business.

MAN408 Analysis of Pakistani Industries
Students get a micro and a macro environmental exposure and understanding of the various issues facing the industry. This course also aims at benchmarking the various functional processes so as to achieve organizational excellence.
Pre-requisite: MAN 302, HRM 301, ECO 402

MAN409 Principles of Management & Human Resource Management
This course highlights management concepts, principles, processes and functions of management, namely, planning, organizing, leading and controlling which provides a sound basis for carrying out required tasks and successfully achieving goals in any organization today. In this environment, effective management of human resource is one of the few levels that managers have at their disposal to accomplish their organizations strategic objectives. The course enhances the students’ understanding of the strategic aspects of managing human resources in an environment, which is constantly changing.

MAN410 Industrial Management
The course introduces industrial management operation system & includes objectives; entrepreneurship, project identification, evaluation, project & operation cost, productivity, break even analysis, process management, operations strategy, competitive strategy framework for competitor analysis, structural analysis of industry, total quality management, capacity planning & facility location, inventory management, supply chain management, project management, project control and technology management.
**Institute of Business Management**

**MAN411 Project Management**
The course covers project initiation, discovery and analysis, time and cost estimates, project planning, network diagram, critical path, recourse management plan, project execution, monitoring and managing, project control, project closure plan, managing operation transfer plan.

**MAN413 Corporate Social Responsibility**
This course examines the responsibilities of business corporations to shareholders and other constituencies as they are manifested in the day to day issues faced by the senior management. It begins by exploring the rationale behind the proposition that business has a responsibility to society beyond that of wealth creation. It then emphasizes value-based decision making and challenges the students to explore and apply their own values to issues.
Pre-requisite: MAN 401

**MAN416 Corporate Governance**
Corporate Governance is the structured system of policies and processes established and maintained by a board of directors and senior management to oversee an organization’s strategic activities and evaluate the resulting performance. The system exists to ensure proper accountability, probity, and openness in the conduct of an organization’s business for the long-term benefit of all its stakeholders. As such, Corporate Governance focuses on effectuating sound relationship among board of directors, top management, investors, employees and various other stakeholders. Corporate Governance encompasses board size, structure, membership, member nomination, election, and tenure committee structure and the nature, composition, and duties of the individual committees rights, responsibilities and relationship of directors, management, and shareholders policies/procedures relating to accounting, auditing, executive compensation, disclosure and financial reporting.
Pre-requisite: MAN 401

**MAN417 Services Management**
This course focuses on service industries, such as dealing with intangibility and inseparability. It also examines the problems faced by professional, not-for-profit, social and financial services marketers.

**MAN501 Total Quality Management**
This course revolves around the customer satisfaction model and deals with the areas of benchmarking, ISO-9000 (quality management systems), ISO-14000 (environmental quality systems), statistical process control, customer satisfaction approaches/models (management tools). There is special emphasis on research project & case studies in this course.
Pre-requisite: MAN 101/301/401, MAN 303

**MAN502 Business Process Re-engineering**
This course is designed to develop an understanding about organizing, managing & improving the ongoing process & systems essential for sustained growth of the organization.
Pre-requisite: MAN 101/301/401, MAN 303

**MAN503 Supply Chain Management**
The course is one of the most important organizational functions which brings in operational efficiency in production and serves as a bridge for company’s customer ROI maximization as well as internal cost efficiency and profit optimization. The objectives of this course are to give students practical exposure to the conceptual framework and operational aspects of this very important science, and discuss various conventional and modern tools applied to achieve better results.
Pre-requisite: MAN 101/301/401, MKT 301/401
MAN504  Business Balanced Scorecard
This course is a set of measures that provide a comprehensive business overview. It includes not only measures that track past actions, but also those that drive future performance. In this course students will build the skills to create a strategy map and a Balanced Scorecard for an organization.

MAN507  Business Etiquette
The course deals with the ingredients necessary for career growth, apart from technical competence, e.g., protocol in the office, personal grooming and dress, relationship with colleagues and customers, etc.

MAN508  Comparative Management
This course exposes students to the different work-related values and norms prevalent in various countries of the world. The main aim of this course is to expose students to different cultural mindsets and the effective leadership styles which have been developed in different parts of the world.

MAN509  Logistics and Inventory Control
The course is based on analysis and designing of domestic and international logistics systems. Topics include transportation, warehousing, inventory control, materials handling and packaging, and plant and warehouse locations. The course may serve as preparation for the American Society of Transportation and Logistics Certification examination in logistics systems management.
Pre-requisite: MAN 304

MAN510  Management Infrastructure
This course is a study of the entire process of management. It gives an insight into the development of managerial skills for effective running of business operations. Along with the in-depth knowledge of the function of management it serves as a basis for understanding the motivation techniques for human resource which is critical for synergies in business.

MAN601  Advanced Research Methodology
This course introduces students to issues involved in developing appropriate research strategies for investigation business and organizational issues and concerns. Extensive literature review, presentation and research article summaries constitute its essential part. Quantitative research techniques are discussed at a higher level and software, such as SPSS, MINITAB and EVIEWS are used to analyze secondary data. The unit is also designed to facilitate the completion of an applied research project.

MAN602  Survey of Current Research Literature in Management
The course provides a review of management research literature under the supervision of PhD faculty. It provides an opportunity to analyze quality research published in different professional journals in the field of Management. The course concentrates on organizational behavior, business policy, human resource management and behavioral sciences.

MANAGEMENT INFORMATION SYSTEMS

MIS001  Introduction to Computers
The course is an overview of computers, understanding the machines, binary (bits and bytes), different goals, different machines and their sizes, history of computers and parts of computers.

MIS102  Computer Concepts
The course provides an overview of computers, understanding the machines, binary (bits and bytes), different goals, different machines and their size, history of computers and parts of computers. Problem solving techniques using computers, flow charting and algorithm design, processing methods and programs, types of computer languages, types of computer software and an introduction to operating systems is also part of the course.
Institute of Business Management

MIS103  Computer Applications I
The course is a study of microcomputer applications software, including operating systems, word processing, presentation graphics, spreadsheet, and implementation of solutions using appropriate applications software.
Pre-requisite:  MIS 102

MIS104  Computer Programming and Graphics
This is the first course in computer programming for engineers, involving an extensive development of programming skills required in engineering disciplines, the concepts of source and object programs, compilation, data and program distinction. It provides mathematical and practical knowledge of graphical standards necessary to meet the requirements of today's industrial engineering practices.

MIS106  Computer Applications in Business
The course is a study of microcomputer applications software, including operating systems, word processing, presentation graphics, spreadsheet, and implementation of solution using appropriate application software. The course helps to develop integrated business microcomputer based applications.

MIS201  Computer Applications II
The course helps to develop integrated business microcomputer-based applications. It emphasizes on design principles of transaction processing, management reporting, decision support, and executive support.
Pre-requisite:  MIS 103

MIS401  Computer Applications
The course is a study of information technology used in business information systems, including input, processing, storage and retrieval, output hardware and software, including operating systems and management reporting, decision support, and executive support systems. It emphasizes on microcomputer applications software, including operating system, word processing, presentation graphics, spreadsheet, database software, design principles of transaction processing and executive support systems.

MIS402  Computer Concepts and Applications
This course has been designed for students to learn basic concepts of Management Information Systems, components and types of MIS, relationship between information technology and MIS; information about software, their types and application, hardware components of a computer system; devices attached to a computer, use of internet, e-mail and e-commerce.

MIS403  Web Authoring
The course provides an introduction to IIS, internet architecture, creating simple web document, HTML, DHTML, linking web pages together, advanced formatting options, adding images to web document, CGI forms, etc.
Pre-requisite:  MIS 401, MIS 402, MKT 301/401

MIS404  Computer Programming Language
The course includes computer cultural impact, its history and uses the essential features of computers and computing systems, problem analysis, development of basic algorithms, introduction to a high level language with general applications, digital computer organization, machine language, instruction execution, addressing techniques, digital representation of data symbolic coding and assembly system, macros, conditional assembly; I/O control subroutine linkage, system and utility programs.
Pre-requisite:  MIS 401
MIS405  Visual Basic
The course provides an introduction to Visual Basic, database access objects, maintaining databases using Visdata, input validation rules, creating user interface, error handling using VB, an overview of SQL server, active X data object, security issues, report writing, etc.
Pre-requisite: MIS 404

MIS406  Operations Research
The course focuses on the nature of operations research, formulating problems and objective analysis, types of problems, risk situation, sequential decisions models, linear programming model, graphical method, simplex method, etc.
Pre-requisite: MIS 401

MIS407  Programming in JAVA
Introduction to object oriented methods, fundamental programming structure in JAVA, GUIs, apples, application, script programming, JAVA database connectivity, JAVA beans, etc.
Pre-requisite: MIS 401, MIS 404

MIS408  Web Page Development and Adobe Photoshop
The course includes an introduction to World Wide Web, hypertext and browser; basic HTML and WWW linking web page together; creating simple web documents, advanced formatting options, adding tables to web pages, adding images to web documents; working with URLs, using external media and plug-ins, linked windows and frames; uploading web pages on internet server, CGI and forms, image maps and dynamic documents. Adobe photoshop has been included as one of the web tools regarding text and images to be added in a web page. The software will teach how to add, edit and format text with color combination, etc. Advanced features are included to enhance the student's skills and professional ability.
Pre-requisite: MIS 401

MIS409  Computer Applications and MIS
This course has been designed to teach basic concepts of Management Information Systems, components and types of MIS, relationship between information technology and MIS, information about software, their types and application, hardware components of a computer system; devices attached to a computer and the use of internet, e-mail and e-commerce. Students would also learn about organization, logical design, and methods of computer usage in the area of mathematical science, algorithm development and presentation, number systems, flow of control; basic number codes.

MIS413  Information Technology I & II
The objective of this course is to provide students with adequate knowledge of computer hardware and software; important elements and concepts of information systems; basic principles of computer programming and computer software application. It also gives an insight in the IT Security and controls; focuses on practical experience on performing various general procedures and the use of standard packages.

MIS414  Computer Practical
The course includes Microsoft Windows and Internet, MS-Excel, Microsoft Word, Microsoft Power Point, Microsoft Access, Microsoft Project and Microsoft Outlook / Outlook Express. This practical examination is a comprehensive form of basic computer and internet as per ICAP’s requirements.

