Institute of Business Management

Catalog 2017-2018
VISION / MISSION STATEMENT

Vision

The Institute of Business Management aims to be one of the leading institutes nationally and internationally for imparting knowledge, skills, confidence, and values to its students thereby enabling them to become successful professionals globally.

Mission

The mission of the Institute of Business Management is to foster a learning environment where students are motivated to make learning an on-going life-long process. We see ourselves as a multi-dimensional educational institution. Our aim is to:

- Use the best teaching and training methodologies
- Prepare students to excel academically as well as in management skills to function ethically and take effective rational decisions in all endeavors of life
- Pursue leading-edge research
- Engage in the development of innovative ideas and analytical, interpersonal and leadership skills
- Allow freedom of thought and expression
- Encourage both faculty and students to be independent and creative thinkers
- Commit to our students and other stakeholders to create responsible future global leaders
FROM THE CHANCELLOR

As the Chancellor of the Institute of Business Management it gives me great pleasure to welcome the perusal of this catalogue by aspiring students, who having qualified for admission now seek to identify the courses they wish to pursue in an institute that has this year marked twenty one years of service to the cause of higher education in Karachi.

From a modest beginning in small rented premises IoBM has grown to occupy this 11-acre campus and a city centre campus. It has done so on the strength of its ability to provide high quality education in many distinct fields. It has done so because the calibre of its graduates has made them preferred candidates for internships and employment in major corporations in Pakistan and abroad. It has done so because it has sought to tailor the expansion of its educational programmes to the growing needs for business and finance managers, for civil engineers, for computer experts, for media managers. Perhaps it has been this facet of the IoBM that has prompted your decision to pursue your higher education here.

Increasingly the world is moving towards more knowledge-based activity, a world in which progress will come through innovation and creativity. Helping you to move in this direction will be one of the principal tasks of the faculty.

The ambition of IoBM management and experienced faculty however goes beyond providing you with the expertise that will make you easily employable or capable of starting your own enterprise. Education at IoBM must mean more. It must even while preparing you for the career you wish to pursue inculcate in you a sense of social responsibility, of recognising that you owe a duty to the betterment of the lot of the less fortunate in your city, your province and your country.

This is a task that needs not only faculty guidance, but active student participation. Numerous student forums exist on the campus. I urge you to be part of these forums. They will help develop your social skills and equally importantly inform you of the many ways in which, as privileged citizens, you can help enforce standards of ethical behaviour, help promote social cohesiveness and above all help improve the availability of better educational and health facilities for all our fellow Pakistanis.

IoBM will offer you state of the art facilities to enhance your intellectual capacity, to give you the required expertise in your special field and to develop your sense of social responsibility. But the primary responsibility will be yours. I am confident that if you choose to pursue your higher education in this institute you will live up to our expectations and with Allah’s blessings leave this institute not only as experts in your field of endeavour but as well rounded citizens with a strong sense of civic responsibility.

Najmuddin A. Shaikh
Chancellor

WELCOME TO IoBM
FROM THE PRESIDENT

Welcome to IoBM, the institution where you will experience a unique blend of rigorous yet rewarding experiential learning and plentiful opportunities to network with leading industry practitioners, erudite scholars and enlightened faculty members.

Now in our twenty-first year, we are fully cognizant of the demands of a rapidly transforming global environment. That is why we have been constantly upgrading our curriculum, methodology and infrastructure. In 2016, we introduced two new bachelor’s degree programs - the ‘Social Entrepreneurship & Social Leadership’ and ‘Mathematics & Economics’ joint degree program.

Our relentless efforts to improve the quality of education is recognized by the Higher Education Commission (HEC) and other revered academic circles. We are also aligned with national and global accreditation agencies to foster quality assurance across all disciplines. Our partnership with over 60 universities in Asia and Europe continues to benefit our students and faculty through exchange programs and collaborative research projects.

In keeping with standard practice, we continue to offer merit and need-based scholarships to our regular students. Our Outreach Program for deserving and meritorious students of less privileged districts: Tharparkar, Umerkot, Badin, Thatta and Suajwal, initiated in Fall-2015, has been extended this year to district Sanghar and Lasbela becoming the first district in Balochistan to benefit from our fully–funded four year Engineering Degree Program.

The number of our alumni has now crossed the 8,000 mark. Many of them are holding mid-to-top level positions in private and public sector organizations in the country and overseas. Whereas others lead their own entrepreneurial ventures or run their family businesses. Based on our vision of institutional leadership and our core values of equality and social justice, we continue to optimize our programs so that all those who pass through this institution ascend to greater heights of success in their personal and professional endeavors.

Shahjehan S. Karim
President
AN INTRODUCTION TO THE INSTITUTE OF BUSINESS MANAGEMENT

This catalog will provide you valuable, up-to-date information about the programs of study and courses offered by the Institute, as well as information about the fee structure, facilities and student services available to students.

Beginning with an introduction to the Institute, the catalog provides an introduction to life at IoBM, as well as detailed information on all undergraduate and graduate level programs along with core courses, electives and specialized courses. Every effort is made to update information on courses in the catalog. However, changes in curricula may be necessary as part of a process of continuous improvement and the need to keep each program fully aligned with academic and professional developments. For that reason, the Institute reserves the right to make necessary alterations in courses and/ or course structures, after clearing them with the concerned Boards of Studies. Teaching methodology, academic and research programs, assessment procedures and course descriptions also form part of the catalog.

The catalog also describes the facilities at computer labs, library resources, student support services and information on application and course registration procedures. Information regarding opportunities for financial assistance and stipends for students are also included. The latter part of the catalog contains brief profiles of academic and administrative personnel.

IoBM: 1994 - 2017

The Foundation for Higher Education was established as a non-profit institution in 1994 by a group of dedicated citizens of Karachi, and was registered under the Societies Registration Act of 1860. The Foundation promotes dissemination of quality education. Its first project was setting up a management university to serve trade, industry and commerce by producing highly competent and talented business executives. Teaching began at the College of Business Management (CBM), IoBM’s first constituent college, in September, 1995.

In January 1998, a bill was unanimously approved by the Sindh Provincial Assembly for establishing a university known as the Institute of Business Management in the private sector. At present, the Institute has its four constituent colleges, the College of Business Management (CBM), the College of Computer Science & Information Systems (CCSIS), the College of Economics & Social Development (CESD) and the College of Engineering and Sciences (CES). Since 2006, the Institute has been ranked as one of the top universities in the private sector, both by the Higher Education Commission of the Federal Government and the Sindh Provincial Government. From 2010 to 2015, we have been honored with prestigious awards of EDUNIVERSAL Palms for meritorious evaluation and certification of educational institutions around the world. The Institute is a member of the International Association of Universities (IAU), Association to Advance Collegiate Schools of Business (AACSB) and other international and national organizations.
The Governor of Sindh is an ex-officio Patron and the Chancellor, Mr. Najmuddin A. Shaikh is also the Chairman of the Board of Governors of the Institute. The other members of the Board are:

- Chairman Higher Education Commission or his nominee
- President, Federation of Pakistan Chamber of Commerce and Industry
- President, Karachi Chamber of Commerce & Industry
- President, Karachi Stock Exchange (Guarantee) Ltd.
- Secretary, Government of Sindh, Education & Literacy Department
- Mr. Shahjehan S. Karim, President IoBM
- Mr. Basheer Janmohammad
- Mr. Jahangir Siddiqui
- Mr. S. M. Muneer
- Mr. Muhammad Ali Tabba
- Mr. Salahuddin Qureshi
- Mr. Muhammad Sharif
- Dr. Zafar Saied Saify
- Mr. Masood Hashmi
- Mr. Muhammad Sikandar Sultan
- Ms. Ameena Saiyid
- Mr. Talib S. Karim Rector, IoBM
- Mr. M. W. Jahangir, Secretary BoG

The Institute, through its College of Business Management (CBM), offers a four year BBA (Honors) and a two/three year MBA degree program with specialization in Marketing, Finance, Human Resource Management and Management Information Systems, Health & Hospital Management, Pharmaceutical Administration, Media Management, Industrial Management and Telecommunication Management. BS (Honors) Economic & Finance, Accounting & Finance and BS Social Entrepreneurship and Social Leadership are also offered. A research degree, an MPhil leading to PhD, is offered in Finance, Human Resource Management, Marketing, Education, Psychology and Management Information Systems. A four year Bachelor of Computer Science (Honors) followed by a two years Master of Computer Science and MBA in Finance & Risk Management, BS in Mathematics & Economics and BS Data Science are offered through the College of Computer Science & Information Systems (CCSIS).

The Institute emphasizes on research and publishes HEC and internationally recognized Pakistan's first business policy and research journal, Pakistan Business Review. Pakistan Journal of Engineering Technology & Science by College of Computer Science & Information Systems and Journal of Education & Educational Development by CESD are also published. Students and faculty contribute regularly to its pages. A research seminar is organized on a weekly basis. The Institute is the only business school where foreign language courses, Arabic, French, Spanish, Italian or Chinese are compulsory subjects in the BBA and BCS programs. The Institute has a competent and dedicated faculty with the majority holding foreign degrees. One international seminar funded by the HEC is organized on an annual basis. IoBM academic programs are up to date and comprehensive in concept and structure, resembling honors programs offered by UK and graduate programs of US Universities. It has extensive links with a number of North American and British universities. Professors from these universities have served as Chief Academic Officers of the Institute.

Since 1998, more than 8,000 students have graduated from the Institute. Most of them are placed in key positions in leading national and multinational firms including Habib Bank, Faysal Bank, Standard Chartered, PIA, Engro, Berger Paints, Geo TV, National Bank of Pakistan, Unilever, IBM, ICI, SmithKline & Beecham, Aga Khan University Hospital, Karachi Stock Exchange and several provincial and federal government agencies. Many graduates have proceeded for their post-graduate program to reputable universities in the UK and USA. More than 400 students go for compulsory internships every year to national and multinational organizations.

The Entrepreneurship & Management Excellence Center (EMEC) / ORIC of the Institute organizes professional education, training and research programs for serving the corporate sector to enhance both its profitability and contribution to society. Support is provided in the areas of banking and finance, marketing, human resource development and information systems management.

The Institute has come a long way since its inception. There are over 4000 students on our campus which is large and purpose-built at Korangi Creek on a 11 acre site, comprising the Business College building, Administration and Entrepreneurship & Management Excellence Center building, CCSIS building, a Convocation Center, Student Activity Center, a five-storeyed library building, Industrial Engineering and Management building, a mosque and CESD building. Another nine acre site has been purchase 1 km from the present campus. A new state-of-art Entrepreneurship and Management Excellence Center with over 150,000 sq.ft of covered area is under construction and is expected to be completed by June 2019.

At the Institute’s fourth convocation in December, 2001, an honorary degree of Doctorate of Philosophy was conferred upon Dr. Nafees Sadik, former Executive Director, United Nations Population Program. At the fifth convocation held in December, 2002, an honorary degree was conferred on our keynote speaker, Mr. Babar Ali, Pro-Chancellor, Lahore University of Management Sciences (LUMS), and at the ninth convocation an honorary degree was conferred on Dr. Goolam Mohamedbhai, President, International Association of Universities (IAU). The sixth convocation was held in December 20, 2003 with Dr. Atta-ur-Rahman, Chairman, Higher Education Commission and Minister for Science & Technology as the Chief Guest and Ms. Musharaf Hai, Chairperson, Unilever Pakistan Limited as the keynote speaker. The seventh convocation was held on December 18, 2004 with the Governor Sindh as the Chief Guest and Mr. Hameed Haroon, Chief Executive Dawn Group of Newspapers as the keynote speaker. Over 300 students were awarded BBA (Hons), BCS (Hons), BS (Accounts), MBA and MCS degrees at this convocation.
The eighth convocation was held on December 17, 2005 with the Minister for Education, Sindh, as the Chief Guest and Syed Ali Raza, President, National Bank of Pakistan, as the keynote speaker. Over 400 students were awarded degrees at this convocation. The ninth convocation of the Institute was held on December 16, 2006 with the Education Minister as the Chief Guest and Dr. Goolam Mohomedbhai President, IAU, as the keynote speaker. Over 450 students were awarded degrees at this convocation. The tenth convocation was held on December 8, 2007, where Mr. Jose Manuel Salazar-Xirinachs, Executive Director of the International Labour Organization, Geneva was the keynote speaker and over 500 students were awarded degrees.

The eleventh convocation of the Institute was held on December 6, 2008 where the Governor, State Bank of Pakistan was the keynote speaker and Governor Sindh, Dr. Ishrat ul Ebad was the chief guest and over 700 degrees were awarded to students at this convocation. Syed Qaim Ali Shah, Chief Minister of Sindh and Mr. Nisar Ahmed Khuhro, Speaker Sindh Assembly attended the twelfth convocation of the Institute, held on December 05, 2009. The keynote Speaker was Mr. Shaharyar Muhammad Khan, former Foreign Secretary and former Chairman of the Pakistan Cricket Board. As many as 927 graduates were awarded degrees. The thirteenth convocation was held on December 4, 2010. The chief guest on the occasion was Dr. Abdul Hafeez Shaikh, Minister for Finance, Revenue, Economic Affairs & Statistics and the keynote speaker was Dr. Javed R. Laghari, Federal Minister / Chairperson of the Higher Education Commission of Pakistan.

The fourteenth convocation was held on December 10, 2011 over 983 degrees were awarded to students at this convocation. The chief guest on the occasion was Dr. Shamsh Kassim-Lakha, Founding President and Trustee of AKU and the keynote speaker was Mr. Javed Jabbar, Chairman and Chief Executive, JJ Media (Pvt.) Ltd. The fifteenth convocation was held on December 08, 2012. Over 825 degrees were awarded to students at this convocation. The keynote speaker was Mr. Shahid Aziz Siddiqi, Chairman and CEO, State Life Insurance Corporation of Pakistan. The sixteenth convocation was held on December 07, 2013. Over 850 degrees were awarded to students at this convocation. The chief guest was Mr. Nisar Ahmed Khuhro, Senior Minister for Education, Govt. of Sindh, keynote speaker was Dr. Kakha Shengelia, President Caucasus University Republic of Georgia, and Mr. Munir Kamal, Chairman National Bank of Pakistan was the guest of honor in this convocation.

The Seventeenth convocation was held on December 07, 2014. Over 850 degrees were awarded to students at this convocation. The chief guest was Mr. Nisar Ahmed Khuhro, Senior Minister for Education, Govt. of Sindh, keynote speaker was Mr. Muhammad Aliuddin Ansari, President & Chief Executive Officer of Engro Corporation in this convocation. The eighteenth convocation was held on December 12, 2015. Over 900 degrees were awarded to students. The chief guest was Mr. Muhammad Mian Soomro, Former President of Pakistan and keynote speaker was Mr. Kamal A. Chinoy, Chief Executive of Pakistan Cables Limited at the event. The nineteenth convocation was held on December 10, 2016. Over 950 degrees were awarded to students. The guest of honor was Mr. Jam Mehtab Hussain Dahar, Minister for Education & Literacy, Government of Sindh, keynote speaker was Mr. Sirajuddin Aziz, President Habib Metropolitan Bank Ltd. Dr. Mukhtar Ahmed, Chairman Higher Education Commission (HEC) also attended the convocation.

**Shahjehan S. Karim Center of Excellence**

A 7 Story (basement plus six floor) centrally air-conditioned building with a covered area of 152,000 sq.ft and open area of 15,000 sq.ft. houses 22 classrooms, 68 faculty offices, examination department with 2 examination halls of 1100 sq.ft, laboratories, media studio of 2,576 sq.ft, seminar rooms, training halls, gymnasium, 8 kiosk (food) with 180 seating capacity and 22 hostel rooms housing for students and faculty.
WHY CHOOSE IoBM?

For the last four years, IoBM has been rated as one of the top universities/institutes and other academic sectors of Pakistan, both by the Higher Education Commission of the Federal Government and the Provincial Government of Sindh. Eduniversal, during its international conventions of Deans of Business Colleges has awarded IoBM 2 Palms as one of the two best Business Schools in Pakistan since 2010. The Institute has been an active member of the International Association of Universities (IAU), International Association of University Presidents (IAUP), Association to Advance Collegiate Schools of Business (AACSB), Association of Commonwealth Universities (ACU) and is also associated with several other international academic organizations.

IoBM has established linkages and earned credibility with reputed foreign business schools and leading international institutes, associations and organizations pertaining to sharing and contributing ideas and insight in business education and research.

The programs we offer include executive MBA and MBA (Evening) in diverse fields, held on weekends placing special emphasis on the needs of busy executives and those who, having finished one career, wish to go for a new one. IoBM offers programs in Health and Hospital Management, Finance & Risk Management, Industrial Management, Telecommunication Management, Environment & Energy Management, Education Management, Organizational Psychology, Economics and many other disciplines. IoBM faculty excel in their respective fields. They pass on their expertise in research and scholarship to students enabling them to have an enhanced understanding of their respective disciplines.

Students have access to excellent facilities and learning resources as IoBM continually invests in the University’s infrastructure: library, gym, sports, computer equipment, Wi-Fi facility, video conferencing, state-of-the-art campus building and subsidized transport facilities. IoBM has earned its reputation through an excellent internship and graduate employment record. The rigorous academic degree courses enable graduates to acquire breadth and depth in their chosen subjects and, therefore, enter a wide range of careers. A large number of its graduates join top business schools in Europe, USA and Canada.

Research is a core competence at IoBM. All members of the IoBM community are actively engaged in disseminating knowledge, pursuing research in a diverse range of themes. The Institute publishes the research quarterly journal, Pakistan Business Review (PBR), which is recognized by the Higher Education Commission (HEC) as category X, and ECONLIT, Journal of Economic Literature, USA. An annually held HEC financed international conference provides a platform for the presentation of research undertaken at IoBM. Pakistan Journal of Engineering Technology & Science and Journal of Education & Educational Development are also being published. IoBM is now connected with PERN2, a high speed dedicated National Research & Education Network (NREN) for the universities/institutes and other academic sectors of Pakistan.

“The essence of IoBM’s academic programs pertains to career focused education towards Individual fulfillment, professional excellence, institutional credibility, family welfare and social responsibility. The net result is reflected in the net product. IoBM’s credibility speaks for itself.”

Shahjehan S. Karim
President
Institute of Business Management
LIFE AT IoBM
RESOURCES AND FACILITIES

Institute of Business Management has a purpose built twenty acre campus located in the serene and secure surroundings of Korangi Creek, Karachi. The College of Business Management building, covering an area of 85,000 sq. ft., is equipped with state-of-the-art teaching equipment to enable the Institute to keep pace with the dynamics of the global market. All classrooms are equipped with internet and intranet facilities. IoBM is a Wi-Fi campus. The campus buildings are centrally air-conditioned and they have all been self financed with no outside assistance or donation. A separate centrally air-conditioned modern Administration and Entrepreneurship & Management Excellence Center building, with a covered area of 26,900 sq.ft. was completed in 2001. Another centrally air-conditioned building with a covered area of 31,655 sq.ft., houses the College of Computer Science and Information Systems and has been operational since 2002. The Convocation Center was completed in November, 2002, and the Students Activity Center building in September, 2003 which has a second floor housing 10 faculty residential suites for visiting scholars and was completed in January, 2006. The library building has been operational since January, 2005. A separate building houses the department of Industrial Engineering & Management. A new 150,000 sq.ft building will be completed by June 2016. The Institute provides students with subsidized transportation to and from the campus through conveniently located pick and drop points all over Karachi. Girls are provided this facility to and from their homes. The campus also has ample car parking facilities.

Computing Facilities

One of the strengths of the IoBM program is the incorporation of information technology as a key component of the curriculum. The academic programs offered by the Institute require students to obtain hands on experience on computers and develop a high level of expertise in this field. The Information Systems Department (ISD) of the College of Computer Science and Information Systems provides administrative, networking and technical support to the faculty and students. The College of Computer Science and Information Systems building includes a number of computer laboratories with around four hundred & twenty workstations. It is fully equipped with satellite/ radio-linked e-mail, Wi-Fi facilities and internet facilities for all students, faculty and staff.

Library

The IoBM library, an ideal setting for learning and research, serves as a repository for the rich array of both traditional and electronic information services. A distinctive strength is its rich spectrum of resources, including a large number of books, journals, periodicals, reference material, audio-visual material, government documents and reports catering to the scholarly needs of students, faculty and researchers. Its pleasant and conducive-to-learning environment accommodates 350 students and 48,851 books. All library books are searchable using OPAC (Online Public Access Catalog) and the newly developed software Library Information and Management System (LIMS), available at the front desk. Students are provided with internet workstations and rooms for group study. Of the many recent initiatives by IoBM are its access to a large number of e-resources through the HEC Digital library, and online journals through JSTOR e-database. The library also provides access to print and online journals through subscription to a number of business, marketing, management and HRM journals. In addition to the main library, the Learning Resource Center in the Academic block caters to the scholarly requirements of M Phil and PhD programs. The Library engages in numerous projects to expand access to its physical and digital collections. Skills development sessions are conducted for students and faculty from time to time. The library projects on the horizon include development of a portal of web links, just a click away, on the desktops of faculty and students.
Exciting and eventful as always, the last year at IoBM has been no exception. Following examples give you a glimpse of life at IoBM:

Student life at IoBM is not just about presentations, reports, midterms and finals. In fact, there is a whole range of student-organized entertainment and events that take place throughout the year. Students on campus are genuinely interested in cultural vibrancy and a sense of community. In between the busy academic schedule there are seminars, talk shows, guest speakers, fund raiser bake sales, the Event Management class food and fun stalls, CBMUN, Green Day, Drama festival and so much more. One can never get enough of it. To cater to the individual student’s choice, there are a number of societies for likeminded people such as:

Literary and Public Speaking; Finance; Mathematics; The Club for Entrepreneurs; Club IT; CBM Society for Health Managers; Egalitarians- Economics; Youth Enhancement; Enlighterz; Industrial Engineering & Management; Dialogue; Marketing; Strategic & Human Resource; Entertainment Plus; Vanguard and the Sports Society; Mentors; SWAT and the Music & Arts Society (MARTS). Each society is headed by a faculty advisor who is a senior member of the faculty or management and a team of student office bearers. These societies are diverse in their activities, organizing university-wide forums for students to talk about and debate social, economic, and political issues; arranging seminars & workshops where they invite well known personalities from the business, government and corporate worlds. This provides them with an opportunities to exchange ideas and opinions with market leaders.

Our students participate in various events organized by other universities / institutes locally, as well as, nationally and have won laurels for their Institute. Social care is a regular feature of these societies. Every year, in the month of Ramzan, donations in cash and kind are collected and, along with the Management’s sizable contribution, distributed to the needy in various hospitals of the city. Among other regular features are blood donation camps that are put up from time to time.

Students’ Achievements

- IoBM team won the Unilever Talent Hunt 2014
- IoBM team won 2nd position in HEC All Pakistan Intervarsity (Men) Table Tennis Championship 2016
- IoBM team won 2nd position at FAST Robotics competition, 2015
- IoBM team won Battle of the Bands at LUMS Music Festival, 2015
- IoBM team won 2nd prize at LUMS Leadership Marathon, 2015
- IoBM team won the 1st prize at Pakistan Tobacco’s “Battle of Minds”, 2015
- IoBM team was Runner-up in HEC Inter-varsity Table Tennis Zone “G” Championship 2015-2016
- IoBM team was Runner-up in Lays Inter-Regional Futsal Glory Cup Tournament 2016 in Lahore
- IoBM team Telecare secured 2nd Runner-up position in the Amanclinics Accelerator, 2016

GLOBAL LINKAGES

International Relations Department

The Institute of Business Management (IoBM) has an International Relations Department that works under the supervision of the President of IoBM. The Department is successfully managing execution of international relations on bilateral and multilateral terms with a large number of universities in Europe, Asia and U.S.A.

Eduniversal Ranking

Eduniversal, based in Paris, France, is a worldwide academic institution ranking organization which ranks the 4,000 best academic institutions from around the world. The expertise of IoBM is distinguished in the 2014 Eduniversal Best Masters’ Ranking in the context of following programs:

Top 200 Best Master’s Programs:
- MBA Advertising and Communication Management - Ranked 2
- MBA Human Resource Management - Ranked 6
- MBA Industrial Management - Ranked 6
- MSc Economics - Ranked 6
- MBA Marketing - Ranked 7
- MBA Finance and Accounting - Ranked 7
- MBA Executive - Ranked 8
- MBA Full Time - Ranked 15

Top 100 Best Master’s Programs:
- MBA Finance and Risk Management
- MBA Health and Hospital Management
- MBA Environment and Energy Management
- MBA Logistics and Supply Chain Management
Erasmus Mundus (EM)

Erasmus Mundus is a cooperation and mobility program of the European Union in the field of higher education. IoBM is participating in the EM Project as the Joint Coordinator to develop institutional cooperation by promoting linkages between leading Asian and European Universities, in the form of student, faculty and staff mobilities. This program also enables undergraduate, master, Ph.D and post doctoral students of Asian partner countries to benefit educationally, linguistically and culturally from studying at partner universities. Further, the project also provides opportunities to IoBM faculty members and staff to get training at partner higher educational institutions, which can upgrade their knowledge, skills and orientation through different training programs.

List of the members of our EM Consortium 2014 is as follows:

European Union Partners:

- Spain University of Malaga (Coordinating Institution)
- Lithuania Vytautas Magnus University
- Germany Erfurt University of Applied Sciences
- Greece University of Peloponnese
- Italy University of Florence
- Portugal Institute of Politecnico de Castelo Branco
- France University of Montpellier 2
- Poland Wroclaw University of Technology
- Slovakia Technical University of Kosice
- Finland Haaga-Helia University of Applied Sciences
- France IPAC

Asian Partners:

- Pakistan Institute of Business Management (Joint Coordinating Institution)
- Bangladesh American International University
- Bhutan Gaeddu College of Business Studies
- Nepal Kathmandu University
- Sri Lanka University of Peradeniya
- Sri Lanka University of Kelaniya
- Thailand Chiang Mai University
- Malaysia University of Kuala Lumpur
Bilateral Agreements
IoBM has bilateral agreements under formally signed Memorandum of Understanding (MoU) with the following universities, which provide exchange of students, faculty and staff and promote joint research and consultancy.

Student and Faculty Exchange Program

IoBM students have gone to the following universities on student exchange programs:

- International Burch University, Bosnia
- Guilin University of Technology, China
- Sias International University, China
- Caucasus University, Georgia
- Erfurt University of Applied Sciences, Germany
- University of Florence, Italy
- Nagoya University of Commerce and Business, Japan
- Vytautas Magnus University, Lithuania
- University of Kuala Lumpur, Malaysia
- Groupe ISCAE, Morocco
- Girne American University, North Cyprus
- Institute of Politecnico de Castelo Branco, Portugal
- Institute of Business Studies (IBS- Moscow), Russia
- Dongseo University, South Korea
- Hanyang University, South Korea
- University of Malaga, Spain
- Naresuan University, Thailand
- Bilkent University, Turkey

IoBM has entered into an understanding with these universities for exchange of students on waiver of university tuition fees and in some cases, provision of free hostel facilities. Our students going to Erfurt University of Applied Sciences for undergraduate studies for a semester also work with leading German companies as internees and thus gain practical experience. IoBM also welcomes students from partner universities to spend a semester at IoBM. More students are expected from different universities in the upcoming semesters through the student exchange program. Experts visit IoBM for a semester from Spain, Germany, China and Nigeria. Exchange of students, faculty members as well as joint research projects are a continuous process involving universities all over the world.

Senior Expert Services

A German NGO, Senior Expert Services (SES) has been sending technical experts and faculty to IoBM for giving training and assistance in various programs in Health Management, Marketing, Media Management, Industrial Engineering, Corporate Social Responsibility, IT, Human Resource, Supply Chain, Telecommunication, Education, Economics, development of Academics and Vocational Training. SES is also assisting IoBM in setting up a full-fledged academic program in Environment and Energy Management.

IAU LEADHER Program 2014

The LEADHER program offers opportunities for learning partnerships and collaboration among IAU member institutions in Good Standing and enables participating institutions to tap into the wealth of experiences around the world. The Institute of Business Management (IoBM) was selected in collaboration with Caucasus University, Georgia (CU) for funding a project on Strengthening research capacity and research management in universities for the International Association of Universities (IAU) Leadership for Higher Education Reform (LEADHER) Program 2014.

Memberships of Professional Bodies

IoBM is also an active member of the following international and national professional bodies:

1. International Association of Universities (IAU), UNESCO, France
2. International Association of University Presidents (IAUP)
3. The Association of Commonwealth Universities (ACU), UK
4. Association of Universities of Asia and the Pacific (AUAP), Thailand
5. AACSB International -The Association to Advance Collegiate Schools of Business, USA
6. Asian Media Information and Communication Centre (AMIC), Singapore
7. Management Association of Pakistan (MAP), (Member, Executive Council)
8. Marketing Association of Pakistan (President)
9. Employers Federation of Pakistan
10. Institute of Corporate Governance
11. International Finance Corporation (IFC), USA
12. Association of University Programs in Health Administration
13. Association of Management Development Institutions in South Asia (AMDISA)
14. OPEN, Karachi (Chairman)
15. Association of Management Development Institutions in Pakistan (AMDIP), (Chairman, Karachi)
COLLEGE OF BUSINESS MANAGEMENT

To be the leading business school, recognized for producing ethical, transformational and change leaders and managers, nationally and internationally.

To provide transformational and change leadership and management for the development of the economy and society through excellence in character, professionalism, education and research.
The Bachelor of Business Administration (Honors) is a professional and comprehensive management degree providing conceptual knowledge and in-depth exposure to functional areas in business management including accounting, marketing, finance, management, entrepreneurship and MIS along with special emphasis on leadership, social awareness, creativity and innovation. The program employs the latest approaches in experiential learning to develop skills for interpersonal communication, team work, foreign languages and managing diversity. Students learn to think critically and to apply conceptual knowledge to real world challenges and design solutions. Graduates of the BBA program distinguish themselves with their personal and professional excellence as managers and entrepreneurs in their areas of specialization. They are well rounded professionals known as doers and go-getters and are in great demand in the industry. BBA is a four-year program which requires completion of 144 credit hours of course work and 2 credit hours of internship in a firm approved by the Institute. A student is required to complete 48 courses of 3 credit hours each in order to meet the degree requirements. Six credit hours are structured into the program for a foreign language course. Students must maintain a CGPA of 2.5 for the conferment of the degree.

To promote lifelong learning at IoBM, the program emphasizes Experiential Learning (EL) and developing readers and writers. The college's mission is reflected through courses designated with a suffix R, W or E in the program structure:

- An experiential learning course (E) requires an intensive experiential learning project focusing on a real life problem in a real life setting
- A writing-intensive course (W) has a substantial writing component and requires multiple writing assignments to be submitted at designated times during a semester
- A reading-intensive course (R) has a substantial reading component and requires multiple reading assignments that are evaluated at designated times during a semester

Students are provided with general business courses as part of their studies and select 5 electives and a capstone project from the following specializations:

- Accounting*
- Entrepreneurship
- Finance and Banking
- Human Resource Management
- Industrial Management
- Management Information Systems
- Marketing
- Management
- Logistics and Supply Chain Management

Courses are divided into Foundation, Core and Electives.

*BBA program is recognized by ACCA which offers 5 course exemptions (F1 - F5) to BBA students of IoBM.

Students must take a minimum load of twelve credit hours (four courses) or a maximum load of eighteen credit hours (six courses) in a semester. In order to obtain the BBA (Honors) degree in four years, they need to complete twelve courses in a year. Full load of six courses can be taken each in Fall and Spring semesters with an option for fewer courses in the latter and making up for the shortfall in the summer session.

BS (JOINT) HONORS IN ECONOMICS & FINANCE

BS (Joint) Honors in Economics and Finance prepares graduates for professional careers in economics and finance in the corporate sector, financial sector and public sector regulatory and planning organizations. It requires completion of 144 credit hours of course work and 2 credit hours of relevant internship of at least six weeks in an approved firm. The program offers 75 credit hours of business and social sciences courses with an intensive coverage of 69 credit hours of Economics and Finance related courses designed to develop well rounded professionals regarded as go-getters in industry. There are 25 business and social science courses with 9 Economics core courses and 6 Finance core courses. Students then select 4 economics electives and 4 Finance elective courses to complete degree requirements.

Students graduating with a CGPA of 2.5 automatically qualify for the MBA program offered by IoBM.

To promote lifelong learning at IoBM, the program emphasizes Experiential Learning (EL) and developing readers and writers. The college’s mission is reflected in courses designated with a suffix R, W or E in the program structure:

- An experiential learning course (E) requires an intensive experiential learning project focusing on a real life problem in a real life setting
- A writing-intensive course (W) has a substantial writing component and requires multiple writing assignments to be submitted at designated times during a semester

SSC101 Introduction to Psychology

2012 to 2016, the most precious and unforgettable years for me. 2012 was a turning point of my life, when I got admission in IoBM after A Levels, and another decisive event for me was 2016’s convocation when I got BE(Elec) degree and a gold medal. I felt much more proud when I was told that it was for the first time any student of an Electrical Engineering department, managed to get a medal.

The constant support and prayers of my parents, teachers and my friends privileged me with being a gold medalist.

Thank you IoBM for making me, not only a good engineer, but also a good human.

Muhammad Ammad Afzal
Gold Medalist
Convocation 2016

BS (JOINT) HONORS IN ACCOUNTING & FINANCE

BS (Joint) Honors in Accounting and Finance prepares graduates for professional careers in finance and accounting in the corporate sector and the financial. It requires completion of 144 credit hours of course work and 2 credit hours of audit and finance internship of at least six weeks in an approved firm. The program offers 84 credit hours of business and social sciences courses with an intensive coverage of 60 credit hours of Finance and Accounting related courses designed to develop well rounded professionals who are regarded as go-getters in industry. There are 28 business and social science courses with 5 Accounting core courses and 5 Finance core courses. Students then select 5 economics electives and 5 Finance elective courses to complete degree requirements.

Students graduating with a CGPA of 2.5 automatically qualify for the MBA program offered by IoBM.

To promote lifelong learning at IoBM, the program emphasizes Experiential Learning (EL) and developing readers and writers. The college’s mission is reflected in courses designated with a suffix R, W or E in the program structure:

- An experiential learning course (E) requires an intensive experiential learning project focusing on a real life problem in a real life setting
- A writing-intensive course (W) has a substantial writing component and requires multiple writing assignments to be submitted at designated times during a semester
- A reading-intensive course (R) has a substantial reading component and requires multiple reading assignments that are evaluated at designated times during a semester

** Foundation

- COM100  Foundation English**
- COM107  Academic English (W,R)
- PSC301  Pakistan Studies (W)
- REL101  Islamic studies (R)
- MTH101  College Algebra

** This non-credit course will be taken by those students who have not been able to reach the desired level of competence in the admission test.

** Business Core

** Accounting

- ACC101  Introduction to Financial Accounting
- ACC201  Intermediate Financial Accounting
- ACC320  Cost & Management Accounting
- ACC503  Taxation
- ACC506  Analysis of Financial Statements

** Communication

- COM202  Methods in Business Writing
- COM203  Business & Professional Speech (E)

** Economics

- ECO101  Principles of Microeconomics
- ECO102  Principles of Macroeconomics
- ECO301  Managerial Economics
- ECO303  Financial Economics
- ECO402  Pakistan Economic Policy

** Finance

BS ENTREPRENEURSHIP

The BS Entrepreneurship Program is designed to take the students through various stages of entrepreneurial and intrapreneurial process whose end product would be a functioning enterprise. The program is designed to develop thought leaders with entrepreneurial spirit that can lead to the creation of new ventures within and outside existing enterprises. After completing the program, students would have designed, launched and managed their entrepreneurial ventures through the stages of ideation, networking, experimentation, execution, breakeven, growth, and investment. Students would have explored each of these stages through multiple courses using the project based learning approach. Graduates of this program will be job creators and not job-seekers, they would have the experience of coming out of the comfort zone, and to practice creativity, innovation and design with real projects, real entrepreneurs, and in real-life environments.

Distinctive Feature of the Program:
Experiential Learning: Learning by doing via PBL; Project based learning and Problem Based Learning. Eight thematic projects on real life entrepreneurial process. Projects are exploratory and descriptive during the earlier part of the program and prescriptive and implementation oriented during the later semesters.

Course Design: Courses designed around PBL sub-projects with deliverables requiring application, analysis/evaluation and creation levels of Bloom’s Taxonomy to complete entrepreneurial process

Pedagogy: Faculty members are project supervisors, facilitators, mentors rather than lecturers

Field Work: The program consists of extensive research based field work, visits, surveys and experiential projects

Design of the Program: It requires completion of 144 credit hours of course work in a total of 8 semesters or 4 years. Student’s graduation with CGPA of 2.5 automatically qualifies for MBA program offered by CBM.

The program is based on a step wise transition of thematic semesters containing courses and projects that facilitate the entire entrepreneurial process. Each semester reflects a stepping milestone having embedded courses from various business domains that revolve around an underlying project.
Entrepreneurial Ideation Stage - Semester 1:
• Startup Garage I: Business Model and Business Research Method with supportive courses

Entrepreneurial Networking Stage - Semester 2:
• Startup Garage II: Affordable Design Project with supportive courses

Entrepreneurial Experimentation Stage - Semester 3:
• Startup Garage III: Test Phase Project with supportive courses

Entrepreneurial Execution Stage - Semester 4:
• Lean Launchpad I: Launch Phase Project with supportive courses

Entrepreneurial Breakeven Stage - Semester 5:
• Lean Launchpad II: Mitigation Phase Project with supportive courses

Entrepreneurial Growth Stage - Semester 6:
• Lean Launchpad III: Expansion Phase Project with supportive courses

Entrepreneurial Investment Stage - Semester 7:
• Capstone I: Pitch and Win Investors Project with supportive courses

Global Entrepreneurship Stage - Semester 8:
• Capstone II: International Business Idea Competition Project with supportive courses

Entrepreneurial Ideation Stage:
ENI101 Idea Generation and Opportunity Recognition
STA403 Statistics and Mathematics
ENI103 Systems, disruptive and exponential thinking
ENI104 Islamic Conception of Business & Entrepreneurship
ENI105 Human-Centered Design Thinking
ENI106 Startup Garage I: Business Model and Business Research Methods

Entrepreneurial Networking Stage:
ENN201 Marketing Tactics and Guerrilla Strategies in Business
COM402 Business Communication: Survey of Investors
ENN203 Psychology and Behavior of Entrepreneurship
ENN204 History and Survey of Pakistani Business and Entrepreneurship
ENN205 Design Methods in Industry
ENN206 Startup Garage II: Affordable Design

Entrepreneurial Experimentation Stage:
ENX301 Idea Prototyping and Market Alignment
ENX302 Lean Accounting and Finance
EXP303 Effectuation Method
ENX409 Business Economics
ENX305 Design Strategy
ENX306 Startup Garage III: Test
Entrepreneurial Execution Stage:

The objective of BS Social Entrepreneurship and Social Leadership program is to develop social leaders and social entrepreneurs who are able to create sustainable and impactful solutions to local and global problems.

Program:
BS Social Entrepreneurship and Social Leadership program inspires and equips graduates to demonstrate leadership through creation of sustainable social advocacy enterprises focused on solving real life problems. This is an innovative and fully experiential learning program focusing on PBL; Project Based Learning and Problem Based Learning. It provides an inter-disciplinary understanding of real life problems from humanities and liberal arts perspectives, and additionally enables students to envision and create enterprise solutions through managerial and leadership skills imparted in the program. The projects involve field work to explore real life social enterprises advocating solutions in areas such as education, health, violence, poverty, women empowerment, environment and “glocalization”. These projects integrate course work of leadership and enterprise management studies with perspectives from several inter-linked subject areas such as philosophy, psychology, history, sociology, economy, power, culture, religion, ethics, arts, literature and aesthetics. This integration enables students to design sustainable solutions to local challenges that reflect their internal desires to benefit themselves and the community and that can give them confidence to take on the global challenges.

The Bachelor Program requires completion of 144 credit hours of course work in a total of 8 semesters or 4 years. Student’s graduation with CGPA of 2.5 automatically qualifies for MBA program offered by CBM. Students must complete an internship and comprehensive exam as part of their degree requirements.

In addition to a full-time internship during the final year, there are additional fieldwork and internships spread across the semesters to provide the students with field experience.

Distinctive Feature of the Program:

Experiential Learning:
Learning by doing via PBL; Project based Learning and Problem Based Learning: Eight thematic projects on real life problems. Projects are exploratory and descriptive during the earlier part of the program and are prescriptive and implementation oriented during the later semesters. These projects include fieldwork and internships as a mandatory part of the semester work as described below.

Focus on Social Problems:
During each semester, students work on a major experiential learning project dealing with a real life problem. Each thematic project consists of multiple sub-projects corresponding to the six threads linking the courses across the semesters:

Semester-1: Foundational Projects
Semester-2: Projects related to social enterprises in education
Semester-3: Projects related to social enterprises in health
Semester-4: Projects related to social enterprises dealing with poverty issues.
Semester-5: Projects related to social enterprises in environment sector
Semester-6: Projects related to social enterprises dealing with violence & peace
Semester-7: Projects related to social enterprises dealing with globalization issues
Semester-8: Capstone Projects and creation of social enterprise
Course design:
Courses designed around PBL sub-projects with deliverables requiring application, analysis/evaluation and creation levels of Bloom’s taxonomy.

Integrated Curriculum:
Courses in each thread integrate perspectives from multiple subject areas. Every semester has a course from each one of the following threads:

Thread-1: Social Enterprise Design (SED) from philosophical and psychological perspectives.
Thread-2: Social Enterprise Challenges (SEC): Social advocacy challenges from socio-economic, political, governmental and other power structures across civilizations and history
Thread-3: Social Change Management (CMS) from ethical, cultural and religious perspectives
Thread-4: Social Advocacy Communication (SAC) through aesthetics, artistic and literary expression
Thread-5 Social Enterprise Management (SEM) thread covers management, HR, finance, marketing negotiations, and strategies.
Thread-6: Social Leadership thread covers from personal mastery to the development of change and ethical leadership

Portfolio based assessment:
Self Assessment, Peer Assessment, Teacher Assessment and External Assessment of the assignments and projects executed by students.

Pedagogy:
Faculty members are project supervisors, facilitators and mentors rather than lecturers.

Internship/Field Work:
The program consists of extensive field work, visits, surveys, interviews, and internships with social work organizations as an integral and mandatory part of the semester work. During the initial semesters this internship/field work spans 2 days per semester that will increase to 3 days per week. During the last year, the fieldwork/internship may constitute 4 days per week. Social Entrepreneurship Center facilitates the organization and enablement of these internship placements. In addition, the student would also do a full-time internship of 6-8 weeks during the final year.

Capstone Projects:
18 credit hours of projects spread over 7th and 8th semester, requiring establishment of a functioning social enterprise. Each course will represent implementing a particular aspect of the implementation process such as organizational design consultations, niche research, planning, establishing the organization, creating a presence through networking, launching and creating awareness, funding, execution, advocacy, management, control. IoBM’s Entrepreneurship Center facilitates this field work.

Services for Designing Successful Careers of Graduates:
Entrepreneurship Center offers several services to enable the graduates of BS Social Entrepreneurship and Social Leadership to design a successful career in the social sector, public sector and CSR initiatives of the corporate sector and include:

Linkages with Industry Organizations: PBL design of the curriculum ensures that students start connecting with the social sector organizations and social leaders right from the first semester. Connection is through projects requiring field work, observations, interviews, case studies and internships and would help them identify a cause for which they are passionate. Students will be connected to public and social sector organizations working in the areas of education, health, poverty alleviation, peace, environment, globalization etc.

Projects in Collaboration with Social Networks: Student projects are designed in collaboration with the wide network of industry contacts of IoBM and through consultation with the advisory committee members of this program belonging to organizations such as Aman Foundation, OPEN, Acumen Fund, TCF, Indus Hospital, SEF etc.

Social Enterprise Start-up Incubation: Students start working on the design of their social enterprise from third year through carefully designed projects. The incubator at IoBM hosts these organizations during the start up phase and connects them with external funding sources in addition to its own incubator fund.
Career in Public Service, Social Sector and Corporate Sector: In addition to the Internship and Placement department of IoBM, the entrepreneurship centre guides the students in preparing for the CSS exams and for placement in social sector, public sector and CSR initiatives of the corporate sector organizations to enable the graduates to pursue their strategic visions.

Establishing Collaborations of Student Start-ups: Entrepreneurship centre provides guidance and enabling of the startup of the student enterprises through strategic collaborations with existing social organizations.

Required Courses

Social Enterprise Design: Philosophical and Psychological Foundations
SED101 Research Methodology for Social Projects
SED102 Philosophy and Psychology of Education
SED201 Philosophy and Psychology of Human Nature and Wellbeing
SED202 Philosophy of Development and Psychology of Poverty
SED301 Anthropocentricity and Environmental Issues
SED302 Violence, Will and Human Psyche: A Critical Investigation
SED401 Neoliberal Foundations of “Glocalization” and Social Issues

Social Enterprise Challenges: Socio-Economic, Political and Power Structures in History
SEC101 Quantitative Analysis for Social Data
SEC102 Social, Political and Economic Dynamics of Education in History
SEC201 Historical Foundations of Health Care Institutions
SEC202 Socioeconomic, Political Institutions and History of Development
SEC301 Socioeconomic Transformation and Threat to Environment
SEC302 History and Kinds of Violence: Socio-Economic and Power Structures
SEC401 Socioeconomics and Political Impacts of “Glocalization”

Social Advocacy Communication; Aesthetics, Arts and Literature - Studio Based Workshops
SAC101 Visual Storytelling: Photography and Documentary in Advocacy
SAC102 Computer Arts and Graphics Designing for Advocacy
SAC201 Recitations/Readings Related to Health and Well Being
SAC202 Poverty/Development: Advocacy through Performing Arts
SAC301 Literary Writings and Expression as Antidote to Violence
SAC302 Street Art/Art Activism for Environmental Awareness
SAC401 Aesthetics Approach to Urbanization and Ghettos

Social Change Management; Ethical, Cultural & Religious Context
CMS101 History of Social Advocacy: Pakistan and Subcontinent
CMS102 Creativity, Novelty and Beauty via Education
CMS201 Health Issues Across Cultures and Ideologies/Language-1
CMS202 Poverty and Women Empowerment/Language-2
CMS301 Artificial vs Natural/Self Sustainable Design
CMS302 Cultural Roots of Violence: Religion, Ethics and Law
CMS401 Fusion of Global and Local Horizons, Emerging Trends in Fashion and Design

Social Entrepreneurship; Study of Social Enterprises and Management
SEM101 Results Based Project Management
SEM102 Social Enterprises in Education: HRM
SEM201 Study of Social Enterprises in Health Care: Operations and Processes
SEM202 Study of Social Enterprises: Finance and Accounting
SEM301 Study of Social Enterprises: Marketing
SEM302 Conflict Management and Negotiation Skills
SEM401 Strategic Issues of Social Enterprises

The Bachelor of Supply Chain Management is a professional and comprehensive management degree providing conceptual knowledge and in-depth exposure to functional areas in business management including accounting and finance, marketing, management, and MIS along with special emphasis on Supply Chain Management and all modules like Logistics and warehousing and Risk management. In a 4-year Bachelor of BS in Supply Chain Management program, students explore the business aspects of the transportation, distribution and warehousing activities of various corporations. The program employs the latest approaches in experiential learning to develop skills for interpersonal communication, team work, foreign languages and managing diversity.

Throughout Program Criteria:
BS is a four-year program. It requires completion of 144 credit hours of course work and 2 credit hours of internship in a firm approved by the Institute. A student is required to complete 48 courses of 3 credit hours each in order to meet the degree requirements. Six credit hours are structured into the program for a foreign language course. Students must maintain a CGPA of 2.5 for the conferment of the degree.

Students must take a minimum load of twelve credit hours (four courses) or a maximum load of eighteen credit hours (six courses) in a semester. In order to obtain the BS degree in four years, they need to complete twelve courses in a year. Full load of six courses can be taken each in Fall and Spring semesters with an option for fewer courses in the latter and making up for the shortfall in the summer session.

Required Courses:

Accounting
ACC101  Introduction to Financial Accounting
ACC201  Intermediate Financial Accounting

Communication
COM107  Academic English
COM202  Business and Professional Speech

Economics
ECO301  Managerial Economics
ECO402  Pakistan Economic Policy
ECO405  Seminar in Economics Policy

Finance
FIN201  Introduction to Business Finance

Management
MAN101  Principles of Management
MAN302  Organizational Behavior
MAN403  Entrepreneurship & Small Business Management
MAN406  Production and Operations Management

Language
LAN 10*  Foreign Language I
LAN 20** Foreign Language II

OVERVIEW OF MBA PROGRAMS

The MBA program is designed to produce transformational, ethical and change leadership for businesses and industry through an integrated curriculum and experiential learning and prepares graduates for business challenges emerging from globalization, connectivity and technology driven innovations. The program is designed to produce a skilled pool of business leaders possessing multidisciplinary expertise.

A distinguishing feature of the program is the academic ecosystem of experiential learning which immerses the student in a cycle of “learning by doing” through reflection. Case studies and project work are among the pedagogies used for delivery of the curriculum content. A significant value adding feature is the 6 credit hours of a Graduate Capstone Project divided into two 3 credit hour components. Students undertake, individually or in small groups, a real life project with a company that addresses a real life issue which, through the application of multidisciplinary knowledge and skills acquired during MBA studies, helps in more profitable and competitive decision making and implementation in the organization. This project is jointly supervised and evaluated by a faculty member with aligned skills and interest and an industry mentor and is evaluated in an open exhibition by executives and faculty. A Capstone Project report has to be converted into a publishable case study as a part of the degree requirement.

The standard MBA program is a 72 credit-hour program that most students can complete in two years. It is designed for students with a minimum of 16 years of education with degrees in a wide range of disciplines such as business, commerce, engineering, law, science, medicine, the arts and pharmacy.

The program is divided into a foundation stage of 36 credit hours followed by the 36-credit hours of rigorous MBA level courses and a project dealing with strategy and business transformation.

The foundation stage covers areas such as accounting, finance, marketing, economics and management and consists of preparatory course work necessary for the higher level MBA courses. The MBA stage refers to the HEC compliant MS/MBA program requirements.
There are two strands of the standard MBA program; MBA Program with Specializations and Specialized MBA programs.

- MBA Program with specializations allows the students to specialize in majors such as Marketing, Finance, Human Resource Management, Logistics and Supply Chain Management and Development Studies. Credit hour requirements for this program may vary in accordance with the duration of the previous qualification and the amount of relevant foundational background for the MBA stage:

  - MBA Program for applicants with 14 years education is of 108 credit hours. It consists of a foundational stage of a minimum of 2 years and consists of 72 credit hours followed by 36 credit hours of rigorous MBA level courses.

  - MBA Program for applicants with 4-year bachelor degree from IoBM in business related disciplines such as BBA (Honors), BS Joint (Honors), BS (Honors) Accountancy, Management & Law are exempted from the foundational stage, and their MBA program is of 36 credit hours.

  - MBA Program for applicants with 4-years bachelors degree from IoBM in non-business disciplines are exempted from up to 6 equivalent courses of the foundational stage done at IoBM.

- Specialized MBA Programs are all of 72 credit hours and share the structural guidelines of the standard MBA program with coverage of the foundational courses in the areas such as Economics, Quantitative, Communication, Research, Management, Marketing, Finance, Accounting etc and retain the emphasis on strategy core courses at the MBA level. The specialized MBA Programs include:

  - MBA Educational Management
  - MBA Media Management
  - MBA Industrial Management
  - MBA Environment and Energy Management
  - MBA Finance and Risk Management
  - MBA Logistics and Supply Chain Management
  - MBA Health and Hospital Management

- All variants of the CBM MBA programs share a unified structure consisting of a foundation stage followed by the MBA stage. The Foundation Stage of the MBA program fulfills the minimum eligibility requirements of HEC to switch from a non-business major at the bachelor stage to a master program in business. Foundation stage consists of eleven course; one each from the following areas: Communications, Economics, Quantitative Analysis, Behavior/Psychology, Accounting, Finance, Law/Ethics, Management, HRM, Marketing, Research. The MBA stage of the course consists of courses in Technology/Operations, Entrepreneurship, Marketing Strategy, Organizational Processes, Analytics for decision making, Strategic Finance, Strategic Management, and Leadership. In addition there are two real life capstone projects to be completed during the final year.
The program is designed to produce transformational, ethical and change leadership for businesses and industry through an integrated curriculum and experiential learning and prepares graduates for business challenges emerging from globalization, connectivity and technology driven innovations. The program is designed to produce a skilled pool of business leaders possessing multidisciplinary expertise in the core corporate functions of Finance, Marketing, HRM and Management.

This Program consists of 36-credit hours of rigorous MBA level courses dealing with strategy and business transformation and includes a Capstone Project. Students who have obtained their BBA and BS Joint (Honors) degree from CBM, are exempted from the 36 credit hours of the foundation stage of the standardized 72 credit hour MBA Program. An MBA student is required to take 10 courses, a Capstone Project of 6 credit hours and clear a comprehensive examination in order to complete the degree requirements. Students must maintain a 3.0 CGPA for conferment of the degree. Minimum duration of this program is 2 years.

A distinguishing feature of the program is the academic ecosystem of experiential learning which immerses the student in a cycle of “learning by doing” through reflection. Case studies and project work are among the pedagogies used for delivery of the curriculum content. A significant value adding feature of the CBM MBA is the 6 credit hours of a Graduate Capstone Project divided into two 3 credit hour components. Students undertake, individually or in small groups, a real life project with a company that addresses a real life issue which, through the application of multidisciplinary knowledge and skills acquired during the MBA studies, helps in more profitable and competitive decision making and implementation in the organization. This project is jointly supervised and evaluated by a faculty member with aligned skills and interest and an industry mentor and is evaluated in an open exhibition by executives and faculty. The Capstone Project report has to be converted into a publishable case study as a part of the degree requirement.

Students are eligible to take two electives from BBA Program provided they have not taken those electives in BBA.

MBA students can specialize in the following areas:

- Marketing
- Finance
- Human Resource Management
- Logistics and Supply Chain Management
- Development Studies
- Islamic Banking and Finance

**Required Course**

**Finance**

FIN601* Strategic Financial Analysis and Design

**Human Resource Management**

Management
MAN604* Management Strategies and Emerging Organizations
MAN606* Business Analytics for Decision Making
MAN608* Technology, Operations and Innovation

Marketing
MKT610* Marketing Strategies and Value Innovation

Capstone Project
BPR601* Capstone Project I
BPR602* Capstone Project II

Business Elective Courses

Students may choose 4 elective courses from the following specializations. They can also select from BBA (Hons) electives (maximum two courses) of 500 level or above:

**Majors in Accounting**
ACC302 Accounting and Financial Information Systems
ACC505 Auditing
ACC506 Analysis of Financial Statements
ACC520 Managerial Analysis and Decision Making
ACC521 International Finance Reporting Standards
ACC522 Strategic Management Accounting
ACC523 Financial Regulatory Requirements for Business
ACC524 Corporate Governance and Reporting

**Majors in Finance and Banking**
FIN602 Behavioral Finance
FIN603 Entrepreneurial Finance
FIN608 Project Appraisal
FIN610 Debt and Equity Markets
FIN612 SME and Micro-Financing
FIN613 Financial Modeling for Investment Decisions
FIN630 Options, Swaps and Futures
FIN631 Applied Corporate Finance
FIN632 Fixed Income Securities
FIN633 Mergers, Acquisitions and Restructuring
FIN634 Enterprise Risk Management
FIN635 Risk Management with Derivatives

**Majors in Human Resource Management**
HRM607 Recruitment and Selection
HRM608 Industrial Relations and Labor Laws
HRM609 Employee Training and Development
HRM610 Negotiation Skills
HRM611 Organizational Change and Development
HRM612 Strategic Human Resource Management
HRM615 Leadership Studies
HRM614 Salary and Compensation
HRM616 Performance Appraisal and Management
HRM617 HR Analytics

**Majors in Management Information Systems**
MIS509 Software Project Management
MIS523 Decision Systems
MIS524 Decision Support Systems
MIS525 Enterprise Systems
MIS526 Enterprise Resource Planning Systems
MIS527 Information Security
MIS528 Advanced Information Security
MIS530 Information Systems Research
MIS532 New Perspectives on Organization Information Systems
MIS533 Big Data and Business Analytics

**Majors in Management Information Systems**
MIS509 Software Project Management
MIS523 Decision Systems
MIS524 Decision Support Systems
MIS525 Enterprise Systems
MIS526 Enterprise Resource Planning Systems
MIS527 Information Security
MIS528 Advanced Information Security
MIS530 Information Systems Research
MIS532 New Perspectives on Organization Information Systems
MIS533 Big Data and Business Analytics

**Majors in Development Studies**
SSC601 Dimensions of Development
SSC602 Development Sociology
PDE703 Development Economics
STA601 Development Statistics and Research Methodology
MAN607 Project and Planning Management

**Majors in Management**
MAN610 Environmental Issues and Management
MAN611 Project Management
MAN613 Corporate Governance
MAN614 Comparative Management
MAN615 Corporate Social Responsibility

**Majors in Islamic Banking and Finance**
ISF601 Economics for Islamic Finance
ISF602 Islamic Banking Practices
ISF603 Accounting for Islamic Finance
ISF604 Islamic Financial Services Marketing
ISF605 Islamic Capital Markets
ISF606 International Islamic Finance Standards
FRM514 Takaful and Risk Management in Islamic Products

---

Students doing majors in Finance & Banking can also opt for Islamic Banking & Finance electives.
Majors in Marketing
MKT501 Strategic Marketing and Planning
MKT602 Marketing Analytics
MKT605 Pricing Models and Strategies
MKT611 Integrated Marketing Communications
MKT613 Marketing of Financial Services
MKT615 Brand Management
MKT618 Advertising Management and Strategy
MKT620 Competitive Strategies
MKT621 Marketing Strategies for Emerging Economies
MKT622 Marketing Strategies for Bottom of the Pyramid (BOP)
MKT623 Pharmaceutical Marketing & Quality Assurance / MHM508/608
MKT625 Business to Business Marketing
MKT626 Marketing for Social Impact

Majors in Logistics and Supply Chain Management
SCM601 Quantitative Methods in Production and Logistics
SCM602 Business Process Mgmt. in Supply Chain & Logistics
SCM603 IT Applications in Logistics
SCM604 Packaging Design and Environmental Aspects
SCM605 Supply Chain Management
SCM606 ERP Systems Design and Implementation
SCM607 Strategic Supply Chain Management
SCM608 Procurement and Inventory Management
SCM609 Storage and Warehouse Techniques
SCM610 Transportation Techniques and Management
SCM611 Sustainability & Env. Aspects in Managing Supply Chains
SCM612 Risk Management in Supply Networks
SCM613 Innovation Management in Supply Chain and Logistics
SCM614 Corporate Consultancy Project in Logistics
SCM615 Contract Management for Supply Chain & Negotiations
SCM616 Life Cycle Enterprise Asset Management
SCM617 Mobile Commerce and Mobile Logistics

The SCM specialization is based on internationally recognized curricula and is being run in collaboration with German experts. The added feature of the program is training on SAP® ERP system. There are tremendous job opportunities in the field of supply chain and logistics. MBA graduates can select four elective courses offered in the area of Supply Chain & Logistics Management.

MBA (REGULAR) PROGRAM FOR STUDENTS WITH 16 YEARS EDUCATION

The program is designed to produce transformational, ethical and change leadership for businesses and industry through an integrated curriculum and experiential learning and prepares graduates for business challenges emerging from globalization, connectivity and technology driven innovations. The program is designed to produce a skilled pool of business leaders possessing multidisciplinary expertise in the core corporate functions of Finance, Marketing, HRM and Management.