MIS501  Information Systems Management
The course covers information systems planning techniques, information systems portfolio analysis and management control and auditing techniques related to information systems. In addition, it focuses on organizing and managing international information systems.
Pre-requisite: MIS 103/401
Institute of Business Management

MIS502  **Electronic Commerce**
The course covers information systems that provide services to multiple organizations linking many buyers and sellers electronically. The topics include telecommunications, electronic data interchange, and doing business on the internet. It emphasizes international information policy issues affecting electronic commerce.
Pre-requisite: MIS 103, MIS 201, MIS 401

MIS503  **System Analysis and Design**
The course focuses on the methodologies and software tools in analyzing business processes. Topics include business re-engineering and information systems cost-benefit concepts; total quality management concepts; systems-building methods, including the system life cycle, prototypes, and end-user development techniques.
Pre-requisite: MIS 103, MIS 201, MIS 401

MIS504  **Oracle/ Developer 2000**
The course teaches design, implementation and management of relational database systems. The basic topics, such as creation of tables, indexes, constraints (referential integrity), views and querying data and advanced topics, such as rollback segments, parallel processing options and triggers are covered in the course.
Pre-requisite: MIS 103, MIS 201, MIS 401

MIS505  **Software Engineering**
The course introduces the architectural make up of some well-known operating systems (from micro to mini to mainframe systems). It also introduces different programming techniques using fifth-generation languages such as C++ to visual basic.
Pre-requisite: MIS 103, MIS 201, MIS 401

MIS506  **Data Communication and Networking**
This course is designed to teach from the very basic to advanced network design methodologies and modern trends in data communications. Design and implementation of windows NT server 4.0 covering topics, such as installation of user accounts, groups, domains and trust relationships, sharing of drives, directories and files are taught. It also covers network protocols, such as NetBeui, IPX/SPX and TCP/IP and communication protocols.
Pre-requisite: MIS 103, MIS 201, MIS 401

MIS507  **Relational Database Management Systems**
The course includes continuation of data structure covering file structures & databases, random, indexed sequential inverted & multi-list file structures, concept of data models, data security and data integrity, etc.
Pre-requisite: MIS 103, MIS 201, MIS 401

MIS508  **Programming in C++**
The course includes the basic concepts of object oriented programming, functions, classes, linked list and procedures.
Pre-requisite: MIS 103, MIS 201, MIS 401

MIS509  **Software Project Management**
The course emphasizes the use of Computer-Aided Software Engineering (CASE) tools and object-oriented design and programming; configuration management and simulated project management; examination of software design issues and techniques. It includes a survey of design representation and a comparison of design methods; planning, scheduling and control of projects including cost estimating techniques; network analysis, time analysis, CPM and PERT, resource allocation, constraining & leveling; review of commercially available software and the use of PC based project management package.
Pre-requisite: MIS 401, MIS 406, MIS 505
MIS510  Object Oriented Systems Analysis and Design Elective
The course introduces an object-oriented and web-based software focusing upon the object model describing classes, their relationships to other objects, and their attributes and operations.
Pre-requisite: MIS 407, MIS 503

MIS511  E-Commerce, Web Design and Graphic Design
The course introduces students to the multi-disciplinary field of electronic commerce; basic e-commerce concepts; a review of relevant internet technologies; LANS, internet, DNS, web browsers, HTML, HTTP, databases, server architectures; commerce workflow models, business models for e-commerce, the value chain, roles and functional architectures; protocol architectures, issues of compatibility portability, transaction processing: database integrity, transaction processing (local key cryptosystem, internet security and security applications for e-commerce (key management, certificate authorities, standards, WWW security, transport and tunnel mode, secure sockets layer, Secure Electronic Transactions (SET), e-Auctions, e-advertising; CRM, supply chain management, internet banking, e-Government and future of e-commerce and technological needs.

MIS521  Record Management
This course particularly caters to the needs of management responsibilities; IT professionals and perspective on some of the unique issues facing the management of IT professionals. Organization Leaders often set the tone and establish the benchmarks for success. In this course, the focus is on developing a successful leadership style that facilitates team-building, collaboration, and a corporate culture that promotes success. Different decision-making techniques will be explored in the context of successful leadership styles.
Pre-requisite: MIS102/MIS401/MIS402

MIS522  Business Information Systems
The course provides strategic views of information systems in modern business as well as the opportunity to examine and build IS solutions. It also provides ample opportunities to gain practical programming skills necessary for successfully developing business applications using modern development technologies and methodologies which constitute the core of this course.
Pre-requisite: MIS102/MIS401/MIS402

MIS523  Decision Systems
The course helps to gain an insight into different decision levels and practical problems of organizations. The course emphasizes the study of decision theory, decision systems development and enabling technologies. The course includes the application and critical evaluation of methods and technologies in the decision-making path in current business scenarios.
Pre-requisite: MIS522

MIS524  Decision Support Systems
This course provides a review of the literature in the area of decision support systems (DSS) and DSS frameworks, the process of decision-making and issues involved in the design, implementation and evaluation of DSS. Additional topics include data mining, user interfaces, knowledge-based DSS, and research directions in DSS; the design and implementation of a DSS prototype.
Pre-requisite: MISS23
**Institute of Business Management**

**MIS525  Enterprise Systems**
This course examines enterprise systems from the perspectives of Information systems and operations management. It examines cross-functional integrated computer-based information systems, commonly referred to as Enterprise Resource Planning (ERP) systems, designed to support an organization’s information needs and operations. Common business processes, re-engineering/change management, and enterprise reference models are introduced from a holistic perspective. The course considers issues associated with the selection, analysis, design, implementation, and configuration of such enterprise systems. It investigates how such systems implement transaction processing, management information, and decision support across an organization’s various business processes. Strategic issues relating to success/failure and human aspects will also be introduced.
Pre-requisite: MIS501

**MIS526  Enterprise Resource Planning Systems**
This course examines the cross-functional integrated computer-based information systems, commonly referred to as Enterprise Resource Planning (ERP) systems. Systems, common business processes, re-engineering/change management, and enterprise reference models are introduced with a holistic and research-oriented perspective. It focuses on issues associated with the analysis, design, implementation, and configuration of such enterprise systems and investigates topics, such as supply chain, planning and control systems, optimization, scheduling systems, electronic commerce and business information warehousing.
Pre-requisite: MIS525

**MIS527  Information Security**
The course presents technical arrangements for making information systems more secure. The process starts with defining the proper security requirements that are usually stated as a data security policy. Other topics include: identification and authentication, access control, security kernel, physical security, eavesdropping, hardware security, system software security, encryption techniques, public key infrastructure, security protocols and handling subversive software.
Pre-requisite: MIS506

**MIS528  Advanced Information Security**
The course addresses concerns regarding confidentiality, privacy and the volatility of information resulting from the use of information technology. It emphasizes such managerial security issues as system security and controls, legal and ethical issues arising from protecting computer files both from a Pakistan and world perspective, disaster recovery and contingency planning and other tools used for protecting information system resources.
Pre-requisite: MIS527

**MIS530  Information Systems Research**
The course provides an opportunity for a substantive review of research in the discipline of information systems as the essential part. Behavioral, strategic and social issues relating to the design, implementation and impact of information technology applications will also be studied.
Pre-requisite: MIS501, MKT404

**MIS532  New Perspectives on Organizations and Information Systems**
The course investigates the major issues facing organizations in adopting, implementing and using information systems for competitive advantage. It also provides an opportunity to explore a set of critical issues from both an academic and practical perspective. The topics include strategic information systems, e-commerce, knowledge management, the emergence of the business process, ERP implementation, virtual teams and global IT, IS and developing countries, etc.
Pre-requisite: MIS522, MIS525
MARKETING

MKT301/401 Principles of Marketing
This is an introductory course in marketing. It is aimed to give an insight into the philosophy of marketing in organizations. Through this course students will get an elaboration of marketing concepts which will form a foundation for all marketing related courses.

Pre-requisite: MKT 301/401

MKT302/402 Marketing Management
This course is designed to familiarize students with the process of marketing management. It is an application of the marketing concepts to real life situations. Students learn to develop a situational framework for analyzing marketing problems and opportunities and pursue suitable objectives and strategies. It is a practical course based on case studies, incorporates preparation of a comprehensive marketing plan and discussion of contemporary marketing issues through article presentations.
Pre-requisite: MKT 301/401

MKT304 Strategic Marketing
This course develops an understanding of the technique, concepts, approaches and skills in marketing management and strategy planning. It incorporates strategic management techniques developed from models for the corporate environment, campaign marketing for the public-environment and international marketing.

MKT403 Sales Management
This course enlightens students on how organizations sales goals can be met in an effective & efficient manner through planning, staffing, training, leading & controlling organizational resources. The course teaches students to prepare sales plans and forecasting, territory planning, and time management among other topics.
Pre-requisite: MKT 301/401, 302/402

MKT404 Methods in Business Research
The course aims at providing an understanding of the research process application to various segments of business and social life. It is designed to impart methods and techniques of scientific research and report writing. It also aims to develop an attitude of objectivity and scientific thinking.
Pre-requisite: MKT 301/401, 302/402, STA 202/403/404

MKT405 Marketing Research
This course teaches the function that links the consumer, customer, and public to the marketer through information. Students learn methods to collect information, manage and implement the data collection process, analyze, and communicate the findings and their implications.

MKT501 Strategic Marketing and Planning
This course develops an understanding of the techniques, concepts, approaches and skills in marketing management and strategy planning. It incorporates strategic management techniques developed from models for the corporate environment, campaign marketing for the public environment and international marketing.
Pre-requisite: MKT 301/401, 302/402

MKT502 Packaging, Printing and Graphic Design
This course prepares students to make marketing decision based on knowledge of visual/aesthetics and business considerations. It also covers paper proportioning and structural designing using different material vis-à-vis steel, aluminum, plastic, paper, etc and hence translating the brand concept to the final sales package. This module provides an appreciation of the factors affecting style, design, color perception, etc., in packaging.
Pre-requisite: MKT 302/402
Institute of Business Management

MKT504 Advertising
This course helps students to acquire a full understanding of the function of advertising in the marketing process, develop their skills in designing an effective advertising campaign and judging and evaluating the advertising proposals. The course will familiarize them with the process and techniques of advertising production, its budgeting & control process.
Pre-requisite: MKT 302/402

MKT505 Industrial Marketing
The course includes the nature of the industrial market, analysis of customer procurement strategy, product policy, pricing, distribution strategy, sales force management and key account selling strategy.
Pre-requisite: MKT 302/402

MKT506 International Marketing
This course analyzes opportunities, distinctive characteristics, and emerging trends in foreign markets; explores alternative methods and strategies for entering foreign markets; organizational planning and control; and impact of social, cultural, economic and political differences.
Pre-requisite: MKT 302/402

MKT507 Services Marketing
This course provides an in-depth appreciation and understanding of the unique challenges inherent in managing and delivering quality services. Students will have the opportunity to work with tools and strategies that address these challenges.
Pre-requisite: MKT 302/402

MKT508 Personal Selling
In this course the students are taught the art of oral communication with potential buyers of a product with the intention of making a sale. Among marketing jobs, more people are employed in selling than any other field, hence this course gives good textbook knowledge to equip the student for such a position in the practical field.
Pre-requisite: MKT 302/402

MKT509 Consumer Behavior
Consumption is so prevalent that we are often unaware of its importance in shaping our lives. This course adopts a psychological approach to consumer behavior and explores the implications for individual consumers and marketers. It deals with the crucial issues of why consumers buy what they buy and how they respond to marketing and advertising influences.
Pre-requisite: MKT 302/402

MKT510 Direct Marketing and Sales Promotion
This course gives an insight into the nature and purpose of direct marketing and how companies can use the various promotional tools to gain a competitive edge. It differentiates the various elements of communication mix and explains where these are used to access targeted consumers. It describes the steps, problems and issues involved in the implementation and execution of a project of direct marketing.
Pre-requisite: MKT 302/402

MKT511 Brand Management
This course considers strategies to build and effectively manage brand equity. It covers the role of brand awareness and image; brand extension principles, integrated marketing communications, and financial and marketing research measures.
Pre-requisite: MKT 302/402
MKT512  Export Marketing
The course offers a guide to the practicalities of entering international markets. The topics includes are international trade and regional comparative advantage, soliciting markets, documentation and financing of exports.
Pre-requisite:  MKT 302/402

MKT513  Media Planning
The course prepares the student for the changing media scenario by enabling them to specialize in the handling and effective selection of media. The course elaborates how the advertising budget can be used optimally across various media.
Pre-requisite:  MKT 302/402

MKT514  Event Management
Courses on event management are the talk of the town nowadays because of the element of glitz, glamour, flamboyance and style associated with important social and corporate events like marriages, birthday parties, company conferences, seminars, workshops, product launches and a host of other activities. This course teaches the student to plan for such events right from brainstorming to the final execution.