The program is a 72 credit hours program that most students can complete in two years. It is designed for students with a minimum of 16 years of education and degrees in a wide range of disciplines such as business, commerce, engineering, law, science, medicine, arts and pharmacy. The 72 credit hours MBA program is divided into a foundation stage of 36 credit hours followed by the 36-credit hours of rigorous MBA level courses and project dealing with strategy and business transformation. The foundation stage covers areas such as accounting, finance, marketing, economics and management and consists of preparatory course work necessary for the higher level MBA courses. The students are also expected to complete 2 credit hours of internship of at least six weeks in an approved firm and the comprehensive examination. Students must maintain a 3.0 CGPA for MBA level courses and project for the conferment of the degree. The program may be completed in a minimum of two years depending upon the relevant preparation. Students who are weak in English and communication skills are required to take an additional Business English course to enhance their proficiency in the language. Students need to clear a comprehensive examination in order to complete the degree requirements.

A distinguishing feature of the program is the academic ecosystem of experiential learning which immerses the student in a cycle of “learning by doing” through reflection. Case studies and project work are among the pedagogies used for delivery of the curriculum content. A significant value adding feature of the CBM MBA is the 6 credit hours Graduate Capstone Project divided into two 3 credit hour components. Students undertake, individually or in small groups, a real life project with a company that addresses a real life issue which, through the application of multidisciplinary knowledge and skills acquired during the MBA studies, helps in more profitable and competitive decision making and implementation in the organization. This project is jointly supervised and evaluated by a faculty member with aligned skills and interest and an industry mentor and is evaluated in an open exhibition by executives and faculty. The Capstone Project report has to be converted into a publishable case study as a part of the degree requirement.

MBA students can specialize in the following areas by taking four electives:
- Marketing
- Management
- Finance
- Human Resource Management
- Logistics and Supply Chain Management
- Development Studies
- Islamic Banking and Finance

Applicants with 4-year bachelor’s degree from IoBM in non-business disciplines can claim up to 6 course exemptions from the foundational stage for the equivalent courses completed in the bachelor program.

I have done my Bachelors in Economics and Finance and my MBA- Finance from IoBM, both on a 100% merit Scholarship. Spending more than 5 years of my life at this institution has been an ecstatic experience. I have interacted with people from different background, religion and culture and have grown immensely as a person. While the bachelors program has allowed me to get a command on the foundations of business, the MBA program has taught me its practical implementation.

SCM614 Corporate Consultancy Project in Logistics
SCM615 Contract Management for Supply Chain & Negotiations
SCM616 Life Cycle Enterprise Asset Management
SCM617 Mobile Commerce and Mobile Logistics

Students doing majors in Finance & Banking can also opt for Islamic Banking & Finance electives.
MBA (REGULAR) WEEKEND PROGRAM FOR STUDENTS WITH 16 YEARS EDUCATION

The program is designed to produce transformational, ethical and change leadership for businesses and industry through an integrated curriculum and experiential learning and prepares graduates for business challenges emerging from globalization, connectivity and technology driven innovations. The program is designed to produce a skilled pool of business leaders possessing multidisciplinary expertise in the core corporate functions of Finance, Marketing, HRM and Management.

The program is a 72 credit-hour program that most students can complete in two years. It is designed for students with a minimum of 16 years of education and degrees in a wide range of disciplines such as business, commerce, engineering, law, science, medicine, arts and pharmacy. The program is divided into a foundation stage of 36 credit hours followed by the 36-credit hours of rigorous MBA level courses and a project dealing with strategy and business transformation. The foundation stage covers areas such as accounting, finance, marketing, economics and management and consists of preparatory course work necessary for the higher level MBA courses. Students must maintain a 3.0 CGPA for MBA level courses and project for the conferment of the degree. The program may be completed in a minimum of two years depending upon the relevant preparation. Students who are weak in English and communication skills are required to take an additional Business English course to enhance their knowledge of the language. Students need to clear a comprehensive examination in order to complete degree requirements.

A distinguishing feature of the program is the academic ecosystem of experiential learning which immerses the student in a cycle of “learning by doing” through reflection. Case studies and project work are among the pedagogies used for delivery of the curriculum content. A significant value adding feature of the program is the 6 credit hours of a Graduate Capstone Project divided into two 3 credit hour components. Students undertake, individually or in small groups, a real life project with a company that addresses a real life issue which, through the application of multidisciplinary knowledge and skills acquired during the MBA studies, helps in more profitable and competitive decision making and implementation in the organization. This project is jointly supervised and evaluated by a faculty member with aligned skills and interest and an industry mentor and is evaluated in an open exhibition by executives and faculty. Capstone Project report has to be converted into a publishable case study as a part of the degree requirement.

MBA students can specialize in the following areas by taking four electives:

- Marketing
- Management
- Finance
- Human Resource Management
- Logistics and Supply Chain Management
- Development Studies
- Islamic Banking and Finance

Applicants with 4-year bachelor’s degree from IoBM in non-business disciplines can claim up to 6 course exemptions from the foundational stage for the equivalent courses completed in the bachelor program.
Required Courses

MBA (REGULAR) WEEKEND PROGRAM FOR STUDENTS WITH 14 YEARS EDUCATION

The program is designed to produce transformational, ethical and change leadership for businesses and industry through an integrated curriculum and experiential learning and prepares graduates for business challenges emerging from globalization, connectivity and technology driven innovations. The program develops a skilled pool of business leaders possessing multidisciplinary expertise in the core corporate functions of Finance, Marketing, HRM and Management.

This program is designed for students with 14 years of education and degrees in a wide range of disciplines such as business, commerce, law, science, and the arts. The 108 credit hours MBA program is divided into a foundation stage of 72 credit hours followed by the 36 credit-hour of rigorous MBA level courses and a capstone project dealing with strategy and business transformation. The foundation stage covers areas such as accounting, finance, marketing, economics and management and consists of preparatory course work necessary for the higher level MBA courses.

Students must maintain a 3.0 CGPA for MBA level courses for the conferment of degree. The program may be completed in a minimum of 3.5 years depending on the relevant preparation. Students who are weak in English and communication skills are required to take an additional Business English course to enhance their knowledge of the language. Students need to clear a comprehensive examination in order to complete degree requirements.

A distinguishing feature of the program is the academic ecosystem of experiential learning which immerses the student in a cycle of “learning by doing” through reflection. Case studies and project work are among the pedagogies used for delivery of the curriculum content. A significant value adding feature of the program is the 6 credit hours Graduate Capstone Project divided into two 3 credit hour components. MAN615 Corporate Social Responsibility

Students doing majors in Finance & Banking can also opt for Islamic Banking & Finance electives.
I believe that choosing Media Studies at IoBM was indeed one of the best choices that I made. Reason being, the experience and learning environment it provides is truly impeccable. Things I learnt here are definitely helping me in my career as a Freelancer. One of the major things that I cherish about this department was the opportunities that came my way. Even if they weren’t that big, it still helped me get what I actually wanted rather than settling for something that was not meant for me.

Gold Medalist
Convocation 2016
MBA (REGULAR) EVENING PROGRAM FOR STUDENTS WITH 14 YEARS EDUCATION

The program is designed to produce transformational, ethical and change leadership for businesses and industry through an integrated curriculum and experiential learning and prepares graduates for business challenges emerging from globalization, connectivity and technology driven innovations. The program develops a skilled pool of business leaders possessing multidisciplinary expertise in the core corporate functions of Finance, Marketing, HRM and Management.

This program is designed for students with 14 years of education and degrees in a wide range of disciplines such as business, commerce, law, science, and arts. The 108 credit hours MBA program is divided into a foundation stage of 72 credit-hour followed by the 36-credit hours of rigorous MBA level courses and a capstone project dealing with strategy and business transformation. The foundation stage covers areas such as accounting, finance, marketing, economics and management and consists of preparatory course work necessary for the higher level MBA courses. Students completing 72 credit hours of the foundation stage are eligible for the grant of Bachelor of Business Studies (BBS) degree.

Students must maintain a 3.0 CGPA for MBA level courses for the conferment of the degree. The program may be completed in a minimum of 3.5 years depending on the relevant preparation. Students who are weak in English and communication skills are required to take an additional Business English course to enhance their knowledge of the language. Students need to clear a comprehensive examination in order to complete degree requirements.

A distinguishing feature of the program is the academic ecosystem of experiential learning which immerses the student in a cycle of “learning by doing” through reflection. Case studies and project work are among the pedagogies used for delivery of the curriculum content.

A significant value adding feature of the program is the 6 credit hours of a Graduate Capstone Project divided into two 3 credit hour components. Students undertake, individually or in small groups, a real life project with a company that addresses a real life issue which, through the application of multidisciplinary knowledge and skills acquired during the MBA studies helps in more profitable and competitive decision making and implementation in the organization. This project is jointly supervised and evaluated by a faculty member with aligned skills and interest and an industry mentor and is evaluated in an open exhibition by executives and faculty. The Capstone Project report has to be converted into a publishable case study as a part of the degree requirement.

MBA students can specialize in the following areas by taking four electives:

- Marketing
- Management
- Finance
- Human Resource Management
- Logistics and Supply Chain Management
- Development Studies
- Islamic Banking and Finance

Required Courses

Accounting
ACC401 Introduction to Managerial and Cost Accounting
ACC419 Financial Accounting
## Communication
- COM107* Academic English
- COM409 Business and Professional Speech
- COM408 Persuasive & Analytical Writing for Business Comm.
  *Less Proficient Students

## Finance
- FIN408 Theory and Practice of Financial Management
- FIN601* Strategic Financial Analysis and Design

## Economics
- ECO405 Seminar in Economic Policy
- ECO409 Business Economics

## Management
- MAN308 Social Advocacy and Community Service
- MAN401 Principles of Management
- MAN402 Organizational Behavior
- MAN403 Entrepreneurship and Small Business Management
- MAN415 Entrepreneurial Leadership and Motivation
- MAN606* Business Analytics for Decision Making
- MAN608* Technology, Operations and Innovation
- MAN612* Strategic Management

*Indicates MBA level courses

## Specialized Courses
MBA students have a choice of four electives from the following disciplines. They can also select from BBA (Hons) electives at most two courses of 500 level or above.

### Majors in Accounting
- ACC302 Accounting and Financial Information Systems
- ACC505 Auditing
- ACC506 Analysis of Financial Statements
- ACC520 Managerial Analysis and Decision Making
- ACC521 International Finance Reporting Standards
- ACC522 Strategic Management Accounting
- ACC523 Financial Regulatory Requirements for Business
- ACC524 Corporate Governance and Reporting

### Majors in Finance and Banking
- FIN602 Behavioral Finance
- FIN603 Entrepreneurial Finance
- FIN608 Project Appraisal
- FIN610 Debt and Equity Markets
- FIN612 SME and Micro-Financing
- FIN613 Financial Modeling for Investment Decisions
- FIN630 Options, Swaps and Futures
- FIN631 Applied Corporate Finance
- FIN632 Fixed Income Securities
- FIN633 Mergers, Acquisitions and Restructuring
- FIN634 Enterprise Risk Management
- FIN635 Risk Management with Derivatives

### Majors in Islamic Banking and Finance
- ISF601 Economics for Islamic Finance
- ISF602 Islamic Banking Practices
- ISF603 Accounting for Islamic Finance
- ISF604 Islamic Financial Services Marketing
- ISF605 Islamic Capital Markets
- ISF606 International Islamic Finance Standards
- FRM514 Takaful and Risk Management in Islamic Products

### Marketing Electives for MBA
- MKT501 Strategic Marketing and Planning
- MKT602 Marketing Analytics
- MKT605 Pricing Models and Strategies
- MKT611 Integrated Marketing Communications
- MKT613 Marketing of Financial Services
- MKT615 Brand Management
- MKT618 Advertising Management and Strategy
- MKT620 Competitive Strategies
- MKT621 Marketing Strategies for Emerging Economies
- MKT622 Marketing Strategies for Bottom of the Pyramid (BOP)
- MKT623 Pharmaceutical Marketing & Quality Assurance / MHM508/608
- MKT625 Business to Business Marketing
- MKT626 Marketing for Social Impact

### Law
- LAW409 Corporate and Business Law

### Human Resource Management
- HRM606* Leadership, Ethics and Change
- HRM410 Managing Human Capital

### Marketing
- MKT402 Marketing Management
- MKT403 Sales Management
- MKT404 Methods in Business Research
- MKT509 Consumer Behavior
- MKT610* Marketing Strategies and Value Innovation

### Management Information Systems
- MISS26 Introduction to Enterprise Resource Planning Systems

### Statistics and Mathematics
- STA403 Statistics and Mathematics
- STA404 Statistical Inference

### Social Sciences
- SSC401 Business Ethics
- SSC402 Organizational Psychology
- SSC408 Political Sociology

### Capstone Project
- BPR601* Capstone Project I
- BPR602* Capstone Project II
### Majors in Human Resource Management
- HRM607 Recruitment and Selection
- HRM608 Industrial Relations and Labor Laws
- HRM609 Employee Training and Development
- HRM610 Negotiation Skills
- HRM611 Organizational Change and Development
- HRM612 Strategic Human Resource Management
- HRM615 Leadership Studies
- HRM614 Salary and Compensation
- HRM616 Performance Appraisal and Management
- HRM617 HR Analytics

### Majors in Development Studies
- SSC601 Dimensions of Development
- SSC602 Development Sociology
- PDE703 Development Economics
- STA601 Development Statistics and Research Methodology
- MAN607 Project and Planning Management

### Majors in Logistics and Supply Chain Management
- SCM601 Quantitative Methods in Production and Logistics
- SCM602 Business Process Mgmt. in Supply Chain & Logistics
- SCM603 IT Applications in Logistics
- SCM604 Packaging Design and Environmental Aspects
- SCM605 Supply Chain Management
- SCM606 ERP Systems Design and Implementation
- SCM607 Strategic Supply Chain Management
- SCM608 Procurement and Inventory Management
- SCM609 Storage and Warehouse Techniques
- SCM610 Transportation Techniques and Management
- SCM611 Sustainability & Env. Aspects in Managing Supply Chains
- SCM612 Risk Management in Supply Networks
- SCM613 Innovation Management in Supply Chain and Logistics
- SCM614 Corporate Consultancy Project in Logistics
- SCM615 Contract Management for Supply Chain & Negotiations
- SCM616 Life Cycle Enterprise Asset Management
- SCM617 Mobile Commerce and Mobile Logistics

### Majors in Management
- MAN610 Environmental Issues and Management
- MAN611 Project Management
- MAN613 Corporate Governance
- MAN614 Comparative Management
- MAN615 Corporate Social Responsibility

**Students doing majors in Finance & Banking can also opt for Islamic Banking & Finance electives.**

The mission of the MBA Health and Hospital management program is to promote an environment of continual learning and development of the health and managerial expertise of its students and faculty keeping in mind the needs, demands and behavior of the target population and stakeholders in the healthcare industry. We are committed to building a competent brand of health managers who excel in creative and critical thinking, decision making, team building and technical mixed with strong communication and entrepreneurial skills to generate research driven results. Our program institutes the best teaching methodologies which cater to the capacity-building of future healthcare leaders, sensitive to the needs of society and able to disseminate applied knowledge and promote the ethical practice of the health care business in turn serving the community and the nation.

This program has a multidisciplinary approach in preparing graduates for the provision of necessary expertise to manage health services effectively and develop technically competent and socially sensitive managers for leadership roles in global health systems hospitals, the NGO sector, pharmaceutical industries and population programs.

This MBA program is a 75 credit hour program which is divided into a foundation stage of 36 credit hours followed by 39 credit-hour of rigorous MBA level courses and a project dealing with strategy. The program covers areas such as accounting, finance, marketing, economics, law, management, quantitative, and health services management. The two-year MBA Health and Hospital Management program is offered on weekends. Students are required to complete 25 courses (23 courses of 3 credit hours and one supervised Capstone project of 6 credit hours, divided into two parts) in order to fulfill the degree requirements. Students must maintain a 3.0 CGPA for the conferment of the degree.

Applicants with 4-year bachelor’s degree from IoBM in non-business disciplines can claim up to 6 courses exemption from the foundational stage for the equivalent courses completed in the bachelor program.

Financial Managers are expected to have knowledge of principles and practices of Financial Risk Management. The MBA in Finance and Risk Management program is consequently designed to cover all dimensions of Risk Management and Finance including recent development in Corporate Risk Management, Sustainable Risk and Risk Financing techniques. Students will learn how to choose alternative techniques to reduce exposure and risks and implement a risk-assessment tool to evaluate future risks. They will also learn implementation and monitoring of selected techniques. The Master’s program requires completion of 72 credit-hour of course work comprising 24 courses. Students require maintaining 3.0 CGPA on a scale of 4 for the conferment of degree.

Applicants with a 4-year bachelor’s degree from IoBM in non-business disciplines can claim up to 6 courses exemption from the foundational stage for the equivalent courses completed in the bachelor program.

*“The two years I spent at IoBM will always be remembered. Taking weekend classes with full load along with a job being a hosteler was not easy. The main motivational factor I found was the practically and diversely experienced faculty. They offered so much to learn in all fields of management that later on proved to be very implementable. I made some great friends for life at IoBM, received merit scholarships and at the end stepped out with a Gold Medal. IoBM was a blessing indeed.”*

M. Kashif Amin  
Gold Medalist  
Convocation 2016
IoBM offers the first of its kind of MBA in Environment and Energy Management that aims to prepare future decision-makers in companies, government and non-governmental organizations for analyzing and acting in an environmentally proactive way when making decisions about policy, production and resource utilization. This is a weekend program which requires completion of 72 credit hours of course work, including 24 courses of 3 credit hours each spread over six consecutive semesters (two-years). Students must maintain a CGPA of 3.0 for the conferment of the degree. The course structure is subject to change in compliance with HEC requirements. The course is particularly designed for managers and administrators engaged in the environment and energy sector.

This MBA program is a 72 credit hour program which is divided into foundation stage of 36 credit hours, followed by 36-credit hours of rigorous MBA level courses and project dealing with strategy. The program covers areas such as accounting, finance, marketing, economics, law, management, environment and energy management and consists of foundational course work necessary for the higher level MBA courses.

Applicants with a 4-year bachelor’s degree from IoBM in non-business disciplines can claim up to 6 courses exemption from the foundational stage for the equivalent courses completed in the bachelor program.

Entry Requirements

Applicants are required to have a four year Bachelor’s degree in Agriculture, Architecture, Biology, Business Administration, Chemistry, Engineering, Commerce, Medical, Forestry, Geology, Geography, Microbiology, Public health, and Environment Science from HEC recognized institutions.

The Master of Business Administration in Industrial Management degree program is designed to address and solve real life problems relating to industrial set-ups. Collaboration with relevant industries and financial institutes is its modus operandi. This course is one of the very few aimed at mid-career professionals who wish to make the move to senior management within industrial and manufacturing organizations. It is designed to provide the business expertise essential for all senior managers by integrating specific engineering subjects with the management of technology and manufacturing systems. The program also examines the latest business thinking and provides expert knowledge on engineering and technology issues and theories. Topics such as finance, marketing, management strategy are integrated with modern industrial issues such as project and quality management, manufacturing effectiveness, advanced manufacturing technology and supply chain management.

This combination of subjects has been specifically designed to reflect the challenges faced by traditional manufacturing organizations. This MBA program is a 72 credit-hour program which is divided into foundation stage of 36 credit hours, followed by 36-credit hours of rigorous MBA level courses and project dealing with strategy. The foundation and MBA level stage covers areas such as accounting, finance, marketing, economics, law, supply chain, engineering. It consists of foundational course work necessary for the higher level MBA courses.

Applicants with a 4-year bachelor’s degree from IoBM in non-business disciplines can claim up to 6 courses exemption from the foundational stage for the equivalent courses completed in the bachelor program.

MS program in Business Management is a research route for a PhD in Business Management and is designed for students with a 4-year BBA qualification or those meeting the HEC criteria for MS in management science i.e. 16 years of education with degree in relevant business field with 1st division/CGPA 3.0.

Program Structure

MS in Business Management is a 36 credit-hour program with 10 courses and one thesis of 6 credit hours. Each of the 10 courses is of 3 credit hours.

After successful completion of course work, students are required to carry out research study for the thesis under the guidance of a research supervisor assigned by IoBM. In lieu of a thesis, students can also opt for two additional courses for the completion of the degree.

Course Structure

MPM601 Advanced Qualitative Research
MPM603 Advanced Quantitative Research
MPM605 Survey of Current Research Literature in Management
MPM607 Corporate Governance and Strategy
MPM609 Seminar in Human Resource Management
MPM611 Advanced Corporate Finance
MPM614 Advanced Marketing Strategy
MPM616 Econometrics

Elective

Elective I
Elective II
(Electives may be selected from the specialization areas of Business Management of 700 Series) on Page 79.

Thesis (06 credit hours)

It is mandatory for research students of MS and PhD programs to attend at least five sessions of the Multi-disciplinary Research Seminar Series in each semester.
The MPhil program in Business Management is designed to meet the challenges of the business world and the growing demand for well-qualified and research-oriented scholars in Pakistan. This program has been carefully designed in response to traditional and emerging trends to meet the growing market demand for various specialist areas in business management.

Eligibility

Students with a 4-year BBA qualification or those meeting the HEC criteria for MS/MPhil in management science i.e. 16 years of education with degree in relevant business field with 1st division/CGPA 3.0.

Program Structure

The MPhil is a 30 credit hours program with 8 courses and one thesis of 6 credit hours.

After successful completion of the course work, students are required to carry out research study for the thesis under the guidance of a research supervisor assigned by the Institute. The students must convert the research thesis into a publishable paper as part of a degree requirement.

Course Structure

MPM601 Advanced Qualitative Research
MPM603 Advanced Quantitative Research
MPM605 Survey of Current Research Literature in Management
MPM607 Corporate Governance and Strategy
MPM609 Seminar in Human Resource Management
MPM611 Advanced Corporate Finance
MPM614 Advanced Marketing Strategy
MPM616 Econometrics

For health professionals, electives may be selected from the specialization areas of Business Management of MPM700 Series (on Page No. 86) in lieu of any four of the above mentioned courses.

Thesis (06 Credit hours)

*It is mandatory for research students of MS/MPhil and PhD programs to attend at least five sessions of the Multi-disciplinary Research Seminar Series in each semester.*
PhD IN BUSINESS MANAGEMENT

The mission of the PhD research program in business management is to pursue leading-edge research, engage in the development of innovative ideas and analytical skills, and encourage both faculty and students to be independent and creative in their thinking. The outcome of this research program is the creation of a real and measurable impact on society and industry through quality research published in impact factor journals and recognized by industry.

Eligibility

MS or equivalent graduates from HEC recognized institutions meeting the following criteria:

- A minimum CGPA of 3.00 on a scale of 4.00 (or overall 60% marks) or equivalent
- A minimum of 18 years of schooling that corresponds to MS / MPhil or equivalent degree from HEC recognized institutions in a relevant discipline. Students with HEC recognized MBA have to do at least four pre-requisite courses (HEC equivalency required)
- GRE Subject or GAT test conducted by the NTS. A minimum of 60% (percentage) marks is required
- An interview conducted by the Institute
- All other HEC stipulated requirements

Program Requirements

PhD requires completion of course work and dissertation/thesis. Minimum duration is three years and maximum is five years:

- PhD course work requirements consist of six graduate level courses (18 credit hours)
- On completion of dissertation/thesis the student is awarded 30 credits

A PhD student must additionally complete the following requirements:

- Comprehensive Exam
- PhD Proposal/Synopsis Development
- PhD Proposal/Synopsis Defense
- BASR Approval of PhD Proposal/Synopsis
- Continuous enrollment in supervised research courses for meeting the full-time residency requirements
- Completion of PhD Dissertation/Thesis
- Selection of External Evaluators by BASR
- Publication of at least one paper in an ISI indexed or an HEC recognized journal or an official acceptance of the paper
- Evaluation of PhD Dissertation by two foreign faculty members from developed countries as per HEC criteria
- Dissertation/Thesis Finalization
- Open defense of PhD dissertation
- Any other HEC requirement
- Final Dissertation/Thesis submission to BASR
Course Structure

Pre-requisites:
MPM601 Advanced Qualitative Research
MPM603 Advanced Quantitative Research
MPM610 Independent Study
MPM616 Econometrics

Semester One
Directed Research Elective I
Directed Research Elective II
Exploratory Research Elective I

Semester Two
Directed Research Elective III
Directed Research Elective IV
Exploratory Research Elective II

Semesters Three to Nine
PBM901 Research Thesis

Graduate Courses:

Directed Research Electives in Area of Specialization
The objective of the directed research electives is to enable the PhD students to link their chosen areas of specialization with the philosophy and methodology of business research and to benchmark their proposed research with quality publications.

PBM701 Philosophy of Business Management
PBM703 Multivariate Analysis
PBM705 Readings in Business Research
PBM707 Replication of Business Research Design and Results
PBM708 Directed Study of a Business Research Problem

Exploratory Research Electives in the Area of Specialization
PhD students may select the following and/or other PhD level courses from CESD and CSIS on the advice of their supervisors.

PBM801 Marketing Models
PBM803 Marketing Theory
PBM805 Advanced Topics in Marketing
PBM811 Advanced Topics in Strategic Management
PBM813 Advanced Topics in Organization Theory
PBM815 Advanced Topics in Human Behavior in Organization
PBM821 Advanced Topics in Operations Management Research
PBM823 Advanced Research Topics in Operations Management
PBM825 Advanced Research Topics in Management Information Systems
PBM831 Advanced Topics in Finance
PBM841 Advanced Readings in Business Ethics
PBM842 Globalization Discourses of Ethics

It is mandatory for research students of MPhil and PhD programs to attend at least five sessions of the Multi-disciplinary Research Seminar Series in each semester.
PhD IN ENVIRONMENT AND ENERGY MANAGEMENT

The doctoral program in Environment and Energy Management is rigorous, interdisciplinary and multidisciplinary. Students will be required to acquire substantial knowledge in primary environment and energy related disciplines with a focus on management and conservation, and sustainable development of resources. They will be expected to develop breadth in specialized fields related to environment and energy; become proficient in advanced research methods and develop expertise in a chosen dissertation topic. Students will be required to write dissertations that evidence original research and proficiency in interpretation, analysis, and explanation of environment and energy related issues and phenomena. The overall objectives of the program are:

To improve understanding of environment and energy related issues and identify solutions to these problems
To foster collaborative, interdisciplinary and multidisciplinary research amongst researchers from various disciplines

Eligibility

MS or equivalent graduates from HEC recognized institutions meeting the following criteria:
• A minimum CGPA of 3.00 on a scale of 4.00 (or overall 60% marks) or equivalent
• A minimum of 18 years of schooling that corresponds to MS / M.Phil or equivalent degree from HEC recognized institutions in a relevant discipline
• GRE subject specific or GAT subject test conducted by the NTS, or equivalent in the relevant discipline. A minimum of 60% (percentage) marks is required
• An interview conducted by the Institute
• All other HEC stipulated requirements
• Complete deficiency courses

Program Requirements

PhD requires completion of course work and dissertation/thesis. Minimum duration is 3 years and maximum is 5 years:
• PhD course work requirements consist of six graduate level courses (18 credit hours)
• On completion of dissertation/thesis the student is awarded 30 credits

A PhD student must additionally complete the following requirements:
• Comprehensive Exam
• PhD Proposal/Synopsis Development
• PhD Proposal/Synopsis Defense
• BASR Approval of PhD Proposal/Synopsis
• Continuous enrollment in supervised research courses for meeting the full-time residency requirements
• Completion of PhD Dissertation/Thesis
• Selection of External Evaluators by BASR
• Publication of at least one paper in an ISI indexed or an HEC recognized journal or an official acceptance of the paper
• Evaluation of PhD Dissertation by two foreign faculty members from developed countries as per HEC criteria
• Dissertation/Thesis Finalization
• Open defense of PhD dissertation
• Any other HEC requirement
• Final Dissertation/Thesis Submission to BASR
Course Structure

Semester One
EEM701  Methods and Issues in Advanced Qualitative Research
EEM702  Methods and Issues in Advanced Quantitative Research

Semester Two
EEM703  Current Advancement and Trends in Environment and Energy Management
EEM704  Independent Study in Environment and Renewable Energy Management

Semester Three
Elective Courses (any two)
EEM801  Advanced Environment Toxicology & Epidemiology
EEM802  Advanced Pollution Control Technologies and Mitigation Options
EEM803  Advances in Green Technology Mechanism
EEM804  Disaster Risk Management and Mitigation Strategies
EEM805  Trade and Environment
EEM806  Sustainability and Conservation of Major Ecosystems

Semester Four to Nine
EEM901  Research Thesis

*It is mandatory for research students of MPhil and PhD programs to attend at least five sessions of the Multi-disciplinary Research Seminar Series in each semester.*

COLLEGE OF COMPUTER
SCIENCE AND INFORMATION SYSTEMS
BS COMPUTER SCIENCE

The program emphasizes the need for overall development including exposure to an integrated series of courses in technology, methodology, social sciences, liberal arts and management. Project-based software development along with research assignments are also emphasized. These courses seek to impart a broad and deep knowledge of theory, design and application of digital computers and information processing techniques. The curriculum has been designed to prepare students to serve the productive needs of Pakistan’s software industry. It requires completion of 135 credit hours of course work. Students are required to take 45 courses, a live project and comprehensive research assignment in order to complete their degree requirements. Students must maintain a CGPA of 2.5 for the conferment of degree.

Foundation Courses

BS ACTUARIAL SCIENCE AND RISK MANAGEMENT

A BS in the Actuarial Science and Risk Management program is intended to provide students with the tools of risk analysis, transfer and financing that are critical to the operation of private and public institutions, and to prepare them for careers in risk management and insurance. As a risk management major, a student will gain a broad business background with an emphasis on accounting, finance and law, as well as a thorough knowledge of all types of insurance. BS in Actuarial Science and Risk Management is a four year degree program. It requires completion of 144 credit hours of course work and 2 credit hours of internship of at least six weeks in an organization approved by the Institute. Students graduating with a CGPA of 2.5 on the scale of 4 are eligible to apply for MBA program offered by the Institute.

BS MATHEMATICS AND ECONOMICS

BS (Mathematics & Economics) is an inter-disciplinary undergraduate program for students with robust mathematical skills and a keen interest in economics. This program is a perfect blend of pure and applied mathematics which does not only ensure a solid quantitative foundation for both disciplines but also provides coverage of Statistics, Actuarial sciences and Finance. The training this degree provides is a unification of critical economic analysis and strong mathematical skills, which can help student pursue an esteemed position in financial services industry, growth and development centers, business enterprises, as well as the public sector. Graduates with this degree are increasingly valued by employers because of their critical reasoning and sound knowledge as much as for economic theory as currently presented in terms of mathematical models. This opens more career options than the ones traditionally available to either mathematics or economics majors. This degree is also a paragon for those who aim for Master/Doctoral degree in Economics, Finance, Mathematics, Statistics, Actuarial Sciences or other related fields.

The BS (Mathematics & Economics) is a four-year program. Applicants who have successfully completed H.Sc with minimum 50% marks in Pre-Engineering or in General Group (with Mathematics) or A-Levels with a minimum 2 Cs in three principal subjects (with Mathematics) are eligible to apply for admission. Graduation requirement is the completion of 141 credit hours of course work and 3 credit hours of project approved by college. Students must take a minimum load of 12 credit hours (four courses) or a maximum load of 18 credit hours (six courses) in a semester. In order to obtain the BS degree in four years, a student is required to cover twelve courses in a year. Full load of six courses can be taken each in the Fall and Spring semesters with an option of four courses in the latter and making up for the short fall in summer session. Students must maintain a CGPA of 2.5 for the conferment of degree.

Required Courses

Mathematics
MTH104 Calculus I
MTH105 Calculus II
MTH203 Introduction to Formal Mathematics
MTH204 Linear Algebra
MTH213 Introduction to Computing
MTH224 Multivariable Calculus
MTH251 Number theory
MTH301 Real Analysis I
MTH311 Real Analysis II
MTH344 Introduction to Differential Equations
MTH346 Partial Differential Equations
MTH350 Topics in Mathematical Economics
MTH403 Numerical Analysis
MTH427 Topology
MTH401 Complex Analysis
MTH433 Optimization Techniques
MTH437 Functional Analysis

Economics
ECO101 Principles of Microeconomics
ECO102 Principles of Macroeconomics
ECO103 Intermediate Microeconomics
ECO105 Intermediate Macroeconomics
ECO207 Game Theory
ECO208 Development Economics
ECO301 Managerial Economics
ECO302 International Trade
ECO303 Financial Economics
ECO307 Monetary theory and Policy
ECO402 Pakistan Economic Policy
ECO410 Econometrics I
ECO412 Econometrics II

BS DATA SCIENCE

BS (Data Science) has a dual emphasis on basic principles of statistics and computer science, with foundational training in statistical and mathematical aspects of data analysis. This program, in addition, develops its foundations on broad computer science principles, including algorithms, data structures, data management and machine learning. The program is suitable for students interested either in a career in industry or more specialized graduate study. This program will prepare students for a career in data analysis, combining foundational statistical concepts with computational principles from computer science. A major component of this degree is the final year two-semester project that teaches students how to apply statistical and computational principles for solving large-scale, real-world data analysis problems. BS (Data Science) is a four year degree program. It requires completion of 144 credit-hour of course work and 2 credit hours of internship of at least six weeks at an organization approved by the Institute.

Data Science students learn to:
- Define information needs of individuals and organizations;
- Select and transform data to increase usefulness for solving particular problems;
- Analyze and synthesize unstructured data to create actionable information;
- Create information visualizations for data exploration and presentation;
- Manage very large volume data sources from acquisition through disposal;
- Secure and preserve data in ways consistent with legal and organizational considerations

Learning Outcomes for Data Science students include:
1. Knowledge of how to apply analytic techniques and algorithms (including statistical and data mining approaches) to large data sets to extract meaningful insights.
2. Acquisition of hands-on experience with relevant software tools, languages, data models, and environments for data processing and visualization.
3. Ability to communicate results of analysis effectively (visually and verbally) to a broad audience.

Required Courses

Accounting
ACC101 Introduction to Financial Accounting

Communication
COM107 Academic English
COM203 Methods in Business Writing
COM403 Interpersonal Communication Skills

Economics
ECO104 Micro and Macroeconomics
ECO304 Introduction to Econometrics

MS COMPUTER SCIENCE

The Master of Science program in Computer Science provides an intensive preparation in the concepts and techniques related to the design, programming and application of computing systems. The program requires students to take a broad spectrum of courses and simultaneously allows for emphasis on the desired areas of specialization. The program is based on HEC guidelines. The program comprises two years of study over at least 4 semesters. It requires completion of 30 credit hours of course work. Students are required to complete 8 courses and a thesis of an equivalent of 6 credit-hour of 2 courses in order to fulfill degree requirements. Students must maintain a CGPA of 3.0 for the conferment of the degree.

Eligibility

BS(CS) / MCS / BE in Computer Engineering candidates are required to make up for the requirement as proposed by the Department Board of Studies. Minimum CGPA of 2.5 on a scale of 4.

MS (Computer Science) program consists of two groups of courses: core and elective.

Core Courses

CSC541 Advanced Research Methodology  
CSC543 Advanced Computer Architecture  
CSC545 Decision Theory  
CSC548 Advanced Analysis of Algorithms

Elective Courses

CSC465 Data Warehousing  
CSC562 Object Oriented Software Engineering  
CSC564 Software Requirement Engineering  
CSC571 Advanced Database Management Systems  
CSC574 Distributed Systems  
CSC576 Parallel and Distributed Algorithms  
CSC467 Neural Networks  
CSC466 Fuzzy Systems  
CSC561 Advanced Software Engineering  
CSC563 Software Quality Assurance  
CSC565 Software Testing Strategies  
CSC573 Data Mining  
CSC575 Parallel and Distributed Computing  
CSC578 Communication and Information Policy  
CSC582 Pattern Recognition  
CSC591/592 Thesis

Course Structure
The MS programs in Mathematics & Scientific Computing and in Statistics & Scientific Computing prepare students for careers in research, applications, and teaching. Students choose courses from two areas of concentration for their course work: Mathematics and Computations or Statistics and Computations. Students are required to qualify successfully for eight courses (4 compulsory and 4 electives) each of 3 credit hours duration. On successful completion of MS course work students will be allowed to work on a 6 credit hour thesis on a subject of their interest and depending on the availability of the faculty. Students will be required to qualify for Final (Comprehensive) Examination, as well as write and defend a thesis. The MS Program takes usually two years to complete and students must pass GRE/NTS exam prior to the completion of the degree.

**Eligibility**

16 Years of education in Computer Science, Engineering, Mathematics or Statistics any relevant field.

**Required Courses**

**MS (Mathematics & Scientific Computations)**

**Compulsory Courses (12 credit hours)**
- MTS614 Mathematical Statistics
- MTS615 Dynamical System
- MTS617 Advanced Numerical Analysis
- MTS618 Statistical Modeling and Computing

**Elective Courses**

**Mathematics Concentration (6 credit hours)**
- MTS610 Calculus of Variation
- MTS612 Numerical Methods for ODEs and PDEs
- MTS620 Asymptotic Analysis
- MTS624 Advanced Fluid Dynamics
- MTS626 Advanced Convex Analysis
- MTS628 Advanced Numerical Optimization
- MTS630 Advanced Mathematical Physics
- MTS632 Advanced Variational Inequalities
- MTS634 Advanced Numerical Linear Algebra
- MTS636 Advanced Hilbert Space
- MTS640 Symmetry Methods for Differential Equations
- MTS641 Continuum Mechanics
- MTS642 Geometric Methods in Mechanics and Physics
Computation Concentration (6 credit hours)
MTS622  Fundamental Algorithms
MTS637  High Performance Computing
MTS657  Machine Learning and Pattern Recognition
MTS691/692 Thesis

The MS (AS&CF) degree program is for those candidates who have demonstrated high academic ability at BS level programs in the fields of Actuarial Science, Economics, Mathematics, Statistics, Computer Science, and Physics and are interested in exploring actuarial science, risk management, financial mathematics and computing sciences in insurance and finance. The field of computational finance along with actuarial science is in demand nationally and internationally in banks, financial institutions and insurance companies.

Eligibility

1. Sixteen years of schooling or 4 year education (130 credit hours) after HSSC/F.A/ F.Sc./Grade 12 equivalent will be required for admission in the MS (AS&CF).

2. Taking the test conducted by IoBM Admission Dept. or some equivalent agency acceptable to HEC (NTS) with a minimum of 50% cumulative score will be a requirement at the time of admission to MS (AS&CF). The test is valid for a period of two years.

MS (AS&CF)

- For the award of MS (AS&CF) candidates be required to complete 30 credit hours with 24 credit hours of course work along with a minimum of 6 credit hours for a thesis.

- (*1. 6 credit hours may be exempted only for those disciplines where research is not possible)

- (*2. The HoD may allow students to do course work of 6 credit hours in lieu of 6 credit hours of research work. This exemption can only allowed if students wish to terminate their course work at MS and not pursue PhD.)

- Course work of 12 credit hours has to be completed in two semesters and thesis should be completed within a year after completion of course work. All examinations and grading will be as per the Institute’s rules.

Required Courses

Compulsory Courses (12 credit hours)
ACF601 Financial Mathematics and Computational Finance
ACF602 Finance and Financial Reporting
ACF603 Life Insurance Mathematics and Computing
ACF604 Advanced Life Insurance Mathematics and Computing
**Elective Courses**
(12 credit hours)

**Actuarial Science Concentration**
ACF605 Economics of Risk and Insurance
ACF606 Statistical Methods (for Insurance and Risk Management) with Computing
ACF607 Stochastic modeling (for Insurance and Risk Management) with Computing
ACF608 Survival Models & Theory of Reliability
ACF609 Risk Theory (for life insurance)
ACF610 Financial Economics
ACF611 Introduction to Model Office Building in Life Insurance
ACF612 Social Insurance in Emerging Markets
ACF613 Hedge Funds
ACF614 Risk Assessment and Decision Analysis Using Bayesian Network (BAN)

**Computing Concentration**
ACF615 Time Series Modeling & Forecasting
ACF616 Simulation & modeling
ACF617 Machine Learning
ACF618 Actuarial Computing Using R or Other Software
ACF619 Financial Soft Computing /Advances in Computational Finance

**Thesis Writing and Evaluation (6 credit courses)**
Thesis writing and evaluation will be done as per rules of IoBM (BASR). Thesis should be Mathematics of Insurance and Computing oriented

**Course Structure**

PhD (COMPUTER SCIENCE)  
PhD (MATHEMATICS & SCIENTIFIC COMPUTING)  
PhD (STATISTICS & SCIENTIFIC COMPUTING)

PhD programs will connect knowledge of three disciplines mathematics, statistics, and computer science to policy-relevant decision-making in business and government. The program aims to train researchers to contribute to theory, develop inventive and useful models and methods, and conduct applied scientific investigations. Although individual researchers will vary in their emphases, the field includes all these aspects. This program emphasizes rigorous course work and high quality research that should be published in international conferences and HEC recognized journals. Course and research work are arranged as per HEC criteria.

Eligibility

M.Phil. /M.S. / in Computer Science related field or equivalent graduates from HEC recognized institutions meeting the following criteria:

• A minimum CGPA of 3.00 on a scale of 4.00 (or overall 60% marks) or equivalent
• A minimum of 18 years of schooling that corresponds to MS / M.Phil or equivalent degree from HEC recognized institutions in a relevant discipline
• GRE subject specific or GAT subject test conducted by the NTS, or equivalent in the relevant discipline. A minimum of 60% (percentage) marks is required
• An interview conducted by the Institute
• All other HEC stipulated requirements

Program Requirements

PhD requires completion of course work and dissertation/thesis. Minimum duration is 3 years and maximum is 5 years:

• PhD course work requirements consist of six graduate level courses (18 credit hours)
• On completion of dissertation/thesis the student is awarded 30 credits

A PhD student must additionally complete the following requirements:

• Comprehensive Exam
• PhD Proposal/Synopsis Development
• PhD Proposal/Synopsis Defense
• BASR Approval of PhD Proposal/Synopsis
• Continuous enrollment in supervised research courses for meeting the full-time residency requirements
• Completion of PhD Dissertation/Thesis
• Selection of External Evaluators by BASR
• Publication of at least one paper in an ISI indexed or an HEC recognized journal or an official acceptance of the paper
• Evaluation of PhD Dissertation by two foreign faculty members from developed countries as per HEC criteria
• Dissertation/Thesis Finalization
• Open defense of PhD dissertation
• Any other HEC requirement
• Final Dissertation/Thesis Submission to BASR
Course Structure

Semesters One to Nine (Select Six courses)

PhD (Computer Science)
- PCS701 Big Data Analytics and Knowledge Discovery
- PCS703 Natural Language Processing Information Retrieval
- PCS705 Advance Theory of Computation
- PCS707 Advances in Machine Learning
- PCS709 Computational Intelligence
- PCS711 Heuristic Search theory & Methods
- PCS713 Advanced Neural Network
- PCS715 Intelligent Web Technologies
- PCS717 Parallel and Distributed Systems
- PCS719 Formal Research Methods
- PCS723 Computer Vision and Robotics
- PCS725 Temporal and Spatial Database Management System
- PCS731 Advanced Digital Signal Processing
- PCS733 Advanced Decision Support System
- PCS739 Advances in Simulation and Modeling
- PCS743 Fuzzy Topologies with Human Centric Computing
- PCS745 Advanced Algorithm Analysis
- PCS749 Seminar on Logic and Scientific Computing
- PCS751 Seminar on Emerging Computing Technologies
- PCS850 Research Thesis

PhD (Statistics & Scientific Computing)
- PST701 Advanced Statistical Computing and Graphics
- PST703 Regression Modeling and Computing
- PST705 Advanced Mathematical Statistics
- PST707 Advanced Bayesian Inference and Stochastic Modeling
- PST713 Nonlinear and Integer Programming
- PST715 Advanced Design and Analysis of Experiments
- PST717 Advances in Time Series Analysis
- PST719 Advances in Bioinformatics & Biostatistics
- PST721 Statistical Quality Control
- PST723 Stochastic Modeling
- PST850 Research Thesis

PhD (Mathematics & Scientific Computing)
- PMT701 Advanced Numerical Computing
- PMT703 Linear Algebra and Lie Algebra
- PMT705 Applied Matrix Theory
- PMT707 Numerical Methods for PDEs
- PMT709 Topics in Inverse Problems
- PMT711 Topics in Numerical Differential Equations
- PST701 Advanced Statistical Computing & Graphics
- PST703 Regression Modeling & Computation
- PST713 Nonlinear and Integer Programming
- PMT850 Research Thesis
College of Engineering and Sciences (CES) was established to realize IoBM’s mission of creating an impact as a multidimensional institution of higher learning. The college strives to develop entrepreneurial engineers who have the technical skills and confidence to create new engineering technologies and design innovative engineering products and processes.
Graduates of the Industrial Engineering Department contribute to the growth of manufacturing and process industries through their technical expertise in creating innovative production processes and developing efficient facilities. The Bachelor of Industrial Engineering degree is known as BS (IEM) and is accredited by PEC (see http://www.pec.org.pk/schedule_first.aspx) and automatically qualifies the graduates for MS/MBA programs at IoBM. BS (IEM) graduates are given attractive exemptions from the equivalent courses of the foundation stage of the MBA Industrial Management program. Another outstanding feature is the provision of hands-on training facilities in industrial units on a continuous basis, which blends theory with practical experience. Each final year student is required to undergo 2 credit hours of internship of 6 to 8 weeks with a reputable engineering firm. This close collaboration increases job opportunities and accessibility to higher technical and managerial positions.

This program requires completion of 138 credit hours of course work, including 46 courses. Students graduating with a CGPA of 2.5 automatically qualify for the MBA program offered by IoBM. Students can also proceed further for postgraduate work in Industrial / Management Engineering at leading international schools. BS (IE&M) program is spread over 18 session per semester.

### Required Courses

#### Engineering
- ENG101 Workshop Practices
- ENG102 Engineering Mechanics
- ENG103 Engineering Drawing
- ENG105 Basic Industrial Engineering
- ENG108 Introduction to Thermo-Fluids
- ENG109 Industrial Chemistry
- ENG201 Design of Machine Elements
- ENG202 Production System Design
- ENG203 Engineering Economics
- ENG206 Manufacturing Process
- ENG209 CAD/CAM Applications
- ENG218 Metrology and Statistical Quality Control
- ENG219 Industrial Maintenance and Safety
- ENG220 Mechanics of Materials
- ENG300 Electrical Technology and Instrumentation
- ENG303 Production Planning and Control
- ENG304 Automation and Robotics
- ENG305 Work Study and Methods Engineering
- ENG306 Basic Machine Design
- ENG307 Basic Electronics
- ENG403 Human Factor Engineering
- ENG503 Project I
- ENG504 Project II

#### Accounting
- ACC101 Introduction to Financial Accounting

#### Computer Science
- CSC310 Computer Simulations

#### Communication
- COM107 Academic English
- COM205 Persuasive & Analytical Writing for Business Comm.

#### Human Resource Management
- HRM301 Human Resource Management

#### General Sciences
- GSC101 Physics

#### Management Information Systems
- MIS104 Computer Programming and Graphics
- MIS406 Operations Research
- SCM301 Introduction to ERP Systems

#### Management
- MAN101 Principles of Management
- MAN303 Production and Operations Management

#### Marketing
- MKT302 Marketing Management
### Statistics
- STA204 Industrial Applications of Statistics
- EEM412 Research and Survey Methodology

### Political Sciences
- PSC301 Pakistan Studies

### Mathematics
- MTH202 Engineering Mathematics
- MTH208 Differential Equation and Complex Variables
- MTH403 Numerical Computing / Analysis
- MTH406 Finite Element Analysis

### Religious Studies
- REL101 Islamic Studies

### Elective Courses

#### Engineering
- ENG204 Plant Engineering
- ENG216 Reliability Analysis
- ENG401 Computer Integrated Manufacturing
- ENG402 Manufacturing Strategies
- ENG404 Tool Design

#### Management
- MAN405 Strategic Management
- MAN501 Total Quality Management
- MAN503 Supply Chain Management
- MAN509 Logistics and Inventory Control

#### Mathematics
- MTH406 Finite Element Analysis

BE ELECTRICAL ENGINEERING IN ELECTRONICS AND TELECOMMUNICATION

Electrical Engineering graduates are empowered to ensure the growth of the electrical, electronics and telecommunication industry through their technical expertise and entrepreneurial spirit. BE (EE) program is accredited by PEC and students can specialize in either electronics or telecommunication streams. Successful completion of BE (EE) automatically qualifies the students for MS/MBA programs.

The program is Pakistan Engineering Council (PEC) approved (see http://www.pec.org.pk/schedule_first.aspx) and designed in close consultation with leading engineering firms and scholars from reputable academic Institutions. The Electrical engineering curriculum is a four-year degree program comprising 8 semesters. The emphasis on laboratory work, experimental knowledge and innovative teaching methods. One of its special features is an Internship of 6 to 8 weeks in a reputable engineering organization. During the first four semesters, the same courses are offered to all students. At the end of the fourth semester, students are allowed to select either of two of the above mentioned areas of specialization. The course work offered in the last four semesters is especially designed to enhance students’ knowledge of area of interest and provide them thorough understanding about the advanced subjects in that particular area of specialization.

Completion of course work with 2.5 CGPA and 139 credit hours with internship automatically qualify students for the Master’s programs offered by IoBM. They can also proceed further for postgraduate studies or work in the fields of Telecommunication and Electronics at leading universities and organizations throughout the world. IoBM course credits are easily transferable to a number of international universities. BE (EE) program is spread over 18 session per semester.

Required Courses

Communication
COM107  Academic English
COM202  Business and Professional Speech
COM403  Interpersonal Communication Skills

Computer Engineering
CME102  Fundamentals of Computing
CME104  Computer Programing and Problem Solving
CME203  Data Structures and Algorithms
CME205  Microcontroller and Microprocessor Systems
CME301  Computer Communication and Networks

Electronic Engineering
ELE200  Electronic Devices and Circuits
ELE201  Digital Logic Design
ELE202  Electronic Workshop Practices
ELE370  Instrumentation and Measurements
ELE419  Linear Control Systems
ELE420  Power Electronics
ELE450  Senior Design Project I
ELE451  Senior Design Project II

Electrical Power Engineering
EPE101  Linear Circuit Analysis
EPE200  Electrical Network Analysis
EPE201  Computer Aided Engineering Design
EPE302  Electrical Machines
### Telecommunication Engineering
- TCE201 Communication System
- TCE204 Electromagnetic Field Theory
- TCE205 Signal and Systems
- TCE301 Probability Methods in Engineering
- TCE321 Wave Propagation and Antennas
- TCE404 Digital Signal Processing
- TCE415 Transmission and Switching Systems
- TCE450 Senior Design Project I
- TCE451 Senior Design Project II

### Engineering Management
- ENG203 Engineering Economics

### Mathematics
- MTH107 Calculus and Analytical Geometry
- MTH204 Linear Algebra
- MTH215 Differential Equation
- MTH216 Complex Variable and Transforms
- MTH403 Numerical Computing / Analysis

### Religious Studies / Ethics
- REL101 Islamic Studies OR
- SSC203 Ethical Behavior

### Course Structure
First two years are common to both Electrical Engineering streamlines (Electronic and Telecommunications)

**MS ENGINEERING MANAGEMENT**

The MS in Engineering Management degree (MEM) can be either an academic or professional master’s degree that bridges the gap between the field of engineering, technology and the field of business by equipping students with the technical expertise and leadership skills required to advance their career in the fast-paced world of technology. Sound decision-making, information management, project management, quality engineering, design engineering, simulation, facility layout, production system and industrial costing management are some of the core issues being addressed as part of their career. MEM graduates can fill this gap.

The need for engineering management has been felt at all levels of managers, particularly in the professional management work environment. Also, management is applicable to every aspect of an organization’s functions and at all levels of top management, middle management and lower management. Basic and specialized knowledge in the field of engineering management is a dire need for every engineer and profitable business.

Engineering management entails planning, organizing, allocating resources, and directing and controlling activities that have a technological component. The course has been designed by engineers and business experts with experience at the International level, keeping in view the requirements of the country.

This is a weekend program with a minimum load of 6 credit hours (2 courses) and a maximum of 9 credit hours (3 courses) in each of the 3 sessions (Fall, Spring and Summer).

**Course Contents**

Duration: 2 years  
Total credit hours: 30  
- Teaching: 24  
- Thesis/ Project: 6

A minimum of eight courses (500 Level) of 3 credit hours each with individual research project / thesis of 6 credit hours in a relevant area shall be required for the completion of the MS degree in the discipline of Engineering Management. A minimum of four courses from core subjects and four courses from optional subjects are opted.

**Eligibility**

BSc/BE degree (16-years of education) in any engineering discipline

*It is mandatory for research students of MPhil and PhD programs to attend at least five sessions of the Multi-disciplinary Research Seminar Series in each semester.*
Compulsory Core Courses (Four Courses)
MEM501 Project Management (3+0)
MEM502 Designs, Patents, Contract and Legal Engineering (3+0)
MEM503 Quality Processes for Design and Production (3+0)
MEM504 Research Methodology (3+0)

MS Projects (Compulsory)
MEM600 Thesis / Project (6+0)
MEM601 Thesis I / Project I (2+0)
MEM602 Thesis II / Project II (4+0)

Elective Courses (Any Four Courses)
MEM505 Applied Engineering Analysis (3+0)
MEM506 Production System Design and Analysis (3+0)
MEM507 Operations Analysis & Resource Allocation (3+0)
MEM508 Operation Management (3+0)
MEM509 Simulation Modeling (3+0)
MEM510 Production Planning and Control (3+0)
MEM511 Advanced Practices in Engineering Management (3+0)
MEM512 Environmental and Safety Management (3+0)
MEM513 Industrial Costing Management (3+0)
MEM514 Technology Management (3+0)
MEM515 Lean Six Sigma & Lean Manufacturing (3+0)
MEM516 Marketing Management (3+0)

COLLEGE OF ECONOMICS AND SOCIAL DEVELOPMENT
The College of Economics and Social Development (CESD) is a social science and liberal arts college with graduate and under-
graduate programs in the areas of accountancy, management and law, education, economics, media studies and psychology. Research is a core competence of CESD. The program is designed to help students build a solid foundation in general business principles and skills. It requires completion of 144 credit hours of course work and 2 credit hours of internship of at least six weeks in a firm approved by the College. Students graduating with a CGPA of 2.5 automatically qualify for MBA program offered by CBM in a weekday full-time program. Students may take a maximum of six courses per semester with summer as an optional semester. This program will lead to an MBA or a professional accountancy qualification. The BS (Hons.) Accountancy, Management and Law degree has been accredited by two of the world renowned accountancy bodies, namely, the Institute of Chartered Accountants of Pakistan (ICAP) and the Association of Chartered Certified Accountants (ACCA), United Kingdom. Students opting for the ICAP qualification may get exemption from all four papers of Assessment of Fundamental Competencies (AFC) and the first four papers of Certificate in Accounting and Finance (CAF). Students opting for the ACCA qualification may get exemption from the following five subjects:

1. F1-Accountant in Business
2. F2-Management Accounting
3. F3-Financial Accounting
4. F4-Corporate and Business Law
5. F5-Performance Management
6. F6-Taxation
7. F7-Financial Reporting
8. F9-Financial Management

**Required Courses**

**Accounting**
- ACC102 Introduction to Accounting I (ICAP-CAF-1)
- ACC103 Introduction to Accounting II (ICAP – CAF-1)
- ACC202 Taxation I (ICAP – CAF-6)
- ACC203 Financial Accounting I (ICAP – CAF-5)
- ACC204 Taxation II (ICAP – CAF-6)
- ACC303 Financial Reporting I (ICAP – CAF-7)
- ACC304 Financial Accounting II (ICAP – CAF-5)
- ACC306 Financial Reporting II (ICAP – CAF-7)
- ACC307 Cost and Management Accounting I (ICAP – CAF-8)
- ACC308 Cost and Management Accounting II (ICAP – CAF-8)
- ACC405 Internal Auditing
- ACC414 Auditing I (ICAP – CAF-9)
- ACC416 Auditing II (ICAP – CAF-9)
- ACC417 Corporate Reporting
- ACC418 Performance Measurement and Decision Making
- ACC501 Advanced Financial Accounting
- ACC520 Managerial Analysis and Decision Making

**Communication**
- COM103 Functional English I (ICAP – AFC-1)
- COM104 Functional English II (ICAP – AFC-1)
- COM105 Business Communication I (ICAP – AFC-2)

**Economics**
- ECO202 Introduction to Economics & Finance I (ICAP-CAF-2)
- ECO203 Introduction to Economics & Finance II (ICAP-CAF-2)
- ECO204 The Pakistan Economy

**Finance**
- FIN201 Introduction to Business Finance
- FIN202 Financial Management
- FIN511 Analysis of Financial Statements
- FIN601 Strategic Financial Analysis and Design

**Human Resource Management**
- HRM301 Human Resource Management
- HRM502 Industrial Relations and Labour Laws

**Management Information Systems**
- MIS413 Information Technology I (ICAP-AFC-4)
- MIS416 Information Technology II (ICAP-AFC-4)

**Management**
- MAN101 Principles of Management (ICAP-CAF-4)
- MAN403 Entrepreneurship and Small Business Management
- MAN411 Project Management
- MAN416 Corporate Governance
### Social Sciences
- **SSC103** Behavioral Studies (ICAP-CAF-4)
- **SSC202** Environmental Studies
- **SSC401** Business Ethics

### Marketing
- **MKT301** Principles of Marketing
- **MKT404** Methods in Business Research

### Law
- **LAW105** Mercantile Law (ICAP-CAF-3)
- **LAW106** Company Law (ICAP-CAF-3)
- **LAW301** Intellectual Property, Patents, Copyrights
- **LAW400** Company Secretarial Practices
- **LAW404** Arbitration
- **LAW407** Statutory Compliance

### Statistics
- **STA101** Quantitative Methods-I (ICAP-AFC-3)
- **STA102** Quantitative Methods-II (ICAP-AFC-3)

### Logistics and Supply Chain Management
- **SCM310** Introduction to ERP Systems

### Religious Studies
- **REL101** Islamic Studies

### Language
- **LAN 10** Foreign Language I
  - *1 = Introduction to Arabic*  
  - *2 = Introduction to French*  
  - *3 = Introduction to Spanish*  
  - *4 = Introduction to German*  
  - *5 = Introduction to Japanese*  
  - *6 = Introduction to Italian*

BS (HONORS) MEDIA STUDIES

The BS (Honors) Media Studies program is designed to provide students with strong grounding in, and a broad academic base for, pursuing a professional career - institutional or entrepreneurial - in the wider field of media and film arts.

The curriculum seeks to endow students with creativity, and deep insight into the world of media and visual communication, through an array of courses in journalism, communication and social sciences, as well as practical hands-on exposure to the art and craft of film-making for television, and new media content creation. It strengthens their prospects in a world where multi-platform communication and multi-format journalism are becoming the norm.

The program has benefited tremendously from the constant and ongoing support it receives from media experts and practitioners - specialists in the field of journalism and filmmaking – who make up the bulk of the teaching faculty. This is in addition to the collaboration the department receives from media channels and establishments, media-related institutions and regulatory authorities.

The four-year program requires completion of 144 credit hours of course work, and a compulsory 6-week internship.

Required Courses

Communication
COM111 Critical Reading & Creative Writing
COM112 Appreciation of Literary Texts

Economics
ECO106 Basic Economics

Islamic Studies
REL101 Islamic Studies

Language
LAN112 Urdu I
LAN113 Urdu II

Law
LAW405 Media Law & Ethics

Management
MAN305 International Relations
Media Studies
MMM301 Photojournalism
MMM303 Outline of Political Science
MMM307 World Civilization & Culture
MMM310 News Writing & Reporting
MMM313 Theater Arts
MMM315 Feature, Article & Column Writing
MMM318 Business Journalism
MMM321 Development Journalism
MMM324 Media Marketing
MMM328 Methods in Media Research
MMM330 Appreciation of Vernacular Literature
MMM333 Sports Journalism
MMM336 Human Rights & Gender Reporting
MMM338 Cinematography I
MMM342 Filmmaking – The Art & Craft I*
MMM345 Screenplay II
MMM354 Introduction to Sound Design
MMM356 Ad-Film Production
MMM361 Fashion Journalism
MMM363 Introduction to Design Tools
MMM366 Filmmaking – The Art & Craft II (Thesis)*
MMM368 Director’s Toolkit

MMM302 Logic & Critical Thinking
MMM304 Media Literacy
MMM308 Contemporary World Media
MMM312 Introduction to Advertising & PR
MMM314 Online Journalism
MMM316 Sub Editing & Page Design
MMM320 Editing & Post Production
MMM322 Current Affairs
MMM327 Studio Production
MMM329 Creative Writing Workshop
MMM332 News Production/News Anchoring
MMM335 Magazine Production
MMM337 Investigative Journalism (Thesis)
MMM339 Cinematography II
MMM344 Screenplay I
MMM351 Production Management
MMM355 Production of Documentary
MMM360 Introduction to Photography
MMM362 History of Filmmaking
MMM364 Introduction to Mass Communication
MMM367 Digital Journalism

- Ad-Film Production
- Filmmaking – The Art & Craft II (Thesis)*
- Investigative Journalism (Thesis)
- Media Marketing
- Digital Journalism
- Photojournalism
- Magazine Production

*Credit Hours: 6
BS ECONOMICS, LAW & INTERNATIONAL RELATIONS (ELI)

This multidisciplinary undergraduate program combines Economics and International Relations with Law. This can result in a better appreciation of the forces that affect our business and personal lives today. Economics today relies more on mathematical and statistical models for substantiation of its theoretical base, international relations has extended beyond its intellectual parameters to embrace real-world dynamics. The program includes core courses in the respective disciplines as well as current issues and hotly debated topics like food security, Genetically Modified Organism (GMOs) versus organic farming, political economy issues, trade roots and economic corridors, CPEC, etc. This will not only makes the courses interesting, but increases the marketability of students. The law courses would equip the students with a working knowledge of the legal issues which they are likely to encounter in their careers. Select law courses would not only give students a strong foundation of legal theory based on traditional mercantile law and company law but also provide them with a working knowledge of such practical areas as patent laws, banking laws, insurance laws and compliance issues.

The BS Economics, Law and International Relations (ELI) program will require students to complete 48 courses i.e. 144 credit hours of coursework. Internship of six weeks duration in a firm approved by the Institute is also obligatory.

BS ECONOMICS, MEDIA & INTERNATIONAL RELATIONS (EMI)

This multidisciplinary undergraduate program combines two key social science disciplines, Economics and International Relations with Media, adding a third dimension that can result in a better appreciation of forces that affect our business and personal lives today. From an academic standpoint all three disciplines have evolved significantly in recent years. Economics today relies more on mathematical and statistical models for substantiation of its theoretical base, international relations has extended beyond its intellectual parameters to embrace real-world dynamics, and media studies having found an ally in science and technology, in this digital age.

The program includes core courses in the respective disciplines as well as current issues and hotly debated topics like food security, Genetically Modified Organism (GMOs) versus organic farming, Political Economy Issues, Trade Roots and Economic Corridors, CPEC, etc. This will not only makes the courses interesting, but increases the marketability of the students.

The BS Economics, Media and International Relations (EMI) program will require students to complete 48 courses i.e. 144 credit hours of coursework. Internship of six weeks duration in a firm approved by the Institute is also obligatory.

BS JOINT (HONORS) IN BUSINESS & PSYCHOLOGY

BS JOINT (HONORS) IN BUSINESS & PSYCHOLOGY

The BS Joint (Hons) in Business & Psychology program is designed to provide a strong foundation in business and to integrate core psychological principles throughout. The main goal of this program is to produce graduates who have the ability to apply the science of human behavior to practical business problems. Students learn to apply theories in psychology to business challenges. They learn to analyze business problems through a psychological approach, utilizing research skills and developing effective solutions.

The four-year program requires completion of 144 credit hours of coursework, and 02 credit hours of compulsory internship. Students can take a minimum load of 12 credit hours (4 courses per semester) or max load of 18 credit hours (6 courses per semester).

Compulsory Courses

Communication
COM100  Foundation English**
COM107  Academic English (W, R)
COM202  Business & Professional Speech
COM205  Persuasive and Analytical Writing for Business Communication (E, W)
** This non-credit course will be taken by those students who have not been able to reach the desired level of competence in the admission test

Language
LAN 10* Foreign Language I
*1 = Introduction to Arabic  *2 = Introduction to French  *3 = Introduction to Spanish  *4 = Introduction to German
*5 = Introduction to Japanese  *6 = Introduction to Italian  *7 = Introduction to Russian  *8 = Introduction to Chinese

Elective Courses

Any FIVE courses from each discipline may be opted from the following in the last two semesters.

Elective Psychology

Psychology
- PSY501 Work Motivation and Attitude
- PSY515 Projective Methods
- PSY506 Quality of Work Life
- PSY507 Cyber Psychology, Behavior and Social Networking
- PSY508 Health Promotion in Corporate Setting
- PSY509 Psychology of Judgment and Decision

Elective Business

HRM501 Organizational Change & Development
MAN405 Strategic Management
MKT403 Sales Management
MKT511 Brand Management
FIN511 Analysis of Financial Statements
FIN602 Behavioral Finance
B.Ed (HONORS) ELEMENTARY

This is a four-year program designed to provide opportunities to prospective teachers to carry out action research, engage in critical thinking, study contemporary problems, and accomplish field work. Moreover, the prospective teachers will visit schools for practicum and interact with the communities in order to gain insight from practical experiences. These trained teachers after intensive education, will be able to transform the teaching and learning scenario in Pakistan. HEC has announced that from 2015, four-year B.Ed. program will be implemented and the previous shorter duration program will be considered obsolete. Hence, these trained teachers will be able to benefit from this degree by getting better professional options in various educational institutions.

Eligibility Criteria

FA/F.Sc/A Levels or equivalent with minimum 2nd Division.

Program details

Duration: 4 years (8 semesters)
Semester duration: 16 – 18 weeks
Semesters: 8
Course load per semester 15 – 18 credit hours
Number of courses per semester 5-6 (not more than 3 lab / practical courses)

MBA EDUCATIONAL MANAGEMENT
FOR STUDENTS WITH 16 YEARS EDUCATION

The MBA Educational Management program provides knowledge, skills and tools required for 21st century leadership and management for educational institutions in the fast changing economy.

This MBA program is a 72 credit-hour program designed for students with a minimum of 16 years of education with degrees in a wide range of disciplines such as business, commerce, engineering, law, science, medicine, arts and pharmacy. The 72 credit hours MBA program is divided into a foundation stage of 36 credit hours followed by the 36-credit hours of rigorous MBA level courses and projects dealing with strategy and educational transformation. The program covers areas such as accounting, finance, marketing, economics, quantitative analysis, ethics, HRM, management and education and consists of foundational course work necessary for the higher level MBA courses.

Students can take a minimum load of 6 credit hours (two courses) or maximum of 12 credit hours (four courses) in each of the 3 semesters (Fall, Spring and Summer).

Applicants from non-business disciplines of IoBM may avail up to 6 course exemptions from foundation stage courses equivalent to the bachelor’s program courses.

**Required Courses**

**Accounting**
ACC419  Financial Accounting

**Educational Management**
EDM406  Educational Policy and Economics
EDM415  Educational Philosophy and Ethics
EDM419  Managing Teaching and Learning

The MBA Educational Management program provides knowledge, skills and tools required for 21st century leadership and management for educational institutions in the fast changing economy.

This MBA program is designed for students with 14 years of education with degrees in a wide range of disciplines such as business, commerce, law, science, and arts. The 108 credit hours program is divided into a foundation stage of 72 credit hours followed by the 36-credit hours of rigorous MBA level courses and a capstone project dealing with strategy and educational transformation. The program covers areas such as accounting, finance, marketing, economics, quantitative analysis, ethics, HRM, management and education management and consists of foundational course work necessary for the higher level MBA courses. The program is designed for students who have passed a two-year bachelor’s degree. Students can take a minimum load of 6 credit hours (two courses) or maximum of 12 credit hours (four courses) in each of the 3 semesters (Fall, Spring and Summer).

**Required Courses**

**Accounting**
ACC419  Financial Accounting

**Communication**
COM403  Interpersonal Communication Skills
COM407  English Language Development

*Note: For the 9th Semester students are required to choose 2 Psychology electives and 2 HRM electives.*
**MSc IN ENERGY ECONOMICS, ENVIRONMENT AND POLICY**

The program is intended for postgraduate Masters of Sciences in Energy Economics, Environment and Policy will be offered to two different groups.

**Group I: Full-Time Students**
The Time length for Group I will be of 2 years, comprising three semesters and 3 months of Dissertation writing.

**Group II: Part-Time Students**
Students will be given between 2 to 3 years to complete the degree allowing them to choose their own work load with a minimum of three courses in the first semester and two onwards. They will also be allowed a time period of 3-6 months for the completion of their dissertations (though strict compliance with initial deadline submitted by them will be enforced).

**Requirements for the Program:**
An undergraduate degree in any of the following:

- Economics or an Undergrad with minor in economics, finance or business
- Science (including Environmental science) and/or engineering

Also, all applicants will be required to fulfil the requirements outlined by the Department of Economics.

**Program Aims:**
The aim of the program is to provide:

- A thorough understanding of the economics of energy supply, demand and policy (both in Pakistan and Internationally)
- The graduates not only technical, but also analytical understanding of the global energy economy, and its sectors.
- Them with the ability to make complex decisions in the industry given the environmental constraints and the know-how to resolve problems
- An understanding of different economic, political and policy dynamics or energy and related problems

The program is unique to Pakistan and will focus on the areas that have gained importance in the global energy economic agenda:

1. Environment and Climate
2. Energy Economics
3. Modelling
4. Regulations and Policy
5. Efficiency and Security

There is a need for specially qualified professionals who have the aptitude required to apply their knowledge and skills to a variety of issues and are able to relate the results to policy making and planning.
Required Courses

Accounting
ACC419  Financial Accounting

Economics
ECO410  Econometrics I
ECO412  Econometrics II
ECO511  Micro and Macro Analysis
ECO512  Quantitative Methods in Economics
ECO513  Research Methods and Dissertation
ECO514  Energy Economics and Technology
ECO515  Theory and Practice of Public Policy
ECO516  Industry Economics
ECO517  Economics of International Energy and Its Issues

Energy Management
EEM403  Energy Sources and Management
EEM510  Economics of Energy Management
EEM511  Energy Regulation and Policy Analysis
EEM601  Environmental Management and Green Technology

Dissertation

Method of Assessment:

All the Energy courses will consist of 75% written examination and 25% assignment. The rest will follow the same procedure as followed by the Department of Economics. The Research Methods course will consist of 25% assignment and 75% dissertation.
MPhil IN ORGANIZATIONAL PSYCHOLOGY

The MPhil program in Organizational Psychology is designed specifically for the training of professional industrial-organizational psychologists. Students will receive comprehensive training in utilizing psychological knowledge for improving organizational effectiveness and employee satisfaction.

Eligibility

Candidates with 16 years of education holding a master’s degree in the relevant subject with 1st division/CGPA with at least 3 on a scale of 4 from an HEC recognized university are eligible for admission to the MPhil program at IoBM.

Program Structure

MPhil is a 30 credit hours program with 8 courses and one thesis of 6 credit hours. Each of the 8 courses will be of 3 credit hours. After successful completion of the course work, students are required to undertake research for the thesis under the guidance of a research supervisor assigned by IoBM.

Course Structure

**Semester One**
MPP601 Qualitative Research Methods in Psychology
MPP603 Quantitative Research Methods in Psychology
MPP605 Psychological Testing and Measurement

**Semester Two**
MPP607 Independent Study in Organizational Psychology
MPP609 Personnel Psychology at Workplace
MPP611 Human Factors in Work Environment

**Semester Three**
MPP613 Organizational Conflict & Management
MPP615 Project Practicum in Organizational Psychology

**Semester Four**
MPP620 MPhil Thesis (6 credit hours)

*It is mandatory for research students of MPhil programs to attend at least five sessions of the Psychology Research Seminar Series in each semester.*
MPhil in Educational Leadership and Management

The program has been designed to equip the participants with essential knowledge and skills to lead organizational change and development. MPhil in Educational Leadership and Management (ELM) will be of interest to those in education-related settings who carry or aspire to reach senior and middle leadership and management positions. This program aims to integrate practical knowledge, theories, and state-of-the-art research by providing an opportunity to the participants to develop specialized research skills for professional investigation in the substantive areas of educational leadership and management.

Eligibility
- As per HEC policy, 16 years of education in the relevant field of study with a minimum of 3.0
- CGPA or B-Grade.
- Candidates must clear NTS test or university developed test.
- Candidates must have a relevant degree in Education/Leadership/Management

Program Structure

The MPhil is a 1.5 to 4 year program and has 30 credit hours with 8 courses and one thesis (20000-25000 words) of 6 credit hours.

After successful completion of the course work, students are required to carry out research study for the thesis under the guidance of a research supervisor selected by the students and approved by the institute. The student must convert the research thesis into a publishable paper as part of the degree requirement.

An MPhil student must additionally complete the following requirements while at IoBM:

- MPhil Proposal/Synopsis Development
- BASR Approval of MPhil Proposal/Synopsis
- Completion of MPhil Thesis
- Open Defense of MPhil Thesis
- Any other HEC Requirement
- MPhil Proposal/Synopsis Defense
- Continuous Enrollment in Supervised Research
- Selection of External Evaluators and Examiner by BASR
- Final MPhil Thesis Submission to BASR

Course Structure

Core Courses

- ELM616 Developing a Research Project
- ELM613 Readings in Education
- ELM607 Philosophical Foundations in Education
- ELM601 Qualitative Research Methods in Education
- ELM604 Statistical Testing and Inferences in Education
- ELM610 Policies and Education in Pakistan

Elective Courses (Any Two Courses)

- ELM730 Leading and Managing Educational Change
- ELM733 Contemporary Issues in Educational Leadership
- ELM736 Education Governance Policy and Practice
- ELM739 Education Leadership Theories Principles and Practices
- ELM742 Strategic Communication in Educational Leadership
- ELM790 Research Thesis

It is mandatory for research students of MPhil and PhD program to attend at least 5 sessions of the Multi-disciplinary Research Seminar Series in each semester.
This program is proposed for students with 16 years of education as well as for in-house BS Economics and Finance students of IoBM and those with equivalent qualifications. The students enrolled will complete one year of coursework for 24 credit hours and six credit hours of thesis writing.

**Required Courses**

**Economics**
ECO601 Microeconomics  
ECO602 Macroeconomics  
ECO603 Econometrics and Research Methods  
ECO607 Development Economics  
ECO606 Financial Econometrics  
ECO608 Theory and Practice of Economic Policy

**Elective Courses**

**Economics**
ECO706 Monetary Economics  
ECO708 Mathematical Economics  
ECO709 Industrial Economics  
ECO710 Mergers, Acquisitions and Restructuring  
ECO711 Taxation and Business Strategy  
ECO712 Trade and Globalization

Thesis writing (6 credit hours)

**Course Structure**

**Semester One**
Microeconomics  
Macroeconomics  
Econometrics and Research Methods

**Semester Two**
Theory and Practice of Economic Policy  
Development Economics  
Financial Econometrics

**Semester Three**
Elective I  
Elective II  
Thesis Writing (6 credit hours)

*It is mandatory for research students of MPhil and PhD programs to attend at least five sessions of the Multi-disciplinary Research Seminar Series in each semester.*
MS IN EDUCATION

The MS in Education is specially designed for teachers of all levels in private and public sector institutions as well as administrators who have an interest in research. This is a two-year degree program completed by advanced coursework and research. Candidates can enroll for a minimum of two years and a maximum of four years. Coursework is offered in the first year while the second year of candidature is devoted to thesis writing. At the end of the first year, candidates are required to produce extended research proposals (approximately 2500-3000 words). Upon acceptance of a research proposal, candidates are guided to conduct research and are finally examined on the basis of defense of a thesis of an upper limit of 15000-20000 words.

Eligibility

- As per HEC policy 16 years of education in the relevant field of study with 3 CGPA or B-Grade
- Candidates must clear NTS test
- Candidates who do not have a teaching degree (BEd/MEd/Masters in Education) will have to opt for at least four deficiency courses as per the HEC policy

An MPhil student must additionally complete the following requirements:

- MPhil Proposal/Synopsis Development
- MPhil Proposal/Synopsis Defense
- BASR Approval of MPhil Proposal/Synopsis
- Continuous enrollment in supervised research
- Completion of MPhil Thesis
- Selection of External Examiner by BASR
- Open defense of MPhil Thesis
- Any other HEC requirement
- Final MPhil Thesis Submission to BASR

Course Structure

Core Courses
MPE604 Developing a Research Project
MPE608 Readings in Education
MPE610 Philosophical Foundations in Education
MPE615 Qualitative Research Methods in Education
MPE617 Statistical Testing and Inferences in Education
MPE618 Policies and Education in Pakistan

Elective Courses
MPE702 Managing Higher Education Institutions
MPE704 Strategic Management of Schools & Schools Systems
MPE705 Economics of Education
MPE706 Global Issues in Education

Thesis
MPE790 Research Thesis
PhD IN PSYCHOLOGY

PhD in Psychology is a program that promotes scholarship, research, and service at an academic level. The doctoral program is one of the highest and most prestigious degrees at the Institute of Business Management and enables faculty and candidates alike to remain current in research literature, and conduct socially relevant and competent research in specialized areas.

Eligibility

MS or equivalent graduates from HEC recognized institutions meeting the following criteria:

- A minimum CGPA of 3.00 on a scale of 4.00 (or overall 60% marks) or equivalent
- A minimum of 18 years of schooling that corresponds to MS / MPhil or equivalent degree from HEC recognized institutions in a relevant discipline.
- GRE subject specific or GAT subject test conducted by the NTS, or equivalent in the relevant discipline. A minimum of 60% (percentage) marks is required
- An interview conducted by the Institute
- All other HEC stipulated requirements

Program Requirements

PhD requires completion of course work and dissertation/thesis. Minimum duration is 3 years and maximum is 5 years:

- PhD course work requirements consist of six graduate level courses (18 credit hours)
- On completion of dissertation/thesis the student is awarded 30 credit hours

A PhD student must additionally complete the following requirements:

- Comprehensive Exam
- PhD Proposal/Synopsis Development
- PhD Proposal/Synopsis Defense
- BASR Approval of PhD Proposal/Synopsis
- Continuous enrollment in supervised research courses for meeting the full-time residency requirements
- Completion of PhD Dissertation/Thesis
- Selection of External Evaluators by BASR
- Publication of at least one paper in an ISI indexed or an HEC recognized journal or an official acceptance of the paper
- Evaluation of PhD Dissertation by two foreign faculty members from developed countries as per HEC criteria
- Dissertation/Thesis Finalization
- Open defense of PhD dissertation
- Any other HEC requirement
- Final Dissertation/Thesis Submission to BASR

PED703 Methods and Issues in Advanced Quantitative Research
PED705 Developing and Conducting Independent Research

Electives

PED810 Planning Developing and Evaluating Curriculum
PED812 Educational Policies and Organizational Development
PED814 Managing Educational Projects and Interventions
PED820 Innovations and Pedagogies in Teacher Education

PED990 Research Thesis

It is mandatory for research students of MPhil and PhD program to attend at least 5 sessions of the Multi-disciplinary Research Seminar Series in each semester.
PhD IN ECONOMICS

The PhD in Economics focuses on providing state-of-the-art teaching and research skills within the broader economics discipline. Students registering for the program should have a thorough knowledge of economic theory, technical and quantitative skill, and the ability to apply these to study economic problems. These goals are achieved through teaching, workshops, research seminars, term papers and thesis writing.

Eligibility

MS or equivalent graduates from HEC recognized institutions meeting the following criteria:

- A minimum CGPA of 3.00 on a scale of 4.00 (or overall 60% marks) or equivalent
- A minimum of 18 years of schooling that corresponds to MS / M.Phil or equivalent degree from HEC recognized institutions in a relevant discipline
- GRE subject specific or GAT subject test conducted by the NTS, or equivalent in the relevant discipline. A minimum of 60% (percentage) marks is required
- Pass interview conducted by the Institute
- Meet all other HEC stipulated requirements

Program Requirements

PhD requires completion of course work and dissertation/thesis. Minimum duration is 3 years and maximum is 5 years:

- PhD course work requirements consist of six graduate level courses (18 credit hours)
- On completion of dissertation/thesis the student is awarded 30 credit hours

Semester One
Advanced Research Methodology
Advanced Applied Econometrics

Semester Two
Development Economics
New Dimensions in Economics and Public Policies

Semester Three
Elective I
Elective II

Semesters Four to Nine
PDE850 Research Thesis

It is mandatory for research students of MPhil and PhD programs to attend at least five sessions of the Multi-disciplinary Research Seminar Series in each semester.
INTERNERSHIP AND PLACEMENT PROGRAMS
The Internship & Placement office of IoBM ensures that students get experience in highly competitive organizations. Their fresh ideas, unique perspectives and fundamental knowledge are important assets that can help shape the future of an organization. The Internship Program for interns is designed to provide students with the opportunity to work on meaningful assignments and gain real-world experience. Real-world experience is aligned to the courses studied. Such experience is of vital importance to students in two main areas:

1. **Gain Valuable Work Experience in the Chosen Field of Interest**

An internship is a great way to gain hands-on work experience, develop specific skills and knowledge as well as to network with people from the students’ chosen field. Moreover, employers assess the skills and abilities of prospective employees by evaluating their previous experience. Students pursue career-related opportunities prior to graduation, thereby, acquiring an edge over other candidates in the highly competitive job market.

2. **Decide on Right Careers Prior to Graduation**

An internship provides a more accurate picture of what individuals do in certain professions. After experiencing a particular job environment and observing what it entails, students may decide if this is the right career for them. The internship is compulsory for all MBA, BBA, and BS final year students, and has a minimum duration of six consecutive weeks. Executive students are exempted from the internship program.

**Eligibility for Internship**

<td>2.4</td>
<td>Six</td>
</tr>
</tbody>
</table>

- MBA & BBA (Honors) students having completed the Methods in Business Research (MBR) course
- The Institute selects the organization for internship for the student
- A student has to select and write a case study on an intriguing problem faced by the organization or department where the student interns and suggest workable solutions considering the courses studied
- Students are required to explain in their report how the internship enriched their learning by identifying theories and concepts studied in class and their application in relation to their experience in the organization of internship. Reports are graded as follows:

  - A - Grade = 3.89 points
  - B - Grade = 3.33 points

Grades lower than ‘B’ are considered ‘satisfactory’ and are not awarded any marks. Interns who fail to get a passing grade are required to re-write their reports.

- Reports are required to be submitted by an intern within two weeks of completion of the internship.
- All sponsoring organizations are requested to evaluate the intern’s performance on a prescribed form which is discussed with the intern so as to focus on his/her strengths and weaknesses.

IoBM lays tremendous emphasis on its close collaboration with the government, firms, banks and leading HR consultants so as to ensure appropriate induction of its graduates into such organizations. Close linkages are maintained with CEOs and Heads of Departments in organizations so as to provide the best career prospects for graduates. Efforts are made to match the talents of students with the requirements of both multinational and local organizations.

Emphasis is placed on the requirement of career fairs and seminars. These provide a meeting ground between the corporate world and graduates allowing for the provision of resumes to HR representatives and the possibility of students being selected for jobs against their requirements immediately, or at a later stage. It is important that their personal data of students remain readily available to such organizations. In career seminars, graduates are given fresh insights into the corporate world with detailed discussions on the writing of resumes and methodology in performing well during interviews.

IoBM’s Internship & Placement Department makes a firm commitment to its graduates in relation to the developing of their careers. This begins from the moment at which the student is inducted and continues with a life long partnership. We assist our graduates / alumni in finding their career paths. Some of the activities designed for placing students include, but are not limited to this:

1. **On Campus Recruitment Drives**

   The Internship & Placement Department has been able to develop strong relationships with the corporate sector by signing MoUs for both Internship & Job Placements, co-sponsoring guest lectures and seminars. As a result, companies frequently conduct on campus recruitment drives. This includes such organizations such as Unilever, P&G, ICI, GSK, Engro, etc.

2. **Publishing Annual Graduate Directories**

   MBA graduates are invited to showcase their resumes in IoBM’s bi-annual Graduate Directory. This publication is circulated to about 264 national and multinational companies and is an essential tool for being placed in the market. The Internship & Placement department recently conducted a survey to determine the efficacy of this document. It was found that 62% of the respondents were contacted for interviews and 69% of these were able to secure positions.

3. **Career Counseling**

   Guidance and counseling is an extremely important aspect of development for young adults at IoBM. With this in mind the team in the Internship & Placement Department is constantly engaged in assisting students in the entire process of preparing for and actually finding jobs for them.
4. **Guest Lectures by Industry Experts**

Recognizing the importance of networking and relationship management, the Department frequently invites industry professionals for lectures, conferences and corporate events. Our aim is to provide students with the opportunity to establish a strong and lasting contact base before graduation to ensure that they are able to get positions in the industry and business organizations.

5. **Workshops Related to Career Management**

The department has recently introduced periodic in-house workshops such as interviewing techniques, resume writing, behavior patterns in organizations, etc.

6. **Career Fair**

The department organizes a Career Fair, inviting organizations engaged in their recruitment cycle to make company presentations and answer questions from students. The department envisages this as an annual event not only for interactive sessions between students and the corporate world, but also for providing resumes for immediate employment, in case jobs are available with the organization concerned or alternatively, arranging for resumes to be kept pending by organizations for jobs whenever such an opportunity arises.

7. **Job Alerts via Group mail, Notices and Rozeepk.com**

IoBM’s Internship & Placement Department manages a database of job opportunities in the market. Students are provided opportunities through group mails, notices and an online web portal in collaboration with Rozeepk.com.

ENTREPRENEURSHIP & MANAGEMENT EXCELLENCE CENTER
ORIC / ENTREPRENEURSHIP & MANAGEMENT EXCELLENCE CENTER (EMEC)

The Office of Research, Innovation & Commercialization (ORIC)/EMEC supports IoBM’s vision of lifelong learning, as well as its long term goal of seeking AACSB’s accreditation which believes in innovation, engagement and impact. ORIC/EMEC works as a bridging unit between the university and public, private as well as international not for profit sector to engage its faculty, staff and students by commercializing IoBM’s initiatives.

ORIC/EMEC Mission

Synonymous with IoBM’s mission of lifelong learning, the work of ORIC is devoted to building the capacity of faculty, staff and management and utilizing such capacity to work on the consultancy and training projects of the corporate, private, not for profit and public sectors of the country. Under the aegis of ORIC and its capacity, IoBM pursues the following ventures:

1. Research Consultancy
2. Capacity Building Training Consultancy for NPOs
3. Proposal Writing Capacity Building for IoBM faculty and students
4. Open enrolment training programs for the corporate sector as well as IoBM staff and faculty
5. Tailor made training programs for the corporate sector as well as IoBM staff and faculty

International Union for Conservation of Nature (IUCN) Project

IoBM executed a research project “Valuation of Mangroves in PQA Indus Delta: An Econometric Approach” awarded by International Union for Conservation of Nature (IUCN). This project was done under the Mangroves for Future’, initiative by IUCN.

UNDP Research Project

A social attitude survey research project with the title “Tolerance on Factory Floors” is being executed by IoBM. This research project is awarded by United Nations Development Program (UNDP).

USAID - GEP Project

In order to strengthen the capacity of Aurat Foundation sub-grantees, ORIC/EMEC conducted ten rounds of a six day workshop of GEP (Gender Equity Program) with the support of USAID. The total number of participants trained across Pakistan was 238. Two sessions were conducted in Islamabad and one in Lahore. The training sessions started on 26th December 2016 and the project was closed on 28th February 2017. The participants were trained on Project Cycle Management, Financial Management, Gender Sensitization and Women Friendly Laws, GEP Specific Reporting, Branding & Marking Guidelines and Introducing Fundraising Techniques.
**NPO Management Course**

In order to enhance the capacity of Not for Profit Organizations in Pakistan and to bridge the gap between citizens and government to promote good governance, The United States Agency for International Development (USAID) for grant making awarded a three year, $ 45 million contract under the aegis of The Citizen’s Voice Project (CVP). This project is being undertaken by a consortium of the Trust for Democratic Education & Accountability (TDEA), The Asia Foundation (TAF), and Grant Thorton - Amjum Asim Shahid Rehman (GT-AASR).

ORIC / EMEC conducts NPO (Not for Profit Organization) Management Course training and since October 2012 to date EMEC has conducted 12 NPO Management Course trainings and has built the capacity of more than sixty participants of thirty different NPO’s across the country. The NPO Management Course is a seven day residential training program comprising five (5) compulsory and two (2) optional courses. The participants are trained in Strategic Planning, Financial Management, Monitoring & Evaluation, Compliance, Project Management, Proposal Writing, Leadership, Public Outreach, Human Resources and Admin & Procurement.
Activities at EMEC (Workshops and Conferences)

- Recruitment Interviewing & Selection, HR Diploma Module, March 2016
- Competency Based People Management, HR Diploma Module, April 2016

- Organization Change & HR Transformation, HR Diploma Module, May 2016
- Talent Management & Employer Branding, HR Diploma Module, July 2016
- International Conference on Entrepreneurial Engineering (ICEE), held on 27th – 28th August 2016
- International Conference on State of Pakistan’s Economy, held on September 27-28, 2016
- Getting Ready for the Leadership Role, HR Diploma Module, October 2016
- Performance Management, HR Diploma Module, November 2016
- Management of Contract Labor Workshop by Dr. Afaq Kazi, November 2016
- Management of Contract Labor Workshop by Dr. Afaq Kazi, January 2017
- International Conference on Multidisciplinary Engineering Research &Technology: Harnessing the Power of R&D”. March, 2017
Karachi Council on Foreign Relations (KCFR) & China Institute of Contemporary International Relations (CICIR) delegates Visit to IoBM

Members of Karachi Council on Foreign Relations with a four-member delegation from China Institute of Contemporary International Relations (CICIR) visited Institute of Business Management on Sunday, March 22, 2015 to discuss the benefits of the China-Pakistan Economic Corridor.

The meeting was hosted by Mr. Talib Karim Syed, Rector, IoBM and Corporate Member of KCFR.

IFC-IoBM Partnership

Business Edge, IFC has recently collaborated with the Institute of Business Management (IoBM) to offer courses specially for SMEs. Business Edge, an innovation of IFC, which is a world-class proprietary training solution designed to improve management capacity and business performance. Business Edge has been used to train hundreds of thousands of individuals globally. Impact studies show that Business Edge has significant impact on workplace performance, real-world application, employability, bankability, revenues, investment, and job support.

List of courses offered in this regard belong to the following categories:

- Marketing Management
- Financial Management & Accounting
- Personal Productivity Skills
- Human Resource Management
- Tourism and Hotel Management
- General & Operations Management
Pakistan Business Review (PBR)
Pakistan Business Review (PBR) is the Institute of Business Management (IoBM’s) multidisciplinary journal in continuous publication since April 1999. It is Pakistan’s first refereed academic business research quarterly. PBR is an HEC approved ‘X’ category journal. It is abstracted and indexed by the American Economic Association in the ECONLIT and the Journal of Economic Literature, USA. It is supervised by an International Advisory Board of Business Academics from national and international organizations such as the University of Malaya, the International Burch University, the University of Brescia, the University of Rostock, the University of Kelaniya, the University of Karachi, the University of Malaga, the Columbia University, the University of Chittagong, the Kathmandu University, etc. are also represented on the board. All full-time faculty members at IoBM contribute research papers on a regular basis. Pakistan Business Review is in its fifteenth year of continuous publication.

Pakistan Journal of Engineering, Technology & Science (PJETS)
In 2010, the College of Computer Science & Information Systems (CCYSIS) was asked to add value in its programs and come up with innovative ideas. The faculty of CCYSIS, after a few brainstorming sessions decided to launch a new journal to publish original research in the fields of Science and Engineering. CCYSIS started working on this project and started a bi-annual, peer reviewed, journal by the name PJETS (Pakistan Journal of Engineering, Technology & Science). PJETS is published in June and December of each year. The Editorial Board consists of two groups, the Editorial Advisory Board (EAB) and Editorial Review Board (ERB). ERB consists of scholars with good academic background and proven research interest from reputed institutes. Many ERB members are associated with universities/institutes abroad, e.g. Malaysia, US, Canada, UAE, and Oman. The mission of this journal is to promote innovative ideas and original research in the fields of Science and Engineering. This journal aims at publishing authentic research papers to create a culture of innovation and scientific development. In 2013, the HEC recognized PJETS and placed it in Z-category.

Journal of Education and Educational Development (JoEED)
The Journal of Education and Educational Development (JoEED) is a bi-annual peer reviewed journal published by the Department of Education, Institute of Business Management. It publishes local, national, and international research papers: empirical researches, action researches, case studies, research briefs, critical reviews, debates, and book reviews focused on interdisciplinary themes of education and educational development. The objective of this journal is to publish original and unpublished contributions that focus on both theoretical and applied research studies in education and related disciplines, offering diversity and variety to its readers. The journal in each issue aims through publishing different articles, case studies, book reviews, and critical reviews to present its readers with interdisciplinary themes on education and educational development. JoEED is an HEC approved ‘Z’ category Journal.

External Research
Consultancy work has been undertaken for the Federation of Pakistan Chambers of Commerce and Industry, the Aga Khan Education Service, Karachi, the Institute of Bankers in Pakistan, Deloitte, Touche International Chartered Accountants, the United Nations Industrial Development Organization, Vienna, SBP, Doha Bank FPCCI, TDAP, UNDP, the Government of Sindh. Research papers from IoBM are regularly presented at the annual meetings of the Pakistan Society for Development Economics, Islamabad.

Online Accessibility
IoBM subscribes to the Business Collection of JSTOR, an online access to a vast collection of business academic journals. It allows access to 46 multidisciplinary and discipline specified collections. In addition, the HEC has allowed us online access to almost 5000 research journals. These publications carry theoretical and applied research findings in fields such as Accounting, Business, Computing, Economics, Engineering, Finance, Law, Management, Marketing, etc. The fast internet link of IoBM provides an easy access to download articles and research reports. Students are encouraged to avail the browsing facility available on the campus. The faculty is also encouraged to use these research journals, give assignments and group discussion exercises based upon the articles of specific fields.

PERN2
IoBM is now connected with Pakistan Education & Research Network (PERN2) which is a high speed dedicated National Research & Education Network (NREN) for the universities/institutes and other academic sectors of Pakistan. This will provide students, faculty members and researchers a fully integrated and dedicated communication infrastructure using advanced Information & Communication Technologies. This NREN is being established to achieve true collaborative research, knowledge & resource sharing and distance learning. PERN2 is also aimed to have connectivity to other NREN(s) of the world including APAN (Asia), Internet2 (USA), GEANT2 (Europe), etc.
Center for Islamic Business and Finance (CIBF)

Growth of Islamic banking and financial institutions in Pakistan and around the world has increased the demand for business managers with expertise in Islamic business and finance. To address this demand, the Center for Islamic Business and Finance (CIBF) at IoBM offers specially designed certificate courses, post-graduate diploma programs and degree specializations. The center has developed a strong research culture around committed MPhil and PhD students working on state-of-the-art issues of Islamic business, Islamic finance, and economics under the supervision of highly qualified faculty. The Center organizes conferences, workshops, and research seminars to support and strengthen the research and innovation at IoBM. A specialized research group in Islamic Business, Finance and Economics led by Dr Imamuddin is now working with several students that meet regularly to discuss and deliberate on research ideas and publications.

Multidisciplinary Research Seminar Series (MRSS)

MRSS is a multidisciplinary platform where researchers share their research findings, methodologies, tools and experiences to encourage students and faculty to pursue high quality research. It helps in making research accessible and productive for scholars from different backgrounds. MRSS actively organizes weekly sessions on research presentations, case studies, research training and workshops, and motivational talks. It also facilitates in organizing open defenses and seminars for MPhil and PhD synopsis/proposals and final theses/dissertations. Over the last two years, MRSS has emerged as an interactive platform that provides opportunities to faculty, researchers, students as well as practitioners to present their researches and exchange ideas for making the research relevant to our organizations, industry and economy. The MRSS team also organizes yearly conferences such as the International Conference on Experiential Learning (ICEL).”

![Image of people at a seminar]
QUALITY ENHANCEMENT CELL (QEC)

QEC is an independent department at IoBM established in 2008 under the directive of the Higher Education Commission (HEC) and is headed by a Director. The purpose of QEC is to implement the guidelines provided by the HEC. It is also involved in planning, guiding and monitoring quality assessment and enhancement activities.

QEC has been successfully functioning over the last seven years with an excellent record and from its existence was able to contribute to the implementation of qualitative and quantitative data of several academic programs, on the basis of which HEC awarded ranking to QEC. QEC has the honor of scoring 99% in 2014. Earlier ratings varied from 85 to 96% on a yearly basis.

QEC monitors plagiarism policy provided by HEC and serves as a focal point for the implementation of HEC quality criteria. All research papers and assignments are checked by software on plagiarism and reported to HEC on regular basis.

QEC is rated very highly by the Asia Pacific Quality Network (APQN). It has received best Internal Quality Assurance Award from APQN, in its conference held in Taiwan in 2013. APQN has recognized post graduate diploma of Quality Assurance in tertiary education to be conducted to locally and internationally.

QEC is responsible for setting up Standard Application and Products (SAP) university alliance linkages with an Australian University with the help of German experts and is among the few institutions in the world to be providing SAP training to its students in the area of Supply Chain, Human Capital Management, Finance and Accounting, etc.

IoBM, in coordination with QEC, was able to get accreditation by NBEAC for its BBA and MBA programs, accreditation by Pakistan Engineering Council (PEC) for its BS-Industrial Engineering and Electrical Engineering programs, and is assisting in acquiring AACSB accreditation.

QEC is also responsible for developing policy, procedure and its revisions. HEC utilizes the services of QEC in its assessment of Institutional Performance Evaluation of other HEI’s on a regular basis. QEC is also conducting workshop on areas of quality and preparation of self-assessment reports of the programs of other institutions.
ADMINISTRATIVE AND ACADEMIC REQUIREMENTS
After completion of their MBA program all students are required to pass a comprehensive examination conducted by the Institute. The comprehensive examination provides students an opportunity to integrate, synthesize and apply the various aspects of academic achievements and overall work done in their chosen majors and the core courses studied during their MBA. Preparation for the comprehensive examination would develop a broader understanding of the significance of the major chosen by the students within the framework of their overall educational experience.

**Structure**

The comprehensive examination is of a 3 hour duration divided equally into three segments and consisting of three case studies, each of a one hour duration.

The case studies/questions are related to all majors available to MBA students.

1. To pass the comprehensive examination, a student must get satisfactory grades in one of his/her majors and in one non-major. The examination is to be conducted thrice a year in the months of January, May and September. Students will be charged Rs. 5,000 as comprehensive examination fee. Passing the comprehensive examination is a mandatory requirement for obtaining the MBA degree.

2. Students are allowed a maximum of two attempts to qualify for the comprehensive examination. A third attempt may be availed only after the Dean’s permission. The comprehensive examination is taken only after the student has completed all course requirements and attained a CGPA of at least 3.0 in his/her program.

3. A refresher course will be arranged by EMEC in the month of August for students who will appear in the comprehensive exam in September and will be conducted by faculty from within IoBM or hired from outside. Students will be charged a nominal fee for attending the refresher course.
PROCEDURE FOR SUBMITTING MS, MPhil & PhD THESIS

MS / MPhil Thesis

- Candidates must pass NTS (50% or more marks in General Exam) or equivalent test taken by IoBM / GRE
- Candidates must pass 08 courses (24 credit hours) with a minimum CGPA of 3.0. D grades will not be considered
- Qualified candidates will inform M.Phil program coordinator/ HoD to decide on a specialized area for research
- Candidates to suggest supervisor as per relevant area of interest
- BASR decision to be shared with the candidate and supervisor in writing
- Candidates to submit thesis on a CD for plagiarism (19% acceptable) check to the program BASR Office
- (Reference section to be excluded from thesis)
- After Plagiarism check, candidates will submit four copies of final thesis to the BASR
- BASR will approve the examiners’ names: 2 for Thesis Evaluation and 1 for Thesis Defense (equal number of alternative names will also be shared with the BASR) which will be provided by the supervisor
- Reports from the examiners will be directed to the respective Deans.
- Dean to submit the report to BASR for recommendations (if any)
- Final copy of the thesis to be submitted to BASR for thesis defense
- Supervisor, coordinator, respective Dean, external examiner, relevant department faculty will form the thesis defense committee.
- Candidates will defend the thesis through powerpoint presentation
- Viva report to be submitted to the respective dean
- Dean to forward the examiner’s report to BASR for the final approval of degree
- The Rector will confirm the award of the degree

PhD Thesis / Dissertation

For prescribed forms and details, refer to PhD manual for students

- Candidates must pass NTS (60% or more marks in subject exam) or equivalent test i.e. GRE or by IoBM
- Candidates must pass 06 courses (18 credit hours) with a minimum CGPA of 3.0. D grades will not be considered
- Qualified candidates will inform PhD program coordinator/HoD to decide on a specialized area for research
- Candidate to suggest supervisor as per relevant area of interest
- BASR decision to be shared with the candidate and supervisor in writing
- Candidates to submit thesis on a CD for plagiarism (19% acceptable) check to the BASR Office (Reference section to be excluded)
- After Plagiarism check, candidates submit four copies of final thesis to the BASR Office
- BASR will approve the examiners’ names: Two international thesis evaluators and one national evaluator (equal number of alternative names will also be shared with the BASR committee members) which will be provided by the supervisor
- Reports from the examiners will be directed to the respective deans
- Dean to submit the report to BASR for recommendations (if any)
- Final copy of the thesis to be submitted to BASR for thesis defense
- Supervisor, coordinator, respective dean, external examiners, relevant department faculty will form the thesis defense committee.
- Candidates will defend the thesis through powerpoint presentation
- Examiners report to be submitted to the respective dean
- Dean to forward the examiner’s report to BASR for final approval of degree
- The Rector will confirm the award of the degree
TEACHING AND LEARNING AT IoBM

IoBM has been, and continues to aim at harnessing the best researched and the most widely implemented method of dissemination of information to support excellence in teaching, learning and research. Multifaceted teaching strategies at IoBM include experiential learning, cooperative learning, directed class discussions and activities in critical thinking.

- Experiential learning methodology enables industry engagement through “learning by doing” approach. Adoption of the experiential learning in all programs is a strategic initiative of IoBM.
- The case method of instruction continues to be a significant classroom teaching strategy at IoBM so as to integrate best practices with management theory.
- Field based learning encourages students to complement their conceptual knowledge with off-campus learning experiences that deepen their understanding of business issues.
- Research based assignments under the supervision of trained faculty aim to hone the research skills of students and maximize participant-centered learning experiences by exploring specific topic of interest related to real business situations.
- Specially-designed class rooms reinforce instruction through multimedia technology.
- Understanding being the purpose of instruction, the process of assessment at IoBM is more than just evaluation. It is a substantive contribution to learning that aim to identify gaps in student learning. IoBM’s approach to learning is rooted deeply in assessment that fosters understandings and is more than an end-of -the-semester test. It informs students and faculty about what students currently understand and how to proceed with subsequent teaching and learning.

Performance Evaluation and Standards

The performance of students is constantly evaluated through surprise quizzes, hourly examinations, assignments throughout the semester, submission of term reports, presentations and final examinations at the end of the semester. The grades awarded are as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Marks</th>
<th>Grade Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>96-100</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>91-95</td>
<td>3.89</td>
</tr>
<tr>
<td>A-</td>
<td>87-90</td>
<td>3.78</td>
</tr>
<tr>
<td>B+</td>
<td>84-86</td>
<td>3.67</td>
</tr>
<tr>
<td>B</td>
<td>79-83</td>
<td>3.33</td>
</tr>
<tr>
<td>B-</td>
<td>74-78</td>
<td>3.00</td>
</tr>
<tr>
<td>C+</td>
<td>68-73</td>
<td>2.75</td>
</tr>
<tr>
<td>C</td>
<td>65-67</td>
<td>2.67</td>
</tr>
<tr>

<tr>
<td>D</td>
<td>60-61</td>
<td>1.75</td>
</tr>
<tr>
<td>F</td>
<td>&lt;60</td>
<td>0.00</td>
</tr>
</tbody>
</table>

Grade points are assigned to the given grades for calculation of the cumulative Grade Point Average (CGPA).
‘I’ Grade

The grade of ‘I’ (incomplete) may be recorded to indicate that while the requirements of a course may have been substantially completed, a small component of work (final examination) remains for a legitimate reason, to be completed and the record of the student justifies the expectation that he or she will obtain a passing grade upon completion. The instructor should be notified of the reason for the non-completion of work in order to ascertain the legitimacy of that reason and in turn to grant an incomplete grade.

In order to complete “I” grade, students must appear in the final examination in the following semester. Failure to do so will result in an ‘F’ grade. The incomplete grade is not counted in the computation of the CGPA for the semester in which the incomplete grade was permitted. The instructor assigning an incomplete grade files with the Dean a signed form indicating the reason for the incomplete grade. For detail visit the link: http://www.examination.iobm.co/

Weightage

A student can apply for Weight-age for a course after satisfying the following criteria.

If he/she misses any of the two hourly exams for a course due to a genuine reason such as, serious illness/death in immediate family or important official assignment may apply for Weight-age within a week from the date of the missed hourly paper, after submitting sufficient documentary evidence in support of his/her request. Weight-age applicability will be determined on the basis of at least 60 percent marks secured in the final exam of the course. No request for weight-age will be entertained after one week of the date of the paper.

For detail visit the link: http://www.examination.iobm.co/

Rechecking (Scrutiny) of Final Exam Script

After the final exam results have been posted, a student can apply for rechecking of his answer script in the final exam or term project if he/she has doubt about the marking of the said answer script/term project by his faculty member.

For further detail visit the link: http://www.examination.iobm.co/

Leave for Absences

A student shall apply for leave for his/her absence from class in advance duly supported with concrete evidence, for approval of Rector.

Following tables shows the approved absences for a course during a semester.

<table>
<thead>
<tr>
<th></th>
<th>Approved Absences:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Regular Semester:</td>
<td></td>
</tr>
<tr>
<td>Weekdays</td>
<td>4 days</td>
</tr>
<tr>
<td>Weekend</td>
<td>2 days</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th></th>
<th>Approved Absences:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Summer Semester:</td>
<td></td>
</tr>
<tr>
<td>Weekdays (Crash)</td>
<td>3 days</td>
</tr>
<tr>
<td>Weekend</td>
<td>2 days</td>
</tr>
</tbody>
</table>

The above absences are allowed on account of serious illness or emergencies and after approval by the Rector.

If a student accumulates more than the approved number of absences in a course, he/she will automatically be awarded an “F” grade in that particular course.

A student will not be eligible to apply for weightage or “I” grade in case the absences exceed the allowed limit.

In case of a severe condition student may apply for condoning of excess absences supported with concrete evidence to Academics Officer, who will forward the application along with evidence and attendance record duly verified by him, to Rector for approval. After Rector’s approval, the student will have to sign an attendance undertaking. For detail visit the link:

http://www.examination.iobm.co/
IoBM stands out among other universities for its special emphasis on maintaining good order and discipline among its students. It reserves the right to prescribe such regulations from time to time as may be considered expedient for effectively maintaining the highest standards of conduct. The regulations set out below are IoBM’s General Regulations for discipline.

The General Regulations provide that:

**No student of IoBM shall**

1. disrupt the activities and functions of the Institute;
2. damage any property of the Institute or of any faculty member, visitor or an employee of the Institute or knowingly misappropriate such property;
3. forge or falsify any certificate/degree issued by IoBM or knowingly make false statements concerning standing or results obtained in examinations;
4. engage in violent, indecent, disorderly, threatening, or offensive behavior or language;
5. engage in the harassment/disrespect of any faculty member, peer, visitor, employee of the Institute;
6. exhibit behavior that is inappropriate in terms of the norms and cultural values of the Institute and society in general;
7. engage in any political activity while enrolled at IoBM;
8. disrespect/disregard any guidelines/instructions prescribed by faculty and management of the Institute;
9. assist or encourage directly or indirectly any person to act in breach of the above mentioned regulations.

**No student of IoBM shall breach any regulation**

a) relating to the use of the libraries or the information and communication technology facilities at IoBM;

b) relating to conduct in examinations;

c) assist or encourage directly or indirectly any person or persons to act in breach of the above mentioned regulations.
The Disciplinary Committee

The Disciplinary Committee, IoBM, comprises a Chairman, Executive Director Administration, Academic Heads of Departments, Controller of Examinations, and other members notified by IoBM. If the Disciplinary Committee is satisfied that a student is guilty of breach of conduct it may:

1. impose a fine of such amount as it thinks fit;
2. order the student to pay compensation to any person or body suffering injury, damage, or loss as a result of the student’s conduct;
3. make an order banning the student from specified premises or facilities for a certain period or on such terms as it thinks fit;
4. rusticate the student for such period as it thinks fit;
5. expel the student;
6. ask the parents of the student to give an undertaking that henceforth their wards will not get involved in any activity warranting disciplinary action and should any such incident occur, the Disciplinary Committee reserves the right to expel him/her permanently from the Institute without even asking him/her to appear before the Committee for the consideration of his/her case.

If the Disciplinary Committee is satisfied that a student has committed a breach of the disciplinary regulations relating to plagiarism it may:

(i) exclude any part of the work submitted from assessment;
(ii) award no mark / reduce or disregard any piece of work;
(iii) permit a student to re-sit an examination or resubmit a piece of work on such conditions as it thinks fit.

Appeal / Review of the decision:

The review of the decision taken by the committee shall rest with the President, IoBM.
ATTENDANCE POLICY

Ensure 100% attendance for each course. 20% absence is permissible, only in case of illness, or emergencies. Absences have to be approved by the Management. Approval is contingent upon the evidence provided. 20% means that a student is allowed a maximum of four approved absences in a course during a regular semester and two in a course offered on weekends. If a student accumulates more than the allowed number of absences, he/she will automatically be awarded an ‘F’ grade in that particular course.

In case of a severe condition, a student may apply for condonation of excess absences supported with concrete evidence to Academics Officer, who will forward the application along with evidence and attendance record duly verified by him, to the Rector for approval. After the Rector’s approval the student will have to sign an attendance undertaking. For detail visit the link: http://www.examination.iobm.co/

DRESS CODE POLICY

Appropriate attire enhances the personality and contributes to successful nonverbal communication in the workplace.

IoBM expects its students to reflect its values & standards in every way, and especially in the way they dress and conduct themselves. This will enable them to make a positive impression and project a professional image wherever they go.

In order to achieve the above stated objectives, the following guidelines must be strictly observed:

- All clothing worn by students should be well laundered.
- Clothes should be inoffensive in terms of cuts and style, or by way of massages printed on them.
- Female students may only wear jeans provided their tops are of mid-thigh length. They should also be modest and avoid transparent materials and short lengths for sleeves and trousers/shalwars.
- Only light make-up jewelry and perfume is permitted.
- Male students are only allowed full length trousers and jeans. For footwear, they must wear dress shoes, moccasins, joggers or sandals with back straps.
- Male students should maintain proper haircuts and refrain from piercing their ears and faces.

No variation or violation in all of the above will be permitted and students doing so will be marked absent in their respective classes.
EXAMINATION NORMS

Each semester has two hourly exams (6th & 11th week) & one final exam in the 15th week. Mark distribution is explained to the students at the beginning of the semester. Traditionally 15 marks are given for each hourly exam and 40 marks for the final exam. 30 marks are assigned for quizzes and assignments. In some cases, there might be a slight variation if the concerned faculty so desires.

IoBM believes in its pursuit of excellence in providing a congenial atmosphere to the students during exams in order to get them to perform at an optimum level. However, there are certain norms which the students are expected to be aware of and observer both in letter and spirit. These norms as follows:

- Impersonation may lead to permanent expulsion from the Institute.
- Cell phones are strictly prohibited in the exam hall/room. Defying this rule may result in confiscation or a fine of Rs. 1000/=.
- Valid college ID card is mandatory for entry to the exam room/hall. There is absolutely no relaxation in this rule.
- Punctuality is most important at all times. Students are expected to check their exam location and be seated at least 10 minutes prior to the exam time. Late comers will be made to wait for 5 minutes in case of hourlies and 15 minutes in the final exam before they are allowed entry. Students arriving late by more than 15 minutes will not be allowed to appear in the exam.
- As per Institute’s policy all question papers are to be returned along with answer scripts.
- Students are required to bring their own stationary and calculators as no leading or borrowing is permitted during examinations.
- Programmable calculators or any other kind of electronic devices are strictly prohibited inside the exam area.
- Indiscipline in the exam hall/room will not be tolerated. Such cases are to be reported to the controller of examinations immediately for appropriate action.
- Possession of any written material related to the subject or communication with their fellow students will result in disciplinary action through the decision of the Disciplinary committee.

Mid-Term Policy

Students are required to take two mid-terms and one final examination. There would be no N-1 given to a student. All students must take both the mid-term exams, as the aggregate of these would be included in the final grade. The Institute does not exempt students from completing course requirements on medical grounds nor is leave granted for any personal reasons. This is to ensure the market credibility of the Institute’s teaching programs and degrees.

Policy for Course Repetition

Student failing a course twice will not be allowed to register for a third attempt. If it is a compulsory course, a second failure will lead to failure in the degree and withdrawal from the Institute.
Grade Improvement

The Institute provides an opportunity to students for improvement of their CGPA if it is below 2.5 in the undergraduate and 3.0 in the Graduate program. A student wishing to improve his grade in any course is eligible to reappear in that course with exemption in attendance provided he has secured at least C- in that course in the undergraduate and C in the graduate program. Only courses for which grades C, D or F are received may be repeated for credit. Only one repetition is permitted, unless authorized in writing by the Dean. On repetition of a course, credit hours are applied towards a degree only once.

BBA (Honors) and BS students must maintain a minimum CGPA of 2.0 on a cumulative basis in order to maintain good standing. Any deficiency should be made up in the following semester. Otherwise, the concerned student may be dropped from the rolls of the College. A CGPA of 2.5 is required for conferment of the degree.

MBA and MPhil students are expected to maintain a CGPA of 2.5 to remain in good standing. Any deficiency should be made up in the following semester; otherwise the concerned student may be dropped from the rolls of the College. The cumulative GPA should be 3.0 in order for a student to receive the degree. MBA and MS students are required to repeat those courses in which they receive F and D grades. For further detail visit the link: http://www.examination.iobm.co/

Umrah Leave

Dates of hourly and final exams are announced in the catalog well in advance for subsequent semesters. Students should not plan their personal events including Umrah during these dates. Weightage requests will not be entertained for missing hourly or final exam on such pretext.

Umrah leave of two weeks (four absences) for weekdays and (two absences) for weekend are allowable for a course on production of sufficient evidence, and are subject to the approval by the Rector. Total absences, however, should not exceed the allowed absence.

Hajj Leave

Hajj leave of three weeks (six absences) for weekdays and (three absences) for weekend are allowable for a course on production of sufficient evidence, and are subject to the approval by the Rector.

Below Good Standing Policy

As per Institute of Business Management (IoBM) Policy, admission will be cancelled on the following grounds:

- Bachelor’s students scoring a CGPA below 2.00 for two consecutive semesters and Summer Crash in an academic year
- Master’s (Regular Program) students scoring a CGPA below 2.5 for two consecutive semesters and Summer Crash in an academic year
- Master’s Weekend and Evening Program students scoring a CGPA below 2.5 for three consecutive semesters in an academic year (which includes three regular semesters)

Please note that if you have a below good standing CGPA, you cannot take semester gap/s unless approved by ED / Registrar.
Academic Dishonesty

To maintain credibility and uphold its reputation, the Institute has certain procedures to deal with academic dishonesty which are uniform and should be respected by all. Violations of academic integrity include:

- Unauthorized assistance during an examination
- Falsification or invention of data
- Unauthorized collaboration on an academic exercise
- Plagiarism

Definition of Plagiarism

Students are required to submit original work. Papers and/or projects submitted as part of a group effort must be clearly identified, with the team members specifically acknowledged. Ideas, data, direct quotations, paraphrasing, or any other indirect incorporation of the work of others must be clearly referenced to avoid plagiarism. Examples of plagiarism include:

- Direct quotation or paraphrasing from published sources that are not properly acknowledged;
- The use of other persons or services to prepare work that is submitted as one’s own;
- The use of previously submitted papers or work, written by other students or individuals;
- Misappropriation of research materials;
- Any unauthorized access to an instructor’s file or computer account;
- Any other serious violations of academic or moral integrity as established by the instructors of the Institute;
- Conduct during examinations.

Cheating is unacceptable. Examples of cheating are:

- Any written or oral communication among students during an examination
- Providing information about the content of an examination
- Impersonation by another student during an examination
- Using cell phones, programmable calculators or any other kind of electronic devices during an examination
- Using cheat sheet during an examination
- Material written on palm, hand or any other part of the body

IoBM is a no smoking campus. Any violation of this rule can lead to serious consequences. The penalty for this can amount to the extent of cancellation of registration.
ADMISSION AND FINANCE
Admission to IoBM is on a highly competitive basis, and only those who compete successfully on merit are selected for admission. They come from a variety of backgrounds. After joining IoBM, students continue to pursue their studies with a high level of competitiveness aimed at professional development. The admission criteria for the Institute’s academic programs are described below:

Eligibility for entrance to Bachelor’s Programs:

The admission for Bachelor’s Programs would be based on any one of the following:

- A Higher Secondary School (HSC) Certificate with at least *55% marks awarded by a recognized Provincial Intermediate Board
- 3 A-Levels with a minimum of *two Cs, preferably in business related subjects, excluding General Paper and Urdu or an American High School Diploma with CGPA 2.5 or equivalent
- Recognized Overseas Equivalence Diploma
- Any other qualification if an authority has issued an equivalence certificate
- IBCC equivalence will be required for A-Level and other foreign qualifications

In addition:

- Atleast 5C’s in O-Level exam or minimum 55% marks in SSC or equivalent
- Success in aptitude test and interview conducted by IoBM

*Subject to revision by the IoBM Management

Eligibility for entrance to Engineering Programs:

The admission for Engineering Programs would be based on any one of the following:

- A Higher Secondary School (HSC) Certificate with at least *60% marks awarded by a recognized Provincial Intermediate Board
- American High School Diploma with CGPA 2.5 or any other qualifications
- Any other qualification if an authority has issued an equivalence certificate
- IBCC equivalence certificate will be required for A-Levels and other foreign qualifications

In addition:

- Success in aptitude test and interview conducted by IoBM

*Subject to revision by the IoBM Management
Eligibility for entrance to two year Master’s Programs:

The admission for Master’s Programs would be based on any one of the following:

- A four year Bachelor’s degree in Arts, Science, Law, Commerce, Engineering, Medicine, Pharmacy or any other degree with high second division or equivalent from HEC/Provincial Government approved Institutes/Colleges/Universities in Pakistan.
- A final qualification examination of a professional body recognized by the Higher Education Commissions of Pakistan, for example, ACMA, CA, ACCA
- Four years overseas bachelor’s degree or equivalent recognized by HEC
- Students with 2/3-year Bachelor’s degree are eligible for MBA (3-year) program.

In addition:

- Minimum 55% marks in overall academic career in annual examination system or 5C’s in O-Level and 3 A-level with minimum 2C’s excluding General Paper and Urdu or equivalent
- Minimum CGPA 2.5 on a scale of 4 in semester system
- Success in aptitude test and interview conducted by IoBM

*Eligibility criteria is subject to revision by the IoBM Management.