MKT515  Print Media
The objective of the course is to provide specific study of print media for those students who aspire for a career in newspapers, magazines, periodicals and other publications. The course teaches students about process and production of print media, printing technologies, production strategies, thus equipping the students with knowledge and skills to enter the print media industry.

MKT516  Electronic Media
This course prepares students to acquire a full understanding of the function of radio and television in all its modern manifestations, including cable TV. Students will learn how to formulate advertising plans & monitor results taking cognizance of problems, opportunities and regulatory matters.

MKT517  Media Marketing
This course teaches techniques which are used by marketers to sell media as well as methods employed to convince advertisers of how their applications can be used to obtain optimum results. Often this takes the form of presentations to advertisers and could include the preparation of a media plan for each campaign to help clients.

MKT518  Role of Media in World Affairs
This course teaches the students of the importance media as a vehicle for creating an atmosphere conducive to international relations. It teaches the students how the media has undergone significant changes over the years and the power it has on the formation of public opinion and the external environment for marketers and others.

MKT519  Marketing of Financial Services
This course teaches students how financial products- banking and insurance primarily- are marketed. Students are taught through local examples and made to apply marketing concepts to local players in the industry.
Pre-requisite:  MKT 301/401, 302/402
**Institute of Business Management**

**MKT520 Merchandising and Sales Promotion**
The course aims to touch upon a frequently overlooked facet of marketing; visual marketing and the role it plays in sales promotions. The course will explore the definition and use of visual merchandising with an emphasis on local companies and then move on to the role it plays in sales promotion.
Pre-requisite: MKT 301/401, 302/402

**MKT521 Distribution and Channel Management**
The battle of consumer products is now fought in the field of distribution. Even the best advertising and communication and positioning strategy will not be capitalizing on the investments made until there are operational executions in the battlefield, i.e., distribution. Hence, this course has been designed to prepare students with a framework as well as operational plan for the execution of a successful distribution strategies related to the local multi-national and national environment, keeping in view the key elements of Pakistani markets.
Pre-requisite: MAN 101/301/401, MKT 301/401, 302/402

**MKT522 Introduction to Media in Pakistan**
This course comprehensively covers contents like print, electronic, out-of-home media in Pakistan. The course also discusses the Pakistani environment in the context of media laws & ethics, the role it plays in world affairs, and marketing, planning and research processes prevalent in the country.

**MKT524 Multimedia and Film Production**
The course focuses on aspects of multi-media, video and film production. This course provides the student hands-on knowledge of planning, organizing, directing, controlling and promoting, provided by professionals from the field. The work-like atmosphere enables students to prepare for careers in this area.

**MKT525 Advertising and Out-of-Home Media**
Out-of-home includes public display media, such as signs, billboards, talking boards located out-of-home, usually near where the audience is and at the point of purchase. This course prepares students to acquire a full understanding of the function of advertising in the marketing process and to develop their skills in designing effective advertising campaigns.

**MKT526 Public Relations and Event Management**
Public relations is increasingly being recognized as an important business function. Accordingly, this course prepares students to acquire a full understanding of the function of public relations in a complex, social, economic and political environment. This course will also familiarize the students with the processes, tools and techniques required for effective public relations.
Pre-requisite: MKT 302/402

**MKT527 Integrated Marketing Communication**
The course focuses on how to plan, develop and execute integrated marketing communication programs using the tools of advertising, direct marketing, sales promotion, public relations, special events marketing, online advertising and personal selling.

**MKT530 New Product Development**
This course educates the student on the whole cycle of launching a new product. It engulfs areas right from conceptualization to research, design, testing, manufacturing and finally at the heart of it—marketing the new product. Segmentation, pricing, profitability, distribution strategies in the light of conjoint portfolio analysis are also included.
MKT531 Retail Management
This course provides a good understanding of the concepts, strategies, and trends associated with a retail operation in the marketplace. It explores the current retail environment and key retail management strategies from managing merchandise and employees to advertising and promotion. The course incorporates environmental, demographic and social issues into the discussion of retail operations.

MKT535 Media Research and Public Opinion
Mass media research introduces graduate students to applied audience research for electronic media. The emphasis will be on Pakistan’s media market and students will gain hands on experience with syndicated and custom audience research for print and electronic media. Students will be exposed to various aspects of media audience research including Gallup ratings for TV, radio and cable TV and other music research. Students are expected to become familiar with the Pakistan media market specially in electronic media, based on TV, radio, cable systems and cinema through mass media research based on research process, research approaches, data analysis and research application.

MKT601 Survey of Current Research Literature in Marketing
This course offers a comprehensive review of research materials from professional marketing journals, allows students to carry out their exploratory and research activities. Moreover, it focuses on data analysis, applications of multivariate statistics, and multiple-regression factor analysis to marketing research problems. Considerable time is devoted to multi-attribute preference model in various marketing fields including brand, product, direct, consumer, advertising, sales, and global marketing.

MATHEMATICS

MTH011/012 Business Maths and Statistics I & II
This course will provide an in-depth study of the concepts of statistics and quantitative business tools. The course will mainly emphasize learning quantitative techniques along with their application to economics and business. The topics include inequalities, function notation and inverse, linear, quadratic, polynomial and exponential functions and mathematics of finance.

MTH101 College Algebra
The course is a review of exponents, equations and inequalities, function notation, composition and inverse, linear, quadratic, polynomial, exponential and logarithmic functions and their graphs.

MTH102 Pre-Calculus
This course is designed for those students who have not studied mathematics in intermediate or equivalent. It helps students in learning basic mathematical skills like, algebra, factorization, geometry and trigonometry. Introduction to functions and matrices would also be a part of this course. Students who have already passed a mathematics course in intermediate or equivalent are exempted.

MTH103 Calculus for Business Decisions
The aim of the course is to develop the ability to analyze problems logically, recognize when and how a situation may be represented mathematically, identify and interpret relevant factors and, where necessary, select an appropriate mathematical method to solve problems. The course includes the concepts and business application of functions, differential and integral calculus, optimization methodology, transformation and assignment model. 
Pre-requisite: MTH 101
MTH104/401  Calculus I
The course covers the functions and graphs, system of linear equations, Cramer’s rule, sequences, limits and continuity, differentiation, chain rule, mean value theorem, maxima and minima and integration of simple functions.

MTH105/402  Calculus II
The course includes techniques of integration, areas between curves, continuity of functions of several variables, partial differentiation, differentiation derivations, line integral, multiple integral, calculus of variations, etc.
Pre-requisite:  MTH 104/401

MTH201  Discrete Mathematics
The course will cover mathematical fundamentals of computer science and some techniques of discrete mathematics. The topics covered will include: proposition calculus, predicate calculus inference imprecation, recursive functions, sequences and series, inclusion/exclusion, recurrence relations, graphs and trees, Boolean algebras, and ordered sets. The course emphasizes introducing students to formal mathematical notation and proofs and concepts useful in computer science. Other topics include computer related arithmetic, propositional and predicate logic.

MTH202  Engineering Mathematics
The course covers vector algebra, dot & cross product, gradient, divergence & curl, functions limits, derivative, slope & rate of change, techniques of differentiations, higher derivatives, maxima/minima, optimization, integration techniques, matrices, solution of system of equations, fourier series, sequences & their convergence.

MTH204  Linear Algebra
The course is an introduction to abstract vector spaces, the algebra and geometry of Rn, and the abstract theory of vectors spaces. It aims to approach the material through a blend of theoretical ideas, such as vector space axioms and their consequences, and computational methods, such as Gaussian elimination for solving systems of linear equations. Various applications illustrate the main ideas, and lab which reinforces the course material.
Pre-requisite:  MTH 105/402

MTH205  Financial Mathematics
Considering the problem of derivates pricing in finance the necessary tools from probability theory and stochastic processes will be introduced in the course. The first part presents the main objects of interest from finance in the context of discrete models. Discrete probability spaces will be reviewed and fundamental results on Martingale theory will also be discussed including the optimal stopping problem applied to American options. The second part helps to move from discrete to continuous models. The course will include the celebrated Brownian motion and the associated Ito’s stochastic calculus. The third part the course will show how to use these tools for pricing various types of derivatives (European, American, Asian, etc.) in the context of continuous models, such as Black-Scholes. The relation with PDEs will be explained and numerical issues will be discussed. Models for interest rates and associated pricing problems will also be presented. In the last part of the course generalizations to stochastic volatility models and calibration issues will be discussed.
Pre-requisite:  STA 301
MTH206  Multivariate Analysis
This course is designed to provide an integrated, in-depth, but applied approach to multivariate data analysis and linear statistical models in behavioral science research. The topics will include regression analysis, univariate and multivariate ANOVA and ANCOVA, disarmament analysis, logistic regression, canonical co-relation analysis. Principal components, factor analysis, LISREL models, cluster analysis and multi dimensional scaling will also be covered.
Pre-requisite:  MTH 204

MTH207  Stochastic Models and Maths Finance
The course is an introduction to mathematical modeling, analysis, and solution procedures applicable to uncertain (stochastic) production systems, including probability theory and stochastic processes. Applications relating to design and analysis of problems, capacity planning, inventory control, waiting lines, and system reliability and maintainability will also be included in the course.
Pre-requisite:  MTH 205

MTH208  Differential Equations and Complex Variables
Differential equation is of fundamental importance in engineering mathematics because many physical laws and relations appear mathematically in the form of such equations. The course of differential equation will give us an understanding of how to transform the given physical situation to its corresponding mathematical model.
Pre-requisite:  MTH 202

MTH209/409  Financial Mathematics I
Time value of money, simple interest, compound interest, accumulation function, future value, present value/net present value discount factor,discount rate (rate of discount),convertible mthly, nominal rate effective rate, force of interest, equation of value, annuity-immediate, annuity-due, perpetuity, payable mthly, level payment annuity, arithmetic increasing/decreasing payment annuity, geometric increasing/decreasing payment annuity, term of annuity, loans, principal, interest, term of loan, outstanding balance, final payment (drop payment, balloon payment), amortization sinking fund .

MTH210/410  Financial Mathematics II
Bonds price, redemption value, par value/face value, coupon, coupon rate, term of bond , yield rate callable/non-callable book value, book value accumulation of discount general cash flows and portfolios, yield rate/rate of return, dollar-weighted rate of return/time-weighted rate of return, current value, duration (macaulay and modified), convexity, portfolio, spot rate, forward rate, yield curve, stock price, stock dividend Immunization, cash-flow matching; immunization (including full immunization); redington immunization. The term structure of interest rates, continuous models, stochastic approaches to interest are featured in the course.

MTH211  Actuarial Mathematics
Advanced problems in the mathematical theory of life contingencies; force of mortality, laws of mortality; premiums and reserves for insurance and annuities based on a single life; joint life probabilities, annuities and insurances; multiple-decrement theory; pension fund mathematics are a part of this course.

MTH400  Mathematics for Business
This course is designed for all business students. It will assist students in reaching a level of increased competence in mathematics and expanded understanding of the applications of mathematical concepts in business activities. Emphasis is placed upon learning mathematical concepts through practical application to common business problems.
Institute of Business Management

MTH403  Numerical Computing / Analysis
The course covers errors, calculations and importance in numerical computing; various methods of solution of non-linear equations, Newton’s method and condition of convergence, interpolating polynomials, forward differences (Newton’s Forward (NF) polynomial, backward differences (NB) polynomial; error analysis, unequal spaced values, inverse interpolation; numerical differentiation, formula for higher derivatives, numerical integration, rectangular rules; trapezoidal rule, Simpson’s 1/3, 3/8 and 14/15 rule, Romberg’s approximation, Gauss’s quadrature, and multiple integrals. MATLAB and a programming language will be used to teach all topics.
Pre-requisite:  MTH 105

MTH406  Finite Element Analysis (FEA)
The course includes variation function, interpolation function, one-dimensional finite elements, two-dimensional finite elements; boundary-value problems, variational principles, Galerken approximation; partial differential equations, initial value problems and numerical integration.
Pre-requisite:  MTH 202

MEDIA MANAGEMENT

MMM410  Introduction to Film / Cinema
Such aspects of introduction to film/cinema are learnt in theory and practice as planning, organizing, directing, controlling and promoting, including hands-on training given by professionals in an ideal work-like atmosphere enabling students to excel in careers, jobs or business.

MMM411  Introduction to Radio
The course will focus on the importance of the radio, nature of the medium, broadcast by objectives, target audience, areas / population covered, planning, production and presentation, formats (drama, music, feature, documentaries, investigative reports, interviews, road shows, musical stories, discussions, magazines), computer planning systems, terminologies of broadcasting (OB, Vet, DJ, Dubbing, Cue, Fading), broadcast engineering (kinds of transmitters, frequency spectrum, process of sending and receiving signals, what is AM (MW), FM (SW, LW), copyrights / royalty, legality of broadcasting, ethics of broadcasting, feedback (listeners’ participation, surveys).

MMM412  Media Time and Priorities Management
This course aims at providing fresh ideas and insights for media personnel to manage time and priorities in a tough and tedious routine and special conditions by delegating work responsibilities or by skillful multiple tasks adjustments. Time and priorities management are intensively addressed in all media forms relating to radio, TV, newspapers and magazines as well as in advertising, public relations and event management, of course, according to local and indigenous conditions.

MMM414  Introduction to Television
The course will focus on companies and channels…terrestrial, satellite, cable: basic difference and distribution system, areas and audiences covered; videotapes discs and view data; viewing trends; audience information, planning, buying and selling; sponsored programs and campaigns, structure of rate cards/station costs, frequencies of impact, computers in planning, programs and campaigns and human interest programs of interest.

MMM415  Media Sponsorships and Supplements
The objective of this course is to help students how to plan, organize, direct, control and promote sponsorships and supplements for the media in order to generate business. The course emphasizes on advertising and supplements for the print media through building and capitalizing on potential clients and contacts and on the editorial, layout and production side of supplements. Similarly, the dynamics of seeking and coordinating sponsorships for the electronic media, including private TV and FM radio channels, will also be emphasized.
MMM416  Introduction to Web (New Media)
Students are introduced to multidisciplinary field of Electronic Commerce. The course covers basic e-commerce concepts, a review of relevant internet technologies (LANs, Internet, DNS, Web, browsers, HTML, HTTP, databases, server architectures) commerce workflow models (business models for e-commerce, the value chain, roles and functional architectures); protocol architectures, issues of compatibility portability; transaction processing (database integrity, transaction processing (local key cryptosystem; Internet security and security applications for e-commerce (key management, certificate authorities, standards, WWW security, transport and tunnel mode; Secure Sockets Layer, Secure Electronic Transactions (SET), e-auctions, e-advertising, CRM; Supply Chain Management, internet banking, e-government and future of e-commerce and technological trends.

MMM417  Media Programming and Product Development
Students are familiarized with contemporary trends in planning, organizing, directing and controlling programming and product development.

MMM418  Media Planning and Buying
The purpose of media planning is to conceive, analyze and select channels of communication that will direct advertising to the right people in the right place and at the right time. As the media becomes more complex and challenging over the years, media decisions become even more critical and the clients even more demanding. In this new advertising environment media planning and buying have become more complicated due to media options, fragmentation of the audience, cost, increasing complexity in the media buying and increasing competition. This course provides students with a comprehensive study of the subject and they will be able to understand the importance of the elements of media strategy.

MMM419  Media Entrepreneurship
To provide an understanding of the person and the process of creating and growing a new media venture, this course introduces the media entrepreneurial perspective and focuses on all the elements in the entrepreneurial process that are part of creating a new venture. It introduces students to aspects of financing a new media venture through alternative sources of capital. Particular emphasis is laid on managing a new venture during growth, early operations and expansion.

MMM420  Media Brand and Image Management
Brand Management considers strategies to build and effectively manage brand equity. It covers the role of brand awareness and image, brand extension principles, integrated marketing communications, and financial and marketing research measures.

MMM421  Media Sales
This course enables students to acquire pertinent knowledge and information pertaining to concerned clients and customers and the sales strategy of media management at large.

MMM422  Strategic Media Marketing
Strategic Marketing is an understanding of the technique, concepts, approaches and skills in marketing management and strategy planning. It incorporates strategic marketing techniques developed from models for the corporate environment, campaign marketing for the public environment and international marketing.

MMM423  Specialized Communication Skills
The course is designed to train and equip students with specialized verbal and written communication acumen required in efficient and effective information and entertainment dissemination through print and electronic media and advertising and public relations.

MMM424  Media in World Affairs / International Media
The media is an important vehicle for creating an atmosphere conducive to harmonious international relations. Editorial comments, headlines and news giving a particular twist to upcoming conferences, negotiations, etc. have a major impact in forming concerned public opinion. The course covers pertinent aspects, such as media professionals vision and understanding of world affairs, their ability to manage sensitive situations skillfully and congenially and their positive and potential coordination with relevant national and international organizations.
Institute of Business Management

MMM425 Future Concepts and Trends
This course incorporates the contemporary tools and techniques regarding technological and business aspects of the Media Management program comprehensively including print and electronic media as well as advertising and communication and media oriented public affairs and promotional strategies.

MMM426 Crisis and Conflict Management
The fact that conflicts and crises arise in challenging and changing media situations, irrespective of print or electronic media, or all media oriented advertising and public relations, there is a growing need for techniques in crises and conflict management. This course offers an efficient and effective account of the measures or modus operandi devised and adopted to manage conflicting situations.

MMM427 Citizen Journalism
Students are familiarized with such aspects of Citizen Journalism as civic and social issues or problems pertaining to education, health planning, vehicular traffic, public utilities etc. This course does not only identify issues and problems as regards social and civil life but also enables students to devise and apply practical models to address them through media efficiently and effectively.

MMM428 Script Writing
The art of script writing is best learnt through professionals in various fields of print and electronic media in terms of conceiving an idea, developing a plan, devising convincing headlines, scripting the idea and concluding with an exclamation, if not a consensus.

MMM429 Digital Media
Digital Media includes interactive multimedia, digital video and film production, web design, image creation, digital animation, 3D Modeling, digital sound technology, graphic designing, basically pertaining to digital technology as a part and parcel of electronic media.

MMM430 Time, Priorities and Conflict Management
This course aims at providing fresh ideas and insights for media personnel to manage time and priorities in tough and tedious routine and special conditions by delegating work responsibilities or by skillful multiple tasks adjustments. Time and priorities management are intensively addressed in all media forms relating to radio, TV, newspapers and magazines as well as in advertising, public relations and event management, of course, according to local and indigenous conditions.

MMM431 Imaging and Photo Journalism
This course is characterized by quick, easy and workable and affordable ways and means to use the camera traditionally or digitally for the pictorial content which is a part and parcel of journalism. It not only covers the technical aspects of photography and developing and printing but would also comprise the photo library for a reference as and when required.

MMM 433 FM Radio Dynamics
The course will highlight the subject in its various forms and manifestations, including the procedure, paraphernalia and personal involved in setting up an FM Radio Channel. Planning, programming, production, presentation and promotional sides are covered comprehensively indeed.

MEDIA PSYCHOLOGY

MMP401 Introduction to Mass Communication
It provides an overview of the historical and social contexts of mass media. Emphasis is placed on the experience and comparative analysis of various media. The purpose of this course is to introduce students to the various dimensions of the media so they will become competent to carefully consider and criticize mass media content and policy. The course presents the study of media from a social scientific perspective with focus on the role of an ethical journalism professional.
MMP402 Media and Self
This course studies the dynamic relationships between media, culture, and self that render a consumerist world view. Using a critical lens, this course explores research and theory of media’s role in sustaining the cultural way of life and its consequences on the individual.

MMP403 Typography
Typography is the art and technique of arranging type, type design, and modifying type glyphs. Type glyphs are created and modified using a variety of illustration techniques. The arrangement of type involves the selection of typefaces, point size, line length, leading (line spacing), adjusting the spaces between groups of letters (tracking) and adjusting the space between pairs of letters (kerning).

MMP404 Media Writing
Students will gain an ‘Analysis & Writing Skills’ of media composition, contexts, and intentions using visual and language theories. This course addresses how overall perceptual impact of specific words and images influences our response to the content itself.

MMP405 Media Literacy
Students will learn to critically read media texts, analyze the impact of media and technology on society and culture from the perspective of educators and educational institutions, understand and evaluate the current place of media and technology in the curriculum and design and develop improved curriculum based on theory and research.

MMP406 New Media Rhetoric
This course enables students to study the theories of persuasion and argument as they are used in, and changed by, modern media channels. This course introduces students to new media concepts such as interactivity, information design, usability, navigation, accessibility, non-linearity, motion and presentation design.

MMP407 Electronic and Print Media
This module is to raise student awareness of the medium and, at the same time, sharpen their research skills. This module will introduce aspects of electronic & print media and examine the many applications of these media in different contexts. Students will be given an opportunity to gain a broad understanding of interactive technologies, how the background to electronic & print media has formed our current view of ‘the computer as media’, and what strategies are needed to conceive and create compelling pieces of interactive media.

MMP408 Media Technology: Sound and Music
The course explores and analyzes how music and sound function in our creation of meaning from mediated messages. Students will explore many areas of music technology including surround sound recording and reproduction, sound synthesis and processing, and the creative combination of these to produce new musical sounds and effects.

MMP409 Capstone Project
In the final capstone project, students create a digital portfolio of written papers and multimedia presentations. One may choose to include a written thesis, a website, a photographic essay, video or film, or a combination of these elements. The portfolio will be reviewed by the faculty instructor at the conclusion of coursework and can serve as a tool for further research or professional practice.

MMP501 Media Technology: Games
This module provides emphasis on ‘Gaming and multimedia’ which have taken an important place in our society, giving rise to a booming industry with turnovers exceeding the entertainment movie industry and leaps forward in computer software and hardware development. Students will explore new types of games and hardware reaching the market regularly. The value of games as an educational tool is recognized more and more, hence the students would integrate multimedia tools into their everyday life for creating fertile grounds.
Institute of Business Management

MMP502 Adobe Photoshop
This course will enable students to learn graphics editing program developed and published by Adobe Systems. It is the current market leader for commercial bitmap and image manipulation software, and is the flagship product of Adobe Systems. It has been described as “an industry standard for graphics professionals”. Adobe’s 2003 “Creative Suite” rebranding led to Adobe Photoshop 8’s renaming to Adobe Photoshop CS. Thus, Adobe Photoshop CS4 is the 11th major release of Adobe Photoshop.

MMP503 Role of Media in Environment
Media plays the role of facilitator of development, disseminator of information, and being an agent of change. Regarding the issue of environment awareness, media plays a vital role in spreading the true message. Along with bringing it into the hub of debates and discussions, it tries to suggest alternatives to people and policy-makers. First of all, the mere awareness also creates a genuine interest to probe into the exact matter. Thus, environment awareness is one of the important issues which media presents consciously and effectively to say a few things to people.

MMP504 Electronic Broadcasting
This course familiarizes students with the basics of electronic media, which they will build upon through other radio and television broadcasting classes. Students practice using microphones and video systems. They create short clips which they present in class. This electronic broadcasting course is a practical, hands-on course which gives students the opportunity to get their feet wet in electronic media.