Eligibility for entrance to two year MBA (Regular) Weekend Programs:

The admission for MBA (Regular) Weekend Program would be based on any one of the following:

- A four year Bachelor’s degree in Arts, Science, Law, Commerce, Engineering, Medicine, Pharmacy or any other degree with high second division or equivalent from HEC/Provincial Government approved Institutes/Colleges/Universities in Pakistan
- A final qualification examination of a professional body recognized by the Higher Education Commissions of Pakistan, for example, ACMA, CA, ACCA
- Four years overseas bachelor’s degree or equivalent recognized by HEC
- Students with 2/3-year Bachelor’s degree are eligible for MBA (3-year) program

In addition:

- Minimum one-year post qualification work experience in Multinational or domestic corporation is required (only for MBA Regular on Weekend). Candidate must be working while applying online for admission and also during the period of study. Experience in unknown or unregistered companies will not be considered.
- Minimum 55% marks in last qualification in annual examination system
- Minimum CGPA 2.5 on a scale of 4 in semester system
- Success in aptitude test and interview conducted by IoBM

*Eligibility criteria is subject to revision by the IoBM Management

Eligibility for entrance to MS Program:

It is based on any one of the following:

- Sixteen years of education in relevant field with high second division or equivalent from HEC recognized Institutes/Universities in Pakistan
  
  OR

- Four years overseas bachelor’s degree or equivalent recognized by HEC

In addition:

- Minimum 55% marks in overall academic career in annual examination system or 5C’s in O-Level and 3 A-level with minimum 2C’s excluding General Paper and Urdu or equivalent
- Minimum CGPA 2.5 on a scale of 4 in semester system
- Success in aptitude test and interview conducted by IoBM
- Candidates must score minimum 50% marks in exam conducted by IoBM
Admission Requirements for PhD Programs:

- Candidate having 18 years of education from an HEC recognized university is eligible to apply. For admission into the PhD minimum CGPA 3.0 on scale of 4 or First Division in MPhil/MS/ degree is required
- Minimum CGPA 2.5 is required for candidates having MBA or equivalent degree
- Students with HEC recognized MBA have to do at least four pre-requisite courses (HEC equivalency required)

In addition:
- Success in interview conducted by IoBM
- Candidates must pass NTS (60% or more marks in subject exam) or equivalent test i.e. GRE or by IoBM

Transfer of Credits

Students desiring credit transfer in a specific degree program will be required to submit application along with their transcripts and course outlines/descriptions soon after their admission formalities have been completed. The equivalence committee will examine such cases and decide accordingly, keeping in view the following:

- All requests must be for same level of program. Courses completed in Bachelor’s program cannot be considered for Master’s program
- Transfer application can be submitted once and in the first semester, late applications for transfer of credits will not be considered
- Student must have secured B or better grade as per IoBM grading plan in each course meant to be transferred and the course title /outline must match with IoBM course plan
- Maximum of 3 courses can be transferred in MPhil/PhD program as per the procedure mentioned above
- Courses of two semesters can be accepted in bachelors / masters program from highly reputed and HEC recognized institutes of Pakistan and abroad. However, each case will be reviewed separately and the decision will be taken considering the grades and the reasons for transfer

Re-Admission and Continuation Policy

- Students who stop attending classes at the Institute, for any reason, without informing the concerned authorities about their absence for more than one semester, their admission shall be suspended.
- Admissions can be deferred for maximum of two semesters with justification and approval of the Executive Director Admissions. Any relaxation not beyond two years is subject to approval of Executive Director Admissions.
- Students who complete their Bachelor from IoBM are eligible to register for MBA. However, if Security Deposit has been withdrawn, candidates may apply for restoration of admission to office of the Executive Director.
- Students dropped due to below good standing (for Master’s program below 2.5 CGPA and for Bachelor’s below 2 CGPA) may also apply for re-admission and to qualify both the entry test and interview.
- Students dropped out from the Institute for any reason will not be considered for enrollment as an external candidate
- On successful completion of readmission process in undergraduate and graduate program: the degree/transcript section will consider transfer of previous courses completed in IoBM based on grades and their relevancy.
- If a MPhil/PhD student has completed course work with minimum CGPA 3.00 and left with thesis may be given exemption in Entry Test if he is required to apply for readmission but to qualify panel Interview would be mandatory.
- If a MPhil/PhD student dropped due to below good standing (i.e CGPA below 2.5) or he/she is absent for more than two years and CGPA is below 3.00 may also apply for readmission and to qualify both the entry test and Interview.
- After readmission the student will follow current program structure and obsolete courses will not be considered. However, the Program Head and OGS Office may recommend transfer of previous courses having minimum C+ grades to degree/transcript section for consideration.
- MPhil/PhD students will be assigned a new enrollment/student ID on readmission.
Internal

IoBM has established a financial assistance fund for students who are unable to afford the financial costs associated with an academic program. Assistantships and financial assistance are provided to students on the basis of merit and need. Currently, about 25% of the students are receiving some form of financial aid.

External

Following external financial assistance are being provided to students:

- HEC - Japanese Scholarships
- HEC - French Scholarships
- Endowment Fund - Education Department, GOS
- IoBM Endowment Fund
- Shahjehan Karim & Family Endowment Fund
- Janmohammad Dawood Trust
- Tabba Foundation
- Endowment Fund - Shan Foods
- Sui Southern Gas Company Ltd. Scholarships

Scholarships are also available on reciprocal basis to:

- Bilkent University, Turkey
- International Burch University, Bosnia
- University of Florence, Italy
- Vytautas Magnus University, Lithuania
- Hanyang University, South Korea
- Guilin University of Technology, China
- Erfurt University, Germany
IoBM operates on a self-financing basis as a non-profit institution. All students are required to pay a one-time. CAUTION MONEY of Rs. 15,000.00 which is refundable only as per the policy.

The fee structure for various degree programs, per semester, is as follows:

<table>
<thead>
<tr>
<th>Post Graduate Programs</th>
<th>Registration Fee (1-2 Courses)</th>
<th>Tuition Fee Per Course</th>
<th>Thesis, External Examiner, Viva Voce, Exam, Supervisors and Foreign Examiner Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>MS / MPhil Programs</td>
<td>3,500.00</td>
<td>11,500.00</td>
<td>63,000.00</td>
</tr>
<tr>
<td>PhD Programs</td>
<td>5,000.00</td>
<td>12,500.00</td>
<td>270,000.00</td>
</tr>
</tbody>
</table>

The registration duration of thesis is one year (3 consecutive semesters) after 3rd semester. Students will be required to get themselves re-registered in thesis by paying registration fee and one course fee for the subsequent semesters.
Fee Refund Policy

Caution Money
- Students are eligible after completion of their respective programs to claim refund of caution money within one year from the date of convocation. The caution money is subject to forfeiture if it is not claimed within the stipulated time.
- Any amount receivable from a student for whatsoever reason will be deducted from the amount due to that student on account of caution money.
- In cases other than above, caution money is nonrefundable and nontransferable.

Tuition Fees
1. Tuition fees for courses dropped within due date (without penalty) will be transferred to the next semester and will not be refundable or alternatively, they may on written request of a student, be relocated, after due approval by the competent authority, to the account of his/her sibling in the case of an on board student.
2. Tuition Fees for courses dropped after due date (with penalty) will be forfeited.

Registration Fee
Registration fees paid is nonrefundable and nontransferable.

Fresh Entrants
If Fresh entrants after getting admission, decides to withdraw from the Institute, the tuition fees paid will be refunded as per Higher Education Commission (HEC) refund policy as outlined hereunder, provided that the application submitted is duly acknowledged by an Authorized officer of the Institute.

Provisional Admission
Students the results of whose last required qualification are awaited are provisionally admitted provided they qualify in the written test as well as interview. If such a student fails to meet admission criteria after declaration the last required results, he/she will be refunded tuition fees. If application for refund is submitted within seven days of declaration of results/grades along with a copy of result/grades. Failure to submit the refund application in time will result in forfeiture of tuition fees.

Deferment of Admission-Fresh Entrants
1. If, for whatsoever reason on the written request of a candidate the Institute defers the admission of the candidate till the next semester, tuition fee will be carried forward to the next semester. If a candidate later decides not to join, the fees so paid shall be forfeited.
2. If any candidate is allowed a second attempt to improve his/her grade/percentage of his/her required qualification in order to qualify for the admission, he/she may do so on signing of an Affidavit duly notarized. If the candidate fails in the second attempt or does not avail the opportunity of second attempt, the fees so paid shall be forfeited.
3. A candidate will remain a candidate until he is allowed to register on completion of formalities.

Dispute
In case of any dispute/disagreement regarding interpretation of any clause of the Refund Policy, the decision of the Management of the Institute would be final and binding.

ORGANIZATION
Board of Governors

The Board of Governors exercises the powers to hold, control and administer the property, funds and resources of the Institute. It also approves the Annual Report, Plan of Work, Statements of Accounts and the Annual Budget Estimates as recommended by the Executive Council. It is also responsible for ensuring the effectiveness of the Institute’s operations and the continuity and preservation of its autonomy.

Members of the Board of Governors (listed on Page 10)

Executive Council

The Executive Council is responsible for formulating and approving the principles, policies and plans governing the activities and operations of the Institute so as to facilitate teaching and other academic work. It can appoint faculty, researchers and officers on the recommendation of the Selection Board. It can also create new components of the Institute such as faculties/departments/college, and constitute standing committees, subcommittees, councils, and other administrative or academic advisory bodies, if necessary. It can undertake initiatives to ensure efficient and effective management and functioning of the Institute. It proposes plans of work for the approval of the Board of Governors.

Members of the Executive Council

- Mr. Basheer Janmohammad, Chairman
- Mr. Shahjehan S. Karim, President, IoBM
- Mr. Justice Irfan Saadat Khan
- Chairman Higher Education Commission
- Secretary, Education & Literacy Department, Govt. of Sindh
- Mr. Muhammad Ali Tabba
- Mr. Salahuddin Qureshi
- Mr. Masood Hashmi
- Mr. Talib S. Karim
- Deans of respective Colleges
- Mr. M. W. Jahangir, Secretary

Academic Council

The Academic Council is responsible for:

- Advising the Executive Council on academic matters
- Regulating the conduct of teaching, research, publications and examinations
- Regulating the admission of students to courses of studies and examinations at the Institute
- Regulating the conduct and discipline of the students of the Institute
- Regulating award of financial assistance, exhibitions, medals and prizes
- Formulating courses of study, syllabi and outlines of all examinations conducted by the Institute

External Members of the Council:

- Mr. Mazhar ul Haq Siddiqui
- Ms. Rukhsana Asghar
- Mr. Khalid M. Nagra
Board of Advanced Studies and Research

IoBM has a Board of Studies which reports to the Academic Council. It supervises teaching research and academic discipline. It has three sub-committees on curriculum, resources and discipline. External members on the Board of Studies are:

External Members of the Board:

- Dr. Muhammad Saleem
- Dr. Abuzar Wajidi

Board of Studies

The following departments exist in the Institute:

College of Business Management (CBM)

College of Computer Science and Information Systems (CCSIS)
Mathematics and Statistics, Computer Science & MIS and Actuarial Science

College of Economics and Social Development (CESD)
Economics, Commercial and Professional Studies, Media Studies, Education, Policy & Area Studies, Business Psychology, Social Sciences and Organizational Psychology

College of Engineering and Sciences (CES)
Electronics & Telecommunication

HoDs report to the Dean and the academic work of each department is governed by a departmental board of studies consisting of both internal and external members.

Foundation for Higher Education

Foundation for Higher Education was established in 1994 under the Societies Registration Act, 1860 as a non-profit institution committed to the provision of quality education in Pakistan. IoBM is the first educational institution established by the Foundation. Following are the members of the Foundation:

- Mr. Shahjehan S. Karim, President
- Mr. Sani Ahmad
- Dr. Mehtab Syed Karim
- Dr. Mussarrat Hassan
- Mr. Mohsin Furqan
- Mrs. Sabina Mohsin
- Mr. Talib S. Karim
- Dr. Ahmer S. Karim
- Mr. Mehboob Syed Karim
- Mr. Nabhan Shah Karim
- Mr. M. W. Jahangir, Secretary
FACULTY
Rector IoBM & Executive Director, Corporate Affairs & EMEC

**Talib S. Karim**, Rector & Executive Director, Corporate Affairs and Entrepreneurship & Management Excellence Center, holds a Bachelor’s degree in Systems Engineering and a Master’s degree in Economics with specialization in International Trade, both from the University of Arizona, USA. He has worked for a financial institution for ten years before joining the Institute full time in 1997. He has also taught Economics at the University of Arizona, USA and IoBM. He also attended the Oxford Advanced Management & Leadership Program at Oxford University. He is an Executive Council member of the Management Association of Pakistan and the President of Marketing Association of Pakistan and represents the Institute in various Associations nationally and internationally.

College of Business Management (CBM)

The Dean

**Prof. Dr. Irfan Hyder**, Dean CBM and CES, holds a PhD and MS from the University of Texas at Austin, USA. In addition, he holds an MBA from IBA and BE-Electronic from DCET/NED. He has a wide experience in academic leadership, consultancy, entrepreneurial ventures, trainings, teaching, research, as well as in the design and implementation of innovative programs and as a motivational speaker. He provides consultancy for entrepreneurial and personal visions, students/parental counseling and education. In his career spanning over 18 years, he has worked in leadership positions at various organizations. He was deputy director at IBA and Dean and VP of PAF-KIET. He has extensive industry consultancy experience for private and public sector organizations such as Oxford University Press, Trade Development Board (EPB), Pakistan Ordnance Factories, Pakistan Steel, Ministry of Science and Technology, etc. His entrepreneurial ventures include E-Patterns Software Solutions, Ahsan Memorial (AEF) & L2L Academy.

Advisor

**Dr. Ahmer S. Karim**, Advisor, College of Computer Science and Information Systems (CCSIS), has a PhD and a Master’s degree from Arizona State University, USA, preceded by Bachelor of Science in Finance and MIS from the University of Arizona, USA. He has over nine years of teaching experience at the University of San Diego, USA. He has published in Decision Sciences, Information and Management and also other academic conference proceedings. Dr. Karim has also published several academic books on Information Systems.
Accounting and Finance

Tazeen Arsalan, Assistant Professor and Head of Department of Accounting and Finance holds MPhil in Business Administration and a Master’s degree in Business Administration from the Institute of Business Management. She has over 16 years of experience in corporate sector and academia. She has worked for Saudi Pak Leasing, SMEDA and various reputed business schools as visiting faculty before joining IoBM as a permanent faculty. Besides teaching Accounting & Finance courses, she is also actively involved in capstone projects where she has supervised more than twelve projects related to Financial Institutions and Markets. She is a faculty advisor of Finance Society of IoBM and has been performing the duties of the Coordinator – BBA program for the last four years.

Dr. Muhammad Mahmud, Senior Fellow has served at the Institute of Business Administration (IBA), Karachi for twenty-four years in various capabilities (teaching, research and administrative). Dr. Mahmud has MBA degree from the IBA Karachi and PhD degree in Business Administration from the University of Malaya, Kuala Lumpur, Malaysia. His main area of interest is finance. He has published more than 24 articles in reputed local and International Journals. When serving at KASBIT he organized many seminars and workshops for students and faculty members. He was awarded third prize in 2002 and fourth prize in 2003 in a research essay competition by the Institute of Bankers of Pakistan.

H. Jamal Zubairi, Associate Professor of Accounting and Finance, holds a BE degree from the Dawood College of Engineering & Technology and an MBA from IBA, Karachi. He also holds a banking diploma (DAIBP) from the Institute of Bankers of Pakistan. He possesses over 30 years of professional experience, mainly as a development banker with the National Development Finance Corporation and has also worked for other leading financial institutions such as ORIX Leasing. He has taught core as well as elective courses in Accounting and Finance for over 15 years, both as visiting and full time faculty. His research interests are in the areas of Banking, Risk Management and Corporate Finance. He has presented research papers at various international conferences and has also co-authored a book ‘Financial Management in Pakistan’ which was published by Oxford University Press, Pakistan in the year 2005.

Sharique Ayubi, Associate Professor of Finance and Accounting. He holds a Master in Business Administration (MBA) from IBA, Karachi and another Master’s degree in Economics from the University of Karachi. He also holds a Banking Diploma from the Institute of Bankers, Karachi. Currently, he is enrolled in the MS/PhD program. His experience in industry has been in the National Development Finance Corporation, where he worked for 14 years. He has been teaching courses in Finance, Accounting and Management for over 12 years at various universities and business schools. His research interests are Corporate Governance; Regulation of Banking and Securities Markets; and Comparative Management.

Dr. Imam Uddin, Associate Professor of Finance and Accounting is an active academician and a researcher in the field of Islamic Banking & Finance. He has more than ten years of experience in teaching, research, product development, product management and Sharia’ compliance and has authored many books as well as numerous research papers that have been published in the International Journal of Islamic Finance recognized by the AAOIFI, IRTI, and IDB etc. He holds a PhD in Islamic Banking & Finance from the University of Karachi, doctoral degree in Islamic Jurisprudence from Jamia Darul Ulum, Karachi, LLB in International Law & PGD in Islamic Banking & Finance from Center for Islamic Economics (CIE). He has served the Islamic Banking Division (IBD) of the National Bank of Pakistan (NBP) as Vice President in the capacity of a member, Sharia’ committee.
Tauseef A. Qureshi, Assistant Professor in Finance, holds an MBA from the Institute of Business Administration. He has a unique blend of industry and teaching experience and has held senior management positions in Pakistan, USA and Canada.

Mehboob Moosa, Assistant Professor, Accounting, is a fellow member of ICMAP. He has also qualified in CA final group-II. His 30 years’ experience includes working with national and multinational companies like BOC (Pakistan) Ltd., Al-Futtaim Engineering, Dubai, Habib Group, World Group of Companies (Automobiles), Liberty Textiles, etc. as well as audit firms like KPMG Taseer Hadi, Sidaat Hyder, Rahim Jan and educational institutions of UK and Pakistani education streams.

Samina Riaz, Assistant Professor in Accounting & Finance, holds an MBA in Finance from Bahria University and MPhil in Banking & Finance. Currently, she is pursuing her PhD in Finance from Malaysia. Her research interests are in the areas of banking and risk management. She is actively involved in research & teaching and believes in fostering a learner centered environment which takes in text books and experiential learning. Her research papers have been published in various national and international journals, news papers and magazines. She has also presented her research papers at various national and international conferences. She is also a member of the Editorial Review Board of the “Journal of Emerging Issues in Economics, Finance and Banking (JEIEFB), internal reviewer board member of Pakistan Business Review (PBR) and has been a reviewer of various international conferences. She has been faculty advisor of IoBM student Finance Society for five years and organized various seminars, conferences and workshops.

His areas of interest are Quantitative Analysis for Business and Management, Statistical Inference, Advanced Quantitative Methods, College Algebra, and Calculus for Business Decisions.

Khalid Bin Muhammad, Senior Lecturer Computer Science, has a degree of Bachelor of Engineering from NED University of Engineering & Technology and is a member of Pakistan Engineering Council. He also has a Master’s in Computer Science from the University of Karachi and an MBA in Banking & Finance from MA Jinnah University with first class first position. He has proficiency in programming of languages specially Object Oriented Programming, Computer Graphics, Engineering Drawings, Computer Aided Designing, Multimedia Technologies, Relational Database Management Systems and Finance related courses. He has a mix of over thirteen years of experience working in industry including Dawlance (Pvt) Ltd and Pakistan Petroleum Ltd and also served as Manager IT.

Najmus Saher Shah, Senior Lecturer in Computer Science, holds an MCS degree and BSc (Honors) in Economics from the University of Karachi and has secured 2nd position in the department. She has three years of teaching experience.

Muhammad Waqar Khan, is Senior Lecturer Computer Science, has a Bachelor of Engineering degree from the NED University of Engineering & Technology and a member of Pakistan Engineering Council. He also has a Master’s in Computer Science from the University of Karachi and a post graduate diploma in Computer and Information Sciences from Karachi University. He is doing Master’s in Engineering from Usman Institute of Technology, Hamdard University. He has proficiency in Data Communication and Networking, Digital Communication, Programming Languages, System Analysis and Designing, Information Management System, E-Commerce, Mobile Communication System, Satellite Communication, Signal Processing, Relational Database Management Systems and communication networking related courses.

Asim Iftikhar, Senior Lecturer in Computer Science, holds a Master’s degree in Computer Science and is currently enrolled in MS program leading to a PhD. He has also done Microsoft Certified Professional Systems Engineer (MCSE). He has eight years of teaching experience in computer related courses. His areas of interest include Digital Communications, E-commerce & Web Development and Graphics Designing.

Sobia Younus, Senior Lecturer, Computer Science, holds an MSC in pure Mathematics and BSC Honors in Mathematics from the University of Karachi. She is currently enrolled in an MS program leading to PhD Mathematics from KU. She has two international publications in the International Journal of Applied Mathematics and Mechanics, India. She has also taught at NUST as visiting faculty.
Syed Mubashir Ali, Lecturer of Computer Science and MIS holds a Bachelor’s degree in Computer Engineering from FAST-NUCES Karachi and a Master’s degree in Information Technology from SZABIST Dubai. He is currently pursuing his PhD in Computer Science from IoBM. Prior to joining IoBM as a full time lecturer, he worked as an IT Administrator and Computer Teacher at American International School, Dubai. He has published 10 research papers in various national and international conferences and journals. His research interests are in the areas of Information Technology Standards, Electronic Commerce, Big Data, Ubiquitous Computing, Internet of Things and Gamification.

Azam Hashmi, Lecturer, holds a Master’s Degree in Statistics from Karachi University and a Master’s Degree in Business Administration from Institute of Business Administration. He has passed ISO 9000 Lead Auditor Course conducted by the British Standard Institution. He has attended six-week management training program at Ashridge Management College, England. Prior to joining IoBM in 2002, he was working at a public sector Management Training and Development Institution. He has over 30 years of experience in teaching training and management consulting services. Presently he is teaching Statistics and Mathematics courses to BBA (H) and MBA students.

Mathematics and Statistics

Dr. Syed Iftikhar Ali, Senior Fellow with the rank of Professor, holds MS and PhD from England. He has a vast teaching experience and has worked for SUPARCO, University of Benghazi (Libya), FAST Institute of Computer Science (Karachi) and Yanbu Industrial College, Saudi Arabia. He is a chartered Physicist and Member of Institute of Physics (London). His main interests are in the areas of Mathematics, Physics and Numerical Analysis.

Dr. Massarrat Ali Khan, Senior Fellow with the rank of Associate Professor holds an MSc in Statistics majoring in Operations Research from the University of Karachi, MBA from IBA and a PhD from Hamdard University. He has 16 years of professional experience in private sector industries in Pakistan and abroad in which he worked with companies such as Philips Electric Company of Pakistan, Al-Futtaim Group of Companies, Juma Al Majid Establishment in UAE and NMC(National Management Consultant) Pakistan. He also has more than 19 years teaching experience in different universities and colleges. He taught at IBA, Hamdard University, ICMAP, Bahria University, CAMS, Textile Institute of Pakistan and has been associated with IoBM for 14 years as visiting faculty before joining the Institute on a permanent basis. He has conducted several marketing research and business development studies in Pakistan and abroad. His areas of interests are Operations Research for Management, Operations and Production Management, Quantitative Analysis for Business and Management, Statistical Inference and Mathematics.
Laiq Muhammad Khan, Senior Fellow, Statistics, holds an MSc in Statistics from the University of Karachi. He has over 35 years experience of teaching Statistics. His research interests are Statistical Modeling and Inferential Statistics. He has published research work in many national journals. He has taught as visiting faculty at FAST, Institute of Computer Science for the period 1995-2001. He has been associated with IoBM as visiting faculty since August, 2000.

Dr. Tajuddin Islamuddin is an Associate Professor at IoBM since September 2014. He received his PhD in Statistics from the University of Windsor, Canada in 1984. He has taught for about 8 years at the University of Karachi and IBA and over 30 years outside Pakistan. He received number of merit scholarships throughout his academic career. He has to his credit a number of publications in reputed international journals and has developed a new measure of skewness. He has refereed a number of papers for well known international journals.

Dr. Muhammad Danish, Assistant Professor, Mathematics, holds BS in Computer Science from Petroman Training Institute, MSc in Mathematics from Federal Urdu University and PhD from Lahore University of Management Sciences. He has taught at Lahore University of Management Sciences, Lahore School of Economics and University of Punjab prior to joining IOBM. Dr. Danish has several publications in leading international journals.

Wajahat Ali, Senior Lecturer in Mathematics, has an MSc from the University of Karachi. He has been involved in research and teaching in Mathematics and Statistics.

Rizwan Ahmed, Senior Lecturer in Mathematics and Statistics, has done his MSc in Statistics and MPA (Finance) from the University of Karachi. He has also done his MAS (Applied Economics) from Applied Economics Research Center, University of Karachi. He has six years of teaching experience at various institutes. His areas of interest are Quantitative Analysis for Business and Management, Statistical Inference, Macroeconomics, Mathematical Economics and Business Finance.

Hina Samreen, Senior Lecturer in Mathematics holds an MSc in Applied Mathematics and Master’s in Applied Economics from the University of Karachi. She has been actively involved in research related work and assisted Pakistan Institute of Education and Research in the development and preparation of various policy papers in labor management and allied subjects.
Sumaira Khan, Senior Lecturer in Mathematics department has an MSc in Applied Mathematics from Karachi University. She is currently enrolled in an MPhil program leading to a PhD in Operational Research at Karachi University. She has taught at NUST and Iqra University. She is the member of Review committee for the First National Conference on Islam and Scientific Research held at FAST-NUCES.

Attra Ali, Lecturer in Mathematics, has an MSc in Mathematics from Federal Urdu University. She received 3 gold medals, for departmental position, being the highest achiever in the university. A BSc (Hons) in Mathematics from Federal Urdu University. She joined IoBM, after teaching for 2 years at NUST Karachi campus. In addition, she has done an Educational Development course from PNS BAHADUR and actively attended many workshops related to teaching and education.

Logistics and Supply Chain Management

Muhammad Moin Uddin Ali Khan, Senior Fellow & Head of Supply Chain Management has BSc and BE degrees from the University of Karachi and MS in Engineering from the University of Missouri, USA. He has been trained in the fields of Operations Management, Quality Assurance, Environmental Management, Supply Chain Management and Technology Management from USA, Japan, UK, South Korea, Sweden, Russia, Brazil and Australia. He has been associated with industry and education for over 34 years. He is a certified lead Auditor ISO 9000 QMS and is actively involved in developing Quality Enhancement activities at IoBM in close coordination with the HEC of Pakistan. His research publications are in the areas of advanced materials and has been guest speaker at American and Malaysian Universities.

Kashif Shafiq, Assistant Professor in Supply chain and logistics Management holds a master’s degree in supply chain and logistics management from university of Warwick, United Kingdom. He holds MBA degree from the Institute of Business Management. He had more than eight years international industrial experience in the field of supply chain and has been a certified supply chain trainer in Europe and Pakistan for the last five years.
Actuarial Science and Risk Management

Dr. S. M. Aqil Burney is a Professor at and Head of AS & RM Dept. He hold an MSc (Statistics), an MPhil (Risk Theory and Insurance -Statistics) from the University of Karachi (UoK) and a PhD (Mathematics) from the Strathclyde University, Glasgow-UK along with many courses he has done in Population Studies of UN and Computing. He has taught for more than 45 years at UoK and extensively delivered lectures at other institutions and universities of Pakistan and abroad. He has also had extensive experience of academic management and organization as Provost, HoD Computer Science for 10 years, Registrar, Project Director Development of Computer Science and Institute of Information Technology and founding Director of Main Communication Network of University of Karachi. He was Meritorious Professor and Head at Dept of Computer Science, University of Karachi, prior to joining IoBM. He has published more than 140 research papers and 7 books nationally and internationally in ICT, Mathematics, Statistics and Computer Science. He has supervised more than 12 PhD and 5 MS/M.Phil in Mathematics/Computer Science/Statistics as approved HEC Supervisor. He has more than 496 citation on his research work and frequently delivers lectures on ICT/CS/ASRM and Data Science. He is Chairman(elect) National ICT Committee for Standard PSQCA- Ministry of Science & technology Govt. of Pakistan and member National Computing Education Accreditation Council (NCEAC)at HEC , Member IEEE(USA), Member ACM(USA) and was Fellow Royal Statistical Society UK).

Sohail Ahmed Khan, Assistant Professor holds an MS in Finance (specialization: Financial Mathematics) from Germany and also holds MSc in Applied Mathematics from University of Karachi. He has worked for five years at P3 Communication GmbH and LogicaCMG GmbH & Co. KG in Germany. He has also served as cooperative lecturer at the department of computer science, University of Karachi. His research interests encompass Computational Finance, Application of Methods from Financial Mathematics in Insurance, Interest Rate Modeling.

Steve James, Assistant Professor in Actuarial Sciences & Risk Management, joined the Institute in August, 2013. He holds an MS in Financial Mathematics from Technical University Kaiserslautern, Germany. He has more than 5 years of teaching experience at PAF KIET. He has also worked at Daimler (Germany).

Mushtaq Ahmad Khan Barakzai holds MS in Actuarial Science from Heriot Watt University, UK. He also holds a Master’s degree in Statistics from University of Peshawar, Peshawar. He is also a member of the Society of Actuaries, USA and Institute and Faculty of Actuaries, UK. He has a mix of professional and teaching experience. He has worked at the prominent organizations of the country such as Ministry of Finance, Securities & Exchange Commission of Pakistan and State Bank of Pakistan in the capacity of Senior Actuary, Assistant Director Insurance and Statistical Officer respectively. Before joining IoBM, he was working as Actuary at Ministry of Finance. In addition to his professional work, he has taught courses of Actuarial Science & Risk Management at University of Karachi and University of the Punjab. He has a great interest in carrying out research in the field of Actuarial Mathematics and Risk Management. He is also a PhD Scholar at IoBM.
College of Engineering and Sciences (CES)

The Dean

Prof. Dr. Irfan Hyder, (See Profile on Page No. 200).

Electrical Engineering & Telecommunication Management

Seema Ansari is the Head of Electrical Engineering Department. She is a PhD scholar in Telecommunication Engineering at the University of Malaga, Spain. She did her MS-CS / Telecommunication from University of Missouri Kansas City, USA and B.E. in Electronics from NED-University of Engineering & Technology. Her research includes publications in JCR Impact factor journals, international journals & Conferences and book chapters. She contributed chapters in books titled: “Wireless Sensor Networks and Energy Efficiency: Protocols, Routing and Management” and “Handbook of Research on Trends and Future Directions in Big Data and Web Intelligence,” both published by IGI GLOBAL, USA in 2011 and 2015 respectively. She is associated with the R & D research groups, TIC102 and TIC128, ETSI Telecommunication, University of Malaga Spain. Her research area is Underwater Communications, Analytical Analysis of MAC protocols for Underwater Acoustic Wireless Sensor Networks.

Dr. Muhammad Imran Majid Associate Professor holds a BSc in Electrical Engineering from UET Lahore an MSc in Space Engineering from Umea University, Sweden and a Commonwealth PhD in Electrical Engineering from University of Surrey, UK. He has worked at various international telecom small satellite and high tech entities as well as in University of Toronto, Canada. He was elected as Founding Regional Coordinator for Asia Pacific, Space Generation Advisory Council (1999-2008) and helped set up various engineering entities including IET on Campus, Surrey (UK), IET Karachi amongst others. He joined the Institute in August 2016 and currently teaches Communication System, Opto-Electronics, Project Management and coordinates MS Thesis for MS in Engineering Management.

Engr. Dr. Zeeshan Shahid has a PhD and MSc degrees in Electrical and Electronics Engineering from International Islamic University Malaysia. He obtained his B.E from Usman Institute of Technology (UIT). He has published number of research articles in high quality international scientific journals and conference proceedings. He has numerous years’ experience in industrial and academic field. His research interest is in power engineering specialized in grid-tied inverters, multi-level inverters, DC-DC converters, Integration of renewable energy sources (RES) with utility grids and Power quality improvement.

Dr. Bilal A. Siddiqui, Assistant Professor in Electrical Engineering, obtained PhD in Systems Engineering (Controls and Instrumentation) and MSc in Aerospace Engineering both from King Fahd University of Petroleum and Minerals in Saudi Arabia, and Bachelor’s in Mechanical Engineering from NED University of Engineering and Technology, Karachi. He has previously been an Assistant Professor and Deputy Head of Mechanical Engineering at DHA Suffa University, the Director of Aircraft Engineering at Saudi Aerospace Technologies and as an Assistant Manager at Space and Upper Atmosphere Research Commission of Pakistan. He is founder and CEO of AeroX, a startup in aerospace systems in Pakistan. He is the developer of the first hybrid rocket engine in Pakistan, the third in Asia. He has taught Digital Image Processing, Machine Design, Measurements and Instrumentation, Numerical Analysis, Aerodynamics, Introduction to Computing and Programming, Linear Control Systems etc.

Osama Mahfooz, Lecturer, Electrical Engineering, holds an MBA degree in Telecommunication Management from the Institute of Business Management and BE degree in Electronics from the PAF-Karachi Institute of Economics & Technology. He has completed a CCNA Exploration certification from Aptech. He also has four research publications in journal recognized by HEC that is PJETS (Pakistan Journal of Engineering Technology & Science).
Industrial Engineering

Dr. Shahid Amjad, is a Professor and Head of the Department, Industrial Management. 
(See Profile on Page No. 205)

Dr. Mohammad Irshad Khan, Senior Fellow of Industrial Engineering with the rank of Professor, holds a PhD degree in Chemical Engineering and a Postgraduate Diploma from University of Bradford, UK. He has over 30 years experience of Industry and Management and is a registered consultant of the Islamic Development Bank, Jeddah and SMEDA, Pakistan. He is a professional member of Institute of Industrial Engineers, USA.

Mukhtar Ahmed, Senior Fellow, Industrial Engineering, has MS (Mechanical Engineering) from the University of Southern California, Los Angeles, USA and BE (Mechanical Engineering) from NED. He has teaching experience of almost 23 years and started his teaching career with NED where his last appointment was as Associate Professor. He also went to Zimbabwe, Harare Polytechnic as Lecturer. He has 4 years working experience with Roti Corporation of Pakistan as Deputy Manager, Technical.

Fahad Bin Abdullah, Senior Lecturer Industrial Engineering, holds an MSC From University of South Bank-London. He has specialized in Mechanical Engineering Management, Robotics and Simulations, Advanced Materials and Advanced Human Machine Designing. He holds a BE Mechanical Engineering Degree from NED University. He has the Project Coordination and Maintenance Engineering experience mainly related to field of Mechanical Engineering & Management.

Falak Shad Memon, Senior Lecturer Industrial Engineering, holds an MBA degree from Institute of Business Management. She has done BE (Industrial & Manufacturing) from NEDUET. She also has six years of industrial experience as a head of production and purchase department. She is a certified ISO lead auditor and possesses expertise on SAP in PP, MM and CO module.

Saima Mohsin, Lecturer, holds M.E degree in Industrial Management from NED University of Engineering and Technology. She has done BE in Industrial and Manufacturing Engineering from NEDUET. She has six years of combined professional and teaching experience with reputable organizations. Her area of interest is Supply Chain Management.
College of Economics and Social Development (CESD)

The Dean

Dr. Shahida Wizarat, Dean of College of Economics & Social Development and Head of the Department, Economics is an independent economist and has been involved in research, teaching and administration. Her areas of interest are industrial economics focusing on industrial productivity, its determinants; concentration and profitability; development economic issues; economic policies; debt and its management. She is the author of forty five research papers and articles published in journals of international repute in Pakistan and abroad. She has organized, attended and read papers at several international and national conferences. She earned an MA in Economics from Vanderbilt University, USA and her PhD in Economics from the University of East Anglia, Norwich, England. She has served as the Editor of the Pakistan Journal of Applied Economics and Director of the Applied Economics Research Center, University of Karachi. She has also served on the Board of Directors of the Karachi Stock Exchange. She is also on advisory boards and research councils of several organizations and universities.

Commercial and Professional Studies

Sartaj Qasim, Head of the Department of Commercial and Professional Studies is a qualified Chartered Management Accountant (FCMA) from England. He is a Fellow Member of the Chartered Institute of Logistics and Transport (FCILT, U.K). He did his MBA from the Institute of Business Administration, Karachi, and was awarded the MBA Gold Medal, BSc (Hons) in Mathematics First Class with Distinction from Karachi University. He is currently enrolled as a candidate for MPhil (Business Management) at the IoBM. He had over thirty years of experience in international aviation financial management prior to joining IoBM in 2011. He has been posted in the Netherlands and Saudi Arabia as Head of Finance. He has travelled extensively to several countries in Europe, North America, Asia and Africa on official assignments. He holds several airline industry qualifications from IATA including the IATA/UFTAA International Travel Consultant Diploma. His area of research is airline service quality. He has conducted several training courses in airline finance and accounting for middle and senior management levels.

Abdul Jabbar Kasim, Senior Fellow, Commercial and Professional Studies brings a rich blend of corporate, professional and academic experience. Besides heading listed leasing companies as a CEO and member board he has taken seats as nominee director on various Corporate Boards. He obtained his BCom from University of Karachi and went to IBA Karachi to earn his BBA (Hons) and MBA degrees. His main emphasis during the last several years is on Corporate Governance and Best Business Practices and Corporate Affairs. His articles on the said subject appear in the Daily Dawn and Business Recorder. He joined IoBM as a full time faculty in October 2011.

M. Rashid Jamil, Senior Fellow, Commercial and Professional studies did his MBA from the Institute of Business Administration, Karachi. He has almost thirty years of experience in international aviation financial management. He was permanently posted as Finance Manager at Manila, the Philippines. He has traveled widely concerning official assignments in Europe, America and Asia. Besides educational qualifications, he holds a Diploma in Cargo Proration from Geneva, Switzerland. In addition to aviation finance he has experience in financial analysis of different projects in public and private sectors. He has been teaching several courses in airline finance and accounting and has been a visiting faculty at IoBM since 2015. He joined as Senior Fellow Commercial and Professional studies on January 12 2016.

Shayaan Essa is an English qualified barrister called to Lincoln’s Inn, with experience advising in corporate and commercial legal matters in the UAE and Pakistan. Shayaan is currently legal adviser to IoBM and senior lecturer for law at the institute.
Economics

Dr. Shahida Wizarat, is a Professor and Head of the Department, Economics.
(See Profile on Page No. 220)

Muhammad Ajaz Rasheed, Assistant Professor, Economics, earned his MPhil in Economics from the Institute of Business Management, an MAS (Applied Economics) from Applied Economics Research Center (University of Karachi) and MSc (Statistics) from the University of Karachi. He has 20 years professional and teaching experience in the area of Statistics, Economics and Computer Science. He has taught at the University of Karachi and University of Balochistan. He has worked with Social Policy and Development Center as a researcher. His research primarily focuses on Macro-Economic Modeling and Monetary Economics. He has published research papers in national and international journals. He has also contributed to the Sindh Economic Survey. He has been a member of FPCCI's standing committee on research and development from July 2005 to June 2007.

Mirza Aqeel Baig, Assistant Professor, Economics has an MPhil in Economics from the Institute of Business Management, MAS in Applied Economics from AERC, University of Karachi and a Master’s degree in International Relations. He has over ten years teaching experience at various business institutions. His research interests are in the areas of Monetary Economics and Macro Economics. His research papers have been published in PBR and journals of the Statistics Department of the University of Karachi. He has also contributed papers in the Sindh Economic Survey and the 2nd international Sindh Conference at IoBM.

Dr. Ayesha Shoukat, Assistant Professor, Economics has a PhD in Political Economy from the University of Malaya, Malaysia. She has multi-craft experience in Teaching, Research and Management. She has been associated with public and private sector higher education institutes for the last 16 years. To provide quality education services to her community she believed in continuous growth and knowledge up-gradation. For it she continuously, kept improving her personal academic portfolio and secured her first Master’s degree in Economics and the next in Business Administration with marketing specialization, along with an MPhil in Business Finance from Bahauddin Zakariya University Multan. Because of her diversified academic background and teaching experience, she is interested in research in political, social and business oriented domains. Her specialization is in qualitative research. She has represented Pakistan in many international conferences and achieved best paper/presenter awards. Her thesis is on Power reconfigurations and Enterprise development in Pakistan.

Dr. Shujaat Abbas, Assistant Professor Economics, holds a Bachelor’s degree and Master’s degree in Business Management with specialization in Finance, from Federal Urdu University of Arts, Sciences, and Technology, Pakistan, and PhD degree in Economics with specialization in International trade and development issues from the University of Karachi. He has worked for the University of Karachi as adjunct faculty for one and a half year before joining the institute as a full-time faculty in 2016. His areas of research interest are international trade and finance, open-economy macroeconomics, and international political economics. He has published various research articles in reputed national and international refereed journals. His research aim’s to address international economic issues of developing and least developed economies.

Ch. Sohail Ahmed, Senior Lecturer, holds an MSc (Statistics) from KU, MPA from IBA, and MAS (Economics) from Applied Economics Research Center, Karachi. He also holds PGD (Computer Science) from the University of Karachi. His research primarily focuses on International Trade and Econometrics. He is pursuing his MPhil Degree in the area of International Trade. He has served for 18 years of at various public and private academic institutions.
Muhammad Zubair, Senior Lecturer in Economics, holds Master’s degree in Economics & Finance from the University of Karachi. He has also secured his post graduate diploma in Economics & Finance and BA (Hons) with Economics and statistics from University of Karachi. He is also enrolled in MPhil at IoBM. He has experience of four years of Broadcasting with Radio Pakistan in the capacity of Business anchor and reporter covering economic policy and stock market etc. He is contributing regularly his article on economic issues in renowned newspaper Express Tribune for two years.

Sadia Mansoor, Lecturer in Economics, holds MAS Economics from the Applied Economics Research Center (AERC) and MSc Economics from the Quaid e Azam University (QAU), Islamabad. She has been working with IoBM for last one and a half year. She has also worked for two years as Lecturer and Economist in different private academic Institutions. She is currently doing her MS Economics from IoBM and her area of interest and research is Financial Economics. She did her MSc thesis on Determinants of Suicide in Pakistan which had been first ever empirical study in Pakistan.

Irfan Lal, Senior Lecturer in Economics is currently enrolled in MPhil Program at IoBM. He has done MAS from Applied Economics Research Centre, University of Karachi and Master’s (Economics), University of Karachi.

Sabeen Anwar, Lecturer, holds MAS (Applied Economics) from Applied Economics Research Center (University of Karachi) and MSc (Hons) from the University of Karachi. She has four international publications. Her MPhil (Economics) is in progress from IoBM.

Zia Ullah, Lecturer holds Master in Applied Sciences (MAS Economics) from the Applied Economics Research Center University of Karachi and MSc in Economics from Quaid-i-Azam University Islamabad. His research areas include International Economics and Macroeconomics.
Education

Prof. Dr. Nasreen Hussain, Chairs the Education Department. She is also the Editor-in-Chief of the Journal of Education and Educational Development published by the institute. Dr Hussain brings to academia over 35 years of diverse teaching, administrative, research, and consultancy experience. She has edited books as well as written articles and book chapters. Dr Hussain is the External Moderator for the University of Cambridge and has received British Council, Hornby Trust, USIS, USAID, Aga Khan University, and Aga Khan Development awards to pursue her academic career and research projects at national as well as international levels in diversified areas. Her forte is in qualitative research methods with a special focus in field research. Inter alia, her specialization includes teacher education, strategic planning / educational planning, leadership development, and organizational learning.

Dr. Muhammad Abid Ali, Assistant Professor in Education, earned his PhD in Education Administration from International Islamic University Malaysia, and MBA in Human Resource Management and Finance from Pakistan Institute of Management. He has 30 years of administrative experience at higher management levels. He is qualified lead auditor ISO quality systems. He is initiator and founder member of two educational research institutes and is actively pursuing the cause of education reforms at different platforms. His areas of specialization are designing and development of education on Iqbal’s educational thought and philosophy.

Dr. Shelina Bhamani completed her PhD in Education, specializing in early childhood and program monitoring from the Institute of Business Management recently. She is currently working as an Assistant Professor at the Dean’s office at College of Business Management in capacity of accreditation and quality enhancement. Also, she is Editor of International Journal of Childhood Studies, IoBM and Assistant Professor in Dept of Education. In the past, she has been associated with USAID, Aga Khan Development Network and City District Government, Karachi in various education project capacities. She has published her research in various national and international journals and has presented her work in quite a few international conferences. Her areas of research interest lie in Qualitative research, advocacy, ECD and Program quality assurance and monitoring and evaluation.

Sarwat Nauman, Assistant Professor in Education, holds an MA in English Literature from the University of Karachi. She has successfully completed her MPhil in Education and in now a PhD scholar at the Education Department, IoBM. She has a teaching experience of 11 years and has been associated with various universities. She also holds the position of the sub-editor for the Journal of Education and Educational Development which is published biannually by the Department of Education.

Samer Iqbal, is a Junior Lecturer and Coordinator, Journal of Education and Educational Development (JoEED). She earned MBA in Educational Management from IoBM and Masters from the University of Karachi. She is currently pursuing MPhil in Education from IoBM. She has been involved with different educational projects, especially with the British Council and Intel Education Program as a master trainer. She has been awarded Intel Education Award and secured 2nd position in overall Sindh. She has been awarded as the Best Teacher, Best Coordinator and the Most Active Teacher in different educational settings. She has research interests in ICT in education, marketing education services, and management.
Center for Policy and Area Studies

Dr. Talat A. Wizarat, Professor and HoD, Center for Policy and Area Studies holds PhD Degree from University of Karachi and Master’s in Government and International Studies from the University of South Carolina where she went on Fulbright Hayes Scholarship. Her first Masters in International Relations is from the University of Karachi. She served as Professor at the Department of International Relations at KU and at the Department of Social Sciences and Liberal Arts at IBA Karachi. Dr. Wizarat has been part of several track-II channels including Nimrana Dialogue of which she was a regular member for several years. She has contributed over thirty research articles to renowned journals and has also contributed chapters to books and edited two books on Middle East and South Asia. She is regularly invited to evaluate research papers for various journals. She is also invited as guest speaker by various TV and radio Channels and has also been invited by NIM and various other staff colleges and other centers of higher education. Her areas of interest include track-II diplomacy, conflict Resolution and crises Management, South Asia, Middle East and Political geography.

Dr. Ghazala Aleem, Assistant Professor, is PhD in Islamic Studies from Karachi University and is a certified Arabic teacher. She has completed Masters in Islamic Studies and Arabic, and BEd from Karachi University and DHMS in Homeopathic Medical System. She has also worked as faculty of medicine at Hamdard University. In addition, she has taught at several other places before joining IoBM. Moreover, she has also worked as a freelance journalist with Daily Jang and other magazines.

Urfi Khalid, Senior Fellow in Pakistan Studies, holds an MA in Physical and Political Geography from the University of Punjab, Lahore. Prior to her current assignment, she was associated with Institute of Business Management as visiting faculty since 1997. She was teaching at various levels in international institutions in the Middle East before joining IoBM. Her research focus is on gender issues in the economic development of Pakistan. Her research paper has been published in Pakistan Business Review, April 2011. She presented her paper on Gender Issues of Pakistan Textile Industry at the seminar on “EU Trade Concessions to the Textile Industry of Pakistan” held at IoBM. She has attended various conferences and seminars held at Karachi University and IoBM.

Syed Hasan Habib, Senior Fellow, Center for Policy and Area Studies, holds a Master Degree in Science. He has worked four years in chemical process industry before joining Central Superior Services in 1983. He joined Foreign Services in 1986. He attended the Chinese Language Course from Beijing University of Language and Culture (1989-91). In his over 30 years of diplomatic career, he had worked in different capacities at Pakistan’s foreign missions in China, Iran, The Netherlands, Morocco, Switzerland, Chengdu (China) and North Korea. Also he has been Pakistan’s representatives at several international organizations and conferences. He remains deeply involved in Chinese and North Korean affairs. He is part of several local and international bodies in social and international affairs.
Business Psychology

Dr. Nadia Ayub, Head & Associate Professor, completed Post-doctoral Fellowship from School of Psychology, University of Queensland, Australia, and earned a Doctor of Philosophy in Psychology from the University of Karachi, Pakistan. She is HEC approved PhD Supervisor and supervising number of MPhil & PhD thesis at IoBM. Her research focuses on identity issues in adolescents, organizational issues, family and marriages, cross-cultural psychology, educational psychology, and Psychometrics. She has published more than 20 journal articles, presented research papers at Harvard University in 2012 & 2013 and around the world, served on the editorial boards of International Journal of Psychological Studies, Journal of Pakistan Psychological Association, Universal Research Journal, and Pakistan Business Review. She has worked on research project on Community Health Sciences at the Aga Khan University and Hospital. She is the member of HEC National Curriculum Revision Committee of Psychology. She is recipient of Group Study Exchange Program Fellowship 2011 for Pennsylvania, USA, hosted by the Rotary Foundation International. She received International Education Faculty Achievement Award from the International Association of University Presidents for 2014 and HEC Best University Teacher Award for 2011. She has visited Caucasus University, Tbilisi, Georgia in 2014 on Leadership Development for Higher Education Reform (LEADHER) project funded by International Association of University Presidents.

Dr. Linah Askari, Associate Professor Psychology, is a psychologist with vast academic and professional experience of behavioral, organizational, clinical and business psychology spanning over 18 years. She holds a PhD in Psychology from the University of Karachi and was awarded gold medals both in MSc Psychology and Post Magistral Diploma in Clinical Psychology from the University of Karachi. She is a recipient of ‘Star Laureate Award’ in 2006 from ‘Who’s Who in Pakistan’. She has introduced the latest ‘Attitudinize Psychotherapy’ recognized internationally through paper presentations at conferences and research publications. She is also the co-editor of Handbook of Counseling and Psychotherapy in an International Context.

Dr. Syed Shameem Ejaz, Assistant Professor, earned a Doctor of Philosophy in Psychology in 2011 from the University of Karachi, Pakistan. He has been practicing Psychology for more than 18 years as psychotherapist, researcher, and educator in and outside Pakistan. He was the only member of QRCA-USA from Pakistan in 90’s. He wrote books on research writing and diversity. Dr. Ejaz is a professional software designer; it defines his personal research interest well i.e., artificial intelligence and emotional machines. He has designed several psychological and analytical software. He likes to write about person–environment integration, issues, and reform.

Falak Zehra Mohsin, Senior Lecturer holds an MPhil degree in Organizational Psychology from the Institute of Business Management. She has previously worked as visiting faculty in one of the private universities of Karachi. Her research focuses on Psychometric Testing, Social Psychology, Personality, Gender Roles, Gender Perspective, Family, Marriages and Relationship dynamics, Interpersonal Psychology, Socio-Cultural Psychology, Attitudes and Emotion and Educational Psychology. She has presented her research in various national and international conferences and her work has been published nationally and internationally in different journals. Additionally, she was part of the organizing committee for the Third Annual Conference on Industrial and Organizational Psychology: Better Organizations through collaboration in Education, Research and Practice and the Women in Development Conference. She has worked as a counselor in clinical organizations as well as at underprivileged schools and continues to be associated with different welfare programs in the society.

Tehzeeb Sakina Amir, Senior Lecturer, is currently a PhD scholar, University of Karachi. She completed MPhil in Psychology, University of Karachi in year 2014. She secured first class first position in her masters in Organizational Psychology. Her research focuses on Organizational dynamics, Consumer Psychology, Psychometrics, and Human Factors at work place. She has published two papers with few in reviewing process. She is on the editorial board of Pakistan Business Review and Journal of Education & Social Sciences.
Islamic Studies / Philosophy Unit

Asad Shahzad, Assistant Professor in Philosophy Unit, has earned his MA in English Literature from the University of Karachi. He has received intensive training from SPELT under Cambridge University and taught at several educational institutions before joining IoBM. He writes for different newspapers on religious, political and social issues. He has presented several papers at national conferences on the topics of Unique Equilibrium of Free-Will and Determinism in Rumi’s writings and “The Impact of Fantastic Advertisement of Consumer Goods on the Mental Health of Society.” His paper “Iqbal’s Idealist Critique of Hawking’s Materialist Concept of Time” was published in Iqbal Review, April 2008 issue; and “Incoherences in Konrad Lorenz’s Concept of Aggression” in PBR. Currently, he is involved in research in the area of the philosophy of globalization.

Media Studies

Ejaz Wasay, Head, Media Studies and Senior Fellow Marketing, joined IoBM as a permanent faculty in January 2010. He has over 37 years of industry experience in Marketing, Corporate Communications and Advertising, having worked with leading MNCs and local companies, including Glaxo, Unilever, Gillette, Philips, Orient McCann-Erickson and United Bank Limited (UBL). With Gillette he held senior positions in Pakistan, Brazil and the Middle-East. He has led two major research projects during his tenure at IoBM: a Consumer Perception Study for Indus Motor Company (IMC) and a Media Responsibility & Independence Index Research for USAID. He has been Council Member of the Marketing Association of Pakistan (MAP) for about 15 years, and its President in 2005. He has been writing for Aurora and Marketing Review for over 20 years, and has been a Jury Member of the Pakistan Advertising Society Awards since its inception.

Dr. Erum Hafeez Aslam, Assistant Professor, Media Studies, holds a PhD degree in Mass Communication with specialization in Social and Cultural Dynamics of Media from the University of Karachi, Pakistan. Before Joining the Institute, she headed Corporate Communications and Public Affairs Department at the Institute of Business Administration (IBA) Karachi for more than six years. She was also engaged as faculty media studies in the Social Sciences Department of IBA Karachi for two years. She has worked in the Dawn Group of Newspapers and MNJ Advertising as an editor and concept writer respectively in the beginning of her career.

Sabeen Jamil, Lecturer, Media Studies, holds an M.A in Mass Communication from University of Karachi and is pursuing MBA in Advertising and Media Management from IoBM. She has worked as a journalist at a leading English language newspaper and has been contributing for leading newspapers and magazines including The News, Dawn, Express Tribune and Newsline for three years now. She was associated with a private university as a faculty before she joined IoBM in September 2011.

ADMINISTRATION
The administrative staff of IoBM is highly skilled and qualified to perform multifarious tasks, vital for the smooth running of the Institute. The administration implements the policies formulated by the Governing Board and the Academic Council. It is responsible for organizing academic programs, ensuring student progress, providing adequate support facilities to the faculty and students, and liaison with business and industry to arrange internships, ensure career development and placement of students on the completion of their degree. It is also responsible for the organization and supervision of examinations.

Members of the Administration

Mr. Shahjehan S. Karim, President, Institute of Business Management has worked in the Civil Service of Pakistan for over 37 years, holding a number of senior positions with the Government of Pakistan and the Government of Sindh. He has also worked with the United Nations Organization as an International Civil Servant for almost a decade. He is a graduate of the University of Arizona, USA and also studied Public Administration at Cambridge University, UK; Transportation Management at the University of British Columbia, Canada and is a fellow of the Economic Development Institute of the World Bank. Mr. Karim is the Founder President of the Foundation for Higher Education and the Institute of Business Management.

- Please note that this list is subject to change. Details of courses, including information about the course activities and scheduling are distributed by the faculty at the time of registration.
- Students should ensure that they complete the pre-requisite courses before opting for advanced level courses.
Accounting

ACC101 Introduction to Financial Accounting
This course is aimed at people with no or limited prior knowledge and provides an understanding of how financial statements are prepared for various types of organizations. The principles of financial accounting course focuses on the record-keeping and financial statement preparation process.

ACC102/103 Introduction to Financial Accounting I & II
The objective of these courses is to enable students to understand fundamentals of accounting theory and apply it to basic financial accounting.

ACC201 Intermediate Financial Accounting
This course covers all aspects of corporate accounting, analysis of financial statements and specialized accounting for leases, construction contracts, inflation and taxation.
Pre-requisite: ACC 101

ACC202/204 Taxation I & II
The aim of these courses is to develop basic knowledge and understanding in the core areas of income tax and its chargeability as envisaged in the Income Tax Ordinance 2001 and the Income Tax Rules 2002 (relevant to the syllabus), Sales Tax Act 1990 and the Sales Tax Rules (relevant to the syllabus).
Pre-requisite: ACC 102/103

ACC203/304 Financial Accounting I & II
These courses are designed to provide understanding of accounting methods, and procedures as followed by business organizations. These cover the accounting process of classification, summarization, presentation in the light of International Accounting and Financial Reporting Standards.
Pre-requisite: ACC 102/103

ACC301 Cost Accounting
Explain the terminology, basic concepts and principles of cost accounting. Fundamentals addresses all key cost accounting topics, including inventory valuation, job order costing, process costing, activity based costing and standard costing. This course also covers the role of the cost accountants in setting prices.
Pre-requisite: ACC 201

ACC302 Accounting and Financial Information Systems
This course provides an understanding of information systems demonstrates how information technology can support the business activities in the areas of accounting and finance and describes the problems associated with controlling and auditing such information systems. This course focuses on business cycles and internal control through software based accounting.
Pre-requisite: ACC 201

ACC303/306 Financial Reporting I & II
To provide candidates with an understanding of the fundamentals of accounting theory and basic financial accounting with particular reference to international pronouncements. The second part of the course will broaden the knowledge base of basic accounting acquired in earlier modules with emphasis on International Financial Reporting Standards.
Pre-requisites: ACC 102/103

ACC305/415 Cost Accounting I & II
These courses are designed to provide students an understanding of the importance of the role of cost accounting in planning and controlling the wide range of organizational and manufacturing cost.
Pre-requisite: ACC 102/103

ACC320 Cost and Management Accounting
This course seeks to give an understanding of the ways in which management accountants can provide relevant information for a variety of decisions to be made in managing any organization. On completion of this course, students should be able to identify, use and interpret the results of costing techniques appropriate to different activates and decisions; formulate and use standards and budgets for planning and control purposes.
Pre-requisite: ACC 201

ACC401 Introduction to Managerial and Cost Accounting
This course will cover cost accumulation concepts and techniques for product and service costing and planning and control. Modern management accountants are not only concerned with how cost data are transformed into cost accounting information but more importantly how to use cost data to management goals. This course should develop the student’s understanding, skill, and analytical ability in management accounting to the level where he or she can function effectively as a professional management accountant.
Pre-requisite: ACC419

ACC405 Internal Auditing and EDP Accounting
This course covers the understanding and application of internal auditing tools and techniques and information system for management of risk and security system.
Pre-requisite: ACC102/103/201

ACC410 Management Accounting
The objective of this course is to explain how managerial accounting information is used by managers in various types of business organizations. The emphasis is on the development, interpretation, and application of managerial accounting information for planning activates, controlling operations, and making decisions. This course covers cost behavior, CVP analysis, variable and absorption costing, budgeting, decision making, and accounting for decentralized operations.
Pre-requisite: ACC301

ACC414/416 Auditing I & II
The purpose of these courses is to give students theoretical and to a limited extent, technical knowledge and skills of auditing and review of historical financial information. It will provide a foundation for acquiring intensive knowledge required for professional competence.
Pre-requisite: ACC 102/103
ACC417 Corporate Reporting
This is an advanced course in the field of Financial Accounting. The course includes preparation of financial statements, consolidated accounts and their disclosures; accounting for investment in subsidiaries and associated undertakings; reporting on investments in joint ventures.
Pre-requisite: ACC 203/304

ACC418 Performance Measurement and Decision Making
The main aims of this course is understanding of cost accounting in relation to management functions, application of financial information for control purposes; development and interpretation of data for decision making techniques of performance appraisal and operational research.
Pre-requisite: ACC 203/304/305/415

ACC419 Financial Accounting
This is an introductory financial accounting course which will introduce and enable students to examine and understand the accounting concepts, the accounting model, analysis process leading to the preparation and presentation of financial statements of a Sole Proprietorship firm as well as a Corporation, in accordance with Generally Accepted Accounting Principles. Furthermore it would enlighten the students to understand in detail, the accounting for all current and fixed assets (tangible and intangible), current and long term liabilities, and equity structures of proprietorships and corporations.