MMP505 Contemporary Issues in Media Studies
This course aims to provide students with a critical understanding of the main theoretical approaches in the closely related disciplines of critical media and cultural studies, which are necessary for any study of contemporary media, and are particularly relevant to appreciating the distinctiveness of non-Western media and the problems in their study. The course also aims to familiarize students with the richness and diversity of Asian media production, distribution, reception and commentary, both by introducing contemporary issues addressed by media in different regions and by requiring students to engage in project research on some specific aspect of media discourse in Asia.

MMP506 New Media Technologies: Audio, Video & Multimedia
Production Management, event production, audio/video support, teleprompter services, etc. will be studied by the students. In addition students will specialize in video editing, DVD development, web design & development, remote audio recording, interactive CD-ROM development and interactive game development.

POLICY STUDIES

PLY101 Policy Making in a Globalized World
The course focuses on theory of policy – liberal, socialist and nationalist approaches. The state, the market and the individual in capitalist order; global policy makers – multinational, financiers, multilateral agencies and private sector raters; the surveillance standardization regime, the system pegemon and global policy; policy making in Pakistan, state policy makers; the State Bank; the impact of de-regulation and privatization. Private sector policy makers associations NGO’s, the media and the influence of global policy on national policy making in Pakistan.

PAKISTAN / ISLAMIC STUDIES

PRL301 Pakistan / Islamic Studies
The course covers various movements which led to the creation of the Islamic Republic of Pakistan. The history of Pakistan is discussed with an analysis of the various leaders and their contributions to the development process. The course discusses how different messengers of Allah came to spread His word. It further discusses the need for Islam: its five pillars, the life of the Prophet Muhammad (PBUH), the companions of the Prophet (PBUH), and the several Surahs, Ahdiths, and Ayats.
POLITICAL SCIENCES

PSC301  Pakistan Studies
The course on Pakistan Studies is an in-depth course covering various movements which led to the creation of the Islamic Republic of Pakistan. The history of Pakistan is discussed with an analysis of various leaders and their contributions to the process of national development. It also discusses the two nation theory in detail.

PSC401  Pakistan Studies and Current Affairs
The course is an in-depth study covering the various movements which led to the creation of the Islamic Republic of Pakistan. The history of Pakistan is discussed with an analysis of the various leaders and their contributions to the development process. Issues related to current affairs will also be discussed.

PSYCHOLOGY

PSY400  Introduction to Organizational Psychology
This course examines the psychological aspects of organizational behavior and individual psychological processes and behavior. The topics will include social norms, group and team processes, leadership and power, motivation, job attitudes and satisfaction and organizational change.

PSY401  Psychometric Testing
This course focuses on psychological testing and measurement in industry and organizations. Various tests such as aptitude test, vocational interest test, personality test, attitude test and predictors used in industry and organization will be demonstrated. Practice using, modifying, making psychological tests, including analyzing and reporting results of the psychological tests will also be discussed.
Pre-requisite: PSY 400

PSY402  Counseling Psychology
This course focuses on the basic approaches, principles, and procedures of counseling. Students will be engaged in some directed role playing of counseling techniques as well as prepare a class demonstration based on their personal integration of readings and practice. Research related to counseling as well as issues regarding the nature of the counseling relationship will also be focused.
Pre-requisite: PSY 400

PSY403  Consumer and Advertising Psychology
This course focuses on the type and behavior of consumer, effects of psycho-social factors in decision making, satisfaction, loyalty, attitude, and changing attitude of consumer, ethics and principles of psychology in advertising, media selection, and methods in developing a research study in the area of consumer and advertising psychology.

PSY404  Research Methods in Organizational Psychology
This course builds on the fundamentals of research design and knowledge of basic statistical techniques to provide a broad overview of the major research methods of applied psychological research. Students learn to frame inquiries and problems as research questions. The relative merits and drawbacks of major research methods are explored. This course will help students to understand and critically evaluate research reports. Students will also learn how to carry out the entire research process, starting with identifying the research problem and ending with a thesis or research report.
PSY405  Group Dynamics  
This course presents theories of group dynamics and illustrative application to understand personal, marital, political, industrial and professional life. Personal participation by the student in a group interactive process will be emphasized. The course is designed especially to help group leaders understand the complex underlying dynamic forces that influence our behavior in groups.

PSY406  Psychology of Industrial Relations  
This course surveys individual behavior in work places, recruitment training and development, grievance procedures, employee counseling, employee efficiency improvement programs, compensation, administration in Pakistan, employee relations with groups and the union, problems and problem solving in labor relations.

PSY407  Personnel Psychology  
This course focuses on psychological methods and knowledge applied to the personnel functions of industry. It provides an analysis and discussion of theories and research studies on the following topics: organizational management and development; manpower planning, selection, placement, training, and other important personnel problems.

PSY408  Seminar in Organizational Psychology  
This course covers the most recent advances, issues and problems in industrial and organizational psychology through relevant professional journals, technical literature, legislation and judicial decisions, advanced research techniques, and consulting practice in order to prepare students for continued education or applied practice of their field. Students will critique professional journals and review the development of topics in their field.

PSY409  Special Topics in Organizational Psychology  
This course provides an in-depth view of important theoretical and methodological issues in various areas of psychology. It is designed to provide students with a comprehensive analysis of a selected contemporary issue (or issues) in psychology.

PSY411  Introduction to Psychology  
This course seeks to enhance student knowledge of general principles of psychology, which are applicable to humans everywhere. The individual differences among individuals are of great interest – not only because of the desire to understand individual uniqueness, but also because a complex society demands specialized roles for its complex members. The scientific study of psychology introduces students to topics such as attitude, conditioning, perception, cognition, emotion, motivation, decision-making, intelligence, personality and social behavior.

PSY412  Media Psychology and Social Change  
Media psychology applies psychological theory to understanding the way this new media landscape impacts the use, experience, and production of media technologies across all economic sectors. This understanding is relevant to applications and careers in telecommunications, education, entertainment, public policy, law, politics, advertising, healthcare, and education. Students will consider how media research is interpreted and presented to the public, how social media has redefined the way people, businesses, and groups connect, how media technologies can facilitate learning, and the societal implications of continuing technological change.
PSY413 Social Psychology
Social psychology studies the influence of others on an individual's thoughts, emotions and behaviors. This course gives special attention to four recent trends: first, cognition has regained its preeminence in social psychology; second, applications of social psychological knowledge have been implemented, extending the reach of the field. Social psychologists are often called on to make contributions in business, medicine, law, and other fields. Third, the field is now represented in other areas of psychology, such as developmental, clinical, counseling, cognitive, industrial and organizational psychology. Fourth, our national interest in diversity and culture has caused a reexamination of research findings and theory with the intent of identifying those that are universal and those that are culture bound.

PSY414 Psychology of Gender
In this course students will study the psychology of gender from a variety of theoretical perspectives (e.g., positivist-empirical, postmodern), with attention to how both quantitative and qualitative methodologies are used to inform our knowledge. Students will examine the ways in which mainstream psychology is gendered, as well as, various feminist approaches to studying issues of gender in psychology. Because sex and gender do not influence people's behavior in isolation from other socially constructed categories, students will examine the intersection of race/ethnicity, sexual orientation, and social class with gender in our analysis.

PSY415 Culture and Psychology
It is a course designed to inform students about the causes and consequences of stereotyping, prejudice, and discrimination. It focuses on theories and empirical research on these topics. In addition, it has excerpts from popular books, political statements, laws, religious texts, and so forth designed to illustrate how prejudice and discrimination are present in everyday life.

PSY416 Counseling Psychology
This course prepares students to work with individuals, couples, families, and groups in various settings, including community mental health centers, schools, hospitals, and consulting agencies. The objective of this course is to introduce students to the basic principles and techniques of counseling families and individuals. Students will become familiar with the major theoretical paradigms for counseling psychology practice. Each student will be encouraged to begin the search for the psychotherapeutic approach as a professional counselor.

PSY417 Media and Forensic Psychology
Forensic psychology is the intersection between psychology and the criminal justice system. This course involves understanding criminal law in the jurisdictions of media world, in order to be able to interact appropriately with judges, attorneys and other legal professionals. An important aspect of forensic psychology is the ability to testify in court, reformulating psychological findings into the legal language of the courtroom, providing information to legal personnel in a way that can be understood.

PSY418 Psychology of Personality
'Personality' is a broad term applied to the wide traits of people who are employed and managed across the economy. Organizations of any size require additional staff to provide psychological assessment and management of their human resources. It enables students to become proficient in understanding the attitudes, behavior and cognitions of personnel in organizations.
Istitute of Business Management

PSY419 Psychological Impact of Film and TV
This course aims to provide students with an understanding of the major themes, topics and theoretical perspectives that constitute film and television studies. Attention will be focused on the producer-text-audience relationships which are central to the understanding of the meanings that are created and the impact of the medium. The course will cover audience and reception analysis, film and television genres and their characteristics, film - television and gender, as well as film - television and ethnicity.

PSY420 Work Psychology
This course covers recent developments, such as self-monitoring and sensation seeking in personality, self-efficacy and social identity in motivation, extra-sensory perception, emotion, knowledge management in learning, investor psychology, trust, virtual teams, upward and lateral leadership, transformational leadership, political skills, virtual organization and other contemporary organizational issues, culture and diversity, business ethics, corporate governance, innovation, models of change, use of technology in selection, mentoring, career development, e-learning, continuous professional development, bullying at work, cognitive strategies to deal with stress, and workplace counseling.

PSY421 Community Psychology
Community psychology draws on interdisciplinary perspectives and approaches to examine social problems and promote the well-being of people in their communities. While the field draws heavily from psychology, it also draws from theory and practice in sociology, community development, ecology, public health, anthropology, cultural and performance studies, public policy, social work, and social justice movements. Through community research and action, community psychologists produce knowledge that can inform social policies, social service work, helping practices, and community change.

PSY422 Psychological Assessment
This is a course that involves the integration of information from multiple sources, such as tests of normal and abnormal personality, tests of ability or intelligence, tests of interests or attitudes, as well as information from personal interviews. Collateral information is also collected about personal, occupational, or medical history, such as from records or from interviews with parents, spouses, teachers, or previous therapists or physicians.

PSY501 Work Motivation and Attitude
The course covers concepts in various theories of motivation, both content and process theories, job satisfaction and its relationship with motives and performance efficiency; applications of theories of motivation to increase performance; problems and solutions of motivation in Pakistani society; research and development of motivational techniques to increase performance efficiency. Critical and in-depth examination of the research evidence for understanding group dynamics and personal, environmental and cultural factors influencing organizational behavior and attitudes are also featured in the course.

PSY502 Career Counseling and Development
This course focuses on the processes of career and academic development, including an emphasis on theories of career education and counseling, culturally different populations, the interface between the individual and the organizational climate and the resources utilized in the career and academic counseling process. The course introduces tools used in career counseling process. The topics include: information about the nature of job market, methods of advising individual and groups implementing career and role of interest, skills, values and personality in the career development process.

PSY503 Organizational Leadership and Strategic Change
This course is designed to enhance skills for facilitating/consulting with organizational leadership in organizational change. Theories and techniques for understanding and facilitating change processes within diverse organizational cultures are discussed and applied.
PSY504   Quality of Work Life
This course focuses on theories and research relating to quality of life at work, application of knowledge in health; safety at work, environment and working motivation; educating managers and employees to enable them to deal with sickness and problems caused by working, and concentrate on their physical and mental health.

PSY505   Psychology of Religion
This course will provide literature on the relationship between religion and psychology. Psychologists consider that there are various ways in which religion may benefit both physical, mental and spiritual health, including encouraging healthy lifestyles, providing social support networks and encouraging an optimistic outlook on life; prayer and meditation to benefit physiological and psychological functioning.

PSY506   Psychology of Attitude Change
Students will learn the possibility of changing someone’s attitude via persuasion. Hovland established that attitude change had to be understood as a response to communication. Experimental research was conducted in the following areas as a means of understanding the process of attitude change: target characteristics, source characteristics, message characteristics, and cognitive routes. Students will gain the expertise that the exact nature of a particular message can play a major role in persuading individuals. A lot of time, a consideration of both sides to a case will help someone change their attitude. The person will be presented with data and subsequently motivated to evaluate that data before arriving at a conclusion that necessitates a change of attitude.

PSY507   Cognitive Psychology
Cognitive psychology is a discipline within psychology that investigates the internal mental processes of thought, such as visual processing, memory, thinking, learning, feeling, problem solving, and language. Students will learn to use psychophysical and experimental approaches to understand, diagnose, and solve problems, concerning themselves with the mental processes which mediate between stimulus and response. Cognitive theory contends that solutions to problems take the form of algorithms—rules that are not necessarily understood but promise a solution, or heuristics—rules that are understood but that do not always guarantee solutions.

PSY508   Health Psychology
Health psychology is concerned with understanding how biology, behavior, and social context influence health and illness. The four divisions include clinical health psychology, public health psychology, community health psychology, and critical health psychology. The allied field is occupational health psychology. Students will have practical assignments to gain experience within these areas.

PSY509   Organizational Psychology
This course applies psychology to organizations and the workplace. Students will learn to contribute to an organization’s success by improving the performance and well-being of its people. They will conduct research and identify how behavior and attitudes can be improved through hiring practices, training programs, and feedback systems. The course examines the psychological aspects of organizational behavior with emphasis upon the organization which is affected by individual psychological processes and behavior. Areas covered include social norms, group and team processes, leadership and power, motivation, job attitudes and satisfaction, and organizational change.

PSY510   Contemporary Issues in Psychology
This course will introduce students to a variety of contemporary topics in psychology. Topics vary from year to year, but would typically include: evolutionary psychology; comparative psychology; polylingualism; brain imaging; and gender differences. Assignments will enable students to gain hands on experience.
PSY511  Psychological Impact of Internet & Mobile Technology
The increasingly widespread use of text-messaging has led to the questioning of the social and psychological effects of this novel communication medium. The fact that internet can help some people develop relationships is drawn upon and taken a step further by exploring the differences between those who prefer texting ("Texters") and those who prefer talking on their mobiles ("Talkers"). Students will gain insight that there is something special about texting that allows some people to translate their loneliness and/or social anxiety into productive relationships while for others the mobile does not afford the same effect.

REL101  Islamic Studies
The course begins with a discussion of how different messengers of Allah came to spread His word. It discusses the need for Islam, the five pillars, the life of the Prophet Muhammad (PBUH), the companions of the Prophet (PBUH), several Surahs, Ahadiths, and Ayats.

SUPPLY CHAIN AND LOGISTICS MANAGEMENT

SCM501  Supply Chain Management
In the challenging environment the companies strive to identify their competitive edge, so the application of supply chain concepts will continue to exert greater influence on overall business success. This module covers a wide range of topics in supply chain strategies, design, planning, operations and development. Pre-requisite: MAN 101/401

SCM502  ERP Systems Design and Implementation
This course provides a technical overview of enterprise planning systems and their impact on organizations. Selected software solutions are introduced to illustrate the concepts, fundamentals, general information technology context and integration of business enterprise applications. Case studies will be used to discuss various stages of implementing ERP solutions.

SCM503  Strategic Supply Chain Management
This course covers a wide range of Supply Chain Management activities including formation and management of strategic alliances, buyer selections and management, negotiations, global sourcing, ethics in contracting situations and applications of information technology in SCM. Pre-requisite: MAN 101/401

SCM504  Procurement and Inventory Management
The synchronization of supply with demand in order to provide customer value has to be designed, controlled and improved. In supply chain management these activities have to be coordinated along different stages in different enterprises. This module deals with understanding and overcoming the problems arising in those multistage inventory systems using case studies.

SCM505  Storage and Warehouse Techniques
In order to operate, optimize or understand warehouse systems, a sound knowledge about the various technical realizations of warehouse functions is essential. This module provides an overview of various in-house transporting and storage systems and indicates the preferred areas of usage. Case studies will be used as modus operandi in the course.

SCM506  Transportation Techniques and Management
The module aims to give an understanding of the basic techniques used in transportation. All major techniques in the fields of road-traffic, air traffic, railroad and navy are discussed. Transport chains using freight-vehicles, intermodal transports, combined transport-chains as location planning, design and organization of dispatch departments, supply- chain- management tracking- and- tracing are investigated using the case study approach.
SOCIAL SCIENCES

**SSC101/402 Introduction to Psychology**
Its subject matter includes human development, memory cognition, perception and psychopathology. The course explores the field of psychology, teaches to learn about oneself, the mind and the science of psychology.

**SSC102 Sindh History Cultures**
The course provides history of the Indus valley civilization, the Arabs in Sindh, Sindhi dynasties, Sindhi literature and the contribution of the Sufi movement. It focuses on the art and architecture of Sindh, the impact of migration on Sindhi art and culture, cultural movements in Sindh.

**SSC103 Business Ethics and Corporate Governance**
This course entails an understanding of the general principles of ethical conduct. It studies the relationship of what is good and right for businesses. This course shall proceed to place modern business practices in their historical context. The ethical attitude of ancient, medieval, modern and postmodern communities would be contrasted and the nature of modern business practices.

**SSC201 Policy Studies**
The Liberal, Marxist and Weberian approaches to policy making. The market and the state, bureaucracy and administration regulatory systems. Non-state sources of policy conception and implementation corporations, association, NGOs policy making and implementation processes in Pakistan.

**SSC202 Environmental Studies**
This course covers the national, state and the global market. Global regulatory systems with special reference to finance, international law and international policy. The role of international organizations, UN security organization, the IMF, FSF, WTO and the development agencies (World Bank and ADB).

**SSC301 History of Ideas**
The course has been divided into different sections, e.g., man, theory of knowledge, ethics, politics, religion and science. The course will logically discuss the most representative ideas related to each section and attempt to put them together into an overall picture of man and his relation to the world.

**SSC401 Business Ethics**
This course entails an understanding of the general principles of ethical conduct. It studies the relationship of what is good and right for businesses. This course proceeds to place modern business practices in their historical context. The ethical attitude of ancient, medieval, modern and postmodern communities would be contrasted and the nature of modern business practices.

**SSC403 Social Psychology**
This course focuses on human behavior in its social context to reveal how one’s feelings and actions can be influenced by other people. The topics include processes of human interaction and the social influences of family, membership groups, mass media, and socioeconomic class on individuals and groups. The course is based on the basic concepts, theoretical and research perspectives on social processes. Students examine the selected forms of social reaction patterns.

**SSC405 Business Ethics & Financial Responsibility**
The course examines ethical issues in the context of business theory and practice. In the process of exploring these issues and raising questions, students draw on a wide body of literature including the humanities, management theory, and the social sciences.

**SSC406 Psychology and Learning**
The course examines major theories of learning with relevance to instrumental and classical (Pavlovian) conditioning, cognitive learning processes, motivation, affect, and memory. The students will explore relevant research on traditional and contemporary issues in learning, with an emphasis on human learning from both behavioral and cognitive perspectives.
Institute of Business Management

SSC501 Epistemology and Moral Philosophy
This course will examine the basic questions and principles of moral reasoning. Among the issues to be considered: What makes an action moral? Does might make right? Do moral judgments admit of exceptions? Is pleasure a relevant factor in deciding what to do? Does moral reasoning rest on a grand mistake?

STATISTICS

STA101/102 Quantitative Methods I & II
The objective of the course is to train students in the use of quantitative techniques in business and finance. The students are required to gain thorough theoretical knowledge of the subject and understanding of the application of such knowledge.

STA103 Sampling and Probability Theory
The course highlights the basis concepts of statistics, sample space, events, classical and axiomatic definition of probability, conditional probability and Bayes' theorem, binomial, Poisson, normal distribution and moment generating functions.

STA201/401 Quantitative Business Analysis
This course will provide an in-depth study of the concepts of statistics and quantitative business tools. The emphasis will mainly be on learning quantitative techniques along with their applications to economics and business. The topics include inequalities, function notation and inverses, linear, quadratic, polynomial and exponential functions and mathematics of finance.
Pre-requisite: MTH 103

STA202 Quantitative Skills and Managerial Statistics
The course introduces the use of statistical method to proceed beyond the collected data into the area of decision making through statistical analysis. It provides an in-depth introduction to probability, sampling theory and sampling distribution, estimation of parameters, hypothesis testing, analysis of variance, decision theory and quality control charts.
Pre-requisite: STA 201/401

STA203 Probability Theory and Statistics
The course includes the basic concepts of statistics, sample space, events, classical and axiomatic definition of probability, conditional probability and Bayes' theorem, binomial, Poisson and normal distribution, moment generating functions, etc.

STA204 Industrial Applications of Statistics
The course teaches an applied approach to statistical quality control utilizing theoretical tools acquired in other mathematics-statistics courses. It emphasizes on understanding and applying statistical analysis methods in real-world situations in engineering.

STA210 Sampling Theory
The purpose of this course is to provide students with theoretical background in survey sampling. The course will expose students to a wide range of sample designs and estimation techniques used in practice, including simple random sampling, sampling with unequal probabilities, stratification, single-stage and multi-stage cluster samples, ratio and regression estimators, variance estimation in complex surveys, introduction to model-assisted estimation, calibration and estimating equations approach.

STA301/402 Model and Inferences
Statistical models and random samples, informal methods of checking models, estimation and prediction, methods of maximum likelihood and least squares and their applications within the framework of programming are taught in this course. Regression, analysis of variance and hypothesis testing; data and regression analysis using MiniTab will also be included.
Pre-requisite: MTH 201, STA 203, STA 302
STA302  Methods of Data Analysis
The course is an introduction to the use of computers as a powerful tool in data analysis. Topics will include statistical graphics, advanced regression techniques, curve fitting and smoothing, generalized additive models, CART, multivariate techniques, cross-validation and the bootstrap. Additional topics may include survival analysis, simulation methods and neural networks.
Pre-requisite: STA 203

STA303  Time Series Analysis and Forecasting
The course serves as an introduction to the use of statistical methods for analyzing and forecasting data observed over time. The topics include: trigonometric regression, periodogram/spectral analysis, smoothing autoregressive moving average models regression with auto correlated errors, linear filters and bivariate spectral analysis. Stress on methods and applications, software implementations are extensively used in assignments.
Pre-requisite: STA 302

STA305  Applied Regression Analysis
Linear regression and correlation; maximum likelihood and least square estimators and their properties. nonlinear regression models; generalized linear regression models; introduction to time series; time series model building and forecasting with focus on data of interest to actuaries are features of this course.

STA307  Decision Theory
Common sampling models in business and economic problems, information from data, likelihood function of parameters, choices of models, Bayes' Theorem, subjective basis for probability, sequential nature of Bayesian inference, prior and posterior distributions of parameters in binomial, Poisson, exponential and normal populations, comparison of two normal distributions, predictive distributions, decision theory, utility, risk aversion, extensive form of analysis, two-action problems, point estimation, best population problems, economics of sampling. Dependence of observations in economic and business data, trend, moving averages, autoregressive series, non-stationary models and their applications, Bayesian estimation of parameters, adaptive forecasting, control theory, elements of difference calculus, dynamics, models for inventory control are features of this course.