ACC501/601 Advanced Financial Accounting
The course will enable students to understand and learn accounting aspects of topics in partnership, head office/branch relationship, installment sales, business combinations, foreign currency translation and bankruptcy and liquidation.
Pre-requisite: ACC203/201/304/419

ACC502/602 Advanced Managerial Accounting
The course will enable students to understand and learn accounting aspects of topics in partnership, head office/branch relationship, installment sales, business combinations, foreign currency translation and bankruptcy and liquidation.
Pre-requisite: ACC203/201/304/419

ACC503 Taxation
Tax law is studied with a special emphasis on what constitutes taxable income and allowable deductions for individual tax payers. The course also includes a comprehensive coverage and treatment of taxes as related to business profits.
Pre-requisite: ACC 201

ACC505/603 Auditing
This course covers the understanding of audit techniques, rules, principles and procedure and their application in the audit of financial statements, relevant records and source documents.
Pre-requisite: ACC201/419

ACC506/604 Analysis of Financial Statements
The course begins by describing accounting standards of USA and international accounting standards with a special focus on developing students’ capability to standardize various companies’ financial statements.
Pre-requisite: ACC 201/419

ACC520 Managerial Analysis & Decision Making
This course is designed to develop an appreciation for the uses of cost information in the administration and control of business organizations. Emphases are on how accounting data can be interpreted and used by management in planning and controlling business activities. Upon completion students should be able to analyze and interpret cost information and present this information in a form that is usable by management.
Pre-requisite: ACC305/401/410

ACC521 International Financial Reporting Standards
The primary purpose of the course is to develop knowledge of International Financial Reporting Standards including the standards’ history, new standard adoption, the recording of financial transactions, and financial statement presentation. In addition, IFRS for SMEs and Comparison of IFRS with GAAP will also be discussed.
Pre-requisite: ACC201/419

ACC522 Strategic Management Accounting & Control
The course is designed for the development of basics of Management accounting to align with the strategic objectives of a business. It aims to provide an understanding of strategic management accounting and control issues for the business and assist management in implementing the firm’s operational and strategic goals with success.
Pre-requisite: ACC201/419

ACC523 Legal Requirements for Business
The course aims to provide an overview of the legal concepts and principles that impact a business. It gives a broad view on the information needed to develop relevant skills for the transactional and functional aspects of the business. The course is designed for students to get familiar about the Law needed for Business along with its various interactions in the legal environment.
Pre-requisite: ACC201/419

ACC524 Corporate Governance & Reporting
This course will teach the fundamental theories and practice of corporate governance. It covers the history of the corporations, role of boards of directors, the division of profit sharing and various forms of employee ownership and equity ownership among insiders, regulation, shareholder activism, the impact of takeovers and mergers and acquisitions on governance, ethical issues such as conflicts of interest and insider trading, international corporate governance, and policy developments likely to impact the corporation.
Pre-requisite: ACC201/419
**Actuarial Science**

**ARM501 Stochastic Process/Modeling**
The aim of the course is to acquaint students with the use of probability theory to study models of phenomena with a degree of unpredictability about them, such as queues and population growth. Discrete and continuous time Markov chains, Poisson processes, random walks, branching processes, first passage Probability generating functions.
Pre-requisite: STA205

**ARM601/602 Models of Financial Economics I & II**
This course aims to provide the complete understanding of pricing of various types of options, Modelling of stock prices, Binomial Tree distribution, Risk neutral Pricing, Brownian Motion, Interest rate Modelling. MFE is the compulsory exam (paper-III) for the Associate Actuaries exam conducting by Society of Actuaries (SOA)USA.
Pre-requisite: ARM601/FIN509

**Communication**

**COM100 Foundation English**
This basic level integrated skills course aims to prepare students for university education. It mainly focuses on developing students’ receptive (reading and listening) and productive skills (writing and speaking) and grammar in context. It also gives intensive input to develop students’ study skills and to make them independent learners.

**COM103 Functional English I**
The objective of this course is to ensure that students select, use and apply the functional skills of reading writing and comprehending in a range of purposeful situations. It will provide compelling learning experiences so that students engage more profoundly in what they are learning and internalize the skills they are developing.

**COM104 Functional English II**
This course has been designed to enhance the students’ understanding and use of writing skills in English. It will provide compelling learning experiences so that students engage more profoundly with what they are learning and internalize the skills they are developing. The course introduces the elements of critical reading, building on a clear understanding of thoughts processes.
Pre-requisite: COM103

**COM105 Business Communication and Behavioral Studies I**
This course is designed to give students an understanding of behavior of individuals and groups in all types of organizations. It also analyzes the strategies and tactics in which organizations achieve their goals.

**COM106 Business Communication and Behavioral Studies II**
This course aims to create awareness of the current norms and conventions of written business communication among students. It teaches students how to plan, organize and write correct and effective business documents for use in today's global business environment.
Pre-requisite: COM105

**COM107 Academic English**
This course aims to enhance students’ writing skills in English based on critical reading and thinking. The course follows an integrated academic reading and writing approach to enable students to cope with their university studies.

**COM111 Critical reading and creative writing**
This course is designed for the Media Studies students to enhance their critical thinking skills, thereby inculcating a maturity of thought in their freshmen year. The course aims at developing the students’ critical reading skills by introducing them to various genres and styles of writing. The focus of the course is to introduce the students to elements of creative writing and to develop the aspects of originality of thought and innovation of ideas.

**COM112 Appreciation of Literary Texts**
This course for the Media Studies students aims to introduce different genres of literature to the students. The course focuses on developing the students’ taste for literary texts through readings in literature in English. The aim is to develop the students’ awareness about various literary genres, and to create an aesthetic insight needed in their studies.
Pre-requisite: COM111

**COM202 Business and Professional Speech**
This course is designed to improve the students’ interpersonal, intrapersonal and public communication abilities. The course aims at developing the students’ critical thinking and problem-solving skills to enable them to argue logically in business contexts. Students learn to apply these skills in public speaking, board meetings, interviewing, and group interaction.
Pre-requisite: COM103

**COM203 Methods in Business Writing**
The course aims at developing business writing skills in order to produce effective letters, memos, job resumes, and short reports. It develops tools for critical thinking to improve business communication and decision-making.
Pre-requisite: COM107

**COM205 Persuasive and Analytical Writing for Business Communication**
The course aims at developing messages at all levels of business communication focusing on mechanics, style, and tone of writing. The main emphasis is on critical thinking in order to analyze and evaluate situations to solve complex business problems. This course will enable students to write effective emails, memos, letters, proposals as well as formal and informal business reports.
Pre-requisite: COM107

**COM402 Business Communication**
The course incorporates the principles of business writing and their application through letters, memos, and minutes of meetings. It also develops skills in writing long and short reports and proposals.
COM403 Interpersonal Communication Skills
This MBA course aims at developing students personal and professional skills through enhancement of personal as well as interpersonal management. It focuses on the development of critical thinking skills in social and professional forums. The course also aims at developing students’ elocution and personal grooming.
Pre-requisite: COM402

COM405 Organizational Consulting Skills
This course is primarily designed for the practitioner who provides services to agencies, professionals, or organizations. The purpose of the course is to provide an understanding of the process of organizational consultation.

COM410 Digital Business Communication
This course aims to develop students’ proficiency based on the requirements of today’s technologically enhanced workplace. It builds on the overall communication skills acquired by students in terms of structure, reasoning, building arguments and graphics, and aims to apply then in a digital media environment. Students will therefore learn to design and develop content for websites, Facebook, Instagram and other platforms, culminating in a complete digital campaign.

Computer Engineering

CME102 Fundamental of Computing
This course is designed to provide the computer and programming foundation for all computer science and engineering students. The language used in this course C++. Topics include: introduction to computers, computer programs, and C++, semantics and syntax, data types and variables, assignments.
Pre-requisite: COM402

CME104 Computer Programming and Problem Solving
The course includes the basic concepts of object-oriented programming, functions, classes, linked list, procedures, Data Abstraction, Inheritance and Polymorphism, Filing Concept, Data Retrieval and saving into Binary and Text files.
Pre-requisite: CME102

CME200 Computer Aided Engineering Design
Introduction to computer-aided design tools including AutoCAD, OrCAD, MATLAB, Lab VIEW, and PCAD. Provides an understanding of computer-aided drafting principles and practices, and provide knowledge of engineering drawing fundamentals using AutoCAD.
Pre-requisite: ELE202

CME203 Data Structures & Algorithms
Data types, Array, Records, Set structure, Abstract data types, Sequential allocation, Linked allocation. Stacks (sequential as well as linked implementation) Queues. (Sequential as well as linked implementation), Linked Lists, Traversal, Insertion, Deletion, Doubly linked lists, Root Node, Terminal Node, Branch Node, Level of a Node, Degree of a node, Binary tree, Tree traversal, (In-order/Pre-order/post-order traversal).
Pre-requisite: ELE202

CME205 Microcontroller and Microprocessor Systems
Introduction to microprocessor and microcontrollers, basic concepts, control unit, internal registers, ALU of an 8-bit or 16-bit microprocessor, timing and sequencing, peripherals And interfacing, memoryandI/Osynchronization, waitstate, hardware single stepping, memory speed requirements, logic levels, loading and buffering.
Pre-requisite: ELE201

CME301 Computer Communication and Networks
To help the students gain an understanding of the terminology and standards in modern day computer networks. To make the students understand communication basics, networking and network technologies.
Pre-requisite: TCE201

CME414 Digital Image Processing
This course emphasizes general principles of image processing, rather than specific applications. The topics covered are as image sampling and quantization, color, point operations, segmentation, morphological image processing, linear image filtering and correlation, image transforms, Eigenimages, multiresolution image processing, wavelets, noise reduction and restoration, feature extraction and recognition tasks, and image registration.
Pre-requisite: TCE404
Computer Science

CSC105/402 Data Structure and Algorithms Design
The course covers object oriented design, static and dynamic data structures (strings, stacks, queries, binary trees), recursion, searching and sorting.
Pre-requisite: CSC113, MTH222

CSC111 Introduction to Information and Communication Technology (ICT)
Introduction to computers, types, generation, units, methods of computing, algorithm development and number systems, flow of control, basic number codes, overview of computer systems, using computer software.

CSC112 Object Oriented Programming
The course includes the basic concepts of object-oriented programming, functions, classes, linked list, procedures, Data Abstraction, Inheritance and Polymorphism, Filing Concept, Data Retrieval and saving into Binary and Text files.
Pre-requisite: CSC113

CSC113 Programming Fundamentals
The course enables students to develop short programs using conditional statements and loops and functions, structure, linked list and file processing. Students are required to complete a project at the end of the course using C language.

CSC205 Computer Architecture & Organizations
The course involves a study of information set architecture, processor performance and design, data path, control (hardware, micro programmed), pipelining, I/O memory organization with cache virtual memory.
Pre-requisite: CSC217

CSC208 Network Programming Framework
This course presents an overview of the technology, architecture and software used by the systems of network connected computers. The course will cover data transmission, local area network architecture, network protocols, internet working, distributed systems, security, and World Wide Web technology. Students will write programs that run concurrently on multiple computers.
Pre-requisite: CSC112

CSC218 Operating Systems
Topics of the course include software organization, translation, linkage, loading and executing, control programs for batch processing, time sharing and real time application, accounting, communication between programs units, multiprogramming and multiprocessing system, etc.
Prerequisite: CSC105, CSC205

CSC220 Introduction to Database Systems
This course develops an understanding of a database software package developed for microcomputer applications. Topics include how to design implement, and access a database.

CSC221 Computer Communication & Network
Synchronous and asynchronous communications, Modes of transmission ASCII codes and data stream with parity, Guided Transmission Media (Twisted Pair, Coaxial Cable and Optical Fibre), Wireless (terrestrial and satellite). Line Configurations, Null Modem, Data Link Control, Flow Control Techniques, Stop & Wait, Sliding Window, Error control techniques, reverse error detection techniques (parity, CRC), switched networks (circuit switched, message switched and packet switched), Broadcast n, Packet Radio Networks, Network Topologies, LAN Architecture, LAN System & Network Standards, Ethernet and Fast Ethernet (CSMA/CD), Token Ring And FDDI etc.,

CSC222 Computer Organization and Assembly Language
Digital computer organization, machine language, instruction execution, addressing techniques, digital representation of data symbolic coding and assembly system; macros; conditional assembly; I/O control subroutine linkage.
Pre-requisite: CSC217

CSC303 Computer Graphics
This course discusses the introduction to computer graphics hardware, algorithms, and software. The topics include: line generators, affine transformations, line and polygon clipping, splines, interactive techniques, perspective projection, solid modeling, hidden surface algorithms, lighting models, shading, and animation. Substantial programming experience is required.
Pre-requisite: CSC112

CSC309 Microprocessor and Applications
The course discusses the structure of Microprocessor, Bit slices and 8/16/32 bit microprocessors, processor architecture, registers, index and stack pointers, address modes, I/O interface adapters, interface devices, system clock, clock phase and bit rates, memory read-write and read only, memory mapping of I/O interrupts, handling of interrupts, direct memory access methodologies.
Pre-requisite: CSC205
CSC315  Theory of Automata and Formal Language
Automata and formal language, regular expressions, Turing machines, recursive functions, formal languages, non-deterministic automata and push down automata are the contents of this course.
Pre-requisite:  MTH222

CSC317  Introduction to Software Engineering
This course intends to develop skills to move from personal programming to professional programming. This course will help students to create applications that interact with their environment and help users according to standard professional norms. The course also intends to develop effective software testing skills, write code conforming to the API standards, to identify and evaluate trade-offs in design and implementation decisions for systems of an intermediate size. The course also will help students to read and write programs in Java using advanced features and to extend model of computation.

CSC318  Design and Analysis of Algorithm
This course teaches techniques for the design and analysis of efficient algorithms, emphasizing methods useful in practice. Topics covered include: sorting; search trees, heaps, and hashing; divide-and-conquer; dynamic programming; amortized analysis; graph algorithms; shortest paths; network flow; computational geometry; number-theoretic algorithms; polynomial and matrix calculations; caching; and parallel computing.
Pre-requisite:  CSC105, MTH222

CSC345  Digital Image Processing
The course includes digital image fundamentals, image sampling & quantization problems, image modeling & geometry, image translation, rotation, convolution, FFT & DCT, Walsh transform, histogram modification, edge linking & boundary detection, image compression techniques.
Prerequisite:  CSC303

CSC411  Compiler Construction
The course discusses the structure of compilers, Lexical analysis, syntax analysis, semantic analysis, abstract interpretation, Tree: pattern matching and parsing and code generation.
Pre-requisite:  CSC315

CSC425  Advanced Operating Systems
This course covers many advanced topics in operating system design and implementation such as operating systems structuring, multi-threading and synchronization in detail and then moves on to systems issues in parallel and distributed computing systems.
Pre-requisite:  CSC218

CSC434/563  Software Quality Assurance
This course extends Software Engineering concepts to focus upon quality, from the perspective of the software, user, customer, and support staff. Topics included are software quality practices, user friendly systems design, modularity and structure, requirements coverage, systems architecture, designing from test maintainability, and an overview of languages and their fit toward various target applications.
Pre-requisite:  CSC317

CSC 435/574  Distributed Systems
The aim of this course is to provide students with an understanding of the principles, techniques, and practice in the design and implementation of distributed systems, with a particular focus on infrastructure software.
Pre-requisite:  CSC204, CSC427

CSC443  Mobile Computing
The course includes Mobile Information Device Profile (MIDP 2.0) programming using J2ME (de facto standard for mobile devices) to supplement the introduction to wireless Internet (WAN, LAN and PAN) covered in the classes. By the end of this course, students will have acquired a deep understanding of various wireless programming concepts and APIs and developed extensive knowledge that you can use to develop sophisticated MIDP applications.
Pre-requisite:  CSC410

CSC445  Network Security
Cryptology and simple cryptosystems; conventional encryption techniques; stream and block ciphers; DES; Block Ciphers; The Advanced Encryption Standard; confidentiality & message authentication: hash functions are the contents of the course.
Pre-requisite:  CSC410

CSC448  Digital Signal Processing
One- and N-dimensional signals and systems, sampling theorem, discrete-time fourier transform, discrete fourier transform, fast Fourier transform, z-transforms: stability and minimum phase signals/systems, linear filtering of signal: time domain: difference equations and convolution, impulse invariance, etc. are the contents of the course.
Pre-requisite:  CSC313, CSC410

CSC451  Telecommunication Systems
The course includes introduction to media, bandwidth and noise. Twisted pair (UTP, STP), coaxial cables (types and specifications), optical fibres (types and losses), introduction to optical sources and detectors. Microwave links, satellite communication and infrared links, etc.
Pre-requisite:  CSC410

CSC458  Compiler Construction
The course discusses the structure of compilers, Lexical analysis, syntax analysis, semantic analysis, abstract interpretation, Tree: pattern matching and parsing and code generation.
Pre-requisite:  CSC315

CSC465  Data Warehousing
This course provides an introduction to data warehouse design. Topics in data modeling, database design and database access are reviewed. Issues in data warehouse planning, design, implementation and administration are discussed in a seminar format.
Pre-requisite:  CSC204
CSC541 Advanced Research Methodology
Students will be given an in-depth analysis to the research methods used in the study of organizations and especially in the study of computer science issues. The course will cover the quantitative and qualitative research processes, which includes sampling techniques, measurement and measurement testing, generalizability and a practical seminar relating to questionnaire construction and data gathering and management.

CSC543 Advanced Computer Architecture
Design and evaluation of modern uni-processor computing systems, evaluation methodology/metrics and caveats, instruction set design, advanced pipelining, instruction level parallelism, prediction-based techniques, alternative architectures (VLIW, Vector and SIMD), memory hierarchy design and I/O. Case studies.

CSC545 Decision Theory
The course combines approaches to decision theory. It is intended for advanced undergraduates and graduates students in computer science. The course will cover basic decision theory, also known as “rational choice theory”; the limitations and problems with this theory, both as it applies to computers and to human agents.

CSC548 Advanced Analysis of Algorithm
Introduction to advanced techniques for designing and analyzing algorithms, including asymptotic notations, divide-and-conquer algorithms and recurrences, greedy algorithms, data structures, dynamic programming, graph algorithms and randomized algorithms.

CSC561 Advanced Software Engineering
System development using formal techniques, algebraic specification, abstract model specification, verification: proof systems, proof techniques, proof obligations, design: data refinement, operation refinement, design decomposition, software reliability and metrics, macro models: productivity, effort, defect reliability modeling, simple model, markov modeling, parameter estimation, comparison of models.

CSC562 Object Oriented Software Engineering
This short course with UML, Java, and Eclipse will expose students to the basics of object-oriented software engineering, including object-oriented analysis and design using UML (Unified Modeling Language), object-oriented programming using Java, all within the Eclipse environment. Laboratory sessions will equip participants with practical experience in object-oriented design, programming, and testing.

CSC563 Software Quality Assurance
This course provides an intermediate QA and Test. Students will acquire a thorough skill set for their respective roles in a QA or test team environment. They will also learn both the theoretical concepts of this matured discipline and the unique experiences and innovative practices from Microsoft.

CSC564 Software Requirement Engineering

CSC565 Software Testing Strategies
This course introduces the major concepts of software testing and develops technical proficiency in test case design and test plan development to covers techniques and tools for software requirements to support testing and test plan development. It presents software testing activities and products within the context of the software development cycle and addresses the role of inspections, walk-through’s and reviews in support of software testing.

CSC571 Advanced Database Management Systems
This course begins with a study of advanced relational theory, followed by the SQL Application Programming Interface (API) standards. Students will also study Data Warehousing, OLTP and OLAP integration, and database distributed architectures.

CSC573 Data Mining
The objective of this course is to serve as an introduction to the techniques, tools and applications of data mining (DM). Also covered is the relationship between DM and other fields such as artificial intelligence, Knowledge Discovery for Databases (KDD), data warehousing and Online Analytical Processing (OLAP). By the end of the course, students should be able to learn any commercial DM tools easily and apply DM techniques to a variety of research and application projects.

CSC574 Distributed Systems
This course aims to provide students with a deeper understanding of distributed systems. In particular, we focus on the principles, techniques, and practices relevant to the design and implementation of such systems. The course takes a systems-oriented view of distributed systems, concentrating on infrastructure software and providing hands-on experience implementing distributed systems.

CSC575 Parallel and Distributed Computing
Parallel and distributed systems. Speedup and Amdahl’s Law, Hardware architectures: multiprocessors (shared memory), networks of workstations (distributed memory), clusters (latest variation). Software architectures: threads and shared memory, processes and message passing, Distributed Shared Memory (DSM), Distributed Shared Data (DSD), etc.

CSC576 Parallel and Distributed Algorithms
The topics to be covered are parallel/distributed algorithms, coarse-grain parallel algorithms and applications, parallel scientific computation, interconnection networks, parallel and distributed computing on network of workstations, scheduling, languages and compiler techniques for parallel programming and theory of parallel/distributed computing.
CSC582 Pattern Recognition
This course will introduce the fundamentals of statistical pattern recognition with examples from several application areas. Techniques for handling multidimensional data of various types and scales along with algorithms for clustering and classifying data will be explained. This is an advanced level course suited for graduate students in Computer Science and Engineering.

CSC466 Fuzzy Systems

Data Science

BDS101 Introduction to Data Science
Data science history and context, technology landscape commerce and research are being transformed by data-driven discovery and prediction. The Introduction to Data Science class will survey the foundational topics in data science, namely: Data Manipulation, Data Analysis with Statistics and Machine Learning, Data Communication with Information Visualization, Data at Scale -- Working with Big Data. Tour the basic techniques of data science, including both SQL and NoSQL solutions for massive data management (e.g., MapReduce and contemporaries), algorithms for data mining (e.g., clustering and association rule mining), and basic statistical modeling (e.g., linear and non-linear regression).

BDS201 Business Process Analysis
This course introduces concepts of business process modeling using the Business Process Model and Notation (BPMN) industry standard. Participants will learn the elements of process models and their precise meaning. Cover business processes within organizations and also interacting processes involving several organizations, i.e., investigate process orchestrations and process choreographies. Will also look at techniques to analyze business processes from a formal perspective.

BDS401 Data Visualization
Learn how to transform information from a format efficient for computation into a format efficient for human perception, cognition, and communication. Explore elements of computer graphics, human-computer interaction, perceptual psychology, and design in addition to data processing and computation.
BDS402  Big Data Concept and Techniques
Big data is data that, by virtue of its velocity, volume, or variety (the three Vs), cannot be easily stored or analyzed with traditional methods. Spreadsheets and relational databases just don’t cut it with big data. In this course, all methods that do work, introducing all the techniques and concepts involved in capturing, storing, manipulating, and analyzing big data, including data mining and predictive analytics. It explains big data's relationship to data science, statistics, and programming; its uses in marketing, scientific research, and tools like Amazon's recommendation engine; and the ethical issues that lie behind its use.

BDS403  Big Data & Analytics
This course is related to advanced tools used to wrangle and analyze big data. In this course you will be guided in basic approaches to querying and exploring data using higher level tools built on top of a Hadoop Platform. Will be able to identify the kinds of analysis one can get of big data and how to interpret these results.

BDS404  Machine Learning
This course provides a broad introduction to machine learning, data mining, and statistical pattern recognition. Supervised learning (parametric/non-parametric algorithms, support vector machines, kernels, neural networks). Unsupervised learning (clustering, dimensionality reduction, recommender systems, deep learning). Best practices in machine learning (bias/variance theory; innovation process in machine learning and AI). The course will also draw from numerous case studies and applications, to apply learning algorithms to building smart robots (perception, control), text understanding (web search, anti-spam), computer vision, medical informatics, audio, database mining, and other areas.

Economics

ECO101  Principles of Microeconomics
The course focuses on the introduction to consumer behavior and the theory of the firm. Topics include the production, possibility frontier, the demand behavior of households, the supply behavior of business firms, the theory of costs, and an introduction to market structure and welfare economics.

ECO102  Principles of Macroeconomics
This course analyzes the determinants of aggregate economic activity. The main areas studied are the monetary and banking system, the composition and fluctuations of national income, and inflation, all as influenced by monetary fiscal and exchange rate policies. There is a special emphasis on the Pakistan government’s economic policies, financing the budget deficit, structural adjustment program (SAP), and privatization policies.

ECO103/105 Intermediate Micro and Macroeconomics
The objective of this course is twofold: first is to extend the students’ understanding of microeconomic theory and to introduce the use of mathematical and graphic models of macroeconomic process.

ECO104/401 Micro and Macroeconomics
The course analyzes the study of the working of a country’s economy in an international setting. It examines the interaction of households, business firms, government and the rest of the world in resource, product and financial business fluctuations, inflation, unemployment and monetary and fiscal policies, with a special emphasis on the Pakistan government’s economic policies, financing the budget deficit, structural adjustment program (SAP) and privatization policies.

ECO106  Basic Economics
This course is an introduction to the basic economic concepts. It will include both microeconomics and macroeconomics, and the economics of Pakistan.

ECO202/203 Introduction to Economics and Finance I & II
The objective of these courses is to enable candidates to equip themselves with the main economic concepts and their uses and relevance in economic analysis. The course aims to serve an introduction to the economic environment of trade, industry and banking as well as to methods of analysis relevant to the study of financial decisions.

ECO204  The Pakistan Economy
This course focuses on the structural change of employment, investment and external trade in Pakistan's economy since 1947. It gives an insight into the GDP growth of various sectors encompassing expenditure and production.
ECO205 Economic Development of Sindh
This course highlights Sindh’s share in Pakistan’s economy. It also encompasses the development strategy of the government of Sindh and its fiscal policy. It strives to compare Sindh and the gulf economy and focuses on the demographics, environment and the economy of Karachi.

ECO207 Game Theory
The course introduces the main concepts and tools of game theory. Ideas such as dominance, backward induction, Nash equilibrium, evolutionary stability, commitment, credibility, asymmetric information, adverse selection and signaling are discussed and applied to games played in class and to examples drawn from economics, politics and elsewhere.

ECO301 Managerial Economics
The course aims to serve an introduction to optimization techniques and their application on the market behavior in terms of demand and supply, market equilibrium and forecasting market parameters.
Pre-requisite: ECO 101, ECO 102

ECO302 International Trade
International Trade is primarily concerned with trade flows between nations and the resulting monetary flows that occur between nations. In this course students are exposed to theories that explain the current flow of trade, various commercial policies, foreign exchange markets, balance of payments, and macroeconomic policies that deal with various types of imbalances in the balance of payments of countries.
Pre-requisite: ECO 103/105

ECO303 Financial Economics
Financial Economics introduces students to the process of investment in financial markets, both at a practical and theoretical level. This course discusses various types of financial instruments in common use and the economic theories that explain how they are priced.
Pre-requisite: ECO 102

ECO304 Introduction to Econometrics
The course focuses on the role and uses of statistical inference in economic research; problem of spanning gap from an economic model to its statistical counterpart; measurement problems and their solutions arising from statistical model and nature of the data; limitations and interpretation of results of economic measurement from statistical techniques.
Pre-requisite: STA301

ECO305 Topics in Microeconomics
This course focuses on market structure and the economics of information. The course aims to make candidates comfortable enough with this area of microeconomics theory so that candidates can read applied papers in one’s areas of application and use theoretical models appropriately in research.
Pre-requisite: ECO 103/105

ECO306 Topics in Macroeconomics
The course aims to provide an introduction to macroeconomic analysis. Long-run growth, business cycles, trade, and fiscal & monetary policies are analyzed using dynamic general equilibrium models. Classical, Keynesian and new classical models are used to examine inflation, unemployment, the open economy, and analysis of fiscal, monetary and exchange rate policies.
Pre-requisite: ECO 305

ECO307 Monetary Theory and Policy
The course is a study of the theoretical and empirical work in money demand, money supply, money multiplier, output effect of monetary policies, alternative techniques of monetary policy formulation and implementation, multi-asset financial markets, and inflation.
Pre-requisite: ECO 103/105

ECO308 Capital Investment Economic Analysis
The course aims to offer an analysis of economic merits of alternatives including interest and income tax consideration. Risk and sensitivity exploration techniques and an introduction to analytical techniques for multiple objectives or criteria.

ECO402 Pakistan Economic Policy
The course is an overview of structural change in the Pakistan economy 1947-2008. The topics include GDP in terms of production sectors and expenditure; structure of employment, investment and external trade; macroeconomic policies, planning (five years and ADP), fiscal policy, monetary policy, balance of payments policy, exchange rate policy, microeconomic policy, agricultural policy, industrial policy, labour policy, social sectors, poverty and income distribution.
Pre-requisite: ECO 101/201

ECO403 Macroeconomics
The course is a study of the operation of a country’s economy in an international setting examining the interaction of households, business firms, government and the rest of the world in resource, product and financial business fluctuations, inflation, unemployment and monetary and fiscal policies, with special emphasis on the Pakistan government’s economic policies, financing the budget deficit, structural adjustment program (SAP), and privatization policies.

ECO404 Micro and Managerial Economics
The course aims to provide an introduction to optimization techniques and their application on the market behavior in terms of demand and supply, market equilibrium, forecasting market parameters and application on business models; elasticity and risk, methods to calculate risk, risk analysis and capital budgeting and five approaches to competitive structure.
Pre-requisite: STA 403
ECO405 Seminar in Economic Policy
The course includes growth and structural change in the Pakistan economy, fiscal, monetary and exchange rate policies, the corporate sector, trade policy, foreign investment, structural adjustment. The role of the World Bank and International Monetary Fund (IMF), discussion on regional economic cooperation. Strategies in multinational corporations and issues in the international transfer of the technology are also discussed.
Pre-requisite: ECO 403, ECO 404

ECO406 Money and Banking
The course describes the monetary systems, financial markets, national income components and their relationship to business activity. Study of structure, regulation and performance of the banking industry.
Pre-requisite: ECO 401

ECO408 Applied Financial Economics
The course will describe the categories, within which financially important variables exist, and develop ways to encapsulate them using simple statistics drawn from the study of simple probability distributions. It will develop graphical tools to analyze market movements, financial history and models which every person interested in finance must know.
Pre-requisite: ECO401

ECO409 Business Economics
This course covers the core economics that will be needed as a business student. Business economics is the application of economic theory and methodology to decision making problems within various organizational settings such as a firm or a government agency. The emphasis in this course will be on demand/supply analysis and estimation, production and cost analysis under different market conditions, forecasting and decision making under uncertainty. Students taking this course are expected to relate and analyze what they observe around them in terms of economic development and growth. It also gives them an excellent grounding to take sensible business decisions.

ECO414 Islamic Economics
This course provides basic knowledge of the principles of Islamic economics and the Islamic economic system, developing skills necessary to appreciate an alternative to a commonly familiar approach of interpreting the economic behavior of men and women in the society, and helping the students probe liberally outside the frontiers of familiar forms of capitalist and socialist systems.

ECO416 Growth Theories
The key learning goal associated with this course is to equip students with the necessary tools for analyzing the sources of economic growth and trends in productivity. Students will gain an understanding of why living standards vary across countries and over time. This course will also enable them to evaluate the impact of government policy on growth and create an awareness of current debate in growth policy.

ECO418 Resource and Environmental Economics
This course is designed to give students a solid understanding of the application of economic models to manage resources subject to environmental policy. It deals with the exploitation of exhaustible, renewable and environmental resources and the public policy issues that arise in seeking their efficient use. It also examines problems of environmental degradation and natural area conservation, with a focus on alternative policy tools and evaluation procedures available to governments to moderate pollution and other forms of environmental damage.

ECO501 Microeconomics
Theory of the firm; market imperfections and failures with special reference to public goods, externalities, taxes and subsidies; Duality in consumption and production; general equilibrium, linear and non-linear models, fixed coefficient technology, contract curve and production possibility frontier; aggregation issues, decision-making under uncertainty, expected utility theory, competitive equilibrium; welfare analysis in a partial and general equilibrium setting; the Stolper-Samuelson theorem; the Rybczinski theorem; Walrasian competitive adjustment mechanism; Pareto optimality and game theory.

ECO502 Macroeconomics
The course will cover long-run and short-run macroeconomics; aggregate demand and national income accounts; saving and finance; investment and financial markets; investment and monetary policy; central bank and macroeconomic policy; money supply and interest rate transmission mechanisms; fiscal policy; discretionary fiscal policy; expectations, inflation, and interest rates; foreign exchange markets and foreign trade and international balance.

ECO503 Econometrics and Research Methods
Literature reviews and data sources; overall design of a research project; equation misspecification, omitted variables, errors in variables, measurement error, simultaneous equation bias; instrumental variables; dynamic single equation models; static, dynamic and equilibrium-correction models; causality and endogeneity; co-integration tests, Johansen’s estimator; generalized linear models; random effect models and diagnostic testing.

ECO505 Theory and Practice of Economic Policy
The basic aim of this course is to analyze the international aspects of development policy pursued by developing countries, using the tools of open economy macroeconomics as well as international trade theory and policy to investigate issues of concern to policy-makers in developing countries.

ECO506 Monetary Economics
The course will focus on monetary issues. The principle aim will be to identify the major intellectual developments in monetary economics over the past two centuries. The course will help students examine key ideas, concepts and theories that have shaped the historical evolution of the subject with special emphasis placed on major articles in the literature. Major monetary schools, new classical Keynesian, stake flow consistency approached will be evaluated.
ECO507 Development Economics
This course will offer a brief overview of selected topics in development economics. Following a general introduction to the subject and to the data the course will focus on long-term processes of productivity growth and structural transformation. This will be followed by a critical presentation of the, still rapidly growing, literature on cross-country growth comparisons (Barro regressions). The last part of the course deals with modern economic growth and globalization.

ECO510 Mathematical Economics
The course includes study of mathematical concepts and tools such as functions, matrices and higher-order derivatives in cases of single and multiple independent variables. Emphasis is on the application of optimization, both with and without constraints, and introductory integral for understanding relationships of various economic variables and concepts, such as the relationship of aggregate, average and marginal functions. Other topics covered analyze market equilibria, impact of taxation and input-output models.

ECO601 Theory of Economic and Social Policy
The areas that the course covers are: moral and ethical foundations of economic and social policy, the role of state in policy making, economic policy; various economic systems including a) market-oriented economy, capitalism; liberalism, b) marxism, socialism including economic theory of socialism, and c) keynes and social democratic policies; an appraisal of contemporary social democratic regimes is included as well. The course also closely focuses on development policy including theoretical foundations.

Educational Management

EDM402 Applied Linguistics
This course addresses grammatical aspects of language such as syntax, semantics, and pragmatics and changes that have taken place in language over time.

EDM403 Critical Thinking and Reading
This course introduces participants to critical reading as a process of analyzing and evaluating the context and purpose of written texts by focusing on the four basic methods of critical thinking: analysis, interpretation, evaluation, and synthesis.

EDM406 Educational Policy and Economics
This course introduces empirical and legal research in education policy issues at the local and state levels by facilitating communication between education leaders and policymakers in the ever changing global economy.

EDM413 Creativity in Education
This course provides participants with the conceptual and practical understanding of various components of classroom and school management.

EDM415 Educational Philosophy and Ethics
This course focuses on aspects related to the learning process, the study of learning outcomes, student attributes, and instructional processes directly related to classroom and educational institutions.

EDM417 Educational Counseling
The course integrates issues of educational, pedagogical and organizational counseling in relation to the contemporary school situation. The focus is on work of school counseling centers, such as counseling in the sphere of educational behavioral problems and students’ career growth.

EDM419 Managing Teaching and Learning
This course explores teaching methods and strategies; teaching and learning styles; classroom management; testing, and their application to a range of classroom contexts.

EDM420 Academic Writing and Seminar Skills
This course develops participants’ English writing skills along with basic understanding of APA (6th edition) writing style. It also aims to equip the participants with editing and proof reading strategies to help them refine their written drafts.

EDM421 Sociology of Education
The course takes an expanded view of education and focuses on learners within both community and educational institution settings. It attends to the complex interrelations between schooling and the social, cultural, historical, political, and economic contexts within which learning institutions operate.

EDM422 Learners and Learning Styles
This course orients participants with learners’ psychology and their learning styles by providing in depth understanding of various learner centered approaches.
**EDM423  Reflective Inquiry in Education**
This course introduces the concept of reflective inquiry in teaching. It brings together essential perspectives of researchers, practitioners and theoreticians about reflective inquiry.

**EDM526  Curriculum Management and Planned Change**
This course covers concepts, processes, and principles of curriculum planning, development, and evaluation. This helps the participants to develop their performance competencies needed to engage in curriculum planning and decision-making as an administrator, a supervisor or a teacher.

**EDM427  Research Methods in Education II (Qualitative)**
This course introduces qualitative research methods as they are applied in education. The primary purpose of the course is to develop awareness in the participants and facilitate the ability to carry out small scale qualitative research in their own professional settings.

**EDM429  Research Methods in Education I (Quantitative)**
The course focuses on the process of defining research problems, the logic of research design, and a limited number of techniques for measurement. It also addresses the problems of research design and sampling. Through the use of SPSS, students learn to analyze quantitative data.

**EDM416  Comparative study of Education Systems**
In this course participants understand the commonalities, differences, and connections between global and comparative education, and the meaning and significance of globalization for both fields. One distinctive characteristic of the course is the service learning element, i.e., practical experience in educational institutions with focus on issues of change juxtaposing nationalism and globalization.

**EDM514  Early Childhood Development**
This course orients participants with the basic concepts of early childhood education and development. It helps them to explore and analyze various models in place.

**EDM518  Evaluation and Assessment in Education**
This course focuses on the use of tests as an instructional tool as well as an administrative tool, teacher attitudes towards testing, and teacher competency with regard to testing. The course helps participants use testing as an important tool in the process of teaching and learning.

**EDM526  Curriculum Management and Planned Change**
This course covers concepts, processes, and principles of curriculum planning, development, and evaluation. This helps the participants to develop their performance competencies needed to engage in curriculum planning and decision-making as an administrator, a supervisor or a teacher.

**EDM689  Thesis Writing-Capstone 1**
This course makes participants undergo the whole process of completing a research project starting from brainstorming to writing a comprehensive research report. The course is practical with hands-on activities to contribute to the overall aim of the course.

**EDM690  Thesis Writing-Capstone 2**
The participants are given guidance and readings to conduct a research project of approximately 6000-8000 words in their own work environment. The project is likely to be based on the investigation of a management issue leading to recommendations for improvement and action.

**EDM650  Quality Assurance in Education**
This course is based on the theoretical framework of quality control management as a model of modern management and its potential application in the educational field.

**EDM652  Knowledge Management**
This course introduces the concept of reflective inquiry in teaching. It brings together essential perspectives of researchers, practitioners and theoreticians about reflective inquiry.

**EDM654  Lifelong Learning in Changing Contexts**
This course analyses the competing understandings and practices of lifelong learning against a background of rapid social, cultural, and organizational changes. A debate around the impact of globalization is central to the analysis of lifelong learning.

**EDM656  Teacher Education**
This course introduces participants to the best practices in teacher education and professional development. It focuses on relevant theories, current issues, and present-day practices in teacher development. It also focuses on pre-service and in-service teacher education models.

**EDM658  Gender Studies in Education**
This course addresses the nature of gender inequalities in education. Apart from the injustice inherent in all gender stereotyping, gender differences in education can also negatively affect economic growth and social inclusion, which is what this course focuses upon.

**EDM660  Inclusive Education**
Inclusive Education provides teachers with basic training in special education. The course reflects contemporary practice in the field and positions graduates at the forefront of current thinking while retaining a broad-based focus on the traditional scope of preparation in special education.
Electrical Power System Engineering

EPE101  Linear Circuit Analysis
The course introduces electrical engineering, basic circuit and systems concepts, and mathematical models of components, Kirchhoff’s laws, resistors, sources, capacitors, inductors, and operational amplifiers, solutions of first and second order linear differential equations associated with basic circuit forms.

EPE200  Electrical Network Analysis
Current and voltage transients, RLC circuits with DC and AC excitation, resonant circuit: series and parallel resonance in AC circuit, Q-Factor, mutual inductance and transformers, introduction to phasor representation of alternating voltage and current, single-phase circuit analysis, star-delta transformation for DC and AC circuits, poly-phase generators, phase sequence, vector diagrams for balance and unbalanced three phase networks, power in three phase circuits.
Pre-requisite:  GSC103, EPE101

EPE302  Electrical Machines
To understand the magnetic field and the reluctance of magnetic materials and air. Voltage-current characteristics and voltage regulation of generator. Torque speed characteristics and speed regulation of DC motors. To introduce the fundamentals of ac machine. Detailed operating principles of ac machines including induction motor, synchronous motors, alternators and Transformers.
Pre-requisite:  EPE200, TCE204

Electronic Engineering

ELE200  Electronic Devices and Circuits
Transistors Modeling Techniques, Hybrid Equivalent Model,BJT Small Signal Analysis, AC Equivalent Circuits,FETs and MOSFETS construction and operation, FET Small Signal Analysis, AC Equivalent Circuits, Cascaded Systems and Compound Configurations, Differential pair of BJTs and MOSFET, Definition and amplifier types Class A, B, C and D amplifiers their operations and circuits Distortion and power considerations.
Pre-requisite:  GSC103

ELE201  Digital Logic Design
Introduce the concepts and tools for the design of digitalelectronic circuits. Basic concepts to design digital hardware consisting of both combinational and sequential logic circuits, number systems, Boolean algebra, logic gates, combinational logic design, sequential circuits and logic design, memory and simple programmable logic devices (SPLDs).
Pre-requisite:  ELE200

ELE202  Electronic Workshop Practices
To develop practical skills in the use of workshop tools and equipment. Introduction to various technical facilities in the workshop including mechanical and electrical equipment.
Pre-requisite:  CME102

ELE370  Instrumentation & Measurements
Introduces the concepts, methods and instruments for the measurement of electrical and non-electrical quantities.
Pre-requisite:  EPE200, ELE200

ELE403  Embedded Systems Design
Trends and challenges in embedded system design, The Microcontroller Architecture, Assembly Language programming, Addressing modes and Instruction Set, I/O Ports programming, TIMER and SERIAL and PARALLEL port programming, Interrupts, interfacing, A/D and D/A conversion. Interfacing and Application using PWM.
Pre-requisite:  CME205, ELE201

ELE415  Opto-Electronic
Nature of light, basic laws of light, optical fiber, types of optical fiber, fiber material, fabrication and components, Planer waveguides and applications, laser principle, operation, characterization and classes of lasers. optical transmitter, semiconductor light sources, light emitting diodes, semiconductor laser diodes (SLDs), Link Budget Analysis, optical receivers, wavelength division multiplexing (WDM), FDM versus benefits of WDM, dense wavelength division multiplexing and optical networks..
Pre-requisite:  ELE200

ELE417  Industrial Electronic
Pre-requisite:  ELE200

ELE419  Linear Control Systems
This course is aimed to build a comprehensive foundation in the analysis and design of control systems using classical and modern techniques.
Pre-requisite:  TCE205

ELE420  Power Electronics
Introduction to power electronics; solid-state devices used in power electronics: power diode, power BJT, power MOSFET, SCR, GTO, IGBT, TRIAC, DIAC; semi-controlled, fully-controlled and uncontrolled rectifiers: single-phase and three-phase, six-pulse, twelve-pulse and twenty-four pulse rectifiers; single-phase and three-phase inverters; pulse-width-modulated (PWM) inverters; UPS; types of converters; switched mode power supplies, AC and DC motor drives
Pre-requisite:  ELE200

ELE422  VLSI Design
Teach VLSI system design including system specification, verification, and fabrication.
Pre-requisite:  ELE200
ELE423 Digital Control Systems
Basics of digital control, theory of sampling, sampled data systems, discrete signals and sampling, difference equation, discrete transfer functions, z transform analysis, frequency response methods, state equations, time-discrete representation of time-continuous systems, discrete control algorithms, design methods of digital controllers, stability of digital control systems, discrete equivalents for continuous controllers, pulse transfer functions of feedback systems, digital-to-analog conversion, digital filtering of systems.
Pre-requisite: ELE419

ELE428 Digital Electronics
This course covers combinational and sequential logic circuits. Topics include number systems, Boolean algebra, logic families, MSI and LSI circuits, A/D and D/A converters, and other related topics. Upon completion, students should be able to construct, analyze, verify, and troubleshoot digital circuits using appropriate techniques and test equipment.
Pre-requisite: ELE419

ELE429 Introduction to Nanotechnology
Introduction, Nano scale phenomena, nanoparticles, carbon nanostructures, nanowires, nanostructured materials, self-assembly, surface probe microscopy, other Nano scale characterization, nanolithography, Nano scale devices and systems, applications of nanotechnology.
Pre-requisite: ELE422

ELE430 Solid-State Device
Solid-state device is an electronic device in which electricity flows through solid semiconductor crystals (silicon, gallium arsenide, and germanium) rather than through vacuum tubes. The first solid-state device was the “cat’s whisker” in 1906 in which a fine wire was moved across a solid crystal to detect a radio signal. Transistors made of one or more semiconductors are at the heart of modern solid-state devices in the case of integrated circuits, millions of transistors can be involved.

ELE432 Wireless Power Transmission
Wireless power transmission is the transmission of electrical power from a power source to a consuming device without using discrete manmade conductors. It is a generic term that refers to a number of different power transmission technologies that use time-varying electromagnetic fields. Wireless transmission is useful to power electrical devices in cases where interconnecting wires are inconvenient, hazardous, or are not possible.

ELE450 Senior Design Project I
To give students a chance for enhancing their Technical capabilities by implementing their theoretical & practical knowledge in the field of Research & Development. (For Semester VII).
Pre-requisite: All courses up to semester six

ELE451 Senior Design Project II
To give students a chance for enhancing their Technical capabilities by implementing their theoretical & practical knowledge in the field of Research & Development. (For Semester VIII).
Pre-requisite: ELE450

Engineering

ENG101 Workshop Practice
The course is focused on practical learning experiences. Students will develop their skills with materials/components, tools, machines/equipment and related technology. The course will also include workshop safety, project planning and design, reading working drawings and surface finishing.

ENG102 Engineering Mechanics
The course discusses static of particles, kinematics of particles, kinetics of particles, rigid bodies, equilibrium of rigid bodies, kinematics of rigid bodies, plan motion of rigid bodies, friction and analysis of structures.

ENG103 Engineering Drawing
This course extensively covers the drawing equipment and the use of instruments, basic drafting techniques and standards, freehand sketching of machine and engine components, concepts of working drawings of component parts of machines and engines, etc.

ENG105 Basic Industrial Engineering
This course is designed to introduce the fundamental concepts of industrial engineering and give answers to the very first questions that are usually asked by the prospective industrial engineering students. The course surveys both the traditional and modern topics of industrial engineering, providing a historical as well as an academic perspective of the whole profession.

ENG108 Introduction to Thermo-Fluids
To introduce basics of thermodynamic properties, laws of thermodynamics and their application to power and refrigeration cycles. Introduction of basic modes of heat transfer. Formulation of basic equations for Fluid Engineering problems. To determine the friction energy loss for various pipes/ducts geometries and fluid engineering applications. Introduction of hydraulic machinery.

ENG109 Industrial Chemistry
The course aims to introduce student to the general concepts of chemical engineering by laying the foundation to establish material and energy balances of chemical processes. Fundamental knowledge of stoichiometry and chemical equilibrium is applied to simple combustion and separation processes.

ENG201 Design of Machine Elements
The course content includes the choice of material, component design, shaft design and shafting, gear design, introduction to design of simple machine elements, governors and gyroscopes, design of springs and design/selection components.
Pre-requisite: ENG 101/102
ENG202 Production System Design
The course focuses on the structure and operation of production planning, scheduling and control systems; emphasis on system structure, capacity planning, master production scheduling, shop loading and supply chain; investigation of current trends, cellular manufacturing, group tech, flexible manufacturing systems and introduction to robot anatomy.
Pre-requisite: ENG 201

ENG203 Engineering Economics
The course includes the economic environment, cost concepts and analysis, time value of money, depreciation and depletion, comparing alternatives; production concepts and mathematical models and capital financing and budgeting.
Pre-requisite: ECO 104

ENG204 Plant Engineering
The course content comprises thermal power plants, steam generators and turbines, air-conditioning and ventilation, pumps and compressors, etc.

ENG 206 Manufacturing Process
The course is designed to focus on analytical study and design of manufacturing engineering with emphasis on manufacturing and processes; the interaction of design, materials, and processing, laboratory instruction and hands-on experience in metrology, machining, process planning, economic justification, current manufacturing methodologies and expendable and non-expendable casting processes.

ENG209 CAD/CAM Application
The course focuses on modular software development for interactive CAD. The topics include human interface for interactive design, programming structure for modular entity creation, storing and retrieving object data, utilizing peripheral input and output devices, attribute regulation and control, and software transfer and documentation specifications.
Pre-requisite: MIS 001/104

ENG216 Reliability Analysis
The course introduces the system reliability, focuses on analysis of deterministic, probabilistic and stochastic reliability models. The topics covered include coherent structures, minimum path representations, computing system reliability, systems with associated components, bounds on system reliability, classes of life distributions, optimal management of systems by replacement and preventive maintenance.
Pre-requisite: STA204

ENG217 Materials Engineering
To familiarize the students with various industrial materials, their applications, properties and structural changes during manufacturing processes.
Pre-requisite: GSC101 / ENG101

ENG218 Metrology & Statistical Quality Control
The course exposes the students to the principles of measurement, gauges and modern quality concepts and their practical use, the basic statistical & probability techniques and their usages in quality applications.
Pre-requisite: STA204

ENG219 Industrial Maintenance and Safety
To keep the plant and machines by removing every type of trouble and providing safe atmosphere in the organization to improve productivity and to enhance the efficiency and economy of the organization. Importance of plant maintenance, factors influencing the maintenance.
Pre-requisite: ENG206

ENG220 Mechanics of Materials
Simple tension, compression and shear, biaxial tension and compression, torsion, stress of beams, analysis of plane stress and strain. Deflection of beams, mechanical properties of materials.
Pre-requisite: ENG217

ENG300 Electrical Technology and Instrumentation
The course focuses on an index study of electrical technology and instrumentation. The course content includes electricity fundamentals and basic laws, A.C. fundamentals, electric machines fundamentals and measuring instruments.

ENG302 Industrial Maintenance
This course is designed to develop an understanding about Industrial maintenance. It includes basic considerations for industrial maintenance, maintenance management and replacement analysis.
Pre-requisite: ENG 301

ENG303 Production Planning and Control
The course is designed to provide the basics of production planning and control with the need of modern manufacturing organizations in mind. The topics covered in the first course are: production and operations strategy, subjective and objective forecasting -such as Delphi method, trend-based methods, and methods for seasonal series, deterministic inventory planning and control, etc.
Pre-requisite: MAN 304

ENG304 Automation and Robotics
The course focuses on the general principles of operation and programming of automated systems, automated assembly, automated manufacturing, and inspection systems. Control of automated manufacturing, industrial logic systems and programmable logic controllers, etc. are also a part of the course.
Pre-requisite: MIS 001/104

ENG305 Work Study and Methods Engineering
This course is designed to teach the fundamentals of Work Study and Methods Engineering, which are both used for the examination of human and human work in all their contexts. Work Study topics includes: methods study, charting techniques, time study, workplace design principles, job evaluation and compensation.
ENG306 Basic Machine Design
The course focuses on normal design procedure, strength & properties, metallurgical aspects, choice of materials, component design, gear design, design of springs, design/selection of screw, bolts, rivets and other joining components and power screws.

ENG307 / PHY209 Basic Electronics
The course is designed to understand and troubleshoot electrical and electronic circuits found in modern applications of technology.

ENG310 Computer Simulations
The course enables the students to become proficient in simulation model building and use of computer simulation as problem solving technique. Hands-on experience on computer simulation using any suitable software.
Pre-requisite: MIS104

ENG401 Computer Integrated Manufacturing (CIM)
The course is designed to help students to define computer integrated manufacturing (CIM), use manufacturer’s reference manuals to determine the system’s normal operating characteristics, set-up, program, and troubleshoot a system. The course provides them an opportunity to study the integration of robots, CNC, CAD/CAM, databases, and automated systems into the manufacturing environment.
Pre-requisite: ENG 209

ENG402 Manufacturing Strategies
This course deals with strategic implications of alternative methods of product cost measurement. The discussions will primarily be case-based and will cover cost measurement issues in both conventional and modern manufacturing environments.
Pre-requisite: ENG 207

ENG403 Human Factor Engineering
The course focuses on the analysis and design of work systems considering human capabilities and limitations, human anatomy and physiology, and occupational safety and health, an emphasis on understanding how human factor should be considered in design processes to maximize system effectiveness and safety.
Pre-requisite: HRM 301

ENG404 Tool Design
Tool design is a division of manufacturing or industrial engineering. This course includes lab work where jigs, fixtures, molds, and dies will be designed, built and operated. It also involves both theoretical and practical tooling design and experimentation, lab work, reporting and class discussion.
Pre-requisite: ENG 209

ENG405 Environmental Impact Assessment and Management
The goal of the course is to promote an understanding of how environmental impact assessment is conducted and used as a valuable tool in the engineering project management decision-making process.

ENG408 Facilities Planning
The course includes fundamentals in developing efficient layouts for single-story and multi-story production and service facilities, manual procedures and micro-computer based layout algorithms; algorithms to determine the optimum locations of facilities and special considerations for multi-period and dynamic layout problems.

ENG410/601 Maintenance Management
This course is designed to help students gain a perspective regarding the maintenance of buildings, industries, and facilities management. Administrative tools and methodology specific to maintenance activities are introduced. Students learn how to manage finance, equipment, materials, and personnel to carry out maintenance functions.

ENG412/602 Manufacturing Processes & Systems
The course includes manufacturing processes and systems, defines role of manufacturing in a world-class organization by improving operational processes. This is done by identifying internal and external customers in the manufacturing cycle, reducing lead-in time in production of quality products and services, integrating supply chain & by understanding working and benefits of CNC machines and automated processes.

ENG501/603 Technology Management
This course examines external environmental factors essential to manage organizations involved in new technologies. It considers the adoption of technologies and innovative processes. The students develop skills in acquiring and interpreting information about the external environment to facilitate technology management. The course analyzes the issues associated with resource management for a technology-based firm. This includes manufacturing technologies, information technologies, work force and materials.

ENG604 Enterprise Asset Management and Financial Analysis
The course focuses on the strategic and financial life cycle of enterprise assets covering all the stages including planning, commissioning, maintenance, asset financial analysis, disposal and replacement. Tools and techniques used for the analysis, planning, monitoring and evaluation of the financial feasibility of the assets during the life cycle.
Entrepreneurship

ENT507  Affordable Design and Entrepreneurship
The course focuses on creating entrepreneurial solutions for solving economic needs for lower segments of the society. The course runs as a virtual firm where students will work on distributed teams to develop social ventures by engaging with partner organizations, prioritizing programs and pursuing goals while deploying modest amounts of seed capital.

ENT508  Getting to Market: Commercializing Your Idea
The course exposes student entrepreneurs to some of the best innovations in the industry. The course entails the strategies for guerilla marketing, market research and product development processes, pricing, etc. Students will be trained to use variety of tools and techniques to address the challenges faced in initial development phase of the business.

ENT509  Building and Managing Start-Up Teams
This course is expected to provide participants with a solid understanding of how to overcome key challenges by addressing four critical themes: organizational architecture, leadership and motivation, team building, and negotiation in entrepreneurial settings. The course revolves around challenges faced by the company in knowing what type of human resource to recruit, how to recruit and how to retain and develop the human asset.

ENT510  Raising Capital Via Crowd Funding Venture Capital, Angel Funding And Debt
Raising capital for your entrepreneurial venture is a unique hands-on course which addresses key questions that challenge all entrepreneurs: how much money can and should be raised; when should it be raised and from whom; what is a reasonable valuation of the company; and how should funding be structured? The course comprehensively explores the financial tools needed by an entrepreneur in funding his or her own business.

ENT511  Managing A Growing Business
This course helps participants explore the critical framework required to build effective processes involving all key business functions in a startup. The course addresses issues of particular importance to rapidly growing companies including: getting the right people and systems in place, managing with limited resources, cash flow planning, leadership and delegation, professional zing the business, turning around a troubled business, establishing and communicating culture, and creating a vision to drive the organization toward the future.

ENT512  Startup Growth Strategies
This course aims to help participants apply the tools and techniques to develop appropriate action plans to address strategic growth challenges. The structure of the course will facilitate the students to analyze and evolve an appropriate structured approach to undertake them effectively.

Environment and Energy Management

EEM401  Environmental Issues and Management
What is environment? What is pollution? Classification of pollution, nature of pollutants, who is responsible for pollution? Effect of pollution, how to prevent and manage them? Health impact, environmental policy and its compliance, environmental protection agency role and is responsibilities, industries and citizens responsibilities towards pollution prevention, analytical methods for measurement of selected parameters of NEQS, case studies and plant visits will be part of this course.

EEM402/603  Air and Noise Pollution Management
Definitions and types of pollutions, causes, sources and effects of air pollution, particulate matters, measurement of air pollutants and particulate matters, green houses gases, global warming, causes, sources and effects, ozone depletion, acid rain, causes, sources and effects, air pollution prevention and control, strategies/methodology compliance of NEQS standards for air pollutants, nature of noise, propagation of noise in air, noise characterization, sources of noise, effect of noise pollution, health impact of noise pollution, noise measuring techniques and methodology, etc. will be covered in this course.

EEM403  Energy Sources and Management
The course will cover basic concept of energy, forms of energy, fundamental of renewable/non-renewable energy sources, energy and environment renewable energy sources, energy scenario in Pakistan, renewable energy potential in Pakistan, basic heat transfer mechanism, etc. Students will learn about the best practices in these areas, includes case studies and visit to plants.

EEM404  Industrial and Municipal Waste Management
The course will cover waste classification, sources, characteristics, generation, onsite handling and storage, collection, transfer, recycling and disposal techniques of solid and hazardous waste. It also covers history of waste disposal, dumping, and burning, land filling, composting and incinerating techniques as well as arious methods for the treatment of liquid effluents from municipalities and industries. Pre-requisite: EEM401

EEM405  Renewable Energy
The course will cover a brief history of energy, reasons of shortage and load shedding, fuel problems for energy, alternative fuels and its problems, power from wind, its environmental impact, costs and economics of alternative fuels, energy from bio-mass and solid waste its problems and environmental impact, etc.
Pre-requisite: EEM403
EEM406/604 Coastal Environment and Management
Products of direct economic value such as fish, hydrocarbons, minerals, dieseline water, etc., products of natural system (intangible), supply of rich nutrients to support productivity, nursery and breeding grounds of fish and shellfish, mangrove ecosystem, coast-dependent activities such as coastal aquaculture, marine transport and shipping, beach related activities, ports and harbor, etc. will be part of this course.

EEM407 Green Technology and Energy Analysis
This course is multidisciplinary and examines Environmental Management Systems (EMS), including their planning and organization. The course also studies how businesses can manage their interactions with the environment in a systematic strategic management approach. Since awareness of environmental issues has increased the need for product eco-compatibility. Students will learn a new methodological approach to design for the environment.

EEM408/614 Safety, Health and Environmental Management
The course is based on OSHA 18000 and is designed for students to understand the concept of EHS management, its importance and principles, hazards and risks at work place, causes and solutions, importance of EHS in industries, purpose and policy, developing safety policy, EHS auditing and inspections, safety training and employee’s motivation and involvement, Plant visit is part of the course.

EEM409/615 Risk and Disaster Management
This course is designed to enable students to develop management skills to operate and understand the complex techniques and key concepts of disaster and risk management pertaining to floods, earthquakes, etc. Students will develop critical evaluation and the application of key elements of business planning and the management of risk and disaster.