STA309  Loss Models
Definition and selection of probability distributions appropriate for insurance data that are heavily tailed and skewed, estimation of parameters of probability distributions appropriate for insurance data that are heavy tailed and skewed, such as Exponential, Gamma, Gumbel, Weibull, and extreme-value distributions, assessment of credibility of data for ratemaking are taught in this course.

STA311  Operations Research & Management
The course will include, deterministic models, stochastic models, simulation, independent study, simulation theory, simulation modeling and languages, mathematical programming, seminar, special project and thesis.

STA403  Statistics and Mathematics
The course introduces the use of statistical & mathematical methods to proceed beyond the collected data in the area of decision-making. The course includes frequency distribution, measures of central location, measures of dispersion, linear equation, quadratic, exponential & logarithmic function, mathematics of finance, matrix algebra differentiation & optimization. A systematic exposure to the statistical analysis of business situations covering descriptive statistics will also be provided.

STA404  Statistical Inference
The course concentrates on the application of statistical techniques to the analysis of data and estimation procedures. The topics include counting techniques, probability & its distributions, sampling, estimation of parameters, testing of hypothesis & analysis of variances, regression & correlation.
Pre-requisite: STA 403
Institute of Business Management

STA405  Simulation and Modeling
The course includes various types of models, properties of linear models, model building techniques, the black box approach, random number generation and testing, transformation; test of randomness, parameter estimation, least mean square, bootstrap, jackknifing, re-sampling procedures, query models and applications using MINITAB, SIMULA.
Pre-requisite: STA 203 CSC 306 / CSC 409

STA406  Statistical Methods in Social Sciences
This course includes an overview of quantitative methods, basic concepts in descriptive and inferential statistics. It emphasizes on the development of critical thinking skills and the methodological tools necessary for functioning as an Industrial Organizational Psychologist in applied settings. The focus is on non-parametric and parametric statistical procedures including when and how to use each quantitative method including choice of the most appropriate research method and strategies to address common problems encountered and using computer programs for data analysis.

TELECOMMUNICATION MANAGEMENT

TCM201  Electromagnetic Theory
Time-varying fields, transmission line, wave propagation through wave guides and antenna theory, basic vector operations, coordinate systems and their transformation, surface and volume integral of symmetrical objects, force fields exerted by point charge and generalize to charged line, surface and other objects, electric flux density, Gauss’s law and its application, energy and potential of a fields, conductors, dielectrics and capacitance. Introduction to Poisson’s and Laplace’s equation, the steady magnetic fields, Biot-Savart law, Ampere’s circuitual law, magnetic flux and flux density are a part of the course.

TCM203  Amplifiers and Oscillators
The student will become capable of assembling and analyzing analog circuits. Topics include: FET characteristics and circuits, differential amplifiers, integrated circuit fabrication, negative and positive feedback, operational amplifier characteristics, analysis of common operational amplifier circuits, Class B power amplifiers, power supply characteristics, and circuits using discrete and integrated circuit technology.

TCM204  Signals and Systems
Linear system theory, signals, types of signals, transformations of independent variable, signal properties, exponential signals, impulse and step functions, systems, input-output models of system, properties of system, linear time-invariant system, time domain analysis of linear systems, properties of LTI system, LTI analysis of linear differential equations, complex exponential inputs to LTI system, frequency analysis, orthogonal transforms, continuous time fourier series(CTFS), continuous time fourier transform(CTFT), discrete Fourier transform(DFT), discrete time Fourier transform(DTFT), sampling and reconstruction, overview of sampling systems, sampling, reconstruction, the Z-transform, definition of Z-transform, region of convergence, Inverse z-transform, properties of z-transform and Inverse z-transform, left and right hand signals, stable and unstable signals, causal and anti-causal signals, analysis of discrete time systems, FIR and IIR systems, stability analysis are taught in the course.

TCM205  Control Systems
Classification of open and closed loop control, advantages and disadvantages, effects of feedback, servomechanism, systems model and characterization, block diagrams and canonical form., control systems from telecom applications such as satellite tracking, LNAV/VNAV in aviation, flight control system, heading tracking, signal flow graphs, DE and laplace transforms, transfer function, poles and zeros, time domain analysis, steady state error using static error coefficient method, dynamic error constant method, feedback characteristics of control systems, and sensitivity of control systems, basic action of controllers (proportional, integral, PI and PID controllers), stability assessment ( Routh, Bode, Nyquist, Nichols chart), compensation and compensators design for telecommunications applications and state space are featured in the course.
TCM206  Analog Communication
Types of electronic communication, modulation and multiplexing, the electromagnetic spectrum, bandwidth, gain, attenuation, and decibels, tuned circuits, filters, noise, baseband and pass band signals, frequency spectra of non sinusoidal signals, analog vs digital communication, AM concepts, modulation index and percentage modulation, sideband and frequency domain, AM powers, single sideband modulation, basic principles of AM, FM. AM, FM and phase modulators. FDM, TDM and duplexing, antenna principles, microwave concepts, satellite communication and optical communication principles are a part of this course.

TCM301  Digital Communication
Significance of digital communication, base band modulation, analogue-to-digital conversion, sampling theory and applications, quantization and its types (Uniform-nonuniform), pulse code modulation (PCM), differential PCM, delta modulation, adaptive differential PCM (ADPCM), inter symbol Interference, equalization, synchronization, basic detection theory and optimum receiver design, multiplexing, TDM, FDM, T1 systems and hierarchy, E1 systems hierarchy, digital modulation techniques, amplitude shift keying (ASK), frequency shift keying (FSK) and phase shift keying (PSK, DPSK, DEPSK, QPSK), differential encoding and M-Ary signaling, performance of binary and M-Ary signaling, performance comparisons of modulation schemes, forward error correction codes (FEC) and basic concepts of information and coding are taught in this course.

TCM302  Antenna and Microwave Engineering
Various definitions, parameters, radiation, comparison between antenna and transmission lines. Power patterns, radiation, pattern of arbitrary shape, gain, field and phase pattern. Arrays of two isotropic point sources, pattern multiplication, arrays of N-isotropic point sources of equal amplitude and spacing broadside vs. end fire array, pattern determination of linear arrays, Schelkunoff theorem for linear arrays, Dolph-tchebyscheff distribution for linear arrays, short electric dipole, field components, resistance, radiation pattern and thin linear antenna. Small loop, short magnetic dipole, loop antennas, field pattern and its resistance. Helical geometry, transmission, and wide band characteristic of helical antenna, horizontal and vertical antennas above a ground plane, arrays with parasitic elements, scanning arrays, retro arrays, adaptive arrays and smart antennas, long wire antennas, and folded dipole antennas, slot antennas, its patterns, babinets principles and complementary antennas, impedance of slot antennas, various types of horn antennas, dielectric, reflector lens antennas, broadband antennas, log periodic, yagi- uda, corner log periodic array are featured in this course.

TCM303  Transmission & Switching Systems
Transmission systems including PDH and SDH, synchronization, routing techniques, line encoding techniques. Telecommunication networks, PSTN, PLMN, PABX, exchange hierarchies, digital exchanges, routers, switches, bridges, switches, hubs, gateways and signaling systems are taught in the course.

TCM304  Optical Fiber Communications
The aim of this course is to understand the optical fibre communication technology and networks & their applications in telecommunication industry. The main objectives of this module is to understand the photonic circuits, functionality and principles of optical devices. Another objective of this module is to learn the present and emerging optical technologies and techniques like SDH, SONET and WDM.

TCM305  Telecommunication Regulations & Policy
This course is designed to provide an introduction to the key issues, developments and trends within the telecommunications sector. Policies and regulations within telecommunications have to be able to address a dynamic and rapidly changing environment. Exponentially developing technologies that spawn new services and applications, coupled with regulatory reforms, changing legal frameworks and the emergence of new markets have given rise to increased demands for training and skill development. The course content covers telecommunications systems, technologies and markets, international trends driving telecommunications reforms, laws, regulations, governance and institutional framework; prices and tariffs regulations, licensing and monitoring, services resource monitoring and other international laws of using resources.
Institute of Business Management

TCM306  Wireless and Mobile Communications
The aim of this module is to understand the fundamentals of wireless and mobile communications & the use of wireless technology in the telecom industry. The main objectives of this module are to understand the design of basic wireless channel models, functionality of wireless systems and the know how of cellular mobile technologies in telecommunications. Another objective of this module is to learn the latest and future mobile and wireless technologies and their applications in everyday life.

TCM401  Introduction to Technology Management
Surveys the history and recent developments of technology management in the corporate and government environments. Major aspects of domestic and international technology management are discussed. Information technology management is the focus of this course. Other topics include project and system management, computer information systems, telecommunications management, distribution, marketing, logistics, manufacturing and aspects of international technology management.

TCM402  Introduction to Teletraffic Engineering
Focuses on the application of telecommunication traffic. The course is centered over the basic concepts of the telecommunication traffic and its use. Teletraffic involves the various telecom traffic models, their controls, traffic prediction and plan. It covers the simulation of traffic models, various queuing disciplines and optimization techniques.

TCM403  Global Communications: Industry and Policy
Focuses on understanding how the changing structures of telecommunications in North America, South America, Europe, Asia/Pacific and Japan, and how global decisions affect local actions. The course explores current and merging issues in global telecommunications including deregulation, transition to new business models and affordable access to technology. The students will learn how some of the most powerful global regulatory bodies create and establish legal and regulatory policy, and how their actions affect business and consumers.

TCM404  Management of Telecommunication
Focuses on the growing integration of the professional, organizational and industry aspects of telecommunications. The course emphasizes on value-added research and analysis, consultative and entrepreneurial skills of the telecommunications professional and explores the business value of telecommunications technology in organizations. It also provides an introduction to industry products and services, technology and regulation.

TCM405  Optical Communication Network
Introduces basic fiber optical technologies. The major components of a fiber communications link, including splices, connectors, optical sources, detectors, optical amplifiers, splitters and modulators are covered. Optical switching systems and technologies will be studied in detail as well as some fiber based standards and networks such as FDDI, SONET.

TCM406  Network Design
Explores advanced network design and optimization of switching systems and networks. It focuses on issues and challenges of network capacity, cost and bandwidth tradeoffs, traffic volumes, and peak traffic considerations applied to different business requirements. It also discusses considerations of network design for businesses in regional, national and global communications contexts and features a case study design approach.
TCM407  **Broadband Communications**
Review of basic digital hardware and the structure of digital computer and the digital switching networks. Topics include voice digitization, line coding, time division multiplexing, basic digital modulation formats, network control and synchronization, digital technologies and switching systems for high-speed data and voice networks in examples of T1/T3, ATM, SONET/SDH, B-ISDN, PBX, ACD and LANs. Different types of media, such as fiber optics, cable and wire, cellular as well as local and long distance switching systems are also covered.

TCM408  **Advanced Mobile and Wireless Communications**
Focuses on key technologies used in mobile and wireless communications, including cellular NGSM, TDMA, CDMA paging, PCS and infrared. It emphasizes on key service providers, design of wireless data and voice communications systems, security, and advances in mobile and wireless technology; addresses growth of PDAs and other mobile devices, and their impact on enterprise networks and features a case study approach on the application of these technologies.

TCM409  **Customer Service and Call Center Technologies**
Focuses on customer service and call centers as the contact point between a customer and a company’s products and services; Emphasizes on critical call center technologies, including Computer Telephony Integration (CTI), workflow software, ACD and PBX systems, messaging systems (voice and email) and knowledge management systems. Students will learn how to implement customer service applications, such as help desk, customer support and field service.