EEM410 Environmental Impact Assessment (EIA)
The course is designed to provide a critical overview of the theory and practice of EIA as per international standard to those students who need to understand pollution impacts on the environment and how to do its assessment. EIA is one of the major requirements of environmental regulations and the course would cover the impact of development on environment.

EEM411 Environmental Rules, Laws and Regulations
The course provides students various regulations of environmental laws of Pakistan and international practices, theory and enforcement problems, including policy making, analysis of policy, needs of environmental law, implementation of legislations, etc.

EEM412 Research and Survey Methodology
The course is designed for those students who are new comers to research and who may have barrier with regard to the research methods and having difficulties in writing thesis or a research project report. The course will give students a sound knowledge of research methodology which is essential for writing thesis, research project conceptualization, elements of a research proposal and formulation of research design.
EEM507/611 Energy Planning
The course will cover energy economics and planning, the nature and cause of the energy problems, demand side and supply side issues, and the role of energy in the environment. The course examines the economics of markets for various energy sources and their interactions with each other and with the rest of the economy. We will look at how energy markets have historically developed and why they have been subject to extensive government intervention. We will analyze the role of energy in the environment, economic growth, and the environment (carbon storage and the policy measures). The course will examine the energy market, demand and supply, energy balances, and energy statistics, definitions, of primary, secondary, delivered and useful energy, problems of interpolation and comparison of energy statistics, rural energy planning, pattern of energy demand and supply, socio-economic aspects of energy utilization, survey methods, identifying potential solutions, project planning, monitoring and execution, financial evaluation projects, project analysis and financial appraisal, discounted cash flow, time preference discount rates inflation and interest rates, project evaluation in terms of present values and internal.

EEM508/612 Environmental Ethics
The course focuses on the understanding of the natural environment and human relationship to it. The course provides strong coverage of major ethical theories such as moral, relativism, ethical egoism, and discussion about the tragedy of the commons, etc.

EEM509/613 Public Awareness for Environment and Energy Sector
This course will focus on the importance, scope and application of the public relation and public information as regard to environment and energy in the private and public sectors, the local, regional, national and international levels.

EEM510 Economics of Energy Management
This course examines the economics of markets for various energy sources (such as oil, coal, natural gas, and electricity), and their interactions with each other and with the rest of the economy. We will look at how energy markets have historically developed and why they have been subject to extensive government intervention. We will analyze the role of energy in the environment, economic growth, and the environment (carbon storage and the policy measures). The course will also look at energy demand and supply analysis, efficiency measures as well as current issues both local and international. The course is designed both for students interested in energy economics specifically, and for those interested in applied economics as well as oil and gas sector in general.

EEM601 Environmental Management and Green Technology
The world is facing increasing environmental and climatic threats which are posing severe scientific, social and economic challenges to the human race. These challenges include: the depletion of natural resources, the loss of diversity and the need to develop new forms of energy generation whilst efficiently utilizing existing energy sources. Tackling these environmental problems and establishing a sustainable environment requires the adoption of appropriate policies and managerial strategies. The interdisciplinary nature of this course provides a broad understanding of environmental problems. The course aims to provide basic managerial and generic skills for a career in the environmental sustainability sector.

Pre-requisite: EEM401

EEM602 Green Marketing Strategy: A Challenge for a New Era
The course is designed to introduce a framework for Green marketing management in light of the socio-economic, cultural and legislative changes related to environmental sustainability. The course provides an overview of concepts and techniques as they relate to marketing opportunities, marketing strategies and communicating effective marketing programs within the context of sustainability. Students will be challenged to critically analyze marketing strategies, plans and decisions. The students will also analyze the social shift that makes green marketing a key aspect of business strategy in light of the changing environmental scenario.

Pre-requisite: EEM401

EEM701 Methods and Issues in Advanced Qualitative Research
The course focuses on developing a working knowledge of a range of qualitative methods, methodological approaches, and theoretical framework of research to enable the participants to conduct qualitative research within the social sciences. Through lectures and seminars, current methodological issues are analyzed and discussed. The participants will conduct an empirical investigation designed to evaluate the usefulness of a research method that they select. The research method itself thus be the focus of inquiry. Academic writing skills will be developed to enable participants to write effective academic papers.

EEM702 Methods and Issues in Advanced Quantitative Research
The primary goal of the course is to help participants to develop a conceptual background and practical skills needed to critically evaluate statistics and to conduct statistical analyses of empirical data independently (e.g., independent study projects, etc.). This course will also introduce computer applications for data analysis, including construction of data files, SPSS for data analysis, and development of an analysis plan. In addition, participants are expected to learn how to document and communicate the results of the analysis efficiently. APA writing style will be introduced to enable participants to write their thesis.

EEM703 Current Advancement and Trends in Environment, and Energy Management
The course focuses on the understanding of the natural environment and human relationship to it. The course provides strong coverage of major ethical theories such as moral, relativism, ethical egoism, and discussion about the tragedy of the commons, etc.
EEM704 Independent Study in Environment and Renewable Energy Management
This course will provide space to the participants coming from different scientific disciplines to propose a research topic in their field of interest. The research work should be completed within one semester for publication preferably in an impact factor journal. For independent study, the participants will be provided a suitable adjunct faculty member of the university, who is able to facilitate in completing the process of research and publication. This independent study course will be different from the main PhD research study and will be beneficial for the candidate in providing them with experience to pursue their major work of investigations, providing an exposure to plan, conduct and publish a small scale research project in their area of interest.

EEM801 Advance Environmental Toxicology & Epidemiology
The course will help develop concepts of adverse toxic effects of environmental chemicals and biological solid/liquid effluents from natural and anthropological sources present in air, water and soil on human and other living organisms. It will examine the overall toxicological and epidemiological management approaches and learn to maintain a balanced approach and balanced public expenditure on environmental health (preventive health) and curative health. The course will expand understanding of percepts that the environmental diseases do not necessarily occur at random and without reason and require taking proactive preventive approaches.

EEM802 Advanced Pollution Control Technologies and Mitigation Options
Advanced pollution control technologies are of concern from two overlapping but distinct point of view of human health and the health of aquatic ecosystems. The course is designed to develop understanding of environmental quality and its control technologies vis-à-vis advanced pollution control technologies and mitigation options in environmental profession. It will entail understanding about different types of pollution, including properties, industrial production, uses, environmental releases, fate, health impacts and mitigation options. Pollution categorization into air, water and soil pollution, organic/inorganic pollutants, pesticides and other toxicants.

EEM803 Advances in Green Technology Mechanism
Green technology being relatively new field is mushrooming its growth in length and breadth exponentially. The course is designed to understand the conceptual development of greening technical strategy, branding/communicating strategy and overall management systems. The course will provide in-depth understanding of what is unfolding green agenda means to all aspect of technologies. The green initiatives benefit from the newer green economic landscape and reap advantage of being a trend setter in the development of continuously improved environmental friendly concepts and technologies and consequently help in introducing of new/improved national/international legislation of improved productivity and profitability.

EEM804 Disaster Risk Management and Mitigation Strategies
There is growing national and international concern at the rising frequency and severity of natural hazards and disasters, in part due to factors related to climate change, there is increased impetus in many countries to put in place policy, legal, technical, financial and institutional measures that will reduce the destructive effects on the lives and livelihoods of individuals and communities.

EEM805 Trade and Environment
The objective of Trade & Environment course is to raise awareness on the linkages between trade, the environment and sustainable development, to promote greater dialogue between trade and environment policy makers. WTO, Introduction to environmental economics. Impact of trade on the environment, Impact of environmental regulation on trade, CBD and the Biosafety Protocol, CITES. Basel Convention on the Control of Transboundary Movement of Hazardous Wastes and their Disposal.

EEM806 Sustainability and Conservation of Major Ecosystems
The course introduces the concept and practice of sustainable development (SD). It examines the environmental, economic, and social dimensions of SD by focusing on changing patterns of consumption, production, and distribution of resources. Evaluation of resources. Tropical, Temperate and Polar Ecoregions. Forest, Mountains, deserts, riverine, rangeland areas. Understanding world’s oceans and their environments.
Finance and Banking

FIN201 Introduction to Business Finance
The course explains the fundamental concepts of finance and aims to provide the basics of time value of money, valuation of current assets, financial forecasting and planning, ratio analysis and common size statements, and risk measurement techniques. Pre-requisite: ACC102/103/201

FIN202 Financial Management
This course is a step above Introduction to Business Finance and covers decision making through forecasting, discounted cash flows, capital budgeting techniques, leverage, capital structure determination, etc. Pre-requisite: FIN201

FIN301 Financial Institutions
The course provides an analysis of the working and interaction among various types of financial institutions, financial markets and the economy. The topics include policies of financial institutions, interest rate structure and the security and mortgage markets. Pre-requisite: FIN 201

FIN305 Internet Banking and EPS
In this course, students will study topics which include: e-commerce, e-business, digital commerce, B2B, B2C, internet advertising, internet auctions, internet banking, internet marketing. Case studies that give students great experiential knowledge to be effective in the market will also be a part of the course. Pre-requisite: FIN201

FIN403 Islamic Banking and Finance
This course is designed after taking into account the changing market requirements of the financial sector not only in Pakistan but also worldwide. The course content comprises of different contracts involved in Islamic finance and their relation with contemporary Islamic banking industry. Pre-requisite: ECO 401 FIN202/408

FIN406 Financial Econometrics
This course provides an intensive introduction of basic principles of econometric analysis that may help students understand finance theories and their empirical applications. In addition, it also equips students with appropriate statistical techniques for doing applied financial research. The emphasis will be on developing and applying regression-based techniques in both cross-sectional and time-series contexts. Their usefulness will also be examined in the light of financial studies. Pre-requisite: ECO304, FIN408/501

FIN408 Theory and Practice of Financial Management
The objective of the course is to introduce fundamental concepts underlying financial management. The main concepts examined include financial planning & forecasting financial statements, time value of money, bond and stock valuation, cost of capital, and capital budgeting. Students will be able to understand the specific techniques and decision rules that are used to help maximize the value of the firm.

FIN410 Finance for Entrepreneurial Ventures
The aim of this course is to prepare the student in understanding the dynamics of handling the finances of their small business(s). This course is one of several courses to prepare the individual to become more aware of all the aspects of planning, researching, and utilizing their finances for their small businesses more effectively. Pre-requisite: FIN408

FIN501 Advanced Financial Management
The objective of this course is to introduce the basic asset valuation models, risk management system, ways to acquire and allocate funds in the most economical and profitable manner, concepts and principles governing investment decisions, etc. Pre-requisite: FIN 408

FIN503 Corporate Finance
Main topics included are advanced capital budgeting, valuation of securities, risk return relationship; cost of capital estimation techniques, capital structure. Specialized topics like Mergers & Acquisitions and International Financial Management are also covered. Pre-requisite: FIN202/408

FIN504 International Finance
The course deals with the factors affecting currency values and the forecasting of future currency prices; describes foreign exchange products, markets, and participants and examines foreign currency exposure from a corporate point of view. Pre-requisite: FIN 202/408

FIN505 Treasury and Fund Management
The course equips students with generic, technical, computational, analytical, critical and evaluative skills relevant to financial management and the commercial bank treasury department function; the role of State Bank of Pakistan with close reference to money and capital markets. Pre-requisite: FIN202/408

FIN506 Investment Banking and Security Analysis
The objective of this course is to teach students how the investment industry works and the role played by investment banks. Students are taught to ascertain the investment objectives of the investors in light of the investor’s appetite for risk and return. Students learn the techniques for valuing different kind of securities. Role of stock market, their procedures for company listing, operations and regulations are also included in the course. Pre-requisite: FIN202/408

FIN507 Portfolio Management
The course covers the application of portfolio theory to investment decisions and performance evaluation to cover both the fundamentals of investment theory and the most recent developments in academic research involving the practical implementation and analysis of modern portfolio strategies. Pre-requisite: FIN202/408
FIN509  Financial Derivatives
The course covers a wide range of financial derivatives, including forwards, futures, swaps and options. The working of various derivative markets and the pricing of derivatives are discussed. The course also covers trading/investment strategies that involve these derivatives. Pre-requisite: FIN202/408

FIN510  Investment Analysis
The course includes alternative investment theories and decision making under differing uncertainties and constraints. Formulation of objectives and strategies, development of conceptual managerial perspectives for investment environment and security analysis will also be covered in this course. Pre-requisite: FIN 202/408

FIN511  Analysis of Financial Statements
The course begins by describing accounting standards of USA and international accounting standards with special focus on developing students’ capability to standardize various companies and sectors’ financial statements. It develops a road map of financial analysis from both the creditor and equity investor’s point of view. Pre-requisite: FIN 202/408

FIN512  Money and Capital Markets
This course covers the fundamentals of money and capital markets, like market instruments and mechanisms and various risk management techniques. Pre-requisite: FIN 202/408

FIN513/608  Project Appraisal
The course teaches formulation of projects and financial projections into the future. Balance sheet, profit and loss accounts and cash flows are prepared for future years depending on the need and nature of the projects. Economic analysis like internal economic rate of return, Bruno’s ratio and the economic rate of return are also described. The course equips students with the understanding of nuances of consortium and syndicate finances. Pre-requisite: FIN202/408/601

FIN514  Asset Liability Management
The course gives an insight into the traditional functions of Asset Liability Management (ALM). It gives a comprehensive review of ALM hedging techniques that encompass all assets and liabilities of financial institutions. Regulatory environment prevailing in the Pakistani financial market and how the State Bank of Pakistan and the Securities and Exchange Commission are regulating financial institutions in Pakistan is also discussed in this course. Pre-requisite: FIN 202/408

FIN515  Foreign Trade and Banking
The course aims at discussing the technicalities of foreign trade covering basic concept, difference between local and foreign trade and documentary requirements of banks. Pre-requisite: FIN 202/408

FIN517  Theory and Practice of Finance
The course will cover overview of risk and return, stochastic dominance, portfolio theory, mean variance decision model, other statistical methods, efficient markets, skewness, limits of arbitrage, attention, corruption, political connections, corporate governance and the role of the government, financial econometrics, market microstructure, informational efficient markets, managerial behavior, agency cost and capital structure, etc. Pre-requisite: FIN 202/408/501/601

FIN519  Industrial and Financial Economics
This course provides a basis in the neoclassical theory of finance that underlies other finance courses. This course is primarily concerned with static, i.e., one period, theories of finance. This course will convey more conceptual understanding of finance than exercise complicated mathematical derivations. It starts with examining the data and then develops basic finance theory to explain the data. Pre-requisite: FIN 202/408

FIN520  Financial Risk Management
This course deals with the theoretical and practical approaches to effective financial management. Planning, analyzing and controlling investment and short and long term financing are examined for decision-making purposes. Emphasis is placed on the application of risk, the methods in today’s business environment and related industries. Topics include: Capital budgeting, risk and diversification, asset liability management, financial derivatives and financial engineering, swaps, options and financial future. Pre-requisite: FIN202/408

FIN521  International Financial Management
Students taking this elective course should expect to learn the nature and purposes of financial management in the international context. They will gain skills in international investment and financing techniques and in exchange risk management, including accounting and taxation aspects. They will learn, through hands-on case studies and simulations, how to judge the riskiness of a currency from a firm’s perspective, and how to measure and manage the company’s exposure to exchange rate and international interest rate risks. Pre-requisite: FIN202/408

FIN530  Commercial & Corporate Banking
Commercial Banking is a comprehensive study of commercial banks and their role in the economy. The course emphasizes the practical application of business and economic principles as they relate to bank management and regulatory policy, and examines the role that commercial banks perform in an economy and highlights the basic principles of commercial bank management. The course also aims to empower the students with practical knowledge about the branch and corporate banking and its functions. Pre-requisite: FIN202/408
FIN531  Real Estate & Alternative Investments
Increased volatility in traditional financial products and financial markets has led investors to include nontraditional investments in their portfolio. The course aims at developing comprehensive understanding of alternative investments including hedge funds, private equity, commodity and real estate. The course will utilize real world cases to gain experience in order to develop skills necessary to prepare, analyze and evaluate alternative investments.
Pre-requisite: FIN202/408

FIN533  Information Technology and Product Innovation in Financial Services
Financial technology, i.e. Fintech, is an economic industry composed of companies that use technology to make financial services more efficient. Financial technology companies are generally startups trying to overcome incumbent financial systems and challenge traditional corporations that are less reliant on software. FinTech innovation is an important component of economic development and financial inclusion, especially for emerging economies. FinTech is reshaping the financial experience of millions of people and businesses around the world today, and has the potential to dramatically alter our understanding of financial services tomorrow.
Pre-requisite: FIN202/408

FIN534  Retail & Consumer Banking
This course is the study of the provision of products and services to meet the financial needs of individuals with a steady and verifiable income flow. Students are introduced to the operation of the financial services industry, the products and services available, and how they are effectively marketed to satisfy the needs of Retail.
Pre-requisite: FIN202/408

FIN601  Strategic Financial Analysis and Design
The objective of this course is to enhance the candidate’s conceptual financial management knowledge and its modern application practices with focus on real world business finance decision making scenarios. The course attempts to develop strategic decision making abilities by aligning theory and practical evidence.
Pre-requisite: FIN202/408

FIN602  Behavioral Finance
Initially field of finance was based on efficient market hypothesis stating that investors and managers are rational participants and prices are efficient. However the last decade negated this paradigm to be the only feature to describe actual financial markets. Researches prove that mistakes in financial decisions are at times caused by biasness of the decision maker. The course examines the psychological influence of investor behavior while making investing decisions.
Pre-requisite: FIN601

FIN603  Entrepreneurial Finance
This course is intended for students who wish to enhance their skills and knowledge in those financial areas of business that lead to successful entrepreneurship and/or small business management. The focus will be on those financial issues and decisions of particular concern to sole proprietors, partnerships and family-owned businesses. This will also include the financial aspects of the relationship between the firm and financial institutions.
Pre-requisite: FIN202/404

FIN605  Financial Modeling for Investment Decisions
Financial modeling course enhance the skills required to test different scenarios leading to company’s future growth. The course will enable the students in identifying company’s key value drivers and would also help them in developing spreadsheet valuation models. The course also shed light on evaluation of financial returns and their relationship with resource constraints.
Pre-requisite: FIN202/404

FIN606  SME & Micro Financing
This course is designed for students willing to become entrepreneurs or considering working in banks, NGOs, and multinational donor agencies. After the course, they will be able to develop and put into practice analytical skills, tools and techniques used in appraising and taking financing decisions. The course also explores the best practices and paradigms in design and management of MSMEs.
Pre-requisite: FIN202/404

FIN610  International Islamic Finance Standards
This course is designed to provide the students an understanding of AAOIFI standards and the key accounting issues that they are trying to address. Through a review of the twenty-three (23) AAOIFI Standards delegates will gain an understanding of how this provides a picture of the financial health and Sharia’a compliance of the institution? Some key differences to International Accounting Standards (IAS) will also be highlighted to enable counterparty credit risk comparisons to be undertaken.

FIN611  Islamic Capital Market
This course is designed to enable participants to acquire a working knowledge of the principles driving Islamic Capital Market (ICM). This course covers the concepts and principles of Islamic Finance, and to distinguish the differences between Conventional and Islamic Finance, exploring the concepts of Riba’, Gharar and gambling in Islamic Finance. As recognize the Islamic Finance as an alternative form of investment that acquire knowledge of regulatory framework governing Islamic Banking, Takaful and Islamic Capital Market (ICM) activities.

FIN613  Financial Modeling for Investment Decisions
Financial modeling course enhance the skills required to test different scenarios leading to company’s future growth. The course will enable the students in identifying company’s key value drivers and would also help them in developing spreadsheet valuation models. The course also shed light on evaluation of financial returns and their relationship with resource constraints.
Pre-requisite: FIN202/601
Finance and Risk Management

FRM201/401 Principles of Risk Management
This course aims to introduce students to the rationale, principles, process and major tools of risk management. A holistic/integrated view of risk management is adopted throughout the course. Covered topics include the concept of risk, risk theory, risk measurement, corporate risks and the rationales of corporate risk management, risk management organization and process, and some major tools of risk management. A lot of the course content reflects the latest developments & industry practices in the discipline of risk management.
Pre-requisite: MAN401 / STA402

FRM202 Life and Other Contingencies
Survival distributions and life tables. Construction of mortality, sickness, multiple decrement and other similar tables for graduated data. Determination of the probability and monetary functions based on mortality, sickness, multiple decrement and other similar rates. Values for premiums for single life annuities and assurances. Determination of policy values, surrender values and paid-up policy values.
Pre-requisite: MTH211

FRM204 Enterprise Risk Management
This course is designed to provide information to actuaries who do not yet regularly practice in enterprise risk management (ERM), but want to know more about it to help expand existing skills or meet professional development requirements. The course content is designed to be introductory, and provides less hard-core mathematics and more conceptual understanding and learning. ERM has been a hot topic for several years and the Society of Actuaries and its members have worked with other actuarial organizations around the world to develop best practices and share them within the actuarial community.
Pre-requisite: FRM201

FRM206 Institutional Investments
The course will start by reviewing basic investment practice, with a discussion about the differentiating institutional features of markets, instruments and benchmarks around the world. It will focus on investment theory, by reviewing the benefits of adding international securities to a domestic portfolio and the key elements of an investment program, starting with the definition of a philosophy and continuing with the construction of a process for managing international equity portfolios.
Pre-requisite: FIN507

FRM302/402 Computational Methods in Risk
A historical perspective of market risk measurement, including the Markowitz, CAPM, and APT models; investigation of the value-at-risk approach and its variants and extensions, and a survey of other methods for evaluating risk, including multivariate methods for evaluating portfolios requiring copula tools.
Pre-requisite: MTH210, MTH410

FRM304/404 Risk Financing Techniques
The Risk Financing course explores the selection, implementation and monitoring of risk financing techniques — ways in which an organization can obtain funds to pay for accidental losses which strike it. Topics include risk financing objectives, various types of risk financing plans, insurance as a risk financing technique, capital market products for risk financing, forecasting accidental losses and risk financing needs, accounting and income tax aspects of risk management, and allocating risk management costs.
Pre-requisite: FRM302/402

FRM403 Introduction to Financial Risk Management
This course covers the principles of financial risk management and financial engineering from the perspective of non-financial corporations. The first part of the course discusses how to measure risks and risk exposures, why firms should or should not hedge, and how to hedge basic exposures. You will also learn how to manage foreign exchange rate risk, interest rate risk, commodity price risk and credit risk. The second part of the course demonstrates how financial engineering, i.e., the issuance of complex financial securities, can increase shareholder value.
Pre-requisite: FRM401

FRM405 Advanced Financial Risk Management
This course is tailored to provide financial risk professionals with the necessary groundwork required to become a financial risk specialist including the latest standards that represent best practice. The course is essential for any person currently in or planning to enter careers in the financial sector, retail banking, investment & merchant banking, asset management, corporate finance, risk analytics and strategic consultancy.
Pre-requisite: FRM403

FRM503 Corporate Risk Management
This course provides an introduction to modern methods of risk management. Lectures cover risk metrics, measurement and estimation of extreme risks, management and control of risk exposures, and monitoring of risk positions. The impact of risk management tools, such as derivative securities will be examined. Issues pertaining to the efficiency of communication architectures within the firm will be discussed. Regulatory constraints and their impact on risk management will be assessed.

FRM504 Theory of Risk and Insurance
FRM505  Risk Management in Corporate Treasury
The role of the treasurer has grown from the traditional financial risk management role to one with a much wider remit. This module aims to explore the theoretical and practical issues in the discipline of treasury risk management as applied to listed non-bank corporate. The subject matter will be of interest to potential corporate treasurers, and to those in banks who require an insight into what major corporate customers require from banks.

FRM506  Financial Regulation and Supervision
The area of financial regulation has been even demanding after financial turmoil of 2008 and another looming financial crisis given the instability of global financial institutions. The aim of the course is to build knowledge and skills among the students to produce quality risk management professionals who can add value to the existing regulatory framework of the country while help commercial banks at the same time with implementation and compliance of the regulatory requirements.

FRM508  Financial Markets Issues and Crisis
The financial markets have gone leveraged manifold during the last decade. This increased leverage with complex structured products demands in-depth understanding of the issues in financial markets. The course is aimed to produce professionals with clear understanding of structured products and issues with them. Development of financial markets, anticipating a financial crisis and taking necessary steps to avoid one are key elements of this course.

FRM510  Energy Risk Management
Today, that industry is still growing. Through organizations such as the Professional Risk Managers’ International Association we can see its growth every day. This course aimed to understand the risk in trading strategies in Oil risk developed into gas risk, and now on a global scale. Electric power risk management was the next market to develop. The weather derivatives markets followed that. Threatening larger than all these markets is the global environmental financial risk management market for emissions trading.

FRM512  International Risk & Financial Reporting
This course is designed in two parts. Part one containing the Risk Reporting standards prevailing in the current International market. Risk Reporting is currently gaining high importance in the financial markets sand become vital after the financial crisis. Basel banking risk reporting standards are also discussed. In part two student will get the understanding on International Reporting standards (IAS). International Reporting Standards regulated by Financial Accounting Standard Board (FASB).

FRM513  Project Risk Management
This course provides the background reason for existence of the project finance to understand the mechanism of financial market to provide the capital on large scale projects.

FRM514  Takaful & Risk Management in Islamic Products
This course covers risk management issues for Islamic financial products and services, considering all of their unique characteristics that are underlined by the Shariah principles and law. In addition to what conventional finance is providing, Islamic banks are providing specific financial products (contracts) which make them perform as investors, instead of only as creditors.

FRM516  International Financial Reporting & Standards

**General Sciences**

GSC101  Physics
The course aims to cover vector review, Coulomb’s law, electric fields, Gauss’s law, electric potential, capacitors and dielectrics, d.c. circuits, Kirchoff law, RC and RL Circuits, magnetic fields, Ampere’s and Faraday’s laws, energy stored in electric and magnetic fields, Biot and Savart law, electromagnetic oscillations, a.c. in resistive, inductive and capacitive, elements.

GSC103  Applied Physics
**Health Management**

**MHM401/529 Introduction to Health Policy, Planning and Management**
This course provides students with an overview of the health system in Pakistan and introduces them to the concepts of public health and the basis of public health programs in the country. The course also covers the planning methodologies and role of health planners within the health care sector. Concepts and techniques of health planning as applied to community and institutional health systems are analyzed.

**MHM402/530 Quantitative Analysis**
The course includes introductory as well as advanced study of stochastic and quantitative analytical tools and concepts which can be used to compute vital statistical rates applicable to problems in public health. Topics such as regression analysis, anova, chi-square are also discussed.

**MHM403/531 Health Management Information Systems**
Applications of computer technology for designing management information system for health care institutions. Topics include data collection, reporting and transmission, file design, record structure, report formats, processing requirements, medical records and statistical audit. Principles of managing the acquisition and development of health management information system are also discussed.

**MHM404/532 Research and Survey Methodology**
This course is designed to familiarize students with basic concepts surrounding surveys. It intends to expose students to the various components, techniques and methods of developing survey instruments and modes of survey conduction. It defines the basic concepts of research methodology and designing of sample survey, including data presentation through tables and graphs.
Pre-requisite: MHM401 or MHM529, MHM530 or MHM402

**MHM501/623 Pharmaceutical Branding**
This course emphasizes on the expressional area of promotion and capitalizes on the functional area as well. Students will be able to launch new brands, create strategy for brand equity with long-term sustainability, handle multi-brand portfolios and conduct evaluation of brands.
Pre-requisite: MKT401 or MKT402

**MHM504/601 Strategic Management of Health Services**
The content of the course is developed around several health care trends including restructuring, innovation of health care delivery and finance and an increased emphasis on performance. It addresses basic theory, strategic plan development, organizational analysis and specific appropriate analytical techniques, implementation strategies and case studies.
Pre-requisite: MAN401/418, MHM401/529

**MHM505/606 Concepts of Primary Health Care**
The course familiarizes students with the basic concepts surrounding primary health care. It aims to provide the basic conceptual understanding of public health problems pertaining to the availability, accessibility and affordability of primary health care services.
Pre-requisite: MHM 401/529

**MHM507/607 Introduction to Epidemiology**
The course includes definitions, principles and factors related to the manifestation of infectious and non-infectious diseases, including tracing their sources, modes of survey conduction, controlling spread and initiating measures to prevent recurrences.
Pre-requisite: MHM402 or 530, MHM404 or MHM532

**MHM508/608 Pharmaceutical Marketing & Quality Assurance**
This course examines the nature of pharmaceutical industrial market and analyses of customer procurement strategy, product policy, pricing, distributing strategy and sales force management strategy.
Pre-requisite: MKT401 or MKT402

**MHM509/609 Marketing of Health Services**
The course aims to familiarize the students with methods most commonly used in marketing of health services. It focuses on the critical links between health service marketing as it relates to customers, competitors, market segmentation and definition of target markets.
Pre-requisite: MKT401 or MKT402

**MHM511/610 Population and Health**
The course studies the impact of population growth on the health of the populace and its effect on the health care delivery system.

**MHM514/611 Environmental Health Assessment and Management**
The objective of this course is to study the impact of environmental pollution and degradation on the health of populace. It provides theoretical instructions with a focus on environmental health assessment and knowledge of managing environmental health problems.
Pre-requisite: MHM401/529

**MHM602 Health Service Delivery & Operation Management**
The course addresses major functions and issues surrounding supervision of hospitals and pharmaceutical establishments relationships/differences between line and staff functions. Likert Scale, Peter Principle, McGregor’s Theory X and Y are also discussed.
Pre-requisite: MAN401 or MAN418, MHM401 or MHM529
MHM517 / BPR601/602  Capstone Project I and II
A Capstone Project course of 6 credit hours is a supervised research, which applies curricular concepts and skills to the problems in an organizational setting.
Pre-requisite: MHM402 or MHM530, MHM404 or MHM532

MHM518/613  Regulatory Affairs at Healthcare Industry
Healthcare is a highly regulated industry and the course provides an insight into the important laws and regulations controlling business in the healthcare sector. Upon completion of the course, students will be well versed with drug laws, good manufacturing practices, and laws governing operation of blood banks, breast feeding ordinance, 2002, and environmental concerns.
Pre-requisite: MHM401 or MHM529, MHM602 or MHM515

MHM520/614  Product Management
This course focuses on creating and managing product and brand portfolios in pharmaceutical industry for long-term profitability, as established and mature products and brands are critical to an organization's financial stability and strategic posture. Students will apply strategic frameworks for managing mature products for profitability, transferring existing competencies to new products and evolving market opportunities of a product portfolio.

Pre-requisite: FIN202/601
Languages

LAN101 Introduction to Arabic
This course is designed for those who do not have any prior knowledge of this language. It enables students to carry out basic conversation in Arabic. Students are prepared in a manner that they can put the message across. This course is designed to bring about awareness about the business taking place between Pakistan and the Arab countries.

LAN102 Introduction to French
This course is designed for those who do not have any prior knowledge of the language. It enables students to carry out basic conversation in French. Students are prepared in a manner that they can put the message across. This course is designed to bring about awareness about the business taking place between Pakistan and France.

LAN103 Introduction to Spanish
This is an introductory course in Spanish. It is structured for those who have no prior knowledge of the Spanish language. It starts from the basics and brings the students to a level at which they can develop phrases and understand spoken Spanish.

LAN104 Introduction to German
This is an introductory course in German language. It is structured for those who have no prior knowledge of the German language. It starts from the basics and brings students to a level at which they can develop phrases and understand spoken German.

LAN105 Introduction to Japanese
This is an introductory course in the Japanese language. It is structured for those who have no prior knowledge of the Japanese language. It starts from basics and brings students to a level at which they can develop phrases and understand spoken Japanese.

LAN106 Introduction to Italian
This is an introductory course in Italian. It is structured for those who have no prior knowledge of the Italian language. It starts from basics and brings the students to a level at which they can develop phrases and understand spoken Italian.

LAN107 Introduction to Russian
Introductory course structured for beginners. Students will learn basic grammar, pronunciation and dialogue interaction so as to develop phrases and understand spoken language.

LAN108 Introduction to Chinese
This course is designed for those who do not have any prior knowledge of this language. It enables students to carry out basic conversation in Chinese. Students are prepared in a manner that they can put the message across. This course is designed to bring about awareness about the business taking place between Pakistan and the Chinese countries.

LAN109 Urdu I
Urdu I is a foundation level course meant to stimulate students' curiosity in a language that serves as the primary vehicle of communication in the country's journalistic environment. Focused first on strengthening structural elements of grammar and composition, the course helps develop vocabulary and writing skills, through reading of short essays, poems, and articles of general interest.

LAN110 Urdu II
Urdu II is geared to enhance the students' language competency by introducing them to classical and contemporary literature, in some measure, and encouraging structured discussion and debate in class. Writing exercises alternate reading of text that gets more extensive and challenging as the semester progresses.

LAN112 Urdu I
Urdu I is a foundation level course meant to stimulate students’ curiosity in a language that serves as the primary vehicle of communication in the country’s journalistic environment. Focused first on strengthening structural elements of grammar and composition, the course helps develop vocabulary and writing skills, through reading of short essays, poems, and articles of general interest.

LAN113 Urdu II
Urdu II is geared to enhance the students’ language competency by introducing them to classical and contemporary literature, in some measure, and encouraging structured discussion and debate in class. Writing exercises alternate reading of text that gets more extensive and challenging as the semester progresses.

LAN201 Intermediate Arabic
This course is designed for those who have basic knowledge of the language and are able to make simple conversation. It further enables students to converse in Arabic on a higher level for specific dealing purposes. This course is designed to give general knowledge of how to communicate in different environments in Arabic. It prepares students in a manner that they can deal with different situations while traveling and corresponding with Arabic natives by letter or e-mail. The main objective of this course is to bring students to a level where they can communicate well and deal with different situations in basic business Arabic.

LAN202 Intermediate French
This course is designed for those who have basic knowledge of the language and are able to make simple conversation. It further enables students to converse in French on a higher level for specific dealing purposes. This course is designed to give general knowledge of how to communicate in different environments in French. It prepares students in a manner that they can deal with different situations while traveling and corresponding with French natives by letter or e-mail. The main objective of this course is to bring students to a level where they can communicate well and deal with different situations in basic business French.

LAN203 Intermediate Spanish
This course is for those who have a basic understanding and command of the Spanish language. It is oriented towards advanced sentence structuring and composition while improving one’s speech style.

LAN204 Intermediate German
This is an advanced course for those who know the basics of the German language. It teaches advanced sentence structuring and composition while improving one’s speech style.
LAN205 Intermediate Japanese
This course is for those who have a basic understanding and command of Japanese language. It is oriented towards advanced sentence structuring and composition while improving one’s speech style.
Pre-requisite: LAN 105

LAN206 Intermediate Italian
This course is for those who have basic understanding and command of the Italian language. It is oriented towards advanced sentence structuring and composition while improving one’s speech style.
Pre-requisite: LAN106

LAN207 Intermediate Russian
The course is oriented towards advanced sentence structuring and composition while improving dialogue interaction.
Pre-requisite: LAN107

LAN208 Intermediate Chinese
This course is designed for those who have basic knowledge of the language and are able to make simple conversation. It further enables students to converse in Chinese on a higher level for specific dealing purposes. This course is designed to give general knowledge of how to communicate in different environments in Chinese. It prepares students in a manner that they can deal with different situations while traveling and corresponding with Chinese natives by letter or e-mail. The main objective of this course is to bring students to a level where they can communicate well and deal with different situations in basic business Chinese.
Pre-requisite: LAN108

LAN401 Functional Urdu
The course will give an insight into the basics of Urdu language. Students will be able to shape language to communicate effectively, while applying appropriate conventions of language usage and grammar. The course will also focus on vocabulary and reading, writing and speaking skills.

Law

LAW101/102 Mercantile Law I & II
The courses aim to enable the students to develop a professional approach towards matters connected with Mercantile Law in the performance of their duties as chartered accountants.

LAW103/104 Company Law I & II
These courses provide candidates with knowledge of the Companies Ordinance, 1984, and helps them to develop an understanding of their application to corporate and other business environment, excluding advanced topics such as provisions relating to arbitration, arrangements and reconstruction, prevention of oppression and mismanagement, winding up, etc.
Pre-requisite: ACC102

LAW301 Intellectual Property, Patents, Copyrights
This course emphasizes on patents and copyrights and a briefer look at trade secrets and trademarks. Current issues relating to information technologies and business methods will be highlighted. The seminar has no prerequisites, and is designed for both graduate students and undergraduates.

LAW400 Company Secretarial Practices
This course introduces participants to the duties and responsibilities of the corporate secretary in organizations. Students will explore the role and functions of the corporate secretary and the application of best practice in the conduct of meetings and in ensuring compliance with legal and regulatory requirements.

LAW401 Business Law

Pre-requisite: MAN 101/301/401

MAN303/406 Production and Operations Management
The course will provide a student-oriented presentation of the subject. It will reflect current production and operations management practices and techniques. An integrated approach featuring management process, resource conversion and concepts, models, and behavior applications within the production/operations function will be followed.
Pre-requisite: MAN 101/301/401, STA 202, MTH 103

MAN305 International Relations
This course aims at providing basic knowledge of international relations. In this course, the key theoretical concepts and terms of the field will be discussed such as level of analysis of international relations, theory and theory building, important actors in the international arena and the world system, and relations between states.
Pre-requisite: MAN 201

MAN307 Entrepreneurial Leadership and Motivation
The course aims at inspiring students to become successful entrepreneurs and attain leadership in their respective fields of endeavor. The course involves extensive interactions with startup and renowned entrepreneurs for inspiring passion and enabling “mentorship” for the conception, identification, and implementation of entrepreneurial personality and projects.

MAN308 Social Advocacy and Community Service
The course objective is to contribute to the development of the society and to enable social entrepreneurship for issues afflicting the society. The course covers practical hands on projects involving students helping the community through experiential learning projects and would involve setting up of the micro-businesses for the needy families and establishment and support of organizations involved in social work.

MAN321 Organizational Behavior & HRM
This management area focuses on (1) individual, group, and organizational attributes and behavior to describe and explain the functioning and structuring of work organizations, and (2) the practical aspects of human resource management. Students seeking managerial careers in any business function can valuably learn about leadership, motivation, morale, performance, teams, organizational culture, and organizational design.

MAN403 Entrepreneurship & Small Business Management
To provide an understanding of the person and the process of creating and growing a new venture, this course introduces the entrepreneurial perspective and focuses on all the elements in the entrepreneurial process that are part of creating a new venture. It introduces a new venture through alternative sources of capital in financing.
Pre-requisite: MAN 101/301/401, MKT 302/402, FIN 202

MAN404 Operations Research and Management
The course aims to enhance the capability of decision-making through application of modern methods of mathematical science to complex problems.
Pre-requisite: MKT 303, MAN 303

MAN405 Strategic Management
The course is intended to be a challenging and exciting capstone course for a graduate business school curriculum. It is the first course about strategy and its implementation. Students will be exposed to the state of the art of strategy analysis, formulation, implementation and control.
Pre-requisite: MKT 302/402, MAN 301/401, 302/402, HRM /401/402

MAN407 Organizational Management
This course is a study of the entire process of management. It gives an insight into the development of managerial skills for effective running of business operations. Along with the in-depth knowledge of the functions of management it serves as a basis for understanding motivation techniques for human resource which is critical for synergies in business.
MAN408 Analysis of Pakistani Industries
Students get a micro and a macro environmental exposure and understanding of the various issues facing the industry. This course also aims at benchmarking the various functional processes so as to achieve organizational excellence.
Pre-requisite: MAN 302, HRM 301, ECO 402

MAN410 Introduction to Industrial Management
The course introduces industrial management operation system & includes objectives; entrepreneurship, project identification, evaluation, project & operation cost, productivity, break even analysis, process management, operations strategy, competitive strategy framework for competitor analysis, structural analysis of industry, total quality management, capacity planning & facility location, inventory management, supply chain management, project management, project control and technology management.

MAN411/611 Project Management
The course covers project initiation, discovery and analysis, time and cost estimates, project planning, network diagram, critical path, recourse management plan, project execution, monitoring and managing, project control, project closure plan, managing operation transfer plan.

MAN413/615 Corporate Social Responsibility
CSR is the commitment of businesses to contribute to sustainable economic development by working with employees, their families, the local community and society at large to improve their lives in ways that are good for business and for development.
Pre-requisite: MAN 401

MAN415 Entrepreneurial Leadership and Motivation
The course aims at aspiring students to become successful entrepreneurs and attain leadership in their respective fields of endeavours. By enabling them to overcome their fear and problems of start-up businesses the course involves presentations by renowned entrepreneurs to arouse passion and provide “mentorship” for successful implementation of entrepreneurial projects.

MAN416/613 Corporate Governance
Corporate Governance is the system by which business corporations are directed and controlled. The Corporate Governance structure specifies the distribution of rights and responsibilities among different participants in the corporation, such as the board, managers, shareholders and other stakeholders and spells out the rules and procedures for making decisions on corporate affairs.
Pre-requisite: MAN 401

MAN417 Services Management
This course focuses on service industries such as dealing with intangibility and inseparability. It also examines the problems faced by professional, not-for-profit, social and financial services marketers.

MAN418 Management and Organizational Dynamics
This course provides a higher level exposure to the management process and organizational behavior from a social science and behavioral perspective. Emphasis is on the analysis and understanding of individual and group behavior in organizations with special attention to managerial and policy implications. Students will study organizational processes both theoretically and in an experiential environment through exercises, case-studies and the experiential learning projects.
Pre-requisite: MAN 401

MAN501 Total Quality Management
This course revolves around the customer satisfaction model and deals with the areas of benchmarking, ISO-9000 (quality management systems), ISO-14000 (environmental quality systems), statistical process control, customer satisfaction approaches/models (management tools). There is special emphasis on research project & case studies in this course.
Pre-requisite: MAN 101/301/401, MAN 303

MAN502 Business Process Re-engineering
This course is designed to develop an understanding about organizing, managing & improving the ongoing process & systems essential for sustained growth of the organization.
Pre-requisite: MAN 101/301/401, MAN 303

MAN503 Supply Chain Management
This course covers essentials of Supply Chain Management and is divided into foundations of SCM, enabling concepts, the requirement process, strategic sourcing, strategic cost management relationship management and world class supply chain management.
Pre-requisite: MAN 101/301/401, MKT 301/401

MAN504 Business Balanced Scorecard
This course is a set of measures that provide a comprehensive business overview. It includes not only measures that track past actions, but also those that drive future performance. In this course, students will build the skills to create a strategy map and a Balanced Scorecard for an organization.

MAN507 Business Etiquette
The course deals with the ingredients necessary for career growth, apart from technical competence, e.g., protocol in the office, personal grooming and dress, relationship with colleagues and customers, etc.

MAN508/614 Comparative Management
This course exposes students to the different work-related values and norms prevalent in various countries of the world. The main aim of this course is to expose students to different cultural mindsets and the effective leadership styles which have been developed in different parts of the world.
MAN509 Logistics and Inventory Control
The course is a based on analysis and designing of domestic and international logistics systems. Topics include transportation, warehousing, inventory control, materials handling and packaging, and plant and warehouse locations. The course may serve as preparation for the American Society of Transportation and Logistics Certification examination in logistics systems management.
Pre-requisite: MAN 304

MAN510 Management Infrastructure
This course is a study of the entire process of management. It gives an insight into the development of managerial skills for effective running of business operations. Along with the in-depth knowledge of the function of management it serves as a basis for understanding the motivation techniques for human resource which is critical for synergies in business.

MAN601 Advanced Qualitative Research
This course introduces students to issues involved in developing appropriate research strategies for investigation business and organizational issues and concerns. Extensive literature review, presentation and research article summaries constitute its essential part. Quantitative research techniques are discussed at a higher level and software such as SPSS, MINITAB and EVIEWS are used to analyze secondary data.

MAN602 Survey of Current Research Literature in Management
The course provides a review of management research literature under the supervision of PhD faculty. It provides an opportunity to analyze quality research published in different professional journals in the field of Management. The course concentrates on organizational behavior, business policy, human resource management, behavioral sciences.

MAN604 Management Strategies and Emerging Organizations
The course aims to equip students in the art and science of conceiving, developing and implementing management strategies to attain and retain business advantage particularly in the emerging organizations. As organizations become global and increase their reach through internet and mobile technologies, they are undergoing transformation of their assumptions regarding reporting structures, lines of communications, and management of their resources.

MAN605 Seminar in Business Policy
Business Policy is a multidisciplinary Capstone Course which focuses on all aspects of business including organizational strategies and practical and emerging trends relating to successful organizations around the world. It will cover policy, rationale and practices relating to business of successful organizations with particular emphasis on latest and emerging trends.

MAN606 Business Analytics for Decision Making
Business Analytics refers to the ways enterprises use data to gain insights and make better decisions. This course will develop students’ skills in the use of Big Data to develop business insights and predictive capabilities, using machine learning, data mining and forecasting techniques, as well as optimization techniques to make business sense from corporate databases and internet data from corporate websites, social networks and other data sources.

MAN608 Technology, Operations and Innovation
Technological trends are modifying and challenging business operations and production of value as well as business interactions with customers and society. These challenges require innovation and technologies to make the organizations nimble and efficient. As manufacturing moves towards nano-technologies and atomic level production, the production processes would change. Information explosion at an exponential rate is creating challenges of business analytics in understanding and managing the changing world. Neuron level technologies are posing challenges in managing perception and control of human beings.

Management Information Systems

MIS001 Introduction to Computers
The course is an overview of computers, understanding the machines, binary (bits and bytes), different goals, different machines and their sizes, history of computers and parts of computers.

MIS102 Computer Concepts
The course provides an overview of computers, understanding the machines, binary (bits and bytes), different goals, different machines and their size, history of computers and parts of computers. Problem solving techniques using computers, flow charting and algorithm design, processing methods and programs, types of computer languages, types of computer software an an introduction to operating systems is also part of the course.

MIS103 Computer Applications I
The course is a study of microcomputer applications software, including operating systems, word processing, presentation graphics, spreadsheet, and implementation of solutions using appropriate applications software.
Pre-requisite: MIS 102

MIS104 Computer Programming and Graphics
This is the first course in computer programming for engineers, involving an extensive development of programming skills required in engineering disciplines, the concepts of source and object programs, compilation, data and program distinction.

MIS106 Computer Applications in Business
The course is a study of microcomputer applications software, including operating systems, word processing, presentation graphics, spreadsheet, and implementation of solution using appropriate application software. The course helps to develop integrated business microcomputer based applications.
MIS201  Computer Applications II
The course helps to develop integrated business microcomputer-based applications. It emphasizes on design principles of transaction processing, management reporting, decision support, and executive support.
Pre-requisite:  MIS 103

MIS303  Information Systems Auditing and Management

MIS305  Customer Relation Management Systems
This course examines customer relationship management (CRM) as a key strategic process within organizations with special emphasis on systems generating and capturing the data, linking them to various activities and enabling a one window resolution of all customer related issues and concerns. CRM is defined as the overall process of building and maintaining profitable customer relationships by delivering value and satisfaction to the customer. Focusing on process, strategy and technology, this course leads students from understanding the fundamentals of CRM through the implementation of CRM systems and analysis of customer data.

MIS401  Computer Applications
The course is a study of information technology used in business information systems, including input, processing, storage and retrieval, output hardware and software, including operating systems and management reporting, decision support, and executive support systems. It emphasizes on microcomputer applications software, including operating system, word processing, presentation graphics, spreadsheet, database software, design principles of transaction processing and executive support systems.

MIS402  Computer Concepts and Applications
This course has been designed for students to learn basic concepts of Management Information Systems, components and types of MIS, relationship between information technology and MIS; information about software, their types and application, hardware components of a computer system; devices attached to a computer, use of internet, e-mail and e-commerce.

MIS403  Web Authoring
The course provides an introduction to IIS, internet architecture, creating simple web document, HTML, DHTML, linking web pages together, advanced formatting options, adding images to web document, CGI forms, etc.
Pre-requisite:  MIS 401, MIS 402, MKT 301/401

MIS407  Programming in JAVA
Introduction to object oriented methods, fundamental programming structure in JAVA, GUIs, apples, application, script programming, JAVA database connectivity, JAVA beans, etc.
Pre-requisite:  MIS 401, MIS 404

MIS408  Web Page Development and Adobe Photoshop
The course includes an introduction to World Wide Web, hypertext and browser; basic HTML and WWW linking web page together; creating simple web documents, advanced formatting options, adding tables to web pages, adding images to web documents; working with URLs, using external media and plug-ins, linked windows and frames; uploading web pages on internet server, CGI and forms, image maps and dynamic documents.

MIS409  Computer Applications and MIS
This course has been designed to teach basic concepts of Management Information Systems, components and types of MIS, relationship between information technology and MIS, information about software, their types and application, hardware components of a computer system; devices attached to a computer and the use of internet, e-mail and e-commerce.

MIS411  Graphics and Animation
This is a practical course which aims to make the student familiar with the use of software to produce different types of graphics and animation in their films and presentations.

MIS404  Computer Programming Language
The course includes computer cultural impact, its history and uses the essential features of computers and computing systems, problem analysis, development of basic algorithms, introduction to a high level language with general applications, digital computer organization, machine language, instruction execution, addressing techniques, digital representation of data symbolic coding and assembly system, macros, conditional assembly; I/O control subroutine linkage, system and utility programs.
Pre-requisite:  MIS 401

MIS405  Computer Applications - E-Business

MIS406  Operations Research
The course focuses on the nature of operations research, formulating problems and objective analysis, types of problems, risk situation, sequential decisions models, linear programming model, graphical method, simplex method, etc.
Pre-requisite:  MIS 401
MIS413 Information Technology I
The objective of this course is to provide students with adequate knowledge of computer hardware and software; important elements and concepts of information systems; basic principles of computer programming and computer software application. It also gives an insight in the IT Security and controls; focuses on practical experience on performing various general procedures and the use of standard packages.

MIS416 Information Technology II
The course will advance students’ IT knowledge and also allow them to expand into new areas. It offers students the opportunity to study new and emerging areas of advanced information technology (IT). Students will have a sound theoretical and practical basis for beginning or continuing a professional IT career.

Pre-requisite: MIS413

MIS501 Information Systems Management
The course covers information systems planning techniques, information systems portfolio analysis and management control and auditing techniques related to information systems. In addition, it focuses on organizing and managing international information systems.

Pre-requisite: MIS 103/401

MIS502 Electronic Commerce
The course covers information systems that provide services to multiple organizations linking many buyers and sellers electronically. The topics include telecommunications, electronic data interchange, and doing business on the internet. It emphasizes international information policy issues affecting electronic commerce.

Pre-requisite: MIS 103, MIS 201, MIS 401

MIS503 System Analysis and Design
The course focuses on the methodologies and software tools in analyzing business processes. Topics include business re-engineering and information systems cost-benefit concepts; total quality management concepts; systems-building methods, including the system life cycle, prototypes, and end-user development techniques.

Pre-requisite: MIS 103, MIS 201, MIS 401

MIS504 Oracle/ Developer 2000
The course teaches design, implementation and management of relational database systems. The basic topics such as creation of tables, indexes, constraints (referential integrity), views and querying data and advanced topics such as rollback segments, parallel processing options and triggers are covered in the course.

Pre-requisite: MIS 103, MIS 201, MIS 401

MIS505 Software Engineering
The course introduces the architectural make up of some well-known operating systems (from micro to mini to mainframe systems). It also introduces different programming techniques using fifth-generation languages such as C++ to visual basic.

Pre-requisite: MIS 103, MIS 201, MIS 401

MIS506 Data Communication and Networking
This course is designed to teach from the very basic to advanced network design methodologies and modern trends in data communications. Design and implementation of windows NT server 4.0 covering topics such as installation of user accounts, groups, domains and trust relationships, sharing of drives, directories and files are taught. It also covers network protocols, such as NetBeui, IPX/SPX and TCP/IP and communication protocols.

Pre-requisite: MIS 103, MIS 201, MIS 401

MIS507 Relational Database Management Systems
The course includes continuation of data structure covering file structures & databases, random, indexed sequential inverted & multi-list file structures, concept of data models, data security and data integrity, etc.

Pre-requisite: MIS 103, MIS 201, MIS 401

MIS508 Programming in C++
The course includes the basic concepts of object oriented programming, functions, classes, linked list and procedures.

Pre-requisite: MIS 103, MIS 201, MIS 401

MIS509 Software Project Management
The course emphasizes the use of Computer-Aided Software Engineering (CASE) tools and object-oriented design and programming; configuration management and simulated project management; examination of software design issues and techniques. It includes a survey of design representation and a comparison of design methods; planning, scheduling and control of projects including cost estimating techniques; network analysis, time analysis, CPM and PERT, resource allocation, constraining & leveling; review of commercially available software and the use of PC based project management package.

Pre-requisite: MIS 401, MIS 406, MIS 505

MIS510 Object Oriented Systems Analysis and Design Elective
The course introduces an object-oriented and web-based software focusing upon the object model describing classes, their relationships to other objects, and their attributes and operations.

Pre-requisite: MIS 407, MIS 503

MIS511 E-Commerce, Web Design and Graphic Design
The course introduces students to the multi-disciplinary field of electronic commerce; basic e-commerce concepts; a review of relevant internet technologies; LANS, internet, DNS, web browsers, HTML, HTTP, databases, server architectures; commerce workflow models, business models for e-commerce, the value chain, roles and functional architectures; protocol architectures, issues of compatibility portability, transaction processing: database integrity, transaction processing (local key cryptosystem, internet security and security applications for e-commerce.

Pre-requisite: MIS401

<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MIS521</td>
<td>Record Management</td>
<td>This course particularly caters to the needs of management responsibilities; IT professionals and perspective on some of the unique issues facing the management of IT professionals. Organization Leaders often set the tone and establish the benchmarks for success. In this course, the focus is on developing a successful leadership style that facilitates team-building, collaboration, and a corporate culture that promotes success. Different decision-making techniques will be explored in the context of successful leadership styles. Pre-requisite: MIS102/MIS401/MIS402</td>
</tr>
<tr>
<td>MIS522</td>
<td>Business Information Systems</td>
<td>The course provides strategic views of information systems in modern business as well as the opportunity to examine and build IS solutions. It also provides ample opportunities to gain practical programming skills necessary for successfully developing business applications using modern development technologies and methodologies which constitute the core of this course. Pre-requisite: MIS102/MIS401/MIS402</td>
</tr>
<tr>
<td>MIS523</td>
<td>Decision Systems</td>
<td>The course helps to gain an insight into different decision levels and practical problems of organizations. The course emphasizes the study of decision theory, decision systems development and enabling technologies. The course includes the application and critical evaluation of methods and technologies in the decision-making path in current business scenarios. Pre-requisite: MIS522</td>
</tr>
<tr>
<td>MIS524</td>
<td>Decision Support Systems</td>
<td>This course provides a review of the literature in the area of decision support systems (DSS) and DSS frameworks, the process of decision-making and issues involved in the design, implementation and evaluation of DSS. Additional topics include data mining, user interfaces, knowledge-based DSS, and research directions in DSS; the design and implementation of a DSS prototype. Pre-requisite: MIS523</td>
</tr>
<tr>
<td>MIS525</td>
<td>Enterprise Systems</td>
<td>This course examines enterprise systems from the perspectives of Information systems and operations management. It examines cross-functional integrated computer-based information systems, commonly referred to as Enterprise Resource Planning (ERP) systems, designed to support an organization’s information needs and operations. Common business processes, re-engineering/change management, and enterprise reference models are introduced from a holistic perspective. The course considers issues associated with the selection, analysis, design, implementation, and configuration of such enterprise systems. It investigates how such systems implement transaction processing, management information, and decision support across an organization’s various business processes. Strategic issues relating to success/failure and human aspects will also be introduced. Pre-requisite: MIS501</td>
</tr>
<tr>
<td>MIS526</td>
<td>Introduction to ERP Systems</td>
<td>This is an hands-on intensive implementation course exploring latest trends in off-the-shelf ERP packages like Oracle Applications or SAP. Overview of the reach of the ERP modules such as ordering and sales, inventory and material management, procurement, project management, manufacturing planning and control, finance, costing, business intelligence, maintenance, HR, etc. The course would involve an in-depth study of parameters, options, customizations and tuning features available in selected ERP modules. Business requirements, implementation methodologies and distinctive features would be analyzed. Hands-on application of ERP concepts in a real-life scenario would be studied. Pre-requisite: MIS525</td>
</tr>
<tr>
<td>MIS527</td>
<td>Information Security</td>
<td>The course presents technical arrangements for making information systems more secure. The process starts with defining the proper security requirements that are usually stated as a data security policy. Other topics include: identification and authentication, access control, security kernel, physical security, eavesdropping, hardware security, system software security, encryption techniques, public key infrastructure, security protocols and handling subversive software. Pre-requisite: MIS506</td>
</tr>
<tr>
<td>MIS528</td>
<td>Advanced Information Security</td>
<td>The course addresses concerns regarding confidentiality, privacy and the volatility of information resulting from the use of information technology. It emphasizes such managerial security issues as system security and controls, legal and ethical issues arising from protecting computer files both from a Pakistan and world perspective, disaster recovery and contingency planning and other tools used for protecting information system resources. Pre-requisite: MIS527</td>
</tr>
<tr>
<td>MIS530</td>
<td>Information Systems Research</td>
<td>The course provides an opportunity for a substantive review of research in the discipline of information systems as the essential part. Behavioral, strategic and social issues relating to the design, implementation and impact of information technology applications will also be studied. Pre-requisite: MIS501, MKT404</td>
</tr>
<tr>
<td>MIS532</td>
<td>New Perspectives on Organizations and Information Systems</td>
<td>The course investigates the major issues facing organizations in adopting, implementing and using information systems for competitive advantage. It also provides an opportunity to explore a set of critical issues from both an academic and practical perspective. The topics include strategic information systems, e-commerce, knowledge management, the emergence of the business process, ERP implementation, virtual teams and global IT, IS and developing countries, etc. Pre-requisite: MIS522, MIS525</td>
</tr>

</table>
Marketing

MKT301/401 Principles of Marketing
This course is an introduction to the language and issues of marketing. The course focuses on basic marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing.