TCM410  **Management of Network Security**
Defines network security in the context of networks, information and computer systems. This course identifies threats and vulnerabilities; major aspects of encryption, digital signatures and other authentication procedures are covered. LAN, Wireless and other aspects of network security are reviewed with discussions focusing on firewalls, VPN, and ISO17700 compliance. Strong emphasis is placed on analysis, monitoring and evaluation of network security. Intrusion and detection strategies are reviewed. An in-depth overview of vendors and other security resources is covered.

TCM411  **Telecommunication Marketing**
Telecommunication Marketing is one of the courses being offered the MBA in Telecommunication Management program. Topics in this course include the nature of the telecommunication market, analysis of customer procurement strategy, product policy, pricing, distribution strategy, sales force management and key account selling strategies.

TCM501  **Management of Telecommunication Regulatory System**
Introduction to graduate level study of telecommunications law and policy and its intersection with economics and technology. Fundamental principles and theories of telecommunications law, policy and policy-making, and methodological approaches are covered.

TCM502  **The Future of Emerging Technologies**
Focuses on emerging technologies and the use of scenario planning as a comprehensive tool to explore the trends and factors impacting technical decisions for business, industry and other organizations. It explores emerging technologies, e.g., biotech, Micromechanical Electrical Systems (MEMS), nanotechnologies, etc. and their potential effect on established systems and technologies. Emphasis is on applying scenario planning tools and techniques as a way to develop and respond to evolving industry scenarios.
Institute of Business Management

TCM503  Electronic Business, System and Technologies
Provides a high-level overview of the e-business industry with a focus on both business-to-business and business-to-consumer electronic commerce. Discussion of e-government issues will also be covered. Topics include framing the electronic commerce market opportunity, the evolution from simple e-commerce to comprehensive e-business, exploring various business models, identifying key elements of branding and the customer interface, implementation, analytics and industry trends. It examines the fine balance between creating a personalized user experience and maintaining a customer’s privacy.

TCM504  Management of Physical Security Technology and Systems
Emphasizes the securing and protection of physical assets with concentration on communications and computing facilities, including computers, servers, etc. Consideration will also be placed on securing key personnel when they are off site. Focus is also placed on processes and procedures that minimize business disruption while insuring site(s) and asset protection.

TCM505  Telecommunication Business Continuity Process and Crisis Management
Emphasizes the development of protocols and procedures designed to minimize business and enterprise risks associated with disasters and other major disruptions to ensure the rapid recovery of critical business functions. Focus is placed on planning and plan maintenance; business impact analysis identifying critical business processes and systems; and development of alternative operating or recovery procedures. Additionally, considerations for virtual continuity and collaboration with intercom any business-continuity planning teams will be covered.

TCM506  Telecommunication Business Process
Focuses on the dramatic transformation of business and organizational models realized through the convergence of communications and computers via the Internet and web, and other networks. Emphasis is placed on the global considerations an enterprise an organization must hold as policies, systems and technologies evaluated for the enterprise or organization. This core MSEBST program course will discuss and analyze relevant case studies.

TCM507  Optimization of Telecommunication Systems
Application of economic principles to policy and strategy issues in the print, online, broadcasting, multi-channel, home video, and motion picture industries, the production, distribution, and pricing of information products and services; intellectual property and new technologies; information networks and compatibility, policy and strategy applications are covered in this course.

TCM508  Managing Telecommunication in Media Application
Examines the information processing of mediated messages and theories underlying memory, attention, and cognition. Advanced analysis of cognitive psychology and emotion theory as they apply to the study of media, case studies in marketing and competitive strategies of media and telecommunications firms. Effects of technological change on industry structure and strategy are covered in this course.

TCM509  Internet Telephony
Focuses on different media and technologies used to deliver integrated data/voice communications, including integrated data/voice switching, voice-over IP and IP Telephony. It discusses current and emerging standards in the industry. Emphasises on the selection, design and implementation of integrated data/voice applications throughout the enterprise is a feature of this course.

TCM510  Managing the Creative Process
Examination of the business side of video production with emphasis on the role of the producer and/or production manager, including production team organization, schedules, budgets, contracts, markets and intellectual property are the course features.
TCM515  Multimedia Communication
This course introduces technologies for multimedia communications. It will address how to efficiently represent multimedia data, including video, image, and audio, and how to deliver them over a variety of networks. In the coding aspect, state-of-the-art compression technologies will be presented. Emphasis will be given to a number of standards, including H.26x, MPEG, and JPEG. In the networking aspect, special considerations for sending multimedia over ATM, wireless, and IP networks, such as error resilience and quality of service, will be discussed. The H.32x series, standards for audiovisual communication systems in various network environments, will be described. Current research results in multimedia communications will be reviewed through student seminars in the last weeks of the course.

TCM516  Error Control coding
Channel coding, cyclic codes, encoding by polynomial, multiple error correction, finite field arithmetic, BCH codes, reed Solomon codes, performance calculation of block codes, multistage coding, iterative decoding, the soft-output Viterbi Algorithm are taught in the course.

TCM517  Multimedia Systems
Multimedia data has become an indispensable part of our daily life and modern research projects. In this course, students will be introduced to principles and current technologies of multimedia systems, multimedia standards, and gain hands-on experience in this area. Issues in effectively representing, processing, and retrieving multimedia data, such as sound and music, graphics, image and video will be addressed.

TCM518  Video and Channel Coding
The course contains video basics, what is video? Recording and playback and history of video, analog video, the video image, formats and standards, composite and component video, digital video, comparing digital and analog video, compression, formats and standards, encoding and streaming, video codecs, MPEG, streaming video, video products, cameras and recorders, video networks and cisco video products.

TCM519  Speech Coding
This course will throw light upon the topics, such as models for speech production: the human vocal tract, linear prediction used for vocal tract parameter estimation, parameters for the male/female, and child voice, models for speech perception: the human ear, frequency analysis and pitch perception, intensity discrimination, time/frequency masking, sound localization and auditory perception, the interaction between visual and auditory information, speech coding and recognition, etc., are features of this course.

TCM520  Network Security and Cryptography
This course focuses on algorithms and protocols for secure network communication. Topics include cryptographic algorithms (DES, Diffie-Hellman, RSA), authentication, key management, secure networking, certification, trust management, and secure electronic.

TCM521  Voice Over Internet protocol
The objective of this course is to provide a technical and practical overview of Voice over IP (VoIP). The course identifies the main elements of the technology and presents them in an accessible format. At the end of the course students will be conversant with VoIP technology and understand the role of VoIP in their customer’s company and marketplace.
**Institute of Business Management**

**TCM522 Information Theory and Coding**
The topics covered include basic concepts of information theory—entropy, mutual information, channel capacity, information rate, Shannon's noiseless coding theorem and Shannon's fundamental coding theorem; modeling of information sources—zero-memory and Markov models; modeling of information channels—BSC and BEC channels, additively of information and cascaded channels; construction of compact source codes—Kraft inequality, compact codes, Huffman and LZW compression codes; and analysis and design of error-control channel codes—Hamming distance, binary linear codes and the parity-check matrix, Hamming codes, checksum codes, cyclic codes and the generator polynomial and CRC codes.

**TCM523 Wireless Adhoc Networks**
Introduction, foundations of wireless communication, wireless channels, modulations, WPANs, WLANs, and MAC Layers, wireless protocols, mobile IP, wireless routing, wireless TCP, source coding, QoS, introduction to wireless sensors networks, data dissemination and network security are covered in this course.

**TCM524 Broadband Communication**
This course covers various systems that transmit data including, multimedia data at high speed networks and networks, ATM, T1/E1 circuits, multiplexing of T1/E1 standards, optical channels, cable systems, satellite transmission and broadband issues, ISDN, and its variants. High speed multimedia communications systems.

**TCM525 Mobile and Pervasive Computing**
This course will cover the topics, such as introduction to wireless communication systems, evolution of mobile radio communications, infra-red systems, paging systems, cordless telephone systems, cellular telephone systems and wireless LANs. In addition, it includes analog and digital transmission, channel capacity, transmission and multiplexing, communication networks, antenna and wave propagation, spread spectrum, satellite communication, cellular wireless networks, mobile radio propagation model, wireless systems and standards, cordless systems and wireless local loop and wireless LAN technologies are also covered.

**TCM526 Next Generation Networks**
This course provides students the opportunity to research and report on near term “Next Generation Networks”. The course consists of discussions on one type of Next Generation Network followed by each student researching two additional Next Generation Network types. A case study approach will be utilized.

**TCM527 Satellite Communication**
The students in this course will be exposed to historical background of satellite communication, uplink and downlink frequencies, synchronous satellite, international regulations and frequency coordination, frequency allocation and band spectrum, general and technical characteristics of satellite communication signals, advantage and disadvantages of satellite communication, active and passive satellites. In addition to this, the course covers orbits and launching methods, radio wave propagation, atmospheric losses, rain attenuation, the space segment, altitude control, station keeping, thermal control, transponders and antenna, earth segments and the space link, inter connect and technical regulation and compliance approval of CPE and convergence are also features of the course.
TOURIST SERVICES MANAGEMENT

TSM101 Introduction to Cultural Studies
The course includes theoretical approaches to cultural studies – Modernist, Post Modernist, Marxist, culture, society and politics. (Adorno, Giddens, Eagleton, Foucault), cultural forms and structures, literature, music, architecture, a global culture or multiculturalism in Pakistan, historic heritage (special emphasis on Moenjodaro and Gandhara). Islamic culture (special emphasis on Sufism), post independence cultural development (special emphasize on literature in Urdu, Sindhi and English) and the impact of globalized cultural on Pakistan – a case study of the Feminist movement in Pakistan are taught in this course.

TSM102 Tourist Services and Hospitality Management
The course includes social Anthropology: aims and scope of social anthropology, the evaluation and development of human societies, major theories of social development (with special emphasis on Ibn-e-Khaldun, Max and Weber) anthropology of South Asia, symbols, communication and culture, human ecology (including behavioral genetics) race and ethnicity Techno science as a cultural artifact and an introduction to present studies in Punjab and the NWFP are features of this course.

CERTIFICATE COURSES

External students are allowed to register for 15-week Certificate Courses of their areas of interest. The following are some of the Certificate Courses being offered during 2008-2009:

**Accounting**
Accounting Information Systems
Advanced Financial Accounting

**Human Resource Management**
Strategic Human Resource Management
Salary and Compensation
Leadership Studies

**Marketing**
Advertising
Personal Selling
Brand Management
Media Planning

**Finance and Banking**
Analysis of Financial Statements
Corporate Finance
Money and Capital Markets
Treasury and Fund Management

**Management Information Systems**
Oracle/Developer 2000
Software Engineering
Data Communication and Networking
Programming in C++

**Health Services Administration**
Strategic Management of Health Services
Pharmaceutical Marketing and Quality Assurance
Dr. Humeira Jawed Abidi
MBA, Health and Hospital Management Program
“I haven’t just ‘studied’ at IoBM, infact, the uniqueness of my program, exceptional mentoring, awe-inspiring activities of my student society, friendly associates and state-of-the-art campus environment has inculcated and polished my personality both professionally and personally. As a doctor, I am now able to think and act more holistically to help manage the changing paradigms of health care and contribute to community welfare. IoBM has made me a Health Manager. I am proud of it!”

Zain Zaidi
BBA (Honors), Vice President, IoBM Marketing Society
“IoBM is more than an academic institute. It is a place where not only you learn business management, but also how to meet challenges every day. It has a wide range of courses to study, societies to join and to participate. Term projects and internships give you an insight into the real world. It also helps build your interpersonal and time management skills. Overall, IoBM is an experience.”