MKT302/402 Marketing Management
This is an intermediate level marketing course that incorporates a mix of lecture and case study approaches, rounding it off with a term-project aimed at understanding the practice of marketing management in the real business world.
Pre-requisite: MKT 301/401

MKT403 Sales Management
This course enlightens students on how organizations’ sales goals can be met in an effective & efficient manner through planning, staffing, training, leading & controlling organizational resources. The course teaches students to prepare sales plans and forecasting, territory planning, and time management among other topics.
Pre-requisite: MKT302/402

MKT404 Methods in Business Research
Objective of this course is to introduce students with fundamental business research process and to provide them with the necessary skills in designing and conducting basic quantitative and qualitative research which can be applied to practical problems encountered in a business organization.
Pre-requisite: MKT302/402, STA 202/403/404

MKT405/619 Marketing Research
An Applied Orientation takes a unique functional and marketing approach that illustrates the interaction between marketing research decisions and marketing management decisions. This course is comprehensive, practical and presents a balanced coverage of both qualitative and quantitative material around marketing research.
Pre-requisite: MKT302/402, STA 202/403/404

MKT501 Strategic Marketing and Planning
This course will provide a general understanding of the strategic marketing process, its relationship with the corporate strategy and the particular role of market driven strategies. It will provide an understanding of the concept of market orientation and role of distinctive capabilities to deliver value to different product-markets.
Pre-requisite: MKT 302/402

MKT506/616 International Marketing
This course analyses opportunities, distinctive characteristics and emerging trends in foreign markets; explores alternative methods and strategies for entering foreign markets; organizational planning and control taking into consideration the impact of social, cultural and economic factors.
Pre-requisite: MKT 302/402

MKT507 Services Marketing
This course focuses on the unique challenges of marketing for delivering quality services to customers. It covers attraction, retention, and building of strong customer relationships through quality services. The course is equally applicable to organizations whose core product is service (e.g., banks, hotels, hospitals, educational institutions, professional services, telecommunication etc.) and to organizations that depend on service excellence for competitive advantage (e.g., high technology manufacturers, automotive, industrial products, etc.).
Pre-requisite: MKT 302/402

MKT508 Personal Selling
This course focuses on the theoretical and practical techniques used in selling goods and services in a B2B as well as in a B2C environment. Emphasis is given to developing practical skills in presenting goods and services to prospective buyers. Attention is devoted to the art of persuasion as a life-skill and to the need to develop professional relationships in business. The importance of the sales professional in the business community and the need for ethical behavior is emphasized. The overriding sales philosophy is relationship focused and the customer approach is consultative.
Pre-requisite: MKT 302/402

MKT509 Consumer Behavior
The course begins with providing an orientation on the concept of consumer behavior and its evolution with changing times with a focus on emerging segmentation and targeting. The course further aims at describing and analyzing how consumers make decisions and identify how the featured organization used insights about the consumer decision-making process and decision-making units to design a marketing program.
Pre-requisite: MKT 302/402, MKT404

MKT510 Direct and Digital Marketing
This course gives an insight into the nature and purpose of direct marketing and how companies can use the various promotional tools to gain a competitive edge over competitors. It differentiates various elements of communication mix and explains where they are used to access targeted consumers.
Pre-requisite: MKT 302/402

MKT511/615 Brand Management
This course is designed to introduce the concept of brands, brand equity, brand identities, the value of brand as an asset and how they deliver value to all the stakeholders.
Pre-requisite: MKT 302/402
MKT513  Media Planning
This course teaches techniques which are used by marketers to sell media as well as methods employed to convince advertisers of how their applications can be used to obtain optimum results. Often this takes the form of presentations to advertisers and could include the preparation of a media plan for each campaign to help clients.
Pre-requisite: MKT302/402

MKT519/613  Marketing of Financial Services
The growth and diversification of the financial services market has led to increasing competition for customers and the constant creation of new products. Significant regulatory developments, impact of technology and new entrants from the global arena with challenge of retaining an ever so mobile consumer has a profound impact on competition in the sector hence the role of marketing is of creating and sustaining a competitive advantage.
Pre-requisite: MKT302/402

MKT520  Merchandising and Sales Promotion
The course aims to touch upon a frequently overlooked facet of marketing; visual marketing and the role it plays in sales promotion. The course will explore the definition and use of visual merchandising with an emphasis on local companies and then move on to the role it plays in sales promotion.
Pre-requisite: MKT302/402

MKT521/612  Distribution and Channel Management
Channel Management is a vital element of marketing models. This course has been designed to prepare students with a framework as well as operational plan for the execution of a successful distribution strategies related to multi-national and national companies, keeping in view the key elements of Pakistani markets.
Pre-requisite: MKT302/402

MKT526  Public Relations and Event Management
Public relations is increasingly being recognized as an important business function. Accordingly, this course prepares students to acquire a full understanding of the function of public relations in a complex, social, economic and political environment. This course will also familiarize the students with the processes, tools and techniques required for effective public relations.
Pre-requisite: MKT302/402

MKT527  Integrated Marketing Communication
The objective of this course is to provide students with an understanding of integrated marketing communication from a conceptual point of view as well as its practical application in business organizations. It will focus on essential concepts such as the impact of communication and buying behavior, the role of promotional activities and tools, as well as provide insight into more advanced concepts and guiding principles of value-based IMC planning.
Pre-requisite: COM402, MKT401

MKT531  Retail Management
This course provides a good understanding of the concepts, strategies and trends associated with a retail operation in the marketplace. It explores the current retail environment and key retail management strategies, retail merchandising, advertising, promotion and other important elements.
Pre-requisite: MKT302/402

MKT532  Principles of Advertising
This course is designed to provide a fundamental understanding of advertising, with a sharp focus on the creative process. It will introduce students to the structure and functioning of different areas in a typical advertising agency viz. Strategic Planning, Client Service, Creative and Media Planning, and their role in servicing their clients’ needs.
Pre-requisite: MKT302/402

MKT534  Marketing for Social Impact
This course aims to develop students’ knowledge and skills in the application of traditional marketing concepts to social issues and related behaviors. The course enables students to consider the nature of social marketing as well as the theoretical foundations that underpin the social marketing discipline. In particular, the course provides an opportunity to understand theory and its application via communication and behavioral change strategies to achieve positive social change.
Pre-requisite: MKT302/402

MKT535/624  New Product Management
The objective of this course is to familiarize students with applications of relatively recent new product planning techniques. The course will emphasize the use of market research data and marketing models for new product management. The main topics to be covered in this course are product positioning, market segmentation, market share estimation, product packaging, advertising, testing, pricing, brand name selection, brand equity, and global product planning.
Pre-requisite: MKT302/402

MKT602  Marketing Analytics
The aim of this course is to prepare future managers who appreciate the importance of competitive advantages leveraged by analytics, understand the existence of the tools, the advantages and limitations of each tool; apply these tools, interpret the input and communicate the output from these tools and models, and apply them to assist business decisions.
Pre-requisite: STA202/403/404

MKT608  Small Business Marketing
The course is specially designed to help small businesses with limited resources to develop effective and competitive marketing programs. Students will learn to position a small business by designing and executing innovative marketing strategies covering product, pricing, channel and communication aspects.
Pre-requisite: MKT302/402
MKT610  Marketing Strategies and Value Innovation
This course examines different marketing led strategies to develop and grow a business. It explores the links between the business strategy and marketing strategies keeping in view the concepts of Value Innovation in particular.
Pre-requisite: MKT302/402

MKT618  Advertising Management & Strategy
The objective of this advanced level course is to develop an appreciation of advertising from a strategic perspective, and the processes involved in developing, evaluating and managing effective advertising campaigns. Students will be exposed to the tools and techniques of contemporary advertising, and their application using examples of local and international campaigns. Case study analyses, as well as assignments and a term project will round off the semester’s work.
Pre-requisite: MKT301/401

MKT620  Competitive Strategies
This course illuminates the dynamics of companies in competition and offers a process for planning and executing marketing strategies to compete in a rapidly changing marketplace. It will also enable marketers to make decisions that account for competitors’ likely responses.
Pre-requisite: MKT302/402

MKT621  Marketing Strategies for Emerging Economies
The focus of this course is to encourage the students to study the institutions of emerging economies that are relevant for managers. Analyze opportunities presented by emerging economies. Analyze the additional marketing challenges which necessitate a different marketing mix and a more aggressive business approach.
Pre-requisite: MKT302/402

MKT622  Marketing Strategies for Bottom of the Pyramid (BOP)
Currently companies are facing saturated markets with limited growth potential and a highly competitive business landscape. A growing number of companies are now viewing the base of the pyramid as one of the most exciting market opportunities of the early part of the new millennium.
Pre-requisite: MKT302/402

MKT623  Pharmaceutical Marketing & Quality Assurance
This course examines the nature of pharmaceutical industry and analyses customer procurement strategy, product policy, pricing, distributing strategy and sales force management strategy.
Pre-requisite: MKT302/402

MKT625  Business to Business Marketing
This course includes the nature of B2B market, analysis of customer procurement strategy, product policy, pricing, distribution strategy, sales force management and key account selling strategy.
Pre-requisite: MKT302/402

Mathematics

MTH101  College Algebra
The course is a review of exponents, equations and inequalities, function notation, composition and inverse, linear, quadratic, polynomial, exponential and logarithmic functions and their graphs.

MTH103  Calculus for Business Decisions
The course includes the concepts and business application of functions, differential and integral calculus, optimization methodology, transformation and assignment model.
Pre-requisite: MTH 101

MTH104  Calculus I
This course is designed to develop the topics of differential and integral calculus. It covers functions, limits, continuity, derivatives and its applications including linear differentials, optimization problems, L'Hospital's rule and the mean value theorem, integrals and techniques of integration, the fundamental theorem of calculus.

MTH105  Calculus II
This course is a continuation of Calculus I, covering definite integrals, Riemann integral, area between curves, arc length of curves, volume of surface of revolutions, parametric equations and polar coordinates, proper and improper integrals, infinite sequences and series, test for convergence, power series and Taylor series with remainder.

MTH107  Calculus and Analytical Geometry
The course includes functions, limit, derivatives, integral calculus with applications, vector algebra, vector calculus, introduction to analytical geometry, straight line in R3, planes, cylindrical and spherical coordinates, surfaces, cylinders and spherical trigonometry.

MTH202  Engineering Mathematics
The course covers vector algebra, dot & cross product, gradient, divergence & curl, functions limits, derivative, slope & rate of change, techniques of differentiations, higher derivatives, maxima/minima, optimization, integration techniques, matrices, solution of system of equations, fourier series, sequences & their convergence.

MTH203 Introduction to Formal Mathematics
This course aims to bridge the gap between school and university mathematics, by beginning with some rather concrete techniques where the emphasis is on calculation, and gradually moving towards abstraction and proof.
MTH204  Linear Algebra
This course covers, algebra of matrices, determinants, system of linear equations, vector space, subspace, basis, dimension, row space, column space, null space, rank and nullity, inner product spaces, orthonormal basis, change of basis, orthogonal matrices, eigenvalues and eigenvectors, diagonalization, Euclidean vector space, linear transformation, general linear transformations, kernel and Range.
Pre-requisite: MTH107

MTH205  Financial Mathematics
Considering the problem of derivates pricing in finance the necessary tools from probability theory and stochastic processes will be introduced in the course. The first part presents the main objects of interest from finance in the context of discrete models. Discrete probability spaces will be reviewed and fundamental results on Martingale theory will also be discussed including the optimal stopping problem applied to American options. The second part helps to move from discrete to continuous models.
Pre-requisite: STA 301

MTH206  Multivariate Analysis
This course is designed to provide an integrated, in-depth, but applied approach to multivariate data analysis and linear statistical models in behavioral science research. The topics will include regression analysis, univariate and multivariate ANOVA and ANCOVA, disarmament analysis, logistic regression, canonical co-relation analysis. Principal components, will alsoconst be covered.
Pre-requisite: MTH204

MTH207  Stochastic Models and Math. Finance
The course is an introduction to mathematical modeling, analysis, and solution procedures applicable to uncertain (stochastic) production systems, including probability theory and stochastic processes.
Pre-requisite: MTH 205

MTH208  Differential Equations and Complex Variables
Solution of first order ODEs, Second and Higher order Linear ODEs, System of DEs, Homogeneous linear systems, Series Solution of ODE. PDEs methods with applications and complex numbers,
Pre-requisite: MTH202

MTH209/409 Financial Mathematics I
The measurement of interest, Solution of problems in interest, Basic annuities, More general annuities, Amortization schedules and sinking funds.
Pre-requisite: MTH104

MTH210/410 Financial Mathematics II
Bonds and other securities, Yield rates, Practical applications, More advanced financial analysis, The term structure of interest rates, Duration, convexity and immunization, Stochastic approaches to interest.
Pre-requisite: MTH209/409

MTH211  Introduction to Computing
Advanced problems in life contingencies; force and laws of mortality; premiums and reserves for insurance and annuities based on a single life; joint life probabilities, annuities and insurances; multiple-decrement theory; pension fund mathematics are a part of this course.
Pre-requisite: STA203/205

MTH213  Actuarial Mathematics
This course is designed to introduce software preferably MATLAB in mathematical computing. Topics includes, assignments, variables, vectors, matrices, for loops, conditional operators, logical operators, while loops, nested loop, structured programming, subroutines, functions, 2D graphics and 3D graphics.

MTH215  Differential Equations
Solution of first order differential equations by various methods and their applications, Second and Higher order Linear differential equations with engineering applications, System of Differential Equations, Homogeneous linear systems with constant coefficients, Series Solution of Differential Equations.
Pre-requisite: MTH 216

MTH216  Complex Variable and Transforms
Pre-requisite: MTH 204

MTH224  Multivariable Calculus
In this course we will study real-valued functions of several variables, vector-valued functions of several variables, partial derivatives, optimization problems of functions of two variables, Lagrange multipliers, double integrals, triple integrals, vector fields, line integrals, Green’s theorem, surface integrals, the divergence theorem and Stoke’s theorem.
Pre-requisite: MTH105

MTH251  Number Theory
This course provide an introduction to the elementary theory of numbers. Topics included are mathematical induction, divisibility, prime numbers, greatest common divisor, Euclidean algorithm, fundamental theorem of arithmetic, factorization and Fermat numbers, linear Diophantine equations, congruence, Chinese remainder theorem, Wilson theorem, Fermat’s little theorem, Euler’s theorem.

MTH225  Differential Equations
In this course we study real-valued functions of several variables, vector-valued functions of several variables, partial derivatives, optimization problems of functions of two variables, Lagrange multipliers, double integrals, triple integrals, vector fields, line integrals, Green’s theorem, surface integrals, the divergence theorem and Stoke’s theorem.
Pre-requisite: MTH202

MTH251  Number Theory
This course provide an introduction to the elementary theory of numbers. Topics included are mathematical induction, divisibility, prime numbers, greatest common divisor, Euclidean algorithm, fundamental theorem of arithmetic, factorization and Fermat numbers, linear Diophantine equations, congruence, Chinese remainder theorem, Wilson theorem, Fermat’s little theorem, Euler’s theorem.

MTH301  Real Analysis I
This course will serve as a bridge between calculus and analysis. In this course we will cover fundamental concepts such as limit, continuity, and differentiation but with much more rigor than it is done in basic calculus courses. Main topics include: The real number system, sequences and series, limits, continuous functions, differentiation.
Pre-requisite: MTH105, MTH203
MTH401 Complex Analysis
In this course, student will learn theory of functions of a complex variable. Topics are complex numbers, the complex plane and Riemann sphere, Möbius transformations, elementary functions and their mapping properties, conformal mapping, holomorphic functions, Cauchy’s theorem and integral formula. Taylor and Laurent series, maximum modulus principle, Schwarz’ lemma, residue theorem and residue calculus.
Pre-requisite: MTH311

MTH403 Numerical Analysis
This course analyzed the basic techniques for the efficient numerical approximation of the solution of problems in science and engineering. Topics includes approximation of roots of f(x)=0, solving linear systems of equations, polynomial interpolation, curve fitting, numerical differentiation and integration, numerical solution of ordinary differential equations.
Pre-requisite: MTH105, MTH204, MTH213

MTH311 Real Analysis II
In this course we will cover advance topics such as theory of Riemann Integration, uniform convergence and the Real line topology with adequate rigor.
Pre-requisite: MTH301

MTH344 Introduction to Differential Equations
The course is an introduction to differential equations. Topics covers, Definitions and terminologies, first order differential equations, modeling with first order differential equations, higher order differential equations, modeling with higher order differential equations, series solutions and special functions, Laplace transform, system of linear first order differential equations, Sturm-Liouville problems.
Pre-requisite: MTH105

MTH346 Partial Differential Equations
This course introduces the theory of initial and boundary value problems for partial differential equations (PDEs) with emphasis on linear equations. Topics covered include characteristic method for linear PDEs, heat equation, wave equation, Laplace equation, non-linear first-order equations, conservation laws, Hamilton-Jacobi equations, Fourier transform, Sobolev spaces.
Pre-requisite: MTH204, MTH344

MTH350 Topics in Mathematical Economics
A course in advanced economic theory designed to provide students the fundamental mathematical tools necessary to prepare for graduate work in economics or business administration. Topics include the development of portions of consumer, producer and macro (fiscal and monetary) theory. The material includes comparative static analysis, single and multiple agent unconstraint and constraint optimization problems and dynamic analysis.
Pre-requisite: MTH105, MTH204

MTH401 Calculus I
The course covers functions, system of linear equations, Cramer’s rule, sequences, limits and continuity, differentiation, mean value theorem, maxima and minima and integration of simple functions.
MTH427  Topology
This course aims to mathematical study of shapes and topological spaces. It will cover the basics of point set topology that includes topological spaces and continuous mappings, separation, compactness, connectedness, fundamental group and covering spaces, Brouwer’s fixed-point theorem.
Pre-requisite: MTH311

MTH433  Optimization Techniques
This course covers, linear programming, duality and sensitivity analysis, Lagrange multipliers, Kuhn-Tucker conditions, convexity and calculus of variations.
Pre-requisite: MTH105, MTH204

MTH437  Functional Analysis
This course is the study of vector spaces endowed with a topology. Topics include review of metric spaces, normed spaces, normed linear spaces, Banach spaces, convex sets, quotient spaces, equivalent norms, linear operators, linear functional, finite dimensional normed spaces.
Pre-requisite: MTH204, MTH311

MTH439  Introduction to Dynamical Systems
This course provides the study of time dependent systems. Topics include flows on the line, bifurcation of one dimensional systems, flows on the circle, two dimensional flows, linear systems of ODEs, nonlinear systems and phase plane analysis, higher dimensional systems, chaos, strange attractors, one dimensional maps, fractals.
Pre-requisite: MTH204, MTH344

MTH430  Operations Research
This course provides scientific study of decision making. In this course student will learn the simplex algorithm, duality, slackness, sensitivity analysis, transportation and assignment problems, transportation simplex method, network models, network simplex method, CPM & PERT, queuing models, Markov chains.
Pre-requisite: MTH204

Mathematics & Statistics (Scientific Computing)

MTS610  Calculus of Variations
Calculus of variations concerns problems in which one wishes to find the extrema (usually the minima) of some quantity over a system that has functional degrees of freedom. In this course it is shown that such variational problems give rise to a system of differential equations, the Euler-Lagrange equations. These equations, which have far reaching applications, and the techniques for their solution, will be studied in detail.

Pre-requisite: MTH105

MTS611  Advanced Statistical Inference
The theory of statistical inference underpins statistical design, estimation and hypothesis testing. Topics covered include, Frequentist and Bayesian approaches, sampling distributions, Sufficiency, likelihood, asymptotic properties of estimators, Bayesian Inference and Likelihood ratio tests.

Pre-requisite: MTH105

MTS612  Numerical Methods for ODEs and PDEs
This course will cover numerical solution of (PDEs) and (ODEs). Applications will include the Poisson equation, heat equation, wave equation, and nonlinear equations of fluid, solid, and gas dynamics.

MTS613  Advanced Design of Experiments
Introduction to linear models; experimental design; fixed, random, and mixed models. Factorial and fractional factorial designs. Taguchi designs and applications. Incomplete block designs, Response surface designs with applications and Mixture experiments.

MTS614  Mathematical Statistics
This course covers Probability theory, marginal and conditional distributions. Introduction to stochastic processes, Markov chain, generating functions, functions of random variables and derived distributions, sampling distributions, methods of estimation.

MTS615  Dynamical Systems
This component aims to give an overview of the main aspects of nonlinear systems and to provide definitions and theoretical background. This course will address issues under Continuous Dynamical Systems, Discrete Dynamical systems, and Non-linear waves.

MTS617  Advanced Numerical Analysis
Direct and indirect methods for solving linear equations and matrix inversion, conditioning eigenvalues and eigenvectors. Functional approximation, methods for ordinary differential equations. The student is also introduced to use some software packages.

MTS645  Multivariate Statistics
Topics include matrix algebra, random sampling, multivariate normal distributions, multivariate regression, MANOVA, principal components, factor analysis, Discriminant analysis. Statistical software, such as SAS or R, will be utilized.
**MTS618  Statistical Modeling & Computation**
This course describes how to use R to build statistical models and use them to analyze data. Multiple regression, followed by logistic regression, is applied to Poisson model for count data. Computational techniques such as Monte Carlo, Jackknife and Bootstrap using R, will be discussed.

**MTS619  Time Series Analysis**
Studies the basic time series models in both the time domain (ARMA models) and the frequency domain (spectral models), emphasizing application to real data sets.

**MTS620  Asymptotic Analysis**
Topics covered may include Asymptotic expansions, (non) convergence, algebraic equations with small parameters, eigen value problems, Asymptotic evaluation of integrals: Laplace's method, method of stationary phase, Boundary layers, principle of dominant balance, matched asymptotics with applications to physical problems, Boundary layers in PDE's, Method of multiple scales, WKB theory, and Exponentially ill conditioning.

**MTS621  Stochastic Processes**
This course covers probability theory, models with unpredictability, queues and population growth. Markov chains, Poisson processes, random walks, branching processes, first passage times, recurrence and transience, stationary and limiting probabilities.

**MTS622  Fundamental Algorithms**
This is an introductory course in algorithms. We will cover standard topics such as sorting, divide-and-conquer, various data structures, graph algorithms, dynamic programming, greedy algorithms, and - time permitting - NP-completeness and basic approximation algorithms.

**MTS623  Applied Regression Analysis**
This course explores, applied methods in regression analysis. Topics include linear and multiple regression and model building, ANOVA as regression analysis, analysis of covariance, model selection and diagnostic checking techniques, nonlinear regression, and logistic regression.

**MTS625  Theory and Practices of Forecasting**
Time series data properties and analysis, temporal dependencies, and applications in areas such as economics, engineering and the natural and social sciences.

**MTS626  Advanced Convex Analysis**
In this course we shall cover the elements at the heart of convex analysis: sub gradients, optimality conditions, the Fenchel conjugate, and duality.

**MTS627  Statistical Quality Control**
Statistical quality control courses introduce students to the product design and control process. Course assignments may include creating sample quality control plans. Students examine a company's production and processing capacity, along with the product quality loss when production exceeds that capacity.

**MTS628  Advanced Numerical Optimization**
Topics may include, Karush-Kuhn-Tucker optimality conditions; Convergence, Newton and quasi-Newton methods; Nonlinear conjugate gradient methods; Levenberg-Marquardt methods; quadratic programming and nonlinear programming; penalty- and barrier-function methods.

**MTS629  Advanced Variational Inequalities**
The theory of variational inequalities treats optimization problems over convex sets. In this course we study the existence, uniqueness and regularity of the solution of a variational inequality. Applications and numerical methods will also be discussed.

**MTS630  Advanced Numerical Linear Algebra**
Matrix computations lie at the heart of most scientific computer codes. In this course, we will study how to perform such computations efficiently and accurately. Topics will include Gaussian elimination, singular value decomposition, eigenvalue solvers and iterative methods for linear systems.

**MTS631  Information Retrieval & Data Mining**
The course is aimed at an entry level study of information retrieval and data mining techniques. It is about how to find relevant information and subsequently extract meaningful patterns out of it. While the basic theories and mathematical models of information retrieval and data mining are covered, the course is primarily focused on practical algorithms of textual document indexing, relevance ranking, web usage mining, text analytics, as well as their performance evaluations.

**MTS632  Advanced Hilbert Space**

**MTS633  Simulation and Modeling**
This course describes analytical and simulation techniques, probability distributions and their properties, Introduction to modeling and simulation concentrating on building business cases. Matlab and/or R will be used to solve formal problems and explore knowledge management.

**MTS634  Principles in Parallel Computing**
This course is designed for both academic and industrial scientists interested in parallel computing and its applications to large-scale scientific and engineering problems. It focuses on the three main issues in parallel computing: analysis of parallel hardware and software systems, design and implementation of parallel algorithms, and applications of parallel computing to selected problems in physical science and engineering. The course emphasizes hands-on practice and understanding of algorithmic concepts of parallel computing.
MTS641 Continuum Mechanics
Topics will include kinematics, stress analysis, balance laws (mass, momentum, and energy), the entropy inequality, and constitutive equations in the framework of Cartesian vectors and tensors. Emphasis will be placed on mechanical principles that apply to all materials by using the unifying mathematical framework of Cartesian vectors and tensors.

MTS657 Machine Learning & Pattern Recognition
This course is a foundational course for anyone pursuing machine learning, or interested in the intelligent utilization of machine learning methods. The primary aim of the course is to enable the student to think coherently and confidently about machine learning problems, and present the student with a set of practical tools that can be applied to solve real-world problems in machine learning, coupled with an appropriate, principled approach to formulating a solution.

MTS658 Production Quality Software
The course will cover the techniques used by most successful software engineers to address problems of quality and complexity. Goal is to learn how to write software that is robust, reusable, and maintainable by practicing the craft thoughtfully and critically through assignments and code reviews. Topics covered include, The Java Language - Overview, features, and best-practices., Concurrency - The Java Memory Model and thread-safety. Object-Oriented Design - Guidelines for good designs. Design Patterns - Solutions for common software design problems. Refactoring - When to modify existing code and how to do so safely. Test-Driven Development - Ensure your code works the way you expect and doesn’t break when you change it.

Media

MMM301 Photo Journalism
This advanced level course aims to polish students’ visual storytelling skills, and enhance their capacity to present stories in an impactful manner, through the use of pictures and words, with the proficiency expected of a trained photojournalist.
Pre-requisite: MMM332

MMM202 Logic and Critical Thinking
This course seeks to develop the faculties of reasoning and critical thinking. It is designed to train students in analyzing arguments critically, using classical and current logic tools, and applying them to real life contexts.
Pre-requisite: SSC101

MMM303 Outline of Political Science
This course takes students through the process of evolution of political ideas, and development of political institutions. Discussions relate to the rise of the state, its institutions such as legislature, executive and judiciary, and their working in different countries.
Pre-requisite: SSC104

MMM304 Media Literacy
Offered early in the program, this course will develop students’ skills for critically analyzing media content, and understanding the purpose and meaning of messages disseminated by traditional and contemporary media.
Pre-requisite: MPY301/ MMM364

MMM307 World Civilization and Culture
This course focuses on the impact of past civilizations on human culture and society. Starting with the Egyptian, Babylonian, Greek, and Roman civilizations, the discussion hones in on the evolution of Western and Islamic culture as reflected in the arts, music, literature, scientific and philosophical thinking of the last two centuries.
[Pre-requisite: SSC104]

MMM308 Contemporary World Media
This course brings out the richness and diversity of media at a global level and the universal concern with regard to its role as the fourth estate. It also highlights problems encountered by or attributed to media, and the challenges faced by it in satisfying a public that is not only better informed, but also holds media accountable for its actions.
Pre-requisite: MMM304

MMM310 News Writing and Reporting
This first news writing course familiarizes students with what news is, how to identify a possible news story, how to gather all the information related to it, and how to present it effectively. It also seeks to acquaint them with reporting techniques for stories related to crime, court cases, political and social issues, education, etc.
Pre-requisite: MMM304

MMM311 Introduction to Broadcast Media
This course introduces students to the world of broadcast media, and provides them with a comprehensive understanding of the historical, technical, legal and commercial aspects of radio and television broadcasting.
[Pre-requisite: MMM310]

MMM312 Introduction to Advertising and PR
This introductory course exposes students to the structure and working of advertising and PR agencies. Students learn about the concepts, practices, principles, tools and techniques of the two interrelated fields, as well as gain insight into the benefits of integrating advertising & PR.
Pre-requisite: SSC101
MMM313 Theater Arts  
This course is designed to increase student’s understanding of theater as a performing art form. Students will explore and experience dramatic structures and styles, acting and directing, theater design and architecture. They will view and critique one or more live play productions, and present their own plays as their term project.  
Pre-requisite: LAN113

MMM314 Online Journalism  
This course exposes students to the practice of web journalism and its capacity to reach vast audiences with speed and alacrity. Students learn to research, write, edit and publish news on the web, through blogs and websites, and to assess their impact.  
Pre-requisite: MMM310

MMM315 Feature, Article and Column Writing  
This course is intended to develop specialized writing skill among students of journalism. It is a practical course that trains students to write as a professional for newspapers, magazines, and other media platforms.  
Pre-requisite: MMM310

MMM316 Sub Editing  
The purpose of this practical course is to train students in the techniques of copy editing, headline making, page layout construction, besides rewriting, restructuring and improving copy, that make up a Sub-Editor’s job.  
Pre-requisites: MMM310

MMM318 Economic Journalism  
This course seeks to develop students’ ability to understand and report on news related to economics, finance and trade. Students learn to analyze financial statements, and understand the operation of banks, financial institutions, stock exchange, and to communicate complex financial news and information in simple laymen’s terms.  
Pre-requisite: ECO106

MMM320 Editing & Post-Production  
This Editing & Post-Production course will provide students with deep understanding of video editing and special effects using Adobe Premier Pro and other relevant applications.  
Pre-requisite: MMM327

MMM321 Development Communication  
This course highlights the importance of socio-economic development, and provides a strong theoretical basis for scrutinizing a country’s development projects and commenting on developmental issues in a constructive manner.  
Pre-requisite: MMM318

MMM322 Current Affairs  
In this course students improve their understanding of current affairs, engage in critical thinking, and develop comparative perspectives on issues. They enhance their debating skills, and the ability to write on current affairs topics for traditional as well as new media (Facebook, Twitter, and blogs).  
Pre-requisite: MAN305

MMM324 Media Management and Marketing  
This course examines the different approaches to business management in media organizations, with a focus on their common as well as differentiated marketing strategies and practices.  
Pre-requisite: MMM328

MMM327 Studio Production  
This practical course introduces students to the craft of writing, editing and producing studio based programs for TV. Emphasis is on understanding the tools and techniques of studio production by playing the roles of news-writers, anchors, directors, and studio crew.  
Pre-requisite: MMM310

MMM328 Methods in Media Research  
This comprehensive course seeks to develop students’ understanding of the tools and techniques of qualitative and quantitative research such as questionnaires, interview and discussion guides. It also teaches them to identify credible data sources and use them as the basis of creating impactful news stories.  
Pre-requisite: STA100

MMM329 Creative Writing Workshop  
This is a mid-level course aimed at optimizing the writing skills of students. It is built around extensive reading and writing assignments. Readings will cover classical and contemporary writers, specializing in fiction and nonfiction genres. Emphasis will be placed on developing the capacity for creating original writings of an elevated standard.  
Pre-requisite: COM112

MMM330 Appreciation of Vernacular Literature  
This course is specifically designed to develop deeper understanding of the cultural and historical evolution of languages in South Asia, focusing primarily on Urdu. It will use a variety of literary genres to arouse students’ interest in discovering the nuances of the language, and its development along cultural and historical timelines.  
Pre-requisite: LAN113

MMM332 News Production / News Anchoring  
This advanced level, studio-based course for Journalism majors, aims to develop the required skills for producing news packages for, and anchoring on television.  
Pre-requisite: MMM327

MMM333 Sports Journalism  
This specialized course familiarizes students with the tools and techniques of sports journalism. Class discussions focus on a variety of major sporting events and review their coverage in print and electronic media. Students visit field locations for real time news coverage, where they also interact with and learn from professional journalists.  
Pre-requisite: MMM315
MMM335 Magazine Production
This course covers magazine design fundamentals i.e. typography, image research assignments, pre-press and manufacturing process, using traditional and computer-based tools and techniques. Every student must produce a sample online magazine during the term, going through a series of workshops, presentations and revision sessions.
Pre-requisite: MMM316 or MMM363

MMM336 Human Rights and Gender Reporting
This course is designed to familiarize students with the nuances of reporting on human rights violations. It relies on lectures, assignments and field visits to develop deeper understanding of issues related to the vulnerable segments of society i.e. women, children, religious minorities, and to enhance students' ability to write on these issues.
Pre-requisite: MMM310

MMM337 Thesis (Journalism)
This capstone project for Journalism majors will test their understanding of the tools and techniques of academic research, as they go through the process of selecting a research topic, developing a formal research design, undertaking literature review, collating, analyzing and interpreting field data and writing the final research report.
Pre-requisite: MMM328

MMM338 Cinematography I
This introductory course provides the technical foundation for developing students' understanding and skill in the art of “visual storytelling”. Students will learn to work with camera and light in a variety of conditions.
Pre-requisite: MMM363

MMM339 Cinematography II
This course will familiarize students with the tools and techniques of studio lighting as well as external lighting. The class shall teach students lighting through lecture sessions, workshops, and screenings. Students will get ample opportunity to develop their technical skills, and practice them to produce a short film focused on lighting techniques.
Pre-requisite: MMM338

MMM340 Cinematography III
This advanced level course will build on the learnings of the previous course, Cinematography II, to provide students with a deeper understanding of the technical properties of lenses, filters, and the application of lighting techniques primarily through lecture sessions, and workshops. Students will sharpen their technical skills, practice video image making, develop critical thinking skills, and their own film language and style.
Pre-requisite: MMM339

MMM342 Advanced Filmmaking – The Art & Craft I
This course is designed as a precursor to the final course in Filmmaking, and by that token it will include all aspects of filmmaking including idea creation, screenwriting, story-boarding, and selection of music and sound.
Pre-requisite: MMM340

MMM344 Screenwriting for Film & TV
This dedicated course will enhance the students' screenwriting skills i.e. “writing from a visual point of view”, for TV. The thrust of the course will be on learning from the work of professional scriptwriters, and cover the principal genres and formats. Written assignments will be used to measure progress, and grade the work of students.
Pre-requisite: MMM329

MMM351 Production Management
This course is designed to familiarize students with essential pre-production areas such as script development, budgeting, casting, set construction, and scouting for locations, required to produce video films for television.
Pre-requisite: MMM363

MMM354 Introduction to Editing & Sound Design
This initial course will focus on two interdependent areas of digital editing and sound design. Students will practice their skill in non-linear video editing using FCP software, to edit different for types of production such as action, dialogues, comedy etc., and experiment with sound tracks to enhance the impact of the edit.
Pre-requisite: MMM363

MMM355 Production of Documentary
This introductory course in nonfiction production will take students through the stages of conceptualizing, researching, scriptwriting, and producing video documentaries. It will focus on learning through observation, discussion and practicing with different treatments, styles, and production techniques.
Pre-requisite: MMM320

MMM356 Ad-Film Production
The focus of this course will be on the “ad-film genre”, taking students through the creative process, starting off with idea generation or scripting o copywriting, storyboarding, casting, choice of locations, set-designing/ construction, shooting, editing, post-production and sound mixing to arrive at the finished “station material”.
Pre-requisite: MMM355

MMM357 Sound Design II
In this course students will aim at polishing their picture competency and sound competency skills. They will learn about sound track creation for film/TV, working with several strata of sound possibilities, ranging from music to general ambience, and perfect their skills in field-recording and sound editing.
Pre-requisite: MMM354

MMM360 Introduction to Photography
This basic photography course will introduce students to the essentials of professional digital photography. It will teach them the techniques of digital photography in a practical and interactive manner, enabling them to obtain optimum results using varied themes, under different conditions.
MMM361 Fashion Journalism
This course covers various aspects of fashion journalism, from understanding fashion trends, generating ideas for fashion features, reviewing shows, taking catwalk notes, working with photographers and photographs, interviewing designers, and writing reviews and pitching them to magazine editors.
Pre-requisite: MMM360

MMM362 History of Filmmaking
This course aims at creating an appreciation of how filmmaking has evolved over the years into a powerful visual medium. Students will not only discover how sound, light, camera, and music come together to create the magic of film, but also how critical are passion, creativity, commitment, and teamwork to succeed in this vocation.
Pre-requisite: MMM360

MMM363 Introduction to Design Tools
This course will introduce students to three practical graphic design software viz. Adobe Photoshop, Illustrator and InDesign, along with their application in photo-editing, web graphics, motion graphics, special effects, vector illustrations, and editorial design and page-making for books and magazines.
Pre-requisite: MMM360

MMM364 Introduction to Mass communication
This is an introductory level course that provides an overview of the historical and social context of mass media. Students learn about the process of Mass Communication and the relationship between Media and Society.

MMM365 Filmmaking – The Art & Craft II (Studio)
The “Studio” component of the final Advertising Filmmaking course will be divided between guest lecture sessions and preparation for the thesis/creative project. High-caliber guest lecturers drawn from the industry will share first-hand knowledge of the challenges of practical filmmaking and project management.
Pre-requisite: MMM342

MMM366 Filmmaking – The Art & Craft II (Thesis)
This capstone course will draw on students’ integrated knowledge, skill and understanding of digital filmmaking. Each student will produce two short films of 20-30 minutes duration. Out of the 90 hours scheduled for this course, a third will be used for lab and review sessions, and two-thirds for fieldwork, editing and post-production.
Pre-requisite: MMM365

MMM367 Digital Journalism
This capstone course will draw on students’ integrated knowledge, this course will encourage students to explore the shift towards digital journalism, and learn digital-specific news production tools and techniques. Students will be required to set up and manage a news website, complete with news, opinion pieces and blogs, and also set up and manage social media accounts to support the site.
Pre-requisite: MMM315

MMM401 Media & Social Change
This new course will explore the linkages between development, media and social change. Beginning with an overview of contemporary development challenges, it will assist the students in exploring ways in which media has and can bring about social, political and economic change. The role of governments responsible for policy-making, civil society as champions of the marginalized segments of the population, and various media tools such as documentaries, digital storytelling, blogging and social networking will also be discussed.

MMM423 Specialized Communication Skills
The course is designed to train and equip students with specialized verbal and written communication acumen required in efficient and effective information and entertainment dissemination through print and electronic media and advertising and public relations.

MMM427 Citizen Journalism
Students are familiarized with such aspects of Citizen Journalism as civic and social issues or problems pertaining to education, health planning, vehicular traffic, public utilities, etc. This course does not only identify issues and problems as regards social and civil life but also enables students to devise and apply practical models to address them through media efficiently and effectively.
Pre-requisite: MMM360

MMM428 Script Writing
The art of script writing is best learnt through professionals in various fields of print and electronic media in terms of conceiving an idea, developing a plan, devising convincing headlines, scripting the idea and concluding with an exclamation, if not a consensus.
Pre-requisite: MMM364/438

MMM429 Digital Media
Digital Media includes interactive multimedia, digital video and film production, web design, image creation, digital animation, 3D modeling, digital sound technology, graphic designing, basically pertaining to digital technology as a part and parcel of electronic media.
Pre-requisite: MIS401

MMM430 Time, Priorities and Conflict Management
This course aims at providing fresh ideas and insights for media personnel to manage time and priorities in tough and tedious routine and special conditions by delegating work responsibilities or by skillful multiple tasks adjustments. Time and priorities management are intensively addressed in all media forms relating to radio, TV, newspapers and magazines as well as in advertising, public relations and event management, of course, according to local and indigenous conditions.
Pre-requisite: MAN401
MMM434 Media Planning
The course prepares the student for the changing media scenario by enabling them to specialize in the handling and effective selection of media. The course elaborates how the advertising budget can be used optimally across various media.
Pre-requisite: MAN401, MKT401

 MMM435 Print Media
The objective of the course is to provide specific study of print media for those students who aspire for a career in newspapers, magazines, periodicals and other publications. The course teaches students about process and production of print media, printing technologies, production strategies, thus equipping the students with knowledge and skills to enter the print media industry.
Pre-requisite: MMM438

MMM436 Electronic Media
This course prepares students to acquire a full understanding of the function of radio and television in all its modern manifestations, including cable TV. Students will learn how to formulate advertising plans & monitor results taking cognizance of problems, opportunities and regulatory matters.
Pre-requisite: MMM438

MMM437 Role of Media in World Affairs
This course teaches students the importance of media as a vehicle for creating an atmosphere conducive to international relations. It teaches the students how the media has undergone significant changes over the years and the power it has on the formation of public opinion and affecting the external environment for marketers and others.
Pre-requisite: MMM438

MMM438 Introduction to Media in Pakistan
This course comprehensively covers contents like print, electronic, out-of-home media in Pakistan The course also discusses the Pakistani environment in the context of media laws & ethics, the role it plays in world affairs, and marketing, planning and research processes prevalent in the country.

MMM439 Media Research and Public Opinion
Mass media research introduces graduate students to applied audience research for electronic media. The emphasis will be on Pakistan’s media market and students will gain hands on experience with syndicated and custom audience research for print and electronic media. Students will be exposed to various aspects of media audience research including Gallup ratings for TV, radio and cable TV and other music research. Students are expected to become familiar with the Pakistan media market specially in electronic media, based on TV, radio, cable systems and cinema through mass media research based on research process, research approaches, data analysis and research application.
Pre-requisite: MMM435/438

MMM511 Multimedia and Film Production
The course focuses on aspects of multi-media, video and film production. This course provides the student hands-on knowledge of planning, organizing, directing, controlling and promoting, provided by professionals from the field. The work-like atmosphere enables students to prepare for careers in this area.

MMM601 Digital Video Production
This introductory course is designed students not familiar with digital video production. It will briefly introduce them to the history of filmmaking, as well as the major artistic and technological advances in the art form. In this course students will become familiar with the specialized vocabulary of film and television, the process for developing ideas, turning them into scripts, and using scripts to learn the basics of practical video production. The final project will be a video product based on the students’ approved scripts.

MMM602 Global Media Marketing Strategies
Building on the fundamentals of marketing, this course is designed to introduce students to media marketing within the context of the global environment. The course therefore would delve into the cultural, social, legal, political, financial and geographic dimensions of global marketing and understand their impact on marketing programs and strategies. Case studies of global media organizations will form part of the course.

MMM603 Seminar in Strategic Media Marketing
The objective of this course is to develop an in-depth understanding of how Strategic Marketing concepts and theories are applied in the real word of media. Hence the time allocated to this course will be evenly split between understanding textbook concepts and theories, reviewing case studies, and learning from direct face-to-face interaction with leading scholars and practitioners in leading media organizations.

MMM604 Screenwriting for TV & Cinema
The objective of this course is to introduce students to the essence of film and television screenplay structure, and develop their ability to analyze strategies in film and television, apply the correct script forms of screenwriting, and creatively engage them in the various stages of original screenwriting for TV. The assignments will include writing of scenes, treatments of up to a half-hour script, with a view to develop a final, usable screenplay.

MMM606 Media Psychology
Media psychology has emerged as a significant field of study in recent years spurred by the major developments in media technologies. This course will not only assist students in understanding the impact of psychological theory and research on media, but also how it can be used to create impact and optimize the potential of media. As technologies become more sophisticated, media professionals need to understand what is aptly described as the psychology of media experience.
MPhil in Business Management

MPM601 Advanced Qualitative Research
The course focuses on developing a working knowledge of a range of qualitative methods, methodological approaches, and theoretical framework of research to enable the participants to conduct qualitative research. Students will read research articles and case studies to propose and plan a study of their own selected inquiry.

MPM603 Advanced Quantitative Research
This course aims to provide students with a broad range of quantitative research methods and skills that are relevant across business psychology, business management, human resources, marketing, economics, finance and social sciences.

MPM605 Survey of Current Research Literature in Management
This course will enable students to explore recent research conducted in Business Management discipline and reported in reputed scientific journals. It will also aim at guiding research students to write literature reviews at the early stage of their research design, which form an important part of dissertation.

MPM607 Corporate Governance and Strategy
The course brings together a coherent research based set of concepts, tools and practices for training integrators (general managers/directors) to handle cross-functional and cross-product sets of decisions. For advanced management researchers, this course aims to develop a useful set of examples and a rich source of research questions.

MPM608 Project / Research Practicum
The practicum course aims to provide students with real experience in a workplace environment, working on a challenging project. The practicum provides opportunities for students from all disciplines, including management, human resource management, finance, and marketing research.

MPM609 Seminar in Human Resource Management
The aim of the course is to equip the students with the latest concepts, techniques and practices of HRM and strategic HRM in a modern corporate environment. The course provides opportunities based on case studies to practically integrate HR functions with overall strategy of national and global organizations.

MPM610 Independent Study
This course will provide space to the participants coming from different disciplines to propose a research topic in their field on unpublished major work and complete the research in one semester for publication in any HEC recognized journal or read at conferences of international repute.

MPM611 Advanced Corporate Finance
The course has been designed to give extended/advanced knowledge about Corporate Finance. Extended topics like option valuation, risk and real options in capital budgeting, financing and dividend policies will be studied at length.

MPM614 Advanced Marketing Strategy
This course focuses on a relative connectivity of changing concepts and philosophy of marketing with application examples created by corporations to handle their complex marketing tasks to achieve intended results.

MPM616 Econometrics
The course provides the students with the fundamental econometric theory and concepts, and practical training to become sound applied economists who know what econometric methods to use in different circumstances and how to interpret and appraise the results of the empirical analysis.

MPM716 Hospital Planning and Organization
This course provides an overview of the evolution, structure and current issues in the health care system. It examines the unique features of health care as a product, and the changing relationships between patients, physicians, hospitals, insurers, employers, communities, and government. This course covers history and organization of the health care system, financing and utilization of health services, health status of the population, disease occurrence, legal aspects of health care and medical sociology. Government health policy formulation and implementation and its impact on health care.

MPM601 Advanced Qualitative Research
The course focuses on developing a working knowledge of a range of qualitative methods, methodological approaches, and theoretical framework of research to enable the participants to conduct qualitative research. Students will read research articles and case studies to propose and plan a study of their own selected inquiry.

MPM603 Advanced Quantitative Research
This course aims to provide students with a broad range of quantitative research methods and skills that are relevant across business psychology, business management, human resources, marketing, economics, finance and social sciences.

MPM605 Survey of Current Research Literature in Management
This course will enable students to explore recent research conducted in Business Management discipline and reported in reputed scientific journals. It will also aim at guiding research students to write literature reviews at the early stage of their research design, which form an important part of dissertation.

MPM607 Corporate Governance and Strategy
The course brings together a coherent research based set of concepts, tools and practices for training integrators (general managers/directors) to handle cross-functional and cross-product sets of decisions. For advanced management researchers, this course aims to develop a useful set of examples and a rich source of research questions.

MPM608 Project / Research Practicum
The practicum course aims to provide students with real experience in a workplace environment, working on a challenging project. The practicum provides opportunities for students from all disciplines, including management, human resource management, finance, and marketing research.

MPM609 Seminar in Human Resource Management
The aim of the course is to equip the students with the latest concepts, techniques and practices of HRM and strategic HRM in a modern corporate environment. The course provides opportunities based on case studies to practically integrate HR functions with overall strategy of national and global organizations.

MPM610 Independent Study
This course will provide space to the participants coming from different disciplines to propose a research topic in their field on unpublished major work and complete the research in one semester for publication in any HEC recognized journal or read at conferences of international repute.

MPM611 Advanced Corporate Finance
The course has been designed to give extended/advanced knowledge about Corporate Finance. Extended topics like option valuation, risk and real options in capital budgeting, financing and dividend policies will be studied at length.

MPM614 Advanced Marketing Strategy
This course focuses on a relative connectivity of changing concepts and philosophy of marketing with application examples created by corporations to handle their complex marketing tasks to achieve intended results.

MPM616 Econometrics
The course provides the students with the fundamental econometric theory and concepts, and practical training to become sound applied economists who know what econometric methods to use in different circumstances and how to interpret and appraise the results of the empirical analysis.

MPM716 Hospital Planning and Organization
This course provides an overview of the evolution, structure and current issues in the health care system. It examines the unique features of health care as a product, and the changing relationships between patients, physicians, hospitals, insurers, employers, communities, and government. This course covers history and organization of the health care system, financing and utilization of health services, health status of the population, disease occurrence, legal aspects of health care and medical sociology. Government health policy formulation and implementation and its impact on health care.

MPM717 Health Institutions, System and Policy Management
This course focuses on managed care and market structure of the healthcare industry as a whole. It covers strategic planning and marketing of managed care services, operational issues in developing a managed care network, actuarial issues, and the management of physician behavior. In addition the course analyzes strategies of vertical integration and horizontal integration, and their attempt to alter the balance of power in local healthcare markets. This course highlights the operational issues in managing cost and quality in an integrated system, integration along the supply chain, and the performance of these systems, and the bargaining and negotiation between hospitals, physicians, and health plans.

MPM718 Global Perspective of Health Care Marketing
This course is aimed at creating better understanding an increasingly complex market environment for Healthcare product development and commercialization. It explores the facts and clarify the implications of ongoing thematic changes - the 5 D’s - that are fundamentally transforming commercial decision making in health care markets from insurance and care delivery to pharmaceuticals, biotechnology, and devices.
MPM719 Integrated Leadership in HealthCare
This course describes the critical knowledge and skills needed to be effective leaders in today’s complex healthcare environment. It covers conflict resolution, leadership and negotiation skills, strategic planning, and ethics. Within the context of healthcare advocacy, the course examines the organizational and individual issues that impact success in promoting and advocating for a healthcare agenda.

MPM723 Primary Health Care Management
In this course, students are introduced to philosophies and models of primary health care. Capacity building and community development are presented in relation to the socio-political environment in which care is delivered. Community nursing and midwifery are profiled as examples of primary health care initiatives.

MPM721 Managing Healthcare Ethics
This course provides an introduction to the relationship of law to health care, including liability, government regulation, financial and ethical issues, contracting and negotiation and dispute resolution. This course presents an overview of legal and ethical issues facing managers and providers in health care. It provides students with a foundation of health law and ethics and reviews a wide variety of health care legal and ethical situations and dilemmas.

MPM722 Managing Regulatory Affairs of Healthcare Industry
This course provides students with a basic understanding of the areas of regulatory affairs and quality operations within various health-care industries, including pharmaceutical companies. Students are prepared for occupations involving drug or medical device submissions and quality assurance functions and roles. The issues of regulatory compliance in Pakistan as well as in other areas of the world are covered in the course.

MPhil in Organizational Psychology

MPP601 Qualitative Research Methods in Psychology
This course provides an introduction to the qualitative research paradigm, issues of ontology, epistemology and methodology, research design using qualitative research methods, and theory building and theory testing. It focuses on several selected research approaches that will prepare students to undertake sound qualitative research.

MPP603 Quantitative Research Methods in Psychology
This course adopts a practical approach to teaching the analytical aspects of quantitative research techniques in psychology. It is designed to provide students with the basic background in research design and data analysis.

MPP605 Psychological Testing & Measurement
This course surveys the major concepts and techniques in the field of psychometrics, and provides students with some practical experience with commonly used tests. Topics covered include: the testing process; test standardization; reliability and validity; personality assessment; occupational applications; large-scale measurements; ethics and prospects.

MPP607 Independent Study in Organizational Psychology
This course is designed to propose a research topic in the field of Organizational Psychology in unpublished major work and to complete the research and publish it in HEC recognized journal. For independent study, the participants will be provided a suitable adjunct faculty member of the university, who is able to facilitate in completing the process of research and publication.

MPP609 Personnel Psychology in the Work Place
This course explores the application of psychological theory and practice to human resources activities in organizations. Topics include job analysis and design, employee selection and placement, performance management and appraisal, and legal and ethical considerations in human resources management.

MPP613 Organizational Conflict & Management
This course is based on the foundation that conflict is both “inevitable and beneficial” in successful organizations. We will examine interpersonal conflict, the role of organizational culture in conflict resolution and the impact of diversity on conflict. Skill development in conflict management and resolution will be based on a collaborative approach involving team- work, case analysis, and role-play.

MPP613 Organizational Conflict & Management
This course provides an introduction to the qualitative research methodologies and issues and plan a study of their own to enable the participants to conduct qualitative research within the subject matter of industrial/organizational psychology in the “real world”.

MS in Educational Leadership and Management

ELM601 Qualitative Research Methods in Education
The course focuses on developing a working knowledge of a range of qualitative methods and methodological approaches of research to enable the participants to conduct qualitative research within the social sciences. Participants will read research articles to identify research methodologies and issues and plan a study of their own selected inquiry. The participants will conduct a small scale investigation designed to evaluate the usefulness of a research method that they select to investigate a real empirical phenomenon.
ELM604  Statistical Testing and Inferences in Education
This course provides opportunities for developing educationists to increase understanding of, and ability to use quantitative research methods for scientific inquiry. The course also focuses on applications for data analysis, including construction of data files; SPSS for data analysis; and development of an analysis plan. In addition, participants are expected to learn how to document and communicate the quantitatively obtained results of the analysis efficiently.

ELM618  Policies and Education in Pakistan
The course aims to enable the participants to critically analyze educational policies since independence. It also encourages the participants to understand the limitations underpinning the policies and how a positive role can be played by the stakeholders for its implementation.

ELM613  Readings in Education
This course introduces participants to critical reading as a process of analyzing and evaluating the context and purpose of written texts by focusing on the four basic methods of critical thinking: analysis, interpretation, evaluation, and synthesis. It also helps the readers form their own opinions upon education issues through extensive reading. The focus is given to written skills through production of book reviews and discussion articles.

ELM610  Philosophical Foundation in Education
The course will explicate the concepts and principles of philosophy and the branches of philosophy; its meaning and scope, as well its relevance to education and its modes. It will also focus on the contributions of important philosophical schools to the theory and practice of education. It will discuss Modernism, Post-modernism, Colonialism, Post-colonialism, Religion and Science and their effects on education. It will expand upon the application of philosophical methods to educational theory and practices.

ELM616  Developing a Research Project
This course enables candidates to identify their own area of research interest in the field of Education to develop a synopsis for their projected thesis. The course assists participants to chalk out the research design for BASR approval.

ELM730  Leading and Managing Educational Change
This course provides a critical understanding of the cultural, social, political and temporal contexts within which educational managers and leaders work. Realizing the fact that change is constant in a healthy and dynamic educational enterprise, the present course will aim to examine how educational leaders and policy-makers create sustainable environment to bring about a viable and positive change, particularly in large education systems where adjustments have traditionally been imposed by the state. This course will analyze the current and emerging issues and trends impacting education emphasizing the nature, characteristics, responsibilities and contextual determinants that influence a leader’s role in changing educational organizations.

ELM733  Contemporary Issues in Educational Leadership
This course provides a critical understanding of the cultural, social, political and historical contexts within which educational managers and leaders work. It examines current and emerging cultural and political issues and trends impacting education, develops cognizance of the issues and how these issues can be most effectively addressed in a leading role to address the complexity of contemporary contexts. The course will increase the understanding of the participants by inspecting contemporary issues and possible means of amelioration.

ELM739  Education Leadership Theories Principles and Practices
This course is designed to enable participants to identify and examine contemporary and classic theories of leadership and to apply these to the problems of practice in education-specific settings. It will enable the participants to appreciate the challenges faced by modern educational leaders working at school and tertiary levels and the reasons why a multitude of theories interplay to improve the management of an institute.

ELM742  Strategic Communication in Educational Leadership
The course examines the strategic role of leaders in communication in terms of creating a vision of learning, developing organizational culture, creating a positive environment, encouraging staff development and achieving positive outcomes. It covers key aspects of communication management, including how to plan, implement and measure strategic communication initiatives. The course will include the use of social media communication tools and approaches to make communication reach at all levels and directions by making pedagogical and philosophical shifts.

ELM739  Education Governance Policy and Practice
This course is designed to help the aspiring educational leaders to effectively engage with the policy environment and to support institutional success. This understanding will be built as the participants acquire knowledge and skills from theories, research and current practices related to governance in education. The participants during the course will develop an understanding of how they, as educational leaders, fit within the bigger system of policies and governance and how decisions made at the provincial and state levels affect what happens in the classrooms.

MS in Education

MPE604  Developing a Research Project
This course enables candidates to identify their own area of research interest in the field of Education to develop a synopsis for their projected thesis.

MPE608  Readings in Education
This course introduces participants to critical reading as a process of analyzing and evaluating the context and purpose of written texts by focusing on the four basic methods of critical thinking: analysis, interpretation, evaluation, and synthesis. It also helps the readers form their own opinions upon education issues through extensive reading. The focus is also given to written skills through production of book reviews and discussion articles.
MPE610 Philosophical Foundation in Education
This course introduces the fundamental conceptual and ethical questions that global change is bringing about in contemporary education. Participants learn the global dimensions of several crucial contemporary issues, including international security and human rights, the problems of global conflict, the hopes of global cooperation, and the complexity of educational accountability, authority, and professionalism.

MPE615 Qualitative Research Methods in Education
The course focuses on developing a working knowledge of a range of qualitative methods, approaches, and theoretical framework of research. The course also introduces the participants to APA writing style and concepts of academic writing.

MPE617 Statistical Testing and Inferences in Education
This course provides opportunities for developing educationists to increase understanding of, and ability to use, quantitative research methods for scientific inquiry. The course also focuses on applications for data analysis, including construction of data files, SPSS for data analysis, and development of an analysis plan. In addition, students are expected to learn how to document and communicate the quantitatively obtained results of the analysis efficiently.

MPE618 Policies and Education in Pakistan
The topics in the course include empirical and legal research on educational issues of Pakistan at the local and state level. Participants gain an in depth knowledge of critical appraisal of Pakistani policies, facilitating communication between education leaders and policymakers, statutes and case law related to liability, student rights, employee relations and property use.

MPE702 Managing Higher Education Institutions
The course assesses the performance of higher education institutions and obstacles encountered in academic and administrative work. It provides participants an opportunity to visit higher education institutions for a briefing to experience and critique the management systems in operation.

MPE704 Strategic Management of Schools and School Systems
This course is particularly based on elements of school systems by utilizing system analysis in identifying system input, operations, outputs, and feedback processes that offer clear criteria for development and improvement in both public and private school systems.

MPE705 Economics of Education
This course is designed to introduce participants to economic principles, theory, and practice as it pertains to educational systems and their impact on economic growth (e.g., investment, labor, productivity, cost, efficiency, supply and demand) in the context of education.

MPE706 Global Issues in Education
This course introduces the fundamental, conceptual, and ethical questions that global change is bringing about in contemporary education. The students understand the importance, commonalities, differences, and connections between global and comparative education.

MS in Engineering Management

MEM501 Project Management
The course will help students gain insight into the concept of a project and its definition, Introduction to planning, scheduling and control of projects, Network model and its applications. Probabilistic and Deterministic Approaches. Gantt charts, PERT and CPM. Network simulation, latest software on project management, Determination of resources requirements of a project.

MEM502 Design, Patents, Contract And Legal Engineering
The course provides an in-depth understanding of Design, its process and optimization, Patent development, its types and authentication, Legal procedures and principles of interest to engineers, The Pakistani patent legal systems and agencies, contracts, its specifications, and liability, Patent and proprietary rights.

MEM503 Quality Process For Design And Production
This course aims to cover the theoretical foundations of Quality and its definition, selecting quality parameters for inspections including limits, tolerances and fits, Product standards and references (national and international), in-process and off-process inspection, Performance tests (destructive and non-destructive tests), Statistical design of engineering experiment.

MEM504 Research Methodology
This course provides an opportunity for participants to establish or advance their understanding of research through critical exploration of research language, ethics, and approaches. The course introduces the language of research, ethical principles and challenges, and the elements of the research process within quantitative, qualitative.

MEM505 Applied Engineering Analysis
This course presents a range of practical modeling and analysis methods that are used to solve engineering problems. Differential equations, series solutions of differential equations (special functions), boundary-value problems and characteristic function representation, Laplace transforms, Fourier analysis, partial differential equations, formulating and solving problems in engineering for systems of differential equations and partial differential equations.

MEM506 Facility Planning And Layout
The course introduces Location and site selection criteria, Equipment and utilities layout, Latest tools and software for facility layouts, work cell layout and job shop layout, Types of Layout, Types of Production, Group / Cellular Technology, Material Handling Systems, Type of flows, Material Requirement Planning (MRP-II).

MEM507 Operations Analysis & Resource Allocation
This course aims to provide an overview of the functional activities necessary for the creation/delivery of goods and services. Topics covered include: productivity; strategy in a global business environment; project management; quality management.
MEM508  Operation Management

MEM509  Simulation & Modeling
The course focuses on Introduction and importance of simulation in engineering, Different levels of simulation in engineering applications (components level, system level and event level simulation), Dynamic and static simulation.

MEM510  Production Planning And Control
This course exposes students to the Production system, its inputs, conversation and output, objectives and evaluation of production planning and control, Aggregate Production Planning, scheduling, shop loading, Low and high volume production, Ordering / sequencing and progress controlling, work flow and its balancing.

MEM511  Advance Practices In Engineering Management
The course emphasizes on emerging trends in the field of engineering management.

MEM512  Environmental And Safety Management
The course introduces students to the physical aspects of odor, noise and vibration and its effect on human. Physical sources of noise, pollution and vibration and their control.

MEM513  Industrial Costing Management
This course particularly caters to the Cost and Value concept, Types of costs and its calculations. Money-time relation, Return on investment, Present and future worth of money. Cost centers, costing organization, and responsibilities. Appreciation and depreciation analysis.

MEM514  Technology Management
The course helps to gain an insight into Technology Management, The Role of Technology in the Creation of Wealth, Critical Factors in Managing Technology, Technology Life Cycles.

MEM515  Lean Six Sigma & Lean Manufacturing
The course focuses on developing a broad understanding of Lean/Six Sigma principles and practices, Build capability to implement Lean/Six Sigma initiatives in manufacturing operations.

MEM516  Marketing Management
The course is designed to serve as an introduction to the theory and practice of marketing. Students will improve their ability to develop effective marketing strategies and assess market opportunities, as well as design strategy implementation programs.

Policy Studies
PLY101  Policy Making in a Globalized World
The course focuses on theory of policy – liberal, socialist and nationalist approaches. The state, the market and the individual in capitalist order; global policy makers – multinational, financiers, multilateral agencies and private sector raters; the surveillance standardization regime, the system pegemon and global policy; policy making in Pakistan, state policy makers; the State Bank; the impact of de-regulation and privatization. Private sector policy makers associations NGO’s, the media and the influence of global policy on national policy making in Pakistan.

Pakistan / Islamic Studies
PRL301  Pakistan / Islamic Studies
The course covers various movements which led to the creation of the Islamic Republic of Pakistan. The history of Pakistan is discussed with an analysis of the various leaders and their contributions to the development process. The course discusses how different messengers of Allah came to spread His word. It further discusses the need for Islam: its five pillars, the life of the Prophet Muhammad (PBUH), the companions of the Prophet (PBUH), and the several Surahs, Ahadiths, and Ayats.

Political Sciences
PSC301  Pakistan Studies
The course on Pakistan Studies is an in-depth course covering various movements which led to the creation of the Islamic Republic of Pakistan. The history of Pakistan is discussed with an analysis of various leaders and their contributions to the process of national development. It also discusses the two nation theory in detail.

PSC401  Pakistan Studies and Current Affairs
The course is an in-depth study covering the various movements which led to the creation of the Islamic Republic of Pakistan. The history of Pakistan is discussed with an analysis of the various leaders and their contributions to the development process. Issues related to current affairs will also be discussed.
PhD (Business Management)

PBM701 Philosophy of Business Management
The objective of the course is to link the philosophy of the researcher’s area of specialization to the theoretical and philosophical foundations of management sciences. It links the selected area with the classical, modern and postmodern discourses and sources of management. It explores past and present of management sciences in terms of epistemology, metaphysics, ethics, knowledge systems and political economy and helps in developing a sound and productive vision of future in the area of research.

PBM703 Multivariate Analysis
The course enables the identification of a set of techniques for analyzing data sets with more than one variable in the student’s chosen area of research. Students would explore and identify relevant techniques from univariate analysis, bivariate analysis, analysis of variance, categorical data analysis, multivariate linear regression, discriminant analysis, canonical correlation, multivariate analysis of variance, principal component analysis, factor analysis, cluster analysis and logistic regression. This would lead the student to develop multivariate analysis techniques for their area of research and their justification.

PBM705 Readings in Business Research
This course enables the students to study high quality PhD dissertations and their research methodology in their chosen area of research. The students are expected to study the qualitative and quantitative research methodologies undertaken in their field and develop a template that they would use for their research plans, methodology, outcomes, results and research writing.

PBM707 Replication of Business Research Design and Results
Replication involves the process of repeating a study using the same methods, different subjects, and different experimenters. A qualitative assessment of the result comparison is carried out to identify similarities and differences and to discover assumptions or parameters underlying any variances. The applied research leads to the proposal of how the selected research may be extended and enhanced.

PBM801 Marketing Models
This course describes theoretical and empirical models used to analyze marketing management issues in the areas of product introduction and positioning, pricing, advertising, and distribution channels. The theoretical structure in the course comes from microeconomics of firm and consumer decision making, with special consideration of competitive issues. Theoretical, operational models in marketing, with emphasis on recent advances; in-depth criticism of models, participation in model development project. The empirical work draws from conjoint analysis, choice modeling, and multivariate techniques.

PBM803 Marketing Theory
Recent and classic research contributions to marketing theory development. The course addresses conceptual development and current practice in marketing decision-making. Topics critically examined include marketing orientation, competitive interaction, product development and introduction, channel relationship management, customer relationship management, advertising and promotion, pricing and revenues, and sales, service and quality.

PBM805 Advanced Topics in Marketing
Current state of knowledge in Marketing Research. As an introductory seminar, coverage will include current topics appearing in top marketing journals. Discussions will revolve around the reference disciplines and theories used in the marketing literature. This course will provide an in-depth introduction to a particular methodology or a particular setting that is relevant to research.

PBM811 Advanced Topics in Strategic Management
Current state of knowledge in strategic management. Topics may include the sources of competitive advantage, the role of industry evolution and technology, the organization of top management, and managerial decision-making and cognition. The course allows students to research alternative theoretical perspectives and available empirical evidence related to these topics.

PBM813 Advanced Topics in Organization Theory
This course introduces students to the major schools of thought in organization and management theory. It considers the development of the field, major and foundational works in these schools of thought, and provides a cognitive map with which to evaluate contemporary research and debates. At the end of the course the student will have an understanding of the strengths and weaknesses of each major perspective from the research.

PBM815 Advanced Topics in Human Behavior in Organization
This seminar examines theory and original research within the field of organizational behavior. The course covers a range of topics, including job performance, work attitudes (e.g., organizational commitment, job satisfaction), motivation, trust, justice, individual differences (e.g., personality), team structure and processes, power, leadership, and organizational culture. The primary emphasis is on the field’s classic, ground-breaking, emperical and/or provocative research. Overall, the course exposes students to current research thinking and strategies within the field.

PBM821 Advanced Topics in Operations Management Research
This course provides a general introduction to the major research fields of operations management (OM). The focus will be on reading and evaluating current papers from prominent OM journals. The theory of science and the review process will be briefly discussed. Students are expected to have as mathematical background the equivalent of upper-level undergraduate or first-year graduate courses in optimization and probability or stochastic modeling. This course may be appropriate for some graduate students in engineering or computing science.
Advanced Research Topics in Operations Management
This course will provide an in-depth introduction to a particular methodology or a particular setting that is relevant to research in operations management. The topic may vary from year to year. Possible topics include optimization modeling and formulation, stochastic modeling and optimization, behavioural research in operations management, and health care operations management. The required background for students will vary depending on the topic. This course may be appropriate for some graduate students in engineering or computing science.

Advanced Research Topics in Management Information Systems
As an introductory seminar, coverage will include current and historical topics appearing in top information systems journals. Discussions will revolve around the reference disciplines and theories used in the MIS literature. This course will provide an in-depth introduction to a particular methodology or a particular setting that is relevant to research in management information systems. Possible topics include applications of optimal control theory in management information systems and operations management, collaborative communication systems, and quantitative models for management information systems.

Advanced Topics in Finance
This course provides introduction to the major research fields of Finance. The focus will be on reading and evaluating current papers from prominent Finance journals. This course provides an introduction to theoretical and empirical research work in asset pricing and market microstructure. Research topics may include market efficiency, time varying expected returns and volatility, test of asset pricing models, and models and analysis of price formation. They may also include contracting theory, the theory of the firm, corporate governance, capital structure, and dividend policy. The course may be repeated if the topics vary.

Advanced Readings in Business Ethics
This course offers description and analysis of discourses of ethics ranging from Aristotle to postmodern ethicists. It also focuses on the applications of these theories in the fields of marketing, finance, technology, employer-employee relationship and the regulation of the corporation. This course presents advanced studies of liberal and neo-liberal, Marxist and neo-Marxist, Aristotelian and neo-Aristotelian, modern and postmodern, and communicative and pragmatist ethical approaches to business practice.

Globalization Discourses of Ethics
This course offers an analytical contextualization of globalization in the framework of modern and postmodern ethical approaches, and addresses relevant ethical issues and their resolutions in theory and practice. It presents a theoretical framework for the ethics of globalization. This course surveys globalist and anti-globalist, hyper-pro-globalist and hyper-anti-globalist discourses from ethical standpoints. It studies the legal, economic, political, and cultural dimensions of globalization in connection with prospects of global civil society, cosmopolitanism and cosmocracy.

PhD (Computer Science)

Big Data Analytics and Knowledge Discovery
This course will introduce principles for big data analytics that have been developed in response to the challenges for big data processing and analysis; it will also cover the Specific knowledge of the fields of Machine Learning and Knowledge Discovery in Databases. Literature published will be discussed and innovative ideas will be encouraged.

Natural Language Processing Information Retrieval
The course is concerned with concept in relevant journals, models and algorithms to interpret generate and learn natural languages, as well as applications of NLP. The goal of the course is for the students to be familiar with basic concepts in NLP, understand the algorithms and methods for NLP and acquire the skills for developing NLP tools/systems.

Advance Theory of Computation
This course is primarily concerned with rigorous reasoning about computation; a significant portion of this course will then be focused on computational complexity, including major topics in theory of computation such as randomization, interactive proofs, parallel computation, and quantum computing.

Advances in Machine Learning
Machine learning approach will be discussed with trends and recent developments. Specific attention will be focused on robotics and intelligent systems.

Computational Intelligence
This course will cover the introductory concepts, models, algorithms, and tools for development of intelligent systems. Topics include artificial neural networks, genetic algorithms, fuzzy systems, swarm intelligence, artificial life, and hybridizations of the above techniques.

Heuristic Search Theory and Methods
This course will cover many important search algorithms used in AI ranging from single-agent search like A*, over two-player search (alpha-beta) to many-players, annealing or global search methods. Algorithms will be evaluated in terms of their algorithmic complexity, implementation considerations, utility, interaction with application-dependent knowledge.

Advance Neural Networks
This course will cover basic neural network architectures and learning algorithms, for applications in pattern recognition, image processing, computer vision, financial markets analysis. Three forms of learning will be introduced (i.e., supervised, unsupervised and reinforcement learning) and applications.

Intelligent Web Technologies
The objective of this course is to cater the recently growing information, culminating in the advent of big digital libraries. The course will discuss web intelligent techniques using AI, data visualization, statistics and other learning techniques.
PCS717  Parallel and Distributed Systems
This course will cover the current research topics in the design, implementation, and evaluation of parallel and distributed systems. Focus will be on the systems software and parallel programming systems, but some hardware issues will also be covered. Topics will include parallel algorithms, parallelization strategies, virtual machines, and operating system support.

PCS719  Formal Research Methods
This course cover the most often encountered research methodologies in Computing Science and the dissemination techniques that a computing scientist should master, ethical issues related to research and graduate school life will also be part of this course.

PCS723  Computer Vision and Robotics
Robotics and related technologies will be discussed with emphasis on vision. This course will cover treatment of geometry to reach and understand the modern Non-Euclidean (projective) formulation of camera imaging.

PCS725  Temporal and Spatial Database Management System
This course will introduce principles and foundations of temporal and spatial databases, including data models, query languages, algebras, and algorithms for selected operators.

PCS731  Advanced Digital Signal Processing
This course will cover the theory and algorithms for processing of deterministic and stochastic signals. Topics include discrete signals, systems, and transforms, linear filtering, fast Fourier transform, non-linear filtering, spectrum estimation, linear prediction, adaptive filtering, and array signal processing.

PCS733  Advance Decision Support System
This course will cover the process of decision-making and issues involved in the design, implementation and evaluation of DSS. Additional topics include data mining, user interfaces, knowledge-based DSS, and research directions in DSS.

PCS739  Advances in Simulation and Modeling
The course will cover Markov Models and Queuing Networks and simulation techniques such as, Monte Carlo Techniques and Event Driven Simulation, applied in performance modeling of communication systems and networks.

PCS743  Fuzzy Topologies with Human Centric Computing
Fuzzy set theory and analysis will be explored in the context of human centric computing and information processes. In addition applications in business, actuarial science and risk management will be discussed.

PCS745  Advanced Algorithm Analysis
The goal of this course is to develop the appropriate background, foundation and experience for advanced study in Computer Science, Develop mathematical skills for algorithm design, analysis, evaluation and computational cost; Develop the skills to design and implement efficient programming solutions to various problems; Develop data structure techniques for various aspects of programming.

PhD (Mathematics & Scientific Computing)

PMT701  Advanced Numerical Computing
Direct and Indirect methods for solving simultaneous linear equations and matrix inversion, conditioning and round-off errors, Eigenvalues, eigenvectors, numerical functional approximation. Numerical differentiation and integration,

PMT703  Linear Algebra and Lie Algebra

PMT705  Applied Matrix Theory
Canonical forms, functions of matrices, variational methods, perturbation theory, numerical methods, nonnegative matrices, applications to differential equations. EM factorization, and Markov chains.

PMT707  Numerical Methods for PDEs
Nonlinear discrete equations; Newton and monotone methods for nonlinear equations; computational algorithms and applications; finite difference method-convergence, stability and error estimates; multiplicity of solutions and bifurcation; asymptotic behavior of solutions; and coupled systems of equations.

PMT709  Topics in Inverse Problems
This course enables students know commonly used algorithms and techniques for analyzing and computing inverse problems, have seen and discussed examples of inverse problems in a variety of fields. Inverse problem resources and references will be discussed. Research based project is required.

PMT711  Topics in Numerical Differential Equations
This graduate-level course is an advanced introduction to applications and theory of numerical methods for solution of differential equations. In particular, the course focuses on physically-arising partial differential equations, with emphasis on the fundamental ideas underlying various methods.

PhD (Statistics & Scientific Computing)

PST701  Advanced Statistical Computing and Graphics
This course introduces students to a range of computational techniques including numerical linear algebra, numerical optimization, graphical techniques, numerical approximations,

PST703  Regression Modeling and Computing
The course emphasizes on the principles of statistical modeling through iterative processes, assessing the fit, and suggesting alternative models. Extensive use of R is part of the course.
PST705  Advanced Mathematical Statistics
This course covers the exposure to the topics of Random Vectors, Multivariate Distributions and Transformations, Conditioning, Transforms – Generating and Characteristic Functions, Order Statistics, the Multivariate Normal Distribution, Convergence and Large Sample Approximations.

PST707  Advanced Bayesian Inference & Stochastic Modeling
This course focuses on building graphical models and stochastic simulation methods for inference and prediction, Mixture models, networks, and other latent variable probability models, i.e. hidden Markov models, Monte Carlo methodology and related dynamical modeling theory.

PST713  Non-linear and Integer Programming
An advanced mathematical treatment of analytical and algorithmic aspects of finite dimensional nonlinear programming. General integer programming problems and methods of solving them. Special attention directed toward current research and recent developments in the field.

PST715  Advanced Design and Analysis of Experiments
This course focuses on the topics such as design fundamentals, factorial; nested factorial; incomplete block and fractional factorial designs. Response surface and mixture designs will be discussed. Split, Split-split and Optimum designs will be studied.

PST717  Advances in Time Series Analysis
Topics include univariate ARIMA modeling, forecasting, seasonality, model identification and diagnostics. Recent advancements in financial time series, unit root phenomenon, cointegration, GARCH and stochastic volatility modeling, trend break analysis and nonlinearity will be covered.

PST719  Advances in Bioinformatics & Biostatistics
The broad topics include model building, advanced analysis of categorical data, logistic regression analysis for binary outcome data, regression analysis for count data, analysis of life table, Kaplan-Meier survival plot, log rank test and Cox Proportional Hazards model.

PST721  Statistical Quality Control
It covers the techniques of modern Quality Control and Management. Topics include Statistical Process Control, Capability Studies, Continuous Improvement, ISO 9000 and other standards. Six Sigma, Design for Six Sigma and Lean Management tools. Taguchi methodology.

PST723  Stochastic Modeling

PhD in Economics

PDE701  Advanced Research Methodology
The importance of research, goals of research, topic selection, literature review, qualitative and quantitative studies, study design and sampling, sampling methods, data preparation and analysis, descriptive statistics, hypothesis testing, errors, correlation, inferential statistics, statistical significance.

PDE702  Advanced Applied Econometrics
Econometric methods for cross-section and panel data. Generalized method of moments, empirical likelihood, instrumental variables, bootstrapping, clustering, treatment effects, selection bias, difference-in-differences, qualitative choice, quartile regression, nonparametric methods, and semi parametric methods, recently developed econometric techniques, simulation techniques, estimation subject to inequality restrictions, semi parametric and nonparametric tools.

PDE703 / PEC711  Development Economics
The objective of the course is to familiarize the students with the theory and problems of development; Modernization Theory vs. Dependency Theory; imperialism; Structuralism vs neoliberalism; trade and development; structural adjustment policies; debt problems; development and democracy; conflict, growth and development; globalization and related issues.

PDE704  New Dimensions in Economic and Public Policies
Optimal design of tax and social insurance policies. Efficiency costs and incidence of taxation, income taxation, transfer and welfare programs, public goods and externalities, fiscal federalism and welfare analysis. Monetary policy and coordination, exchange rates, balance of payment analysis, international capital flows, debt crises, growth, and policy coordination. Structural and stabilization policies, growth, income distribution, poverty. Industrial policy to promote growth and industrialization, organizational structure, R&D, strategic objectives; competition and anti-trust policies.

PDE711/ PEC712 Industrial Economics in a Globalized World
Theory and current issues in industrial economics. Core industrial organization issues, industrial economic issues at the national level and policy related issues. Market structure and innovation, market structure and advertising, vertical integration and mergers, foreclosures, upstream competition, privatization and regulation, industrial policy, structural adjustment and stabilization policies, reforming State Owned Enterprises (SOEs) in China.

PDE712  Public Finance
Equity and market failure; the economics of taxation, direct and indirect taxation, taxation of income, wealth and consumption, tax incentives, tax compliance and enforcement, and tax reform, user charges and fees. Public expenditure policy, government social protection programs, balanced budgets, deficit financing, debt management, fiscal consolidation and fiscal sustainability. Fiscal stimulus vs. fiscal austerity, fiscal decentralization and intergovernmental fiscal relations.
PDE713  International Trade
Law of comparative advantage, gains from trade, Ricardian and the Heckscher-Ohlin models, alternative trade theories, tariff and non-tariff barriers (NTBs), customs unions, international factor movements, fixed and flexible exchange rates, the internationalization of financial markets, international capital mobility, International Financial Institutions (IFIs), balance of payments and adjustment policies, international macroeconomic policy.

PDE714  Selected Topics in Monetary Economics
Monetary policy under uncertainty, market based monetary policy, economic and monetary union, monitoring inflation, empirical models of exchange rate dynamics, financial globalization, rational expectations, exchange rates and monetary policy in the New Synthesis.

PDE715  Main Issues in Islamic Economics
Theological basis to the practical implications of economic philosophy of Islam; basic economic theory of Islam and economic rules and outlook of the individual, businesses and the state in the Islamic context discussed in contrast to conventional economic theories. Analysis of the economic and spiritual well being of individuals and states as proposed under the Islamic system based on equity and justice.

Psychology

PSY300  Introduction to Psychology
Its subject matter includes human development, memory cognition, perception and psychopathology. The course explores the field of psychology, teaches to learn about oneself, the mind and the science of psychology.

PSY301  History of Psychology
This course examines the history of psychology from the time of the early Greeks until the present. Starting from the evolution of psychology from speculations to science. It provides a comprehensive understanding of development of psychology as a science.

PSY302  Research Methods in Organizational Psychology
This course builds on the fundamentals of research design and knowledge of basic statistical techniques to provide a broad overview of the major research methods of applied psychological research. Students learn to frame inquiries and problems as research questions.

PSY303  Writing Business Psychology Research
This course will develop the crucial writing skills for the preparation of psychological research report. Participants will learn how to integrate scattered ideas and data and theories into a meaningful write up. They will learn about the world standards in writing and report layout.

PSY304  Statistics - I in Psychology
This course introduces the core concepts and philosophy of statistics. Participants will learn to understand what data is and how it carries meanings, what role statistics plays in developing meaningless numbers into powerful facts, how data is cleaned, coded, entered into computers, and analyzed and described through software.

PSY305  Statistics - II in Psychology
This course is the extension of Statistics-I. It discusses the relationships and differences and how these characteristics can be explored through inferential statistics using different sets of formulae and techniques. It requires extensive use of software in statistical analyses.

PSY306  Ethical Issues in Psychology
This course outlines the ethical and moral responsibilities when carrying out research. The main focus is to protect participants from any harm and also safe guard the reputation of psychology as a science.

PSY307  IT in Behavioral Sciences
Dissemination of information was never limited to any particular discipline. We have evolved new technologies and tools to disseminate information; and the modern tool is a computer. This course introduces the participant to different use of computers in psychological sciences whether it clinical, educational, or business. It will discuss about understanding phenomena through simulations and sharing information on global network.

PSY308  Introduction to Psychological Testing
This is an introductory course that presents the principles of testing, including requirements for validity, reliability, norm samples, and examples of psychological tests. Emphasis is placed on familiarizing the student with the basics of psychological testing and the major components of how to judge and understand a test.

PSY309  Experimental Psychology
This is an undergraduate psychology course intended to deliver knowledge about experimental research methods in psychology. Students will study the technicalities related to conducting an experiment – they will learn how to plan, conduct, and analyze experimental research, and how to communicate the results of research to others.

PSY310  Social Psychology
This course focuses on human behavior in its social context to reveal how one’s feelings and actions can be influenced by other people. The topics include processes of human interaction and the social influences of family, membership groups, and socioeconomic class on individuals and groups.

PSY311  Developmental Psychology
This course is a study of human growth and development. It describes the nature and context of development as well as the research methods used to study human development. Emphasis is on major theories and perspectives as they relate to the biological, cognitive, social, emotional, and moral aspects of development. The course examines fundamental theories, perspectives and critical thoughts about historical and current arguments in the field.
PSY 312 Individual Differences
The course studies the individual differences focuses on the extent and kind of variations or similarities among people on some of the important psychological aspects such as intelligence, personality, interest, and aptitude. Personal qualities, behaviors and abilities of individuals.

PSY 313 Positive Psychology
This course entails the scientific study of human flourishing, and an applied approach to optimal functioning. It has also been designed as the study of the strengths and virtues that enable individuals, communities and organizations to thrive.

PSY 314 Cross-Cultural Psychology
This course will explore how social and cultural forces shape human experiences. Cross-cultural psychology offers an opportunity to develop an appreciation of the interplay of individual, ethnic, and cultural contributions to personal and group growth and well-being and their role in psychotherapy and cross-cultural interactions. The course will explore topics such as differences in worldviews, communication, the acculturation process, stereotyping, prejudice discrimination, racism and the development of cultural identity. An important aspect of multicultural psychology is the impact of research; therefore it will explore research outcomes and methodologies as well.

PSY 317 Capstone Project
A Capstone Project course of 6 credit hours is a supervised research, which applies curricular concepts and skills to the problems in an organizational setting.

PSY 400 Introduction to Organizational Psychology
This course examines the psychological aspects of organizational behavior and individual psychological processes and behavior. The topics will include social norms, group and team processes, leadership and power, motivation, job attitudes and satisfaction and organizational change.

PSY 402 Counseling Psychology
This course focuses on the basic approaches, principles, and procedures of counseling. Students will be engaged in some directed role playing of counseling techniques as well as prepare a class demonstration based on their personal integration of readings and practice. Research related to counseling as well as issues regarding the nature of the counseling relationship will also be focused. Pre-requisite: PSY 400

PSY 405 Group Dynamics
This course presents theories of group dynamics and illustrative application to understand personal, marital, political, industrial and professional life. Personal participation by the student in a group interactive process will be emphasized. The course is designed especially to help group leaders understand the complex underlying dynamic forces that influence our behavior in groups.

PSY 406 Research Methods in Organizational Psychology
This course builds on the fundamentals of research design and knowledge of basic statistical techniques to provide a broad overview of the major research methods of applied psychological research. Students learn to frame inquiries and problems as research questions.

PSY 407 Personnel Psychology
This course focuses on psychological methods and knowledge applied to the personnel functions of industry. It provides an analysis and discussion of theories and research studies on the following topics: organizational management and development; manpower planning, selection, placement, training, and other important personnel problems.

PSY 408 Consumer Psychology
This course focuses on the type and behavior of consumer, effects of psycho - social factors in decision making, satisfaction, loyalty, attitude, and changing attitude of consumer, ethics and principles of psychology in advertising, media selection, and methods in developing a research study in the area of consumer and advertising psychology.

PSY 430 Psychological Testing I
This course is designed to provide an introduction to concepts, theories, and methods regarding psychological testing and measurement. It will focus on areas such as psychometric principles (e.g., validity and reliability), test and item analysis, test construction, and applications of psychological testing in industry. Pre-requisite: PSY 400

PSY 431 Psychological Testing II
This course focuses on psychological testing and measurement in industry and organizations. Various tests such as aptitude test, vocational interest test, personality test, attitude test and predictors used in industry and organization will be demonstrated. Practice using, modifying, making psychological tests, including analyzing and reporting results of the psychological tests will also be discussed.

PSY 432 Behavior Modification in Industry
The overall objective of this course is to discuss reinforcement theory and how those techniques can be applied to positively or negatively affect human behavior. Students learn about methods, terminology and procedures used, as well as the development and history of behavior modification.

PSY 433 Leadership and Strategic Change
This course is designed to enhance skills for facilitating/consulting with organizational leadership in organizational change. Theories and techniques for understanding and facilitating change processes within diverse organizational cultures are discussed and applied.

PSY 434 Personality Psychology
‘Personality’ is a broad term applied to the wide traits of people who are employed and managed across the economy. Organizations of any size require additional staff to provide psychological assessment and management of their human resources.
PSY435  Research Project/Practicum
The practicum prepares students to practice industrial/organizational psychology with the understanding of organizational cultures critical to effective professional practice in the workplace. Students refine skills in identifying and solving human-resource problems in work settings.

PSY436  Seminar in Organizational Psychology
This course covers the most recent advances, issues and problems in industrial and organizational psychology through relevant professional journals, in order to prepare students for continued education or applied practice of their field. Students will critique professional journals and review the development of topics in their field.

PSY501  Work Motivation and Attitude
The course covers concepts in various theories of motivation, content and process theories, job satisfaction and its relationship with motives and performance efficiency; applications of theories of motivation to increase performance; problems and solutions of motivation in Pakistani society; research and development of motivational techniques to increase performance efficiency.

PSY506  Quality of Work Life
This course focuses on theories and research relating to quality of life at work, application of knowledge in health; safety at work, environment and working motivation; educating managers and employees to enable them to deal with sickness and problems caused by working, and concentrate on their physical and mental health.

PSY515  Projective Methods
This course presents the history and use of projective assessment devices such as the Thematic Apperception Test, Rorschach Ink blot Test, and Draw-A-Person test. The emphasis is upon administration and interpretation of these specific projective techniques.

Supply Chain and Logistics Management

SCM301  Introduction to ERP Systems
This is a hands-on intensive implementation course exploring latest trends in off-the-shelf ERP packages like Oracle Applications or SAP. Overview of the reach of the ERP modules such as ordering and sales, inventory and material management, procurement, project management, manufacturing planning and control, finance, costing, business intelligence, maintenance, HR, etc.

SCM501/605  Supply Chain Management
This course covers essentials of Supply Chain Management and is divided into foundations of SCM, enabling concepts, the requirement process, strategic sourcing, strategic cost management relationship management and world class supply chain management.
Pre-requisite: MAN 101/401

SCM306/603  IT Applications in Logistics & SCM
Covers the topics: identification techniques for data collection, data transmission, data processing, and data warehousing in logistics; standardization in logistical data management; the importance of a real-time data flow and significant analytics.

SCM309/604  Packaging Design - Environmental Aspects
Packaging aspects are discussed in view of the different logistical, marketing, environmental, and legal requirements. Important factor is the standardization of packages for cost saving and damage free handling and transportation. Packages are carrying different kind of information, For logistical purposes the international standards for product identification, location numbering etc. are important.

SCM502/606  ERP Systems Design and Implementation
This course provides a technical overview of enterprise planning systems and their impact on organizations. Selected software solutions are introduced to illustrate the concepts, fundamentals, general information technology context and integration of business enterprise applications. Case studies will be used to discuss various stages of implementing ERP solutions.

REL101  Islamic Studies
This course focuses on the meaning, significance and practicality of Islam as a universal religion. It acquaints students with the fundamental concepts, values and practice of Islam. It also reveals the relevance of Islam to all walks of life. The aim of this course is to enable the students to discover and study the spirit of the religion of Islam.

SCM503/607  Strategic Supply Chain Management
This course covers a wide range of Supply Chain Management activities including formation and management of strategic alliances, buyer selections and management, negotiations, global sourcing, ethics in contracting situations and applications of information technology in SCM.
Pre-requisite: MAN 101/401

SCM504/608  Procurement and Inventory Management
The synchronization of supply with demand in order to provide customer value has to be designed, controlled and improved. In supply chain management these activities have to be coordinated along different stages in different enterprises. This course deals with understanding and overcoming the problems arising in those multistage inventory systems using case studies.
SCM505/609 Storage and Warehouse Techniques
In order to operate, optimize or understand warehouse systems, a sound knowledge about the various technical realizations of warehouse functions is essential. This course provides an overview of various in-house transporting and storage systems and indicates the preferred areas of usage. Case studies will be used as modus operandi in the course.

SCM506/610 Transportation Techniques and Management
The course aims to give an understanding of the basic techniques used in transportation. All major techniques in the fields of road-traffic, air traffic, railroad and navy are discussed. Transport chains using freight-villages, intermodal transports, combined transport-chains as location planning, design and organization of dispatch departments, supply-chain-management tracking- and- tracing are investigated using the case study approach.

SCM507/601 Quantitative Methods in Production and Logistics
Students get knowledge and skills required to manage complex systems of production, distribution and freight transport in global supply chains. It also prepares students for careers in industrial companies and service organizations which have to deal with complex logistical and production processes. Operations Research & Quantitative Logistics focuses on those areas in the transport and logistics sector that require strong quantitative skills, where practitioners apply academically developed theories. This includes Quantitative trend analyses techniques. Production planning process (optimizing capacities and lot sizes). Transportation Planning Facility, site layout, and location planning etc. The use of the planning tools provided by Microsoft Excel Solver Data Analytics, Data warehousing, Business intelligence.

SCM508/615 Design of Business Processes - Workflow Management
Understanding of Value Adding business processes, internal and cross-company supply chain Knowledge of the design and optimization tools. Definition of internal and external enterprise process chains. Design and optimization process chains using Microsoft Office SharePoint Designer/Server 2007 or ARIS-Toolset. Visualization of internal or cross-company processes by using flowchart modeling style of MS Visio 2010. Automation of ERP processes by implementation workflow management systems in ERP systems (SAP workflow management).

SCM510/616 Logistical Projects in ERP - Case Study Development
Good understanding of business processes such as order fulfillment, material and capacity resource planning, financial and accounting processes. Operating the ERP application system with SAP or Oracle. Understanding of business analytics resulting out of the business processes. Introduction into ERP systems, Basic technology of the SAP ERP system Design of business cases like quality management, quality auditing or business information systems, Customizing requirements and realization. Future ERP systems – requirements and realization with advanced computing technics s.a. in-memory-computing with HANA, Cloud Computing.

SCM511/612 Risk Management in Supply Networks
This course provides a holistic view on the total value adding process regarding risk portfolios. Using the FMEA method for analyzing risk potentials and learning how to develop resistant / robust supply chain strategies (TSCRM). Introduction to the principles of risk management of business and engineering processes. Sources of risk – early warning signals, Trends effecting the Supply Chain risk potential, Total Supply Chain Risk Management TSCRM – holistic approach, Business continuity management.

SCM512/613 Innovation Management in Supply Chain and Logistics
This course provides future trends in global supply networks in technology of material and information flow, new partnership and collaboration principles following the Toyota Supply Chain Management, Impact of new technologies in communication (RFID, GBI, WLAN, Web-based applications etc, Demand driven supply chains, Impact analysis of innovation to social, environmental and financial results. Development of a innovative and sustainable supply chain strategy.

SCM513/614 Corporate Consultancy Projects in Logistics
This course provides introduction into the project management and consultancy process. Kick-off Meeting between the customer (industrial or logistics service enterprise) and the consultancy team (4 to 5 students and the lecturer). Problem definition (diagnosis) workshop of the consultancy team moderated by the lecturer. Information gathering at customer’s site Creative problem solving workshop of the consultancy team Information consolidation and evaluation.

Social Sciences

SSC101/402 Introduction to Psychology
Its subject matter includes human development, memory cognition, perception and psychopathology. The course explores the field of psychology, teaches to learn about oneself, the mind and the science of psychology.

SSC103 Behavioral Studies
This course is designed to provide students with the knowledge and significance of human behavior at work place. The course will offer an understanding of human behavior along with organizational design & culture, structure, leadership, motivation and other management concepts.

SSC104 Principles of Sociology
The course seeks to teach the basics of Sociology including social action and interaction, social groups, social institutions, culture, prejudice and stereotypes, and social change.

SSC201 Policy Studies
The Liberal, Marxist and Weberian approaches to policy making. The market and the state, bureaucracy and administration regulatory systems. Non-state sources of policy conception and implementation corporations, association, NGOs policy making and implementation processes in Pakistan in fiscal, monetary, labor, energy, health and education areas.
SSC202Environmental Studies
The course covers basic concepts of Environmental Science and current environmental issues. Major components of environment and ecosystems. Basic understanding in the areas of industrial, coastal and marine environment, deforestation, greenhouse effects, ozone depletion, impacts on human health and climatic change. Environmental challenges for sustainable development, current and future trends in population growth, environmental pollution, development in industry and agriculture.

SSC301History of Ideas
This course offers insights into the archetypes of knowledge and introduces students with nature of diverse ideas and the way socio-politico-economic conditions are related to ideas. This course studies metaphysics, epistemology, political theory, and ethics etc. It develops students’ critical thinking and analytical skills and enables them to appreciate the role of ideas in shaping past, structuring present and influencing future.

SSC302Important Concepts in Philosophy
This course will seek to discuss the history of ideas, from the ancient Greeks to the present, and the contribution of important philosophers.

SSC401Business Ethics
This course offers an in-depth analytical and critical study of ethical theory and its application to business practice. It encompasses ethical theories from Aristotle to modern and postmodern ethics and applies them to various areas of business practice such as marketing, management, finance, technology, organization, globalization etc. This course is designed to enable students to foresee, identify and resolve ethical issues and problems in business.

SSC403Social Psychology
This course focuses on human behavior in its social context to reveal how one’s feelings and actions can be influenced by other people. The topics include processes of human interaction and the social influences of family, membership groups, and socioeconomic class on individuals and groups.

SSC405Business Ethics and Financial Responsibility
The course examines ethical issues in the context of business theory and practice. In the process of exploring these issues and raising questions, students draw on a wide body of literature including the humanities, management theory, and the social sciences.

SSC406Psychology and Learning
The course examines major theories of learning with relevance to instrumental and classical conditioning, cognitive learning processes, motivation, affect, and memory. The students will explore relevant research on traditional and contemporary issues in learning, with an emphasis on human learning from both behavioral and cognitive perspectives.

SSC408Political Sociology
This course focuses on the relationship between power, civil society and the state. It addresses the modern and postmodern socio-political approaches to power and society at both national and global levels. It also explores political culture between place and space, the power of networks as well as the complexity theory. It is also concerned with the role of media, democracy, capitalism, and the power of identity. It investigates governance with and without states and explores the prospects both of global civil society and cosmocracy.

SSC501Epistemology and Moral Philosophy
This course will examine the basic questions and principles of moral reasoning. Among the issues to be considered: What makes an action moral? Does might make right? Do moral judgments admit of exceptions? Is pleasure a relevant factor in deciding what to do? Does moral reasoning rest on a grand mistake?

Statistics

STA100Basic Statistical Methods
This course provides concepts of statistical tools used for computation of quantities required for business analysis. The emphasis is on quantitative techniques and its application to economics, business and media studies.

STA101/102Quantitative Methods I & II
The objective of the course is to train students in the use of quantitative techniques in business and finance. The students are required to gain thorough theoretical knowledge of the subject and understanding of the application of such knowledge.

STA103Sampling and Probability Theory
The course highlights the basic concepts of statistics, sample space, events, classical and axiomatic definition of probability, conditional probability and Bayes’ theorem, binomial, Poisson, normal distribution and moment generating functions.

STA201Quantitative Business Analysis
This course will provide an in-depth study of the concepts of statistics and quantitative business tools. The emphasis will mainly be on learning quantitative techniques along with their applications to economics and business.
Pre-requisite: MTH 103

STA202Quantitative Skills and Managerial Statistics
The course introduces the use of statistical method to proceed beyond the collected data into the area of decision making through statistical analysis. It provides an in-depth introduction to probability, sampling theory and sampling distribution, estimation of parameters, hypothesis testing, analysis of variance, decision theory and quality control charts.
Pre-requisite: STA 201
STA203  Probability Theory and Statistics
The course includes the basic concepts of statistics, sample space, events, classical and axiomatic definition of probability, conditional probability and Bayes’ theorem, binomial, Poisson and normal distribution, moment generating functions, etc.
Pre-requisite: MTH104, MTH103

STA204  Industrial Applications of Statistics
The course teaches an applied approach to statistical quality control utilizing theoretical tools acquired in other mathematics-statistics courses. It emphasizes on understanding and applying statistical analysis methods in real-world situations in engineering.

STA205  Probability Theory & Statistics II
Probability Theory, a rigorous treatment of probability and Statistical Theory, a treatment of Distribution Theory and Inference will develop your knowledge of probability and statistics beyond the first year course. It will also provide the probability and statistics basis for all advanced courses. Further Mathematical Methods covers the mathematics needed for statistics and actuarial courses.
Pre-requisite: STA203

STA206  Probability & Statistics
The course includes concepts of statistics, sample space, events, probability, conditional probability and Bayes’ theorem, Discrete and continuous random variables and discrete probability distributions. Mathematical expectations and moment generating function.

STA210  Sampling Theory
The purpose of this course is to provide students with theoretical background in survey sampling. The course will expose students to a wide range of sample designs and estimation techniques used in practice, including different sampling techniques.
Pre-requisite: MTH201, STA203, STA301, STA302

STA301  Model and Inferences
Statistical models and random samples, informal methods of checking models, estimation and prediction, methods of maximum likelihood and least squares and their applications within the frame-work of programming are taught in this course.
Pre-requisite: MTH201, STA203, STA205

STA302  Methods of Data Analysis
The course is an introduction to the use of computers as a powerful tool in data analysis. Topics will include statistical graphics, advanced regression techniques, curve fitting and smoothing, generalized additive models, CART, multivariate techniques, cross-validation and the bootstrap. Additional topics may include survival analysis, simulation methods and neural networks.
Pre-requisite: STA203, STA301

STA303  Time Series Analysis and Forecasting
The course covers introduction of statistical methods for analyzing and forecasting time series data. The topics include; spectral analysis, smoothing autoregressive moving average models, regression with auto correlated errors, linear filters and bivariate spectral analysis.
Pre-requisite: ARM601, STA305

STA305  Applied Regression Analysis
Linear regression and correlation; maximum likelihood and least square estimators and their properties. nonlinear regression models; generalized linear regression models; introduction to time series; time series model building and forecasting with focus on data of interest to actuaries are features of this course.
Pre-requisite: MTH204, STA302

STA307  Decision Theory
Sampling models in business and economic problems, Bayesian inferences, auto-regressive series models and their applications, Bayesian estimation of parameters, adaptive forecasting, control theory, dynamics, models for inventory control are features of this course.
Pre-requisite: STA205

STA309  Loss Models I
Models for loss severity: parametric models, effect of policy modifications; tail behavior. Models for loss frequency: (a,b,0), (a,b,1), mixed Poisson models; compound Poisson models. Aggregate claim models: moment and moment generating function: recursion. Classical ruin theory.
Pre-requisite: FRM202

STA310  Loss Models II
Credibility Theory: Limited fluctuation; Bayesian; Buhlmann; Buhlmann-Straub; Empirical Bayes parameter estimation statistical inference for loss models; maximum likelihood estimation; effect of policy modifications; model selection.
Pre-requisite: STA309

STA403  Statistics and Mathematics
A systematic exposure to the statistical and mathematical analysis of business situations. This course introduces statistical & mathematical methods in the area of decision-making. The course includes measures of dispersion, different mathematical functions, optimization methodology.

STA404  Statistical Inference
The course concentrates on the application of statistical techniques to the analysis of data and estimation procedures. The topics include counting techniques, probability & its distributions, sampling, estimation of parameters, testing of hypothesis & analysis of variances, regression & correlation.
Pre-requisite: STA 403
STA405 Simulation and Modeling
The course includes types of models, properties of linear models, model building techniques, the black box approach, random number generation and testing. Transformation; test of randomness, parameter estimation, least mean square, bootstrap, jackknifing, re-sampling procedures, query models and applications.
Pre-requisite: STA 203 CSC 306 / CSC 409

STA406 Statistical Methods in Social Sciences
This course includes an overview of quantitative methods, basic concepts in descriptive and inferential statistics. It emphasizes on the development of critical thinking skills and the methodological tools necessary for functioning as an Industrial Organizational Psychologist in applied settings. The focus is on non-parametric and parametric statistical procedures including when and how to use each quantitative method including choice of the most appropriate research method and strategies to address common problems encountered and using computer programs for data analysis.

STA407 Design of Experiments
This course explains design of experiment and its importance. Different experimental designs such as Complete Randomized (CRBD), Latin Square Design, two-level factorial, fractional factorial, and Taguchi’s orthogonal designs will be discussed.
Pre-requisite: STA404

STA411 Quantitative Analysis for Decision Making
The course is designed to make students integrate the theoretical knowledge of statistics and its application with the help of data analysis with the help of a software SPSS. The main focus of the course is on valid interpretations and conclusions drawn as a result of data analysis.

Telecommunication Engineering

TCE201 Communication System
This course introduces the fundamentals of electronic communication systems. Topics include the frequency spectrum, electrical noise, and modulation techniques, characteristics of transmitters and receivers, and digital communications. Upon completion, students should be able to interpret analog and digital communication circuit diagrams, analyze transmitter and receiver circuits, and use appropriate communication test equipment.
Pre-requisite: TCE204, TCE205

TCE204 Electromagnetic Field Theory
Introduces the concepts and mathematical methods to understand and analyze electromagnetic fields and waves.
Pre-requisite: GSC103, MTH204

TCE205 Signals and Systems
To provide understanding of signals, systems and transforms. Linear system theory, signals, types of signals, transformations of independent variable, signal properties, exponential signals, impulse and step functions, systems, input-output models of system, properties of system, linear time-invariant system, time domain analysis of linear systems, properties of LTI system, LTI analysis of linear differential equations, complex exponential inputs to LTI system, stability analysis are taught in the course.
Pre-requisite: MTH216

TCE207 Wave Propagation & Antenna
To make students understand different aspects of electromagnetic wave propagation and the role of antenna as transducer. Different characteristics of antennas are also explained.
Pre-requisite: TCE201

TCE208 Communication Networks
Introduction to telecommunication networks, PSTN, PLMN, and PABX, exchange hierarchies, digital exchanges, routers, bridges, switches, hubs, gateways and signaling systems are taught in the course.
Pre-requisite: TCE205

TCE209 Modern Communication Systems
Pre-requisite: TCE201

TCE415 Transmission & Switching Systems
Transmission systems including PDH and SDH, synchronization, routing techniques, line encoding techniques. Telecommunication networks, PSTN, PLMN, and PABX, exchange hierarchies, digital exchanges, routers, routers, bridges, switches, hubs, gateways and signaling systems are taught in the course.
Pre-requisite: TCE205

TCE416 Digital Communication
Introduction to principles of analysis and designing of modern digital communication systems.
Pre-requisite: TCE201

TCE420 Information Theory and Coding
Information, Entropy, Relative & mutual Entropy, Chain rules for entropy and mutual information, Source coding, Data compression, Examples of compression codes, Huffman codes, Lempel-ziv codes, Types of channels: discrete memory-less, Binary Symmetric, Binary Erasure, Gaussian channel capacity, Shannon’s Theorem, Prefix and Block codes(fixed and variable length).
Pre-requisite: TCE201
TCE422 Communication System
This course is structured as a senior-level design course emphasizing the different communication systems and their applications such as broadband, satellite communication, TV broadcasting and navigation etc.
Pre-requisite: TCE204/205

TCE423 RF and Microwave Engineering
Radio communication systems, Modulation and Demodulation, Radio wave propagation techniques, Antennas and Aerials, Antenna Arrays, Antenna Distribution systems, Radio receiver properties, Types of receivers.
Pre-requisite: TCE321

TCE424 Radar Systems
To teach the principle of operation of radar; commonly used devices in radar; statistical nature of the received signal and signal processing; different types of radar and their applications.
Pre-requisite: TCE201

TCE425 Telecom Management
The course will give the concepts of Network Management in TCP/IP Environments, Networks Management Station (NMS), Network Management Requirements, and Performance & Security Management.
Pre-requisite: ENG203

TCE426 Electromagnetic Compatibility
The primary purpose of the course is to develop the fundamental concepts of EMI and EMC. The course is devised to acquaint the students with the knowledge of sources and types of interference, EMI effects, Coupling, Grounding, Shielding, filtering and military EMI/EMC standards.
Pre-requisite: TCE204

TCE427 Antenna Theory and Design
Design and use of antennas of varying types, including wire, broadband, horn, and reflector antennas in transmitting and receiving applications. The application and design of antenna arrays, and an introduction to diffraction theory.
Pre-requisite: TCE321

TCE428 Mobile and Pervasive Computing
This course will cover the topics such as introduction to wireless communication systems, evolution of mobile radio communications, infra-red systems, paging systems, cordless telephone systems, cellular telephone systems and wireless LANs.
Pre-requisite: TCE461

TCE429 Tele-Traffic Engineering
This course focuses on the application of traffic engineering theory to telecommunication.
Pre-requisite: TCE321

TCE471 Optical Communication
The aim of this course is to understand the optical fiber communication technology and networks & their applications in telecommunication industry.
Pre-requisite: TCE416

TCE450 Project
To give students a chance for enhancing their Technical capabilities by implementing their theoretical & practical knowledge in the field of Research & Development. (For Semester VII & VIII).

TCE430 Satellite Communication
To acquaint the students with the principle of operation of satellite communication, its benefits and the technology involved.
Pre-requisite: TCE201

TCE431 Digital Filter Design
The objective of this course is to introduce the basic concepts in designing digital filters, for example IIR filter or FIR filters.
Pre-requisite: TCE404

TCE461 Wireless and Mobile Communications
The aim of this module is to understand the fundamentals of wireless and mobile communications & the use of wireless technology in the telecom industry.
Pre-requisite: TCE416

Telecommunication Management

TCM401 Introduction to Technology Management
Surveys the history and recent developments of technology management in the corporate and government environments. Major aspects of domestic and international technology management are discussed. Information technology management is the focus of this course. Other topics include project and system management, computer information systems, telecommunications management, distribution, marketing, logistics, manufacturing and aspects of international technology management.

TCM402 Introduction to Teletraffic Engineering
Review of Probability distributions, PDF and CDF development and applications for Telecommunication systems. Traffic characterization, Loss and delay traffic scenarios. Traffic tables and Traffic provisioning and planning case studies for both private and Public based Telecommunication Networks.

TCM403 Global Communications: Industry and Policy
Focuses on understanding how the changing structures of telecommunications in North America, South America, Europe, Asia/Pacific and Japan, and how global decisions affect local actions. The course explores current and merging issues in global telecommunications including deregulation, transition to new business models and affordable access to technology. The students will learn how some of the most powerful global regulatory bodies create and establish legal and regulatory policy, and how their actions affect business and consumers.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCM404</td>
<td>Management of Telecommunications</td>
<td>To study principle of telecom planning and management, Telecom strategic planning, system planning process, Business planning process, the Business planning and revision, feasibility analysis, financial evaluation techniques.</td>
</tr>
<tr>
<td>TCM405</td>
<td>Optical Communication Network</td>
<td>Introduces basic fiber optical technologies. The major components of a fiber communications link, including splices, connectors, optical sources, detectors, optical amplifiers, splitters and modulators are covered. Optical switching systems and technologies will be studied in detail as well as some fiber based standards and networks such as FDDI, SONET.</td>
</tr>
<tr>
<td>TCM406</td>
<td>Network Design</td>
<td>To impart knowledge to students, about designing of Telecommunications Networks. This course provides basic concepts of telecommunication networks and how it is designed and what factors play prime role in designing of any telecommunication network. This course also compares various networks such as Satellite, Optical fiber and Microwave/DRS. This comparison provides advantages and disadvantageous of different networks in different scenarios and how and why a particular one is selected.</td>
</tr>
<tr>
<td>TCM407</td>
<td>Broadband Communications</td>
<td>Review of basic digital hardware and the structure of digital computer and the digital switching networks. Topics include voice digitization, line coding, time division multiplexing, basic digital modulation formats, network control and synchronization, digital technologies and switching systems for high-speed data and voice networks in examples of T1/T3, ATM, SONET/SDH, B-ISDN, PBX, ACD and LANs. Different types of media such as fiber optics, cable and wire, cellular as well as local and long distance switching systems are also covered.</td>
</tr>
<tr>
<td>TCM408</td>
<td>Advanced Mobile and Wireless Communications</td>
<td>Focuses on key technologies used in mobile and wireless communications, including cellular NGSM, TDMA, CDMA paging, PCS and infrared. It emphasizes on key service providers, design of wireless data and voice communications systems, security, and advances in mobile and wireless technology; addresses growth of PDAs and other mobile devices, and their impact on enterprise networks and features a case study approach on the application of these technologies.</td>
</tr>
<tr>
<td>TCM409</td>
<td>Customer Service and Call Center Technologies</td>
<td>Focuses on customer service and call centers as the contact point between a customer and a company’s products and services; Emphasizes on critical call center technologies, including Computer Telephony Integration (CTI), workflow software, ACD and PBX systems, messaging systems (voice and email) and knowledge management systems. Students will learn how to implement customer service applications, such as help desk, customer support and field service.</td>
</tr>
<tr>
<td>TCM410</td>
<td>Management of Network Security</td>
<td>Defines network security in the context of networks, information and computer systems. This course identifies threats and vulnerabilities; major aspects of encryption, digital signatures and other authentication procedures are covered. LAN, Wireless and other aspects of network security are reviewed with discussions focusing on firewalls, VPN, and ISO17700 compliance.</td>
</tr>
<tr>
<td>TCM411</td>
<td>Telecommunication Marketing</td>
<td>Topics in this course include the nature of the telecommunication market, analysis of customer procurement strategy, product policy, pricing, distribution strategy, sales force management and key account selling strategies.</td>
</tr>
<tr>
<td>TCM450</td>
<td>Project</td>
<td>This course gives students a chance to enhance their technical capabilities by implementing their theoretical and practical knowledge in the field of Research and Development.</td>
</tr>
<tr>
<td>TCM501</td>
<td>Management of Telecommunication Regulatory System</td>
<td>Introduction to graduate level study of telecommunications law and policy and its intersection with economics and technology. Fundamental principles and theories of telecommunications law, policy and policy-making, and methodological approaches are covered.</td>
</tr>
<tr>
<td>TCM502</td>
<td>The Future of Emerging Technologies</td>
<td>Focuses on emerging technologies and the use of scenario planning as a comprehensive tool to explore the trends and factors impacting technical decisions for business, industry and other organizations. It explores emerging technologies, e.g., biotech, Micromechanical Electrical Systems (MEMS), nanotechnologies, etc. and their potential effect on established systems and technologies.</td>
</tr>
<tr>
<td>TCM503</td>
<td>Electronic Business, System and Technologies</td>
<td>Provides a high-level overview of the e-business industry with a focus on both business-to-business and business-to-consumer electronic commerce. Discussion of e-government issues will also be covered. Topics include framing the electronic commerce market opportunity, the evolution from simple e-commerce to comprehensive e-business, exploring various business models, identifying key elements of branding and the customer interface, implementation, analytics and industry trends. It examines the fine balance between creating a personalized user experience and maintaining a customer’s privacy.</td>
</tr>
<tr>
<td>TCM504</td>
<td>Management of Physical Security Technology and Systems</td>
<td>Emphasizes the securing and protection of physical assets with concentration on communications and computing facilities, including computers, servers, etc. Consideration will also be placed on securing key personnel when they are off site. Focus is also placed on processes and procedures that minimize business disruption while insuring site(s) and asset protection.</td>
</tr>
</tbody>
</table>
**TCM505  Telecommunication Business Continuity Process and Crisis Management**
Emphasizes the development of protocols and procedures designed to minimize business and enterprise risks associated with disasters and other major disruptions to ensure the rapid recovery of critical business functions. Focus is placed on planning and plan maintenance; business impact analysis identifying critical business processes and systems; and development of alternative operating or recovery procedures. Additionally, considerations for virtual continuity and collaboration with intercom any business-continuity planning teams will be covered.

**TCM506  Telecommunication Business Process**
Focuses on the dramatic transformation of business and organizational models realized through the convergence of communications and computers via the Internet and web, and other networks. Emphasis is placed on the global considerations an enterprise an organization must hold as policies, systems and technologies evaluated for the enterprise or organization. This core MSEBST program course will discuss and analyze relevant case studies.

**TCM507  Optimization of Telecommunication Systems**
Application of economic principles to policy and strategy issues in the print, online, broadcasting, multi-channel, home video, and motion picture industries, the production, distribution, and pricing of information products and services; intellectual property and new technologies; information networks and compatibility, policy and strategy applications are covered in this course.

**TCM508  Managing Telecommunication in Media Application**
Examines the information processing of mediated messages and theories underlying memory, attention, and cognition. Advanced analysis of cognitive psychology and emotion theory as they apply to the study of media, case studies in marketing and competitive strategies of media and telecommunications firms. Effects of technological change on industry structure and strategy are covered in this course.

**TCM509  Internet Telephony**
Focuses on different media and technologies used to deliver integrated data/voice communications, including integrated data/voice switching, voice-over IP and IP Telephony. It discusses current and emerging standards in the industry. Emphasises on the selection, design and implementation of integrated data/voice applications throughout the enterprise is a feature of this course.

**TCM510  Managing the Creative Process**
Examination of the business side of video production with emphasis on the role of the producer and/or production manager, including production team organization, schedules, budgets, contracts, markets and intellectual property are the courses features.

**TCM511  IP Multimedia Technologies**
The objective of course is to impart knowledge about Next Generation Converged Networks and Services based on IP Core Network, i.e. IP Telephony, IPTV, Multimedia and Interactive Games, Internet Radio, and Media Streaming. The students will learn technological as well as managerial aspects of multimedia networks and applications.

**TCM515  Multimedia Communication**
This course introduces technologies for multimedia communications. It will address how to efficiently represent multimedia data, including video, image, and audio, and how to deliver them over a variety of networks. In the coding aspect, state-of-the-art compression technologies will be presented. Emphasis will be given to a number of standards, including H.26x, MPEG, and JPEG. In the networking aspect, special considerations for sending multimedia over ATM, wireless, and IP networks, such as error resilience and quality of service, will be discussed.

**TCM516  Error Control coding**
Channel coding, cyclic codes, encoding by polynomial, multiple error correction, finite field arithmetic, BCH codes, Reed Solomon codes, performance calculation of block codes, multistage coding, iterative decoding, the soft-output Viterbi Algorithm are taught in the course.

**TCM517  Multimedia Systems**
Multimedia data has become an indispensable part of our daily life and modern research projects. In this course, students will be introduced to principles and current technologies of multimedia systems, multimedia standards, and gain hands-on experience in this area. Issues in effectively representing, processing, and retrieving multimedia data such as sound and music, graphics, image and video will be addressed.

**TCM518  Video and Channel Coding**
The course contains video basics, what is video? recording and playback and history of video. analog video, the video image, formats and standards, composite and component video. digital video, comparing digital and analog video, compression, formats and standards, encoding and streaming, video codecs, MPEG, streaming video. Video products, cameras and recorders, video networks and cisco video products.

**TCM519  Speech Coding**
This course will throw light upon the topics such as models for speech production: the human vocal tract, linear prediction used for vocal tract parameter estimation, parameters for the male/female, and child voice, models for speech perception: the human ear, frequency analysis and pitch perception, intensity discrimination, time/frequency masking, sound localization and auditory perception, the interaction between visual and auditory information, speech coding and recognition, etc., are features of this course.

**TCM520  Network Security and Cryptography**
This course focuses on algorithms and protocols for secure network communication. Topics include cryptographic algorithms (DES, Diffie-Hellman, RSA), authentication, key management, secure networking, certification, trust management, and secure electronic.

**TCM521  Voice Over Internet protocol**
The objective of this course is to provide a technical and practical overview of Voice over IP (VoIP). The course identifies the main elements of the technology and presents them in an accessible format. At the end of the course students will be conversant with VoIP technology and understand the role of VoIP in their customer’s company and marketplace.
TCM522 Information Theory and Coding
The topics covered include basic concepts of information theory—entropy, mutual information, channel capacity, information rate, Shannon’s noiseless coding theorem and Shannon’s fundamental coding theorem; modeling of information sources—zero-memory and Markov models; modeling of information channels—BSC and BEC channels, additively of information and cascaded channels; construction of compact source codes—Kraft inequality, compact codes, Huffman and LZW compression codes; and analysis and design of error-control channel codes—Hamming distance, binary linear codes and the parity-check matrix, Hamming codes, checksum codes, cyclic codes and the generator polynomial and CRC codes.

TCM523 Wireless Adhoc Networks
Introduction, foundations of wireless communication, wireless channels, modulations, WPANs, WLANs, and MAC Layers, wireless protocols, mobile IP, wireless routing, wireless TCP, source coding, QoS, introduction to wireless sensors networks, data dissemination and network security are covered in this course.

TCM524 Broadband Communication
This course covers various systems that transmit data including, multimedia data at high speed networks and networks, ATM, T1/E1 circuits, multiplexing of T1/E1 standards, optical channels, cable systems, satellite transmission and broadband issues, ISDN, and its variants. High speed multimedia communications systems.

TCM525 Mobile and Pervasive Computing
This course will cover the topics such as introduction to wireless communication systems, evolution of mobile radio communications, infra-red systems, paging systems, cordless telephone systems, cellular telephone systems and wireless LANs. In addition it includes, analog and digital transmission, channel capacity, transmission and multiplexing, communication networks, antenna and wave propagation, spread spectrum, satellite communication, cellular wireless networks and mobile radio propagation model.

TCM526 Next Generation Networks
This course provides students to get the opportunity to research and report on near term “Next Generation Networks”. The course consists of discussions on one type of Next Generation Network followed by each student researching two additional Next Generation Network types. A case study approach will be utilized.

TCM527 Satellite Communication
Students will be exposed to historical background of satellite communication, uplink and downlink frequencies, synchronous satellite, international regulations and frequency coordination, frequency allocation and band spectrum, general and technical characteristics of satellite communication signals, advantage and disadvantages of satellite communication, active and passive satellites. In addition to this, the course covers orbits and launching methods, radio wave propagation, atmospheric losses, rain attenuation, the space segment, altitude control, station keeping, thermal control, transponders and antenna, earth segments and the space link, inter connect and technical regulation and compliance approval of CPE and convergence are also features of the course.
External students are allowed to register for 15-week Certificate Courses of their areas of interest. The following are some of the Certificate Courses being offered during 2016-2017:

**Accounting**
- Accounting Information Systems
- Advanced Financial Accounting

**Advertising and Communication Management**
- Principles of Marketing
- Principles of Advertising
- Advertising Research
- Client Management

**Finance and Banking**
- Analysis of Financial Statements
- Corporate Finance
- Money and Capital Markets
- Treasury and Fund Management

**Health Services Administration**
- Strategic Management of Health Services
- Pharmaceutical Marketing and Quality Assurance

**Human Resource Management**
- Strategic Human Resource Management
- Salary and Compensation
- Leadership Studies

**Management Information Systems**
- Oracle/Developer 2000
- Software Engineering
- Data Communication and Networking
- Programming in C++

**Marketing**
- Advertising
- Personal Selling
- Brand Management
- Media Planning

**Sales Management**
- Effective Territory Design
- Basic Selling Skills
- Distribution and Channel Management
- Merchandising
